

Microsoft

Exam Questions SC-900

Microsoft Security. Compliance and Identity Fundamentals

NEW QUESTION 1

What can you use to provide threat detection for Azure SQL Managed Instance?

- A. Microsoft Secure Score
- B. application security groups
- C. Azure Defender
- D. Azure Bastion

Answer: C

NEW QUESTION 2

What do you use to provide real-time integration between Azure Sentinel and another security source?

- A. Azure AD Connect
- B. a Log Analytics workspace
- C. Azure Information Protection
- D. a connector

Answer: D

Explanation:

To on-board Azure Sentinel, you first need to connect to your security sources. Azure Sentinel comes with a number of connectors for Microsoft solutions, including Microsoft 365 Defender solutions, and Microsoft 365 sources, including Office 365, Azure AD, Microsoft Defender for Identity, and Microsoft Cloud App Security, etc.

NEW QUESTION 3

Which service includes the Attack simulation training feature?

- A. Microsoft Defender for Cloud Apps
- B. Microsoft Defender for Office 365
- C. Microsoft Defender for Identity
- D. Microsoft Defender for SQL

Answer: B

NEW QUESTION 4

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements | Yes | No |
|----------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Compliance Manager tracks only customer-managed controls. | <input type="radio"/> | <input type="radio"/> |
| Compliance Manager provides predefined templates for creating assessments. | <input type="radio"/> | <input type="radio"/> |
| Compliance Manager can help you assess whether data adheres to specific data protection standards. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: No

Compliance Manager tracks Microsoft managed controls, customer-managed controls, and shared controls. Box 2: Yes

Box 3: Yes

NEW QUESTION 5

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements | Yes | No |
|--------------------------------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Conditional access policies can use the device state as a signal. | <input type="radio"/> | <input type="radio"/> |
| Conditional access policies apply before first-factor authentication is complete. | <input type="radio"/> | <input type="radio"/> |
| Conditional access policies can trigger multi-factor authentication (MFA) if a user attempts to access a specific application. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated
 Box 1: Yes
 Box 2: No
 Conditional Access policies are enforced after first-factor authentication is completed. Box 3: Yes

NEW QUESTION 6

Select the answer that correctly completes the sentence.

Answer Area

is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.

| |
|-----------------------------------|
| Microsoft Cloud App Security |
| Microsoft Defender for Endpoint |
| Microsoft Defender for Identity |
| Microsoft Defender for Office 365 |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text Description automatically generated with medium confidence

NEW QUESTION 7

Which Azure Active Directory (Azure AD) feature can you use to restrict Microsoft Intune-managed devices from accessing corporate resources?

- A. network security groups (NSGs)
- B. Azure AD Privileged Identity Management (PIM)
- C. conditional access policies
- D. resource locks

Answer: C

NEW QUESTION 8

Which two cards are available in the Microsoft 365 Defender portal? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Users at risk
- B. Compliance Score
- C. Devices at risk
- D. Service Health
- E. User Management

Answer: BC

NEW QUESTION 9

Select the answer that correctly completes the sentence.

is a cloud-based solution that leverages on-premises Active Directory signals to identify, detect, and investigate advanced threats.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Microsoft Defender for Identity (formerly Azure Advanced Threat Protection, also known as Azure ATP) is a cloud-based security solution that leverages your on-premises Active Directory signals to identify, detect, and investigate advanced threats, compromised identities, and malicious insider actions directed at your organization.

NEW QUESTION 10

In the Microsoft Cloud Adoption Framework for Azure, which two phases are addressed before the Ready phase? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Plan
- B. Manage
- C. Adopt
- D. Govern
- E. Define Strategy

Answer: AE

NEW QUESTION 10

What is a use case for implementing information barrier policies in Microsoft 365?

- A. to restrict unauthenticated access to Microsoft 365
- B. to restrict Microsoft Teams chats between certain groups within an organization
- C. to restrict Microsoft Exchange Online email between certain groups within an organization
- D. to restrict data sharing to external email recipients

Answer: B

Explanation:

Information barriers are supported in Microsoft Teams, SharePoint Online, and OneDrive for Business. A compliance administrator or information barriers administrator can define policies to allow or prevent communications between groups of users in Microsoft Teams. Information barrier policies can be used for situations like these:

NEW QUESTION 15

Which three authentication methods can be used by Azure Multi-Factor Authentication (MFA)? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. text message (SMS)
- B. Microsoft Authenticator app
- C. email verification
- D. phone call
- E. security question

Answer: ABD

NEW QUESTION 17

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

| Statements | Yes | No |
|--------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Microsoft Sentinel data connectors support only Microsoft services. | <input type="radio"/> | <input type="radio"/> |
| You can use Azure Monitor workbooks to monitor data collected by Microsoft Sentinel. | <input type="radio"/> | <input type="radio"/> |
| Hunting provides you with the ability to identify security threats before an alert is triggered. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Statements | Yes | No |
|--------------------------------------------------------------------------------------------------|----------------------------------|-----------------------|
| Microsoft Sentinel data connectors support only Microsoft services. | <input checked="" type="radio"/> | <input type="radio"/> |
| You can use Azure Monitor workbooks to monitor data collected by Microsoft Sentinel. | <input checked="" type="radio"/> | <input type="radio"/> |
| Hunting provides you with the ability to identify security threats before an alert is triggered. | <input checked="" type="radio"/> | <input type="radio"/> |

NEW QUESTION 21

Select the answer that correctly completes the sentence.

_____ is the process of identifying whether a signed-in user can access a specific resource.

- Authentication
- Authorization
- Federation
- Single sign-on (SSO)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text Description automatically generated

NEW QUESTION 26

Select the answer that correctly completes the sentence.

_____ enables collaboration with business partners from external organizations such as suppliers, partners, and vendors. External users appear as guest users in the directory.

- Active Directory Domain Services (AD DS)
- Active Directory forest trusts
- Azure Active Directory (Azure AD) business-to-business (B2B)
- Azure Active Directory business-to-consumer B2C (Azure AD B2C)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

_____ enables collaboration with business partners from external organizations such as suppliers, partners, and vendors. External users appear as guest users in the directory.

- Active Directory Domain Services (AD DS)
- Active Directory forest trusts
- Azure Active Directory (Azure AD) business-to-business (B2B)
- Azure Active Directory business-to-consumer B2C (Azure AD B2C)

NEW QUESTION 30

Which two types of resources can be protected by using Azure Firewall? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Azure virtual machines
- B. Azure Active Directory (Azure AD) users
- C. Microsoft Exchange Online inboxes
- D. Azure virtual networks
- E. Microsoft SharePoint Online sites

Answer: AD

Explanation:

Firewall is really not directly protecting the Virtual Networks though DDOS would have been ideal for VNETS

NEW QUESTION 33

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements | Yes | No |
|------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Azure Defender can detect vulnerabilities and threats for Azure Storage. | <input type="radio"/> | <input type="radio"/> |
| Cloud Security Posture Management (CSPM) is available for all Azure subscriptions. | <input type="radio"/> | <input type="radio"/> |
| Azure Security Center can evaluate the security of workloads deployed to Azure or on-premises. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

Azure Defender provides security alerts and advanced threat protection for virtual machines, SQL databases, containers, web applications, your network, your storage, and more

Box 2: Yes

Cloud security posture management (CSPM) is available for free to all Azure users. Box 3: Yes

Azure Security Center is a unified infrastructure security management system that strengthens the security posture of your data centers, and provides advanced threat protection across your hybrid workloads in the cloud - whether they're in Azure or not - as well as on premises.

NEW QUESTION 37

Match the Microsoft Defender for Office 365 feature to the correct description.

To answer, drag the appropriate feature from the column on the left to its description on the right. Each feature may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Features

- Threat Explorer
- Threat Trackers
- Anti-phishing protection

Answer Area

- Feature: Provides intelligence on prevailing cybersecurity issues
- Feature: Provides real-time reports to identify and analyze recent threats
- Feature: Detects impersonation attempts

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Features

- Threat Explorer
- Threat Trackers
- Anti-phishing protection

Answer Area

- Anti-phishing protection: Provides intelligence on prevailing cybersecurity issues
- Threat Explorer: Provides real-time reports to identify and analyze recent threats
- Threat Trackers: Detects impersonation attempts

NEW QUESTION 38

Which score measures an organization's progress in completing actions that help reduce risks associated to data protection and regulatory standards?

- A. Microsoft Secure Score
- B. Productivity Score
- C. Secure score in Azure Security Center
- D. Compliance score

Answer: D

NEW QUESTION 42

Match the Microsoft 365 insider risk management workflow step to the appropriate task.

To answer, drag the appropriate step from the column on the left to its task on the right. Each step may be used once, more than once, or not at all.
 NOTE: Each correct match is worth one point.

| Steps | Answer Area | |
|-------------|-------------|------------------------------------------------|
| Action | | Review and filter alerts |
| Investigate | | Create cases in the Case dashboard |
| Triage | | Send a reminder of corporate policies to users |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 45

What can you use to view the Microsoft Secure Score for Devices?

- A. Microsoft Defender for Cloud Apps
- B. Microsoft Defender for Endpoint
- C. Microsoft Defender for Identity
- D. Microsoft Defender for Office 365

Answer: B

Explanation:

- > Artikel
- > 12.05.2022
- > 3 Minuten Lesedauer

Microsoft Secure Score for Devices Applies to:

- > Microsoft Defender for Endpoint Plan 2
- > Microsoft Defender Vulnerability Management
- > Microsoft 365 Defender

Some information relates to pre-released product which may be substantially modified before it's commercially released. Microsoft makes no warranties, express or implied, with respect to the information provided here.

To sign up for the Defender Vulnerability Management public preview or if you have any questions, contact us (mdvmtrial@microsoft.com).

Already have Microsoft Defender for Endpoint P2? Sign up for a free trial of the Defender Vulnerability Management Add-on.

Configuration score is now part of vulnerability management as Microsoft Secure Score for Devices.

Your score for devices is visible in the Defender Vulnerability Management dashboard of the Microsoft 365 Defender portal. A higher Microsoft Secure Score for Devices means your endpoints are more resilient from cybersecurity threat attacks. It reflects the collective security configuration state of your devices across the following categories:

- > Application
- > Operating system
- > Network
- > Accounts
- > Security controls

Select a category to go to the Security recommendations page and view the relevant recommendations.

Turn on the Microsoft Secure Score connector Forward Microsoft Defender for Endpoint signals, giving Microsoft Secure Score visibility into the device security posture. Forwarded data is stored and processed in the same location as your Microsoft Secure Score data.

Changes might take up to a few hours to reflect in the dashboard.

- > In the navigation pane, go to Settings > Endpoints > General > Advanced features
- > Scroll down to Microsoft Secure Score and toggle the setting to On.
- > Select Save preferences.

How it works Microsoft Secure Score for Devices currently supports configurations set via Group Policy. Due to the current partial Intune support, configurations which might have been set through Intune might show up as misconfigured. Contact your IT Administrator to verify the actual configuration status in case your organization is using Intune for secure configuration management.

The data in the Microsoft Secure Score for Devices card is the product of meticulous and ongoing vulnerability discovery process. It is aggregated with configuration discovery assessments that continuously:

- > Compare collected configurations to the collected benchmarks to discover misconfigured assets
- > Map configurations to vulnerabilities that can be remediated or partially remediated (risk reduction)
- > Collect and maintain best practice configuration benchmarks (vendors, security feeds, internal research teams)
- > Collect and monitor changes of security control configuration state from all assets

NEW QUESTION 49

Which type of identity is created when you register an application with Active Directory (Azure AD)?

- A. a user account
- B. a user-assigned managed identity
- C. a system-assigned managed identity
- D. a service principal

Answer: D

Explanation:

When you register an application through the Azure portal, an application object and service principal are automatically created in your home directory or tenant.

NEW QUESTION 53

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|-------------------------------------------------------------|-----------------------|-----------------------|
| You can use information barriers with Microsoft Exchange. | <input type="radio"/> | <input type="radio"/> |
| You can use information barriers with Microsoft SharePoint. | <input type="radio"/> | <input type="radio"/> |
| You can use information barriers with Microsoft Teams. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Statements | Yes | No |
|-------------------------------------------------------------|----------------------------------|----------------------------------|
| You can use information barriers with Microsoft Exchange. | <input type="radio"/> | <input checked="" type="radio"/> |
| You can use information barriers with Microsoft SharePoint. | <input checked="" type="radio"/> | <input type="radio"/> |
| You can use information barriers with Microsoft Teams. | <input checked="" type="radio"/> | <input type="radio"/> |

NEW QUESTION 54

Select the answer that correctly completes the sentence.

When you enable security defaults in Azure Active Directory (Azure AD),

Azure AD Identity Protection

Azure AD Privileged Identity Management (PIM)

multi-factor authentication (MFA)

will be enabled for all Azure AD users.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 57

Which three authentication methods can be used by Azure Multi-Factor Authentication (MFA)? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. phone call
- B. text message (SMS)
- C. email verification
- D. Microsoft Authenticator app

E. security question

Answer: ABD

NEW QUESTION 59

Select the answer that correctly completes the sentence.

Answer Area

You can use in the Microsoft 365 security center to view an aggregation of alerts that relate to the same attack.

- Reports
- Hunting
- Attack simulator
- Incidents

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 61

Match the Azure networking service to the appropriate description.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all. NOTE: Each correct match is worth one point.

| Services | Answer Area |
|------------------------------|------------------------------------------------------------------------------------------------------------|
| Azure Bastion | Service Provides Network Address Translation (NAT) services |
| Azure Firewall | Service Provides secure and seamless Remote Desktop connectivity to Azure virtual machines |
| Network security group (NSG) | Service Provides traffic filtering that can be applied to specific network interfaces on a virtual network |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: Azure Firewall

Azure Firewall provide Source Network Address Translation and Destination Network Address Translation. Box 2: Azure Bastion
 Azure Bastion provides secure and seamless RDP/SSH connectivity to your virtual machines directly from the Azure portal over TLS.

Box 3: Network security group (NSG)

You can use an Azure network security group to filter network traffic to and from Azure resources in an Azure virtual network.

NEW QUESTION 63

What are three uses of Microsoft Cloud App Security? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. to discover and control the use of shadow IT
- B. to provide secure connections to Azure virtual machines
- C. to protect sensitive information hosted anywhere in the cloud
- D. to provide pass-through authentication to on-premises applications
- E. to prevent data leaks to noncompliant apps and limit access to regulated data

Answer: ACE

NEW QUESTION 68

Select the answer that correctly completes the sentence.

Compliance Manager can be directly accessed from the

- Microsoft 365 admin center.
- Microsoft 365 Defender portal.
- Microsoft 365 Compliance Center
- Microsoft Support portal.

- A. Mastered

B. Not Mastered

Answer: A

Explanation:

Compliance Manager can be directly accessed from the

NEW QUESTION 71

Select the answer that correctly completes the sentence.

Answer Area

You can use _____ in the Microsoft 365 security center to identify devices that are affected by an alert.

- classifications
- incidents
- policies
- Secure score

A. Mastered
B. Not Mastered

Answer: A

Explanation:

Text, letter Description automatically generated

NEW QUESTION 73

Select the answer that correctly completes the sentence.

provides single sign-on (SSO) capabilities across multiple identity providers.

A. Mastered
B. Not Mastered

Answer: A

Explanation:

provides single sign-on (SSO) capabilities across multiple identity providers.

NEW QUESTION 76

What should you use to ensure that the members of an Azure Active Directory group use multi-factor authentication (MFA) when they sign in?

- A. Azure Active Directory (Azure AD) Identity Protection
- B. a conditional access policy
- C. Azure role-based access control (Azure RBAC)
- D. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)

Answer: B

Explanation:

The recommended way to enable and use Azure AD Multi-Factor Authentication is with Conditional Access policies. Conditional Access lets you create and define policies that react to sign-in events and that request additional actions before a user is granted access to an application or service.

NEW QUESTION 81

Which two tasks can you implement by using data loss prevention (DLP) policies in Microsoft 365? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. Display policy tips to users who are about to violate your organization's policies.
- B. Enable disk encryption on endpoints.
- C. Protect documents in Microsoft OneDrive that contain sensitive information.
- D. Apply security baselines to devices.

Answer: AC

NEW QUESTION 86

Select the answer that correctly completes the sentence.

Answer Area

_____ is used to identify, hold, and export electronic information that might be used in an investigation.

| |
|----------------------------|
| Customer Lockbox |
| Data loss prevention (DLP) |
| eDiscovery |
| A resource lock |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

eDiscovery
<https://docs.microsoft.com/en-us/microsoft-365/compliance/ediscovery?view=o365-worldwide>

NEW QUESTION 91

Which three tasks can be performed by using Azure Active Directory (Azure AD) Identity Protection? Each correct answer presents a complete solution.
 NOTE: Each correct selection is worth one point.

- A. Configure external access for partner organizations.
- B. Export risk detection to third-party utilities.
- C. Automate the detection and remediation of identity based-risks.
- D. Investigate risks that relate to user authentication.
- E. Create and automatically assign sensitivity labels to data.

Answer: CDE

NEW QUESTION 95

What is the purpose of Azure Active Directory (Azure AD) Password Protection?

- A. to control how often users must change their passwords
- B. to identify devices to which users can sign in without using multi-factor authentication (MFA)
- C. to encrypt a password by using globally recognized encryption standards
- D. to prevent users from using specific words in their passwords

Answer: D

Explanation:

Azure AD Password Protection detects and blocks known weak passwords and their variants, and can also block additional weak terms that are specific to your organization.
 With Azure AD Password Protection, default global banned password lists are automatically applied to all users in an Azure AD tenant. To support your own business and security needs, you can define entries in a custom banned password list.

NEW QUESTION 98

Select the answer that correctly completes the sentence.

Answer Area

Federation is used to establish _____ between organizations.

| |
|-----------------------------------|
| multi-factor authentication (MFA) |
| a trust relationship |
| user account synchronization |
| a VPN connection |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

Federation is a collection of domains that have established trust. Reference: <https://docs.microsoft.com/en-us/azure/active-directory/hybrid/whatis-fed>

NEW QUESTION 101

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|---------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Conditional access policies can be applied to global administrators. | <input type="radio"/> | <input type="radio"/> |
| Conditional access policies are evaluated before a user is authenticated. | <input type="radio"/> | <input type="radio"/> |
| Conditional access policies can use a device platform, such as Android or iOS, as a signal. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

Conditional access policies can be applied to all users Box 2: No

Conditional access policies are applied after first-factor authentication is completed. Box 3: Yes

Users with devices of specific platforms or marked with a specific state can be used when enforcing Conditional Access policies.

NEW QUESTION 105

Which Microsoft 365 feature can you use to restrict users from sending email messages that contain lists of customers and their associated credit card numbers?

- A. retention policies
- B. data loss prevention (DLP) policies
- C. conditional access policies
- D. information barriers

Answer: B

NEW QUESTION 109

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements | Yes | No |
|----------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| With Advanced Audit in Microsoft 365, you can identify when email items were accessed. | <input type="radio"/> | <input type="radio"/> |
| Advanced Audit in Microsoft 365 supports the same retention period of audit logs as core auditing. | <input type="radio"/> | <input type="radio"/> |
| Advanced Audit in Microsoft 365 allocates customer-dedicated bandwidth for accessing audit data. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

Box 1: Yes

The MailItemsAccessed event is a mailbox auditing action and is triggered when mail data is accessed by mail protocols and mail clients.

Box 2: No

Basic Audit retains audit records for 90 days.

Advanced Audit retains all Exchange, SharePoint, and Azure Active Directory audit records for one year. This is accomplished by a default audit log retention policy that retains any audit record that contains the value of Exchange, SharePoint, or AzureActiveDirectory for the Workload property (which indicates the service in which the activity occurred) for one year.

Box 3: yes

Advanced Audit in Microsoft 365 provides high-bandwidth access to the Office 365 Management Activity API.

NEW QUESTION 111

Which feature provides the extended detection and response (XDR) capability of Azure Sentinel?

- A. integration with the Microsoft 365 compliance center
- B. support for threat hunting
- C. integration with Microsoft 365 Defender
- D. support for Azure Monitor Workbooks

Answer: C

NEW QUESTION 116

Which three authentication methods does Windows Hello for Business support? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. fingerprint
- B. facial recognition
- C. PIN
- D. email verification
- E. security question

Answer: ABC

NEW QUESTION 119

What can you use to provision Azure resources across multiple subscriptions in a consistent manner?

- A. Azure Defender
- B. Azure Blueprints
- C. Azure Sentinel
- D. Azure Policy

Answer: B

NEW QUESTION 121

In a hybrid identity model, what can you use to sync identities between Active Directory Domain Services (AD DS) and Azure Active Directory (Azure AD)?

- A. Active Directory Federation Services (AD FS)
- B. Azure Sentinel
- C. Azure AD Connect
- D. Azure Ad Privileged Identity Management (PIM)

Answer: C

NEW QUESTION 126

Which Microsoft 365 feature can you use to restrict communication and the sharing of information between members of two departments at your organization?

- A. sensitivity label policies
- B. Customer Lockbox
- C. information Barriers
- D. Privileged Access Management (PAM)

Answer: C

NEW QUESTION 130

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|---------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Digitally signing a document requires a private key. | <input type="radio"/> | <input type="radio"/> |
| Verifying the authenticity of a digitally signed document requires the public key of the signer. | <input type="radio"/> | <input type="radio"/> |
| Verifying the authenticity of a digitally signed document requires the private key of the signer. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Yes

A certificate is required that provides a private and a public key. Box 2: Yes

The public key is used to validate the private key that is associated with a digital signature. Box 3: NO

NEW QUESTION 133

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point

| Statements | Yes | No |
|-------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Microsoft Defender for Cloud can detect vulnerabilities and threats for Azure Storage. | <input type="radio"/> | <input type="radio"/> |
| Cloud Security Posture Management (CSPM) is available for all Azure subscriptions. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Cloud can evaluate the security of workloads deployed to Azure or on-premises. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

| Statements | Yes | No |
|-------------------------------------------------------------------------------------------------------|----------------------------------|-----------------------|
| Microsoft Defender for Cloud can detect vulnerabilities and threats for Azure Storage. | <input checked="" type="radio"/> | <input type="radio"/> |
| Cloud Security Posture Management (CSPM) is available for all Azure subscriptions. | <input checked="" type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Cloud can evaluate the security of workloads deployed to Azure or on-premises. | <input checked="" type="radio"/> | <input type="radio"/> |

NEW QUESTION 138

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|---------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Global administrators are exempt from conditional access policies | <input type="radio"/> | <input type="radio"/> |
| A conditional access policy can add users to Azure Active Directory (Azure AD) roles | <input type="radio"/> | <input type="radio"/> |
| Conditional access policies can force the use of multi-factor authentication (MFA) to access cloud apps | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION 143

What can you protect by using the information protection solution in the Microsoft 365 compliance center?

- A. computers from zero-day exploits
- B. users from phishing attempts
- C. files from malware and viruses

D. sensitive data from being exposed to unauthorized users

Answer: D

NEW QUESTION 148

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
 NOTE: Each correct selection is worth one point.

| Statements | Yes | No |
|---------------------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Microsoft Defender for Endpoint can protect Android devices. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Endpoint can protect Azure virtual machines that run Windows 10. | <input type="radio"/> | <input type="radio"/> |
| Microsoft Defender for Endpoint can protect Microsoft SharePoint Online sites and content from viruses. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 151

Select the answer that correctly completes the sentence.

Answer Area

a file makes the data in the file readable and usable to viewers that have the appropriate key.

- Archiving
- Compressing
- Deduplicating
- Encrypting

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application Description automatically generated

NEW QUESTION 154

Select the answer that correctly completes the sentence.

In an environment that has on-premises resources and cloud resources,

the cloud
 a firewall
 identity
 Microsoft Defender for Cloud

should be the primary security perimeter.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

In an environment that has on-premises resources and cloud resources,

should be the primary security perimeter.

NEW QUESTION 158

In a Core eDiscovery workflow, what should you do before you can search for content?

- A. Create an eDiscovery hold.
- B. Run Express Analysis.
- C. Configure attorney-client privilege detection.
- D. Export and download results.

Answer: A

NEW QUESTION 160

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements | Yes | No |
|--------------------------------------------------------------------------|-----------------------|-----------------------|
| You can create custom roles in Azure Active Directory (Azure AD). | <input type="radio"/> | <input type="radio"/> |
| Global administrator is a role in Azure Active Directory (Azure AD). | <input type="radio"/> | <input type="radio"/> |
| An Azure Active Directory (Azure AD) user can be assigned only one role. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, text, application, email Description automatically generated
 Box 1: Yes
 Azure AD supports custom roles. Box 2: Yes
 Global Administrator has access to all administrative features in Azure Active Directory. Box 3: No

NEW QUESTION 161

When security defaults are enabled for an Azure Active Directory (Azure AD) tenant, which two requirements are enforced? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. All users must authenticate from a registered device.
- B. Administrators must always use Azure Multi-Factor Authentication (MFA).
- C. Azure Multi-Factor Authentication (MFA) registration is required for all users.
- D. All users must authenticate by using passwordless sign-in.
- E. All users must authenticate by using Windows Hello.

Answer: BC

Explanation:

Security defaults make it easy to protect your organization with the following preconfigured security settings: > Requiring all users to register for Azure AD Multi-Factor Authentication.

- > Requiring administrators to do multi-factor authentication.
- > Blocking legacy authentication protocols.
- > Requiring users to do multi-factor authentication when necessary.
- > Protecting privileged activities like access to the Azure portal.

NEW QUESTION 166

You need to connect to an Azure virtual machine by using Azure Bastion. What should you use?

- A. an SSH client
- B. PowerShell remoting

- C. the Azure portal
- D. the Remote Desktop Connection client

Answer: D

NEW QUESTION 168

What are customers responsible for when evaluating security in a software as a service (SaaS) cloud services model?

- A. applications
- B. network controls
- C. operating systems
- D. accounts and identities

Answer: D

NEW QUESTION 170

Select the answer that correctly completes the sentence.

An Azure resource can use a system-assigned _____ to access Azure services.

| |
|------------------------------------------------------------------------------------------------------------------------------------------------|
| |
| <p>Azure Active Directory (Azure AD) joined device managed identity service principal user identity</p> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

An Azure resource can use a system-assigned _____ to access Azure services.

| |
|-----------------------------------------------------------------------------------------------------------------------------------------------|
| |
| <p>Azure Active Directory (Azure AD) joined device <u>managed identity</u> service principal user identity</p> |

NEW QUESTION 174

What can you use to provide a user with a two-hour window to complete an administrative task in Azure?

- A. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- B. Azure Multi-Factor Authentication (MFA)
- C. Azure Active Directory (Azure AD) Identity Protection
- D. conditional access policies

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/azure/active-directory/privileged-identity-management/pim-configure> Privileged Identity Management provides time-based and approval-based role activation to mitigate the risks of excessive, unnecessary, or misused access permissions on resources that you care about. Here are some of the key features of Privileged Identity Management: Provide just-in-time privileged access to Azure AD and Azure resources Assign time-bound access to resources using start and end dates Require approval to activate privileged roles Enforce multi-factor authentication to activate any role Use justification to understand why users activate Get notifications when privileged roles are activated Conduct access reviews to ensure users still need roles Download audit history for internal or external audit Prevents removal of the last active Global Administrator role assignment

NEW QUESTION 175

Which service should you use to view your Azure secure score? To answer, select the appropriate service in the answer area.

Azure services

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Security Center

NEW QUESTION 176

Which Azure Active Directory (Azure AD) feature can you use to provide just-in-time (JIT) access to manage Azure resources?

- A. conditional access policies
- B. Azure AD Identity Protection
- C. Azure AD Privileged Identity Management (PIM)
- D. authentication method policies

Answer: C

Explanation:
Azure AD Privileged Identity Management (PIM) provides just-in-time privileged access to Azure AD and Azure resources

NEW QUESTION 178

For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

| Statements | Yes | No |
|---------------------------------------------------------------------------------------------|-----------------------|-----------------------|
| All Azure Active Directory (Azure AD) license editions include the same features. | <input type="radio"/> | <input type="radio"/> |
| You can manage an Azure Active Directory (Azure AD) tenant by using the Azure portal. | <input type="radio"/> | <input type="radio"/> |
| You must deploy Azure virtual machines to host an Azure Active Directory (Azure AD) tenant. | <input type="radio"/> | <input type="radio"/> |

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
Graphical user interface, text, application Description automatically generated

NEW QUESTION 183

Which Microsoft portal provides information about how Microsoft manages privacy, compliance, and security?

- A. Microsoft Service Trust Portal
- B. Compliance Manager
- C. Microsoft 365 compliance center
- D. Microsoft Support

Answer: A

NEW QUESTION 186
