

## **Microsoft**

### **Exam Questions PL-600**

Microsoft Power Platform Solution Architect

## About ExamBible

### *Your Partner of IT Exam*

## Found in 1998

ExamBible is a company specialized on providing high quality IT exam practice study materials, especially Cisco CCNA, CCDA, CCNP, CCIE, Checkpoint CCSE, CompTIA A+, Network+ certification practice exams and so on. We guarantee that the candidates will not only pass any IT exam at the first attempt but also get profound understanding about the certificates they have got. There are so many alike companies in this industry, however, ExamBible has its unique advantages that other companies could not achieve.

## Our Advances

### \* 99.9% Uptime

All examinations will be up to date.

### \* 24/7 Quality Support

We will provide service round the clock.

### \* 100% Pass Rate

Our guarantee that you will pass the exam.

### \* Unique Gurantee

If you do not pass the exam at the first time, we will not only arrange FULL REFUND for you, but also provide you another exam of your claim, ABSOLUTELY FREE!

**NEW QUESTION 1**

DRAG DROP - (Topic 1)

You need to recommend solutions to meet the organization's communication needs.

What should you recommend? To answer, drag the appropriate technologies to the correct groups of users. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Technologies	Group of users	Technology
Microsoft Teams	First Up employees	
Power Apps portals	Workers	
Microsoft 365 Business Voice		

Answer:

Technologies	Group of users	Technology
Microsoft Teams	First Up employees	Microsoft Teams
Power Apps portals	Workers	Microsoft 365 Business Voice
Microsoft 365 Business Voice		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Microsoft Teams

First up employees must be able to contact each other by using a secure system to ask and answer questions about medical cases.

Microsoft Teams key capabilities:

- ? Connected
- ? Secure
- ? Managed

? Collaborative and productive Box 2: Microsoft 365 Business Voice

Workers must be able to communicate in near real-time with worker support agents.

Microsoft 365 Business Voice makes it easy for small and medium organizations to turn Microsoft Teams into a powerful and flexible telephone system. It's a replacement for

traditional telephony providers and in-house phone systems that can be difficult and costly to manage.

### NEW QUESTION 2

- (Topic 1)

You need to recommend technology for accessing historical job placement data. What should you recommend?

- A. Power Virtual Agents chatbots
- B. Virtual tables
- C. Power BI
- D. Power Automate flows

**Answer: B**

#### Explanation:

A virtual table is a custom table in Microsoft Dataverse that has columns containing data from an external

rows, but contain data that is sourced from an external database, such as an Azure SQL Database. Rows based on virtual tables are available in all clients including custom clients developed using the Dataverse web services.

Scenario:

? First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

? The company plans to reference historical data in the existing system. The records held in these systems will not be migrated to the new solution except for medication information.

? The solution must provide a worker appointment booking system that can access worker historical job placement data.

? First Up staff members must be able to view and update worker records. They must be able to see current and historical job placement data on the same form in the new solution.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-virtual-entities>

### NEW QUESTION 3

DRAG DROP - (Topic 1)

You need to recommend methods for assigning security to each group of users.

What should you recommend? To answer, drag the appropriate methods to the correct groups of users. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area	
	Group of users	Method
Dataverse Application User	Full-time employees	Method
Power Platform Local Business Owner Team	Automation	Method
Azure Active Directory B2B Guest Access	Corporate governance auditing team	Method
Azure Active Directory Security Group Team		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Power Platform Local Business Owner Team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Scenario: Employee authentication with the existing system is provided by an on-premises Active Directory instance that is linked to Azure Active Directory.

Box 2: Azure Active Directory Security Group Team

An Azure Active Directory (Azure AD) group team. Similar to owner team, an Azure AD group team can own records and can have security roles assigned to the team.

Note: The administration of app and data access for Microsoft Dataverse has been extended to allow administrators to use their organization's Azure Active Directory (Azure AD) groups to manage access rights for licensed Dataverse users.

Box 3: Azure Active Directory B2B Guest Access

An Azure AD B2B collaboration user is an external user, typically from a partner organization, that you invite to sign into your Azure AD organization using their own credentials. This B2B collaboration user (also generally referred to as a guest user) can then access the apps and resources you want to share with them. A user object is created for the B2B collaboration user in the same directory as your employees. B2B collaboration user objects have limited privileges in your directory by default, and they can be managed like employees, added to groups, and so on.

Scenario: Before First Up signs a contract to place workers at a client company, a member of the audit team visits the company and interviews company management. Audit members use different types of devices including Android and iOS devices. First Up has no plans to require the use of a single type of device.

**NEW QUESTION 4**

DRAG DROP - (Topic 2)

You need to propose a solution for form requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Requirement	Solution
Field controls	Phone number format	
Workflow	Sections of Agents case form	
Custom development		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Field controls

You must standardize the format used by agents to enter customer phone numbers.

Box 2: Workflow

Log issues as cases. The case form must show variable sections based on the case type.

#### NEW QUESTION 5

- (Topic 2)

You need to recommend the field type to use for configuring meal selections during reservation.

Which field type should you recommend?

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Scenario:

? Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

? The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.

In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it.

Example:

Country Name
Poland
USA
England
India

Reference:

<https://michalguzowski.pl/how-to-work-with-option-set-in-powerapps/>

#### NEW QUESTION 6

- (Topic 2)

You need to select an appropriate app for Relecloud. Which app should you recommend?

- A. Dynamics 365 Field Service
- B. Dynamics 365 Sales
- C. Dynamics 365 Project Operations
- D. Dynamics 365 Customer Service

**Answer:** D

**Explanation:**

Microsoft Dynamics 365 Customer Service is a module for customer service automation that streamlines case and knowledge management, enables personalized customer service with a 360-degree customer view, and provides visibility into customer service department performance with dashboards and reports.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

**NEW QUESTION 7**

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution				
View, assign, and resolve inspection bottlenecks.	<div data-bbox="837 1774 1421 1834" style="border: 1px solid gray; padding: 2px;">▼</div> <table border="1" data-bbox="837 1834 1421 1982"><tr><td>Booking rules</td></tr><tr><td>Schedule board</td></tr><tr><td>Proficiency models</td></tr></table>	Booking rules	Schedule board	Proficiency models	
Booking rules					
Schedule board					
Proficiency models					
Automatically input measurement readings from inspection gauges	<div data-bbox="837 2000 1421 2059" style="border: 1px solid gray; padding: 2px;">▼</div> <table border="1" data-bbox="837 2059 1421 2243"><tr><td>Custom connector</td></tr><tr><td>Azure IoT Hub connector</td></tr><tr><td>Azure IoT Central connector</td></tr><tr><td>Microsoft Dataverse connector</td></tr></table>	Custom connector	Azure IoT Hub connector	Azure IoT Central connector	Microsoft Dataverse connector
Custom connector					
Azure IoT Hub connector					
Azure IoT Central connector					
Microsoft Dataverse connector					

Answer:

**Requirement**

**Solution**

View, assign, and resolve inspection bottlenecks.

▼
Booking rules
Schedule board
Proficiency models

Automatically input measurement readings from inspection gauges

▼
Custom connector
Azure IoT Hub connector
Azure IoT Central connector
Microsoft Dataverse connector

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Schedule board

The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.

Box 2: Azure IoT Central connector

Information about each machine produced must be transferred to Dynamics 365 Field Service.

The difference between IoT hub and IoT central is that IoT is an application platform that simplifies the creation of Internet of Things solutions. IoT central helps to reduce the challenges of implementing IoT development, operations, and management. IoT Central is a fully managed Software as a Service solution.

Note: There are three ways you can use to connect IoT-enabled devices into the Field Service solution:

? Connected Field Service for Azure IoT Central

? Connected Field Service for Azure IoT Hub

? Connected Field Service for non-Azure IoT providers using the extensible IoT provider framework

**NEW QUESTION 8**

HOTSPOT - (Topic 3)

You need to recommend a solution to meet user interface requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Requirement**

**Solution**

Visual representation of gauge readings with minimum and maximum tolerances.

▼
Create and embed a Power BI radial gauge.
Create and embed a custom visualization component.
Create and embed a standard Power Apps donut chart.

Add visibility to the manufacturing inspection records for onsite technicians.

▼
Configure mobile offline synchronization.
Add an inspection order to the work order form
Modify the sitemap for Dynamics 365 Field Service.

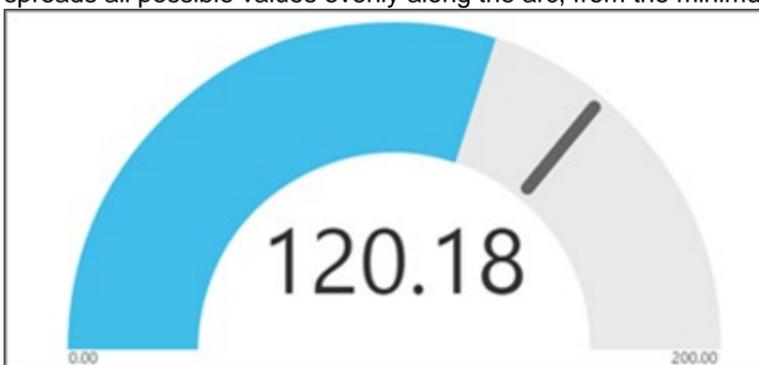

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Create and embed a Power Bi radial gauge

A radial gauge chart has a circular arc and shows a single value that measures progress toward a goal or a Key Performance Indicator (KPI). The line (or needle) represents the goal or target value. The shading represents the progress toward that goal. The value inside the arc represents the progress value. Power BI spreads all possible values evenly along the arc, from the minimum (left-most value) to the maximum (right-most value).

In this example, you're a car retailer tracking the sales team's average sales per month. The needle represents a 140 cars sales goal. The minimum possible

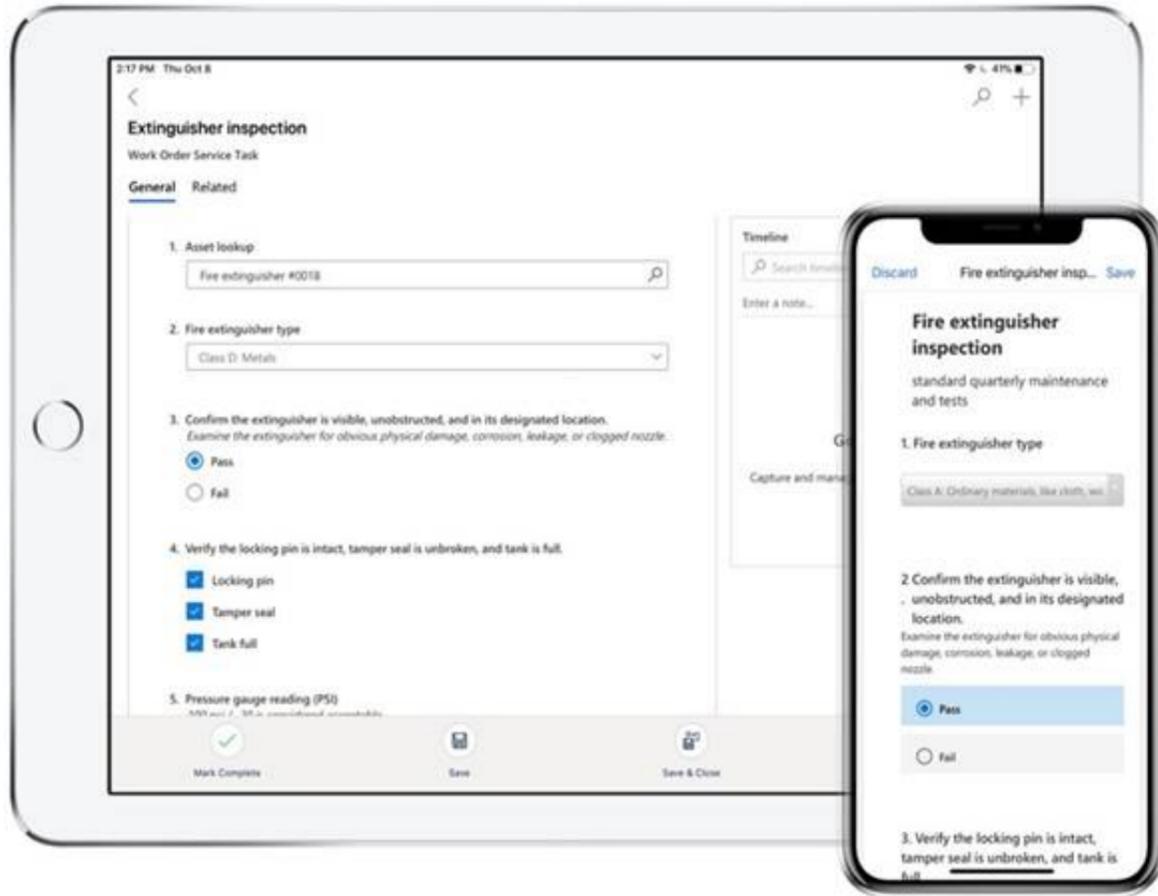

average sales is 0 and the maximum is 200. The blue shading shows that the team is averaging approximately 120 sales this month.

Box 2: Add an inspection order to the work order form

You can add inspections to work orders in Dynamics 365 Field Service.

Field Service inspections are digital forms that technicians use to quickly and easily answer a list of questions as part of a work order. The list of questions can include safety protocols, pass-and-fail tests for a customer asset, an interview with a customer, or other audits and assessments performed before, during, or after a work order.

Example:

**NEW QUESTION 9**

HOTSPOT - (Topic 3)

You need to recommend components to meet the re-inspection requirements.

Which components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Requirement**

**Component**

Initiate the creation of re-inspection orders.

▼
Dataflow
Business rule
Power Automate flow

Automatically set overall inspection ratings based on the checklist ratings.

▼
From event
Business rule
Custom action
Rollup data type

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Power Automate flow

Scenario: Inspection orders must be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.

Box 2: Business rule

? By combining conditions and actions, you can do any of the following with business rules:

- ? Set column values
- ? Clear column values
- ? Set column requirement levels

- ? Show or hide columns
- ? Enable or disable columns
- ? Validate data and show error messages
- ? Create business recommendations based on business intelligence.

**NEW QUESTION 10**

- (Topic 3)

You need to recommend a solution to collect the information required to meet reporting requirements. What should you recommend?

- A. Business process flow
- B. Business rule
- C. Business event
- D. Business process modeler

**Answer:** A

**Explanation:**

Business rule can create business recommendations based on business intelligence. Scenario: Analytics and reporting

The solution must:

- ? Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.
- ? Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).
- ? Provide a printed quality certificate to be included with each machine.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/define-create-business-rules/>

**NEW QUESTION 10**

HOTSPOT - (Topic 3)

You need to recommend the appropriate components to meet the inspection requirements. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent editing of finalized inspection orders.	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;">Business rule</div> <div style="padding: 2px;">Security role</div> <div style="padding: 2px;">User permission</div> </div>
Prepare documentation for failed inspection steps.	<div style="border: 1px solid gray; padding: 5px;"> <div style="text-align: right; border-bottom: 1px solid gray;">▼</div> <div style="padding: 2px;">Data flow</div> <div style="padding: 2px;">Business rule</div> <div style="padding: 2px;">Form property</div> </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

- ? You must prevent users from changing inspection order data once an inspection is marked as final.
- ? Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

**NEW QUESTION 11**

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the integration requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Requirement**

**Solution**

View, assign, and resolve inspection bottlenecks.

- ▼
- Booking rules
- Schedule board
- Proficiency models

Automatically input measurement readings from inspection gauges

- ▼
- Custom connector
- Azure IoT Hub connector
- Azure IoT Central connector
- Microsoft Dataverse connector

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Schedule board

Note: The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make. When you're looking at the schedule board for the current day, you'll see a blue line that indicates the current time of day. You can also see a picture of all the resources listed on the schedule board. To quickly view contact information for a resource, hover over their name to view the contact card.

Box 2: Azure IoT Central connector

Azure IoT Central makes it easy to connect, monitor, and manage your IoT devices at scale. With the IoT Central V3 connector, you can trigger workflows when a rule has fired, and take actions by executing commands, updating properties, getting telemetry from

devices, and more. Use this connector with your Azure IoT Central V3 application. This connector is available in the following products

and regions:

Service	Class	Regions
Logic Apps	Standard	All <a href="#">Logic Apps regions</a> except the following: <ul style="list-style-type: none"> <li>- Azure Government regions</li> <li>- Azure China regions</li> </ul>
Power Automate	Premium	All <a href="#">Power Automate regions</a> except the following: <ul style="list-style-type: none"> <li>- US Government (GCC)</li> <li>- US Government (GCC High)</li> <li>- China Cloud operated by 21Vianet</li> </ul>
Power Apps	Premium	All <a href="#">Power Apps regions</a> except the following: <ul style="list-style-type: none"> <li>- US Government (GCC)</li> <li>- US Government (GCC High)</li> <li>- China Cloud operated by 21Vianet</li> </ul>

**NEW QUESTION 12**

- (Topic 3)

You need to recommend an environment for the inspection solution. Where should you recommend installing the solution?

- A. within the Dynamics 365 Field Service environment
- B. in a separate Microsoft Dataverse environment in the same instance as the Dynamics 365 Field Service environment
- C. in a separate Dataverse environment with Dynamics 365 apps enabled
- D. within the default Dynamics 365 Field Service environment

**Answer: A**

**NEW QUESTION 16**

DRAG DROP - (Topic 4)

You are designing a solution to automate the following processes:

- Import data into Microsoft Dataverse from systems that have an API available.
- Import data into Microsoft Dataverse from systems that do not have an API available.
- Validate that contacts in a Microsoft Excel file Dataverse forms in a specified order. You need to implement automation methods.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**NEW QUESTION 20**

HOTSPOT - (Topic 4)

A company uses Dynamics 365 Sales and Power BI.

Sales managers must be able to keep track of changes to their pipeline in the following ways:

- ? Notify the sales managers when an Opportunity changes sales stage.
- ? Notify the sales managers when the pipeline drops below 2.5M USD.
- ? When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

You need to recommend a solution that meets the company requirements.

Which combination of solutions should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft 365 Outlook connector

Use Microsoft Dataverse as the data source.

While Power Automate is a robust tool with ever-expanding capabilities, it also handles simple tasks with grace. A universal business need for many organizations is the ability to automate email notifications based on certain criteria: an opportunity is won, send an email to the sales manager; a case is closed, send an email to the customer; a work order is completed, send an email to the customer.

Power Automate can easily accommodate this using the Microsoft 365 Outlook connector.

Box 2: Microsoft Power Automate, Power Bi data alerts, and Microsoft 365 connector Data alerts in the Power BI service: Set alerts to notify you when data in your dashboards changes beyond limits you set.

Box 3: Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

**NEW QUESTION 24**

- (Topic 4)

A company wants to create a Power Automate flow that posts marketing events to social media.

The company must ensure that the postings adhere to regulatory requirements for handling of personally identifiable information (PII) data. The company will not post events to unauthorized social media platforms.

You need to ensure that the requirement is met.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure the relevant connector so that is part of the Non-Business data group category.
- B. Create a security role to prevent data export.
- C. Configure an Azure Active Directory (AAD) security role for the maker to the environment.
- D. Create a Data Loss Protection (DLP) policy.
- E. Configure the relevant connector so that it is part of the Blocked data group category.

**Answer:** DE

**Explanation:**

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business. If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow. Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

**NEW QUESTION 28**

- (Topic 4)

An organization plans to implement a solution to deliver the complete sales process for its sales teams. The organization does NOT have any physical barcode scanners.

To meet the organization business requirements, the proposed solution must include the following capabilities:

- ? Create and qualify leads to contacts
- ? Generate quotes and convert quotes to orders
- ? Scan product barcodes as part of the order generation process

You need to recommend a solution to help the organization achieve its business requirements.

What should you recommend?

- A. Dynamics 365 mobile app and a Power Apps canvas app
- B. Dynamics 365 for Phones only
- C. Dynamics 365 Customer Service and Dynamics 365 Sales
- D. Unified Service Desk

**Answer:** A

**Explanation:**

There is barcode scanner control in Power Apps. The control opens a native scanner on an Android or iOS device. The scanner automatically detects a barcode, a QR code, or a data- matrix code when in view.

Use the Dynamics 365 for phones or Dynamics 365 for tablets app to run customer engagement apps (such as Dynamics 365 Sales, Dynamics 365 Customer

Service, and Dynamics 365 Marketing), built on Microsoft Dataverse on your mobile device.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/field-service/mobile-power-app-system- barcode-scanning>

<https://docs.microsoft.com/en-us/dynamics365/mobile-app/overview>

**NEW QUESTION 31**

- (Topic 4)

You are designing a Microsoft Power Platform solution for an automobile parts manufacturer. You create the following tables:

Table	Comments
Assemblies	For each assembly record, there will be one or more rows in the Parts table. When the ownership for an assembly record changes, the related parts records must be updated.
Parts	Rows in the Parts table must not be deleted when an assembly is deleted.

You need to recommend a relationship behavior. Which relationship behavior should you recommend?

- A. Referential, Restrict Delete
- B. Custom
- C. Parental
- D. Referential, Remove Link

**Answer:** A

**Explanation:**

Restrict Delete: Prevent the Referenced table record from being deleted when referencing tables exist.

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/configure-entity-relationship-cascading-behavior>

**NEW QUESTION 36**

HOTSPOT - (Topic 4)

A company uses Power Pages for article submissions. The article properties are stored in a table in Microsoft Dataverse and the content of the article is stored in a related Microsoft SharePoint library. The company invites different experts outside its organization to review an article before publishing it. The reviewers are granted access to the articles in Microsoft Dataverse. The company has the following requirements:

- Provide a app to canvas the reviewers that exposes both the article properties and content in read-only mode.
- Once the review is completed, the reviewer saves the review data, and the article and the review no longer appear in the app. You need to recommend the components to be used for each requirement. Which options should you use?

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Option
Security configuration for reviewers	<input type="checkbox"/> Create a dedicated access team and add the reviewers to the team. <input checked="" type="checkbox"/> Create a dedicated access team and add the reviewers to the team. <input type="checkbox"/> Create a dedicated access team template and add it to the article record. <input type="checkbox"/> Create a dedicated owner team in the Microsoft Dataverse environment and add the reviewers to the team. <input type="checkbox"/> Create a dedicated Microsoft Teams channel with a security role for the article and add the reviewers as members.
Access to the app	<input checked="" type="checkbox"/> Embed app in Power Pages portal. <input type="checkbox"/> Embed app in Power Pages portal. <input type="checkbox"/> Share app through the Power Apps maker portal. <input type="checkbox"/> Register app in Azure AD and email the registration link. <input type="checkbox"/> Publish the app in Power Apps Studio and email the link to the app.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	Option
Security configuration for reviewers	<input type="checkbox"/> Create a dedicated access team and add the reviewers to the team. <input checked="" type="checkbox"/> Create a dedicated access team and add the reviewers to the team. <input type="checkbox"/> Create a dedicated access team template and add it to the article record. <input type="checkbox"/> Create a dedicated owner team in the Microsoft Dataverse environment and add the reviewers to the team. <input type="checkbox"/> Create a dedicated Microsoft Teams channel with a security role for the article and add the reviewers as members.
Access to the app	<input checked="" type="checkbox"/> Embed app in Power Pages portal. <input type="checkbox"/> Embed app in Power Pages portal. <input type="checkbox"/> Share app through the Power Apps maker portal. <input type="checkbox"/> Register app in Azure AD and email the registration link. <input type="checkbox"/> Publish the app in Power Apps Studio and email the link to the app.

**NEW QUESTION 38**

- (Topic 4)

You are designing a new Microsoft Power Platform solution for a wedding organizer company.

The company uses a third-party application and plans to migrate the data into Microsoft Dataverse for the new solution. The third-party application has an API that can be connected to programmatically for data migration purposes.

You need to migrate the unique IDs belonging to the records from the third-party application.

Which two Microsoft Dataverse column types should you use to store this information? Each correct answer presents a complete solution.

- A. Text Area
- B. Unique Identifier
- C. Plain Text
- D. Rich Text
- E. Float

Answer: B

**NEW QUESTION 39**

HOTSPOT - (Topic 4)

You are designing a Power Platform solution for a company. You have the following requirements:

? Users in the human resources department must be able to create tasks.

? Users in the human resources department must be able to assign cases to other users.

You need to recommend security settings to the company.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Business requirement**

**Solution**

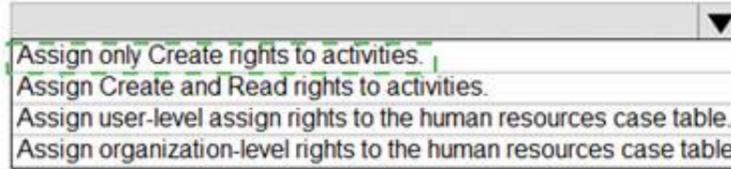

Users in the human resources department must be able to create tasks.	<input type="checkbox"/> Assign only Create rights to activities. <input type="checkbox"/> Assign Create and Read rights to activities. <input checked="" type="checkbox"/> Assign user-level assign rights to the human resources case table. <input type="checkbox"/> Assign organization-level rights to the human resources case table.
Users in the human resources department must be able to assign cases to other users.	<input type="checkbox"/> Assign only Create rights to activities. <input type="checkbox"/> Assign Create and Read rights to activities. <input checked="" type="checkbox"/> Assign user-level assign rights to the human resources case table. <input type="checkbox"/> Assign organization-level assign rights to the human resources case table.

Answer:

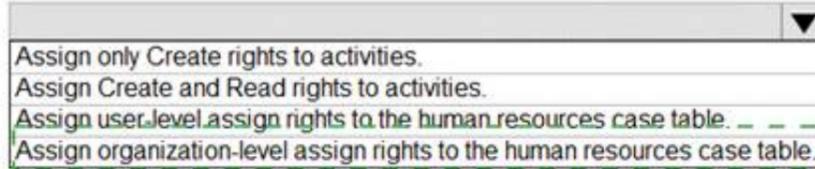

**Business requirement**

**Solution**

Users in the human resources department must be able to create tasks.

Users in the human resources department must be able to assign cases to other users.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Assign only Create rights to activities

You require the same set of Dataverse privileges and access rights to work with custom activities as those required to work with custom entities.

Task-based privileges, at the bottom of the form, give a user privileges to perform specific tasks, such as publish articles.

Box 2: Assign User-level assign rights to human resources case table.

Record-level privileges define which tasks a user with access to the record can do, such as Read, Create, Delete, Write, Assign, Share,

Append, and Append To.

For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.

**NEW QUESTION 44**

- (Topic 4)

You are designing a database table for a client. You have the following requirements:

? Maintain a comprehensive list of colors and their corresponding RGB values and hexadecimal values.

? Prevent the addition of duplicate colors based on the hexadecimal value for the color.

You need to recommend a design for the table.

Which two actions should the client perform after the table is created? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Mark the hex value column as business required.
- B. Configure and schedule a recurring bulk record deletion job.
- C. Create alternate keys for the table.
- D. Mark the RGB value column as business required.

**Answer:** CD

**Explanation:**

B: Setting a column to Business Required means that the default behavior of a model-driven or canvas app will enforce this requirement in the app.

C: With alternate keys you can now define a column in a Dataverse table to correspond to a unique identifier (or unique combination of columns) used by the external data store. This alternate key can be used to uniquely identify a record in Dataverse in place of the primary

key. You must be able to define which columns represent a unique identity for your records. Once you identify the columns that are

unique to the table, you can declare them as alternate keys through the customization user interface (UI) or in the code.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-portal>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/define-alternate-keys- entity>

**NEW QUESTION 49**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a custom connector. Create a cloud flow for approval and use the custom connector to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

**NEW QUESTION 52**

- (Topic 4)

A company has a website that contains a form named Contact Us. Data from completed forms is saved to a shared document. An office administrator periodically

reviews the document. The office administrator sends new submissions to another employee who creates contacts or updates existing contacts. You need to recommend a solution to automate the process. What should you recommend?

- A. Excel Online Connector
- B. Dynamics 365 Customer Insights
- C. Dynamics 365 Customer Service
- D. Dynamics 365 Marketing

**Answer:** D

**Explanation:**

Microsoft designed Customer Insights to allow organizations to map, match, merge, and enrich customer-based data from different sources. A classic scenario would be to merge data from customer service software, like Freshdesk, and online sales, such as Shopware, into one source for reporting and further data analysis.

Reference:

<https://msdynamicsworld.com/story/microsoft-dynamics-365-customer-insights-overview>

**NEW QUESTION 53**

- (Topic 4)

You are a Microsoft Power Platform solution architect working on a project. API calls are being sent between external applications and a Microsoft Power Platform solution.

The number of requests per user within a given time frame varies. Some users may be exceeding the service protection API limits.

You need to ensure that the API conforms to service protection limits.

Which three metrics should you review? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. The number of requests that a user can make each day.
- B. The total number of requests that can be processed each day.
- C. The number of concurrent requests that a user can make.
- D. The total execution time for requests by all users.
- E. The combined execution time required to process requests from a user.

**Answer:** ACE

**Explanation:**

Three types of service protection API limit errors that can be returned:

? Number of requests This limit counts the total number of requests during the preceding 300 second period.

? Execution time This limit tracks the combined execution time of incoming requests during the preceding 300 second period.

? Concurrent requests This limit tracks the number of concurrent requests. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/api-limits>

**NEW QUESTION 57**

HOTSPOT - (Topic 4)

You are a Microsoft Power Platform architect designing integrations for a project. You have the following integration requirements:

- Post requests to a system that is not always available and limited in its ability to process high volumes of messages.
- Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.
- Stream large volumes of data from the company's website to a live Power BI dashboard.
- Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.

You need to use an Azure service for the integration requirements.

Which Azure services should you use? To answer, select the appropriate options in the answer area?

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Service
Post requests to a system that is not always available and limited in its ability to process high volumes of messages.	<ul style="list-style-type: none"> <li>Azure Service Bus</li> <li>Azure Service Bus</li> <li>Azure Notification Hub</li> <li>Azure Active Directory</li> <li>Azure ExpressRoute</li> </ul>
Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.	<ul style="list-style-type: none"> <li>Azure Relay</li> <li>Azure Relay</li> <li>Azure SQL</li> <li>Azure Cognitive Services</li> <li>Azure API Management</li> </ul>
Stream large volumes of data from the company's website to a live Power BI dashboard.	<ul style="list-style-type: none"> <li>Azure Event Hubs</li> <li>Azure Event Hubs</li> <li>Azure Service Bus</li> <li>Azure SQL</li> </ul>
Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.	<ul style="list-style-type: none"> <li>Azure Functions</li> <li>Azure Logic Apps</li> <li>Azure Functions</li> <li>Azure Service Bus</li> </ul>

Answer:

Answer Area

**Requirement**

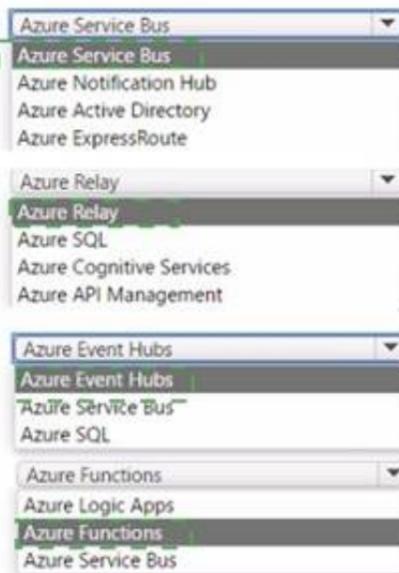

Post requests to a system that is not always available and limited in its ability to process high volumes of messages.

Allow peer-to-peer communication between on-premises services and cloud-based model-driven Microsoft Power Platform apps.

Stream large volumes of data from the company's website to a live Power BI dashboard.

Support enterprise-level integrations with Dynamics 365 that can be billed on a consumption basis.

**Service**

- A. Mastered
- B. Not Mastered

**Answer: A**

**NEW QUESTION 60**

- (Topic 4)

A company uses Microsoft Power Platform and Dynamics 365 Field Service. External workers deliver onsite service to customer locations by using the Field Service (Dynamics 365) mobile app. You need to ensure that external users can only use the app from specific locations. Which solution should you use?

- A. Azure Conditional Access policy
- B. Azure role-based access control (RBAC)
- C. Azure Active Directory security groups
- D. Azure multi-factor authentication (MFA)

**Answer: A**

**NEW QUESTION 65**

- (Topic 4)

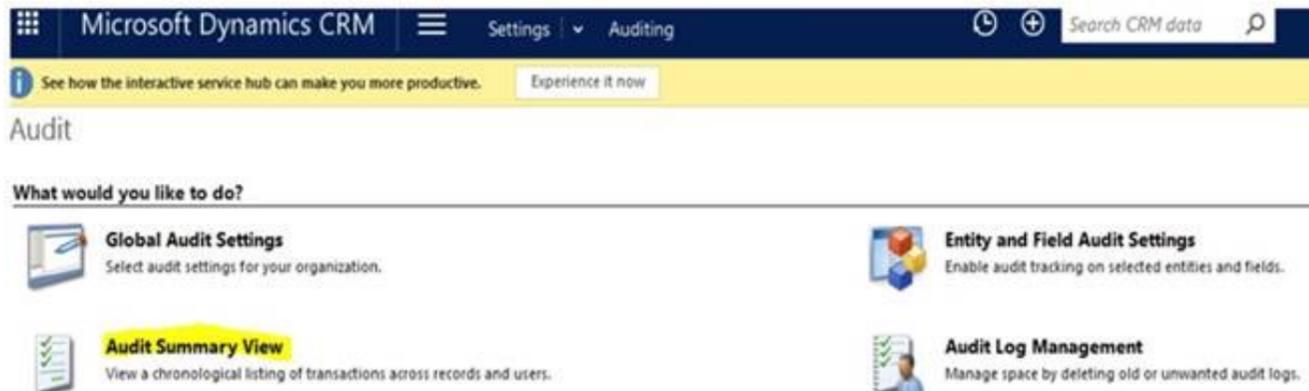

A company has a Power Platform solution that integrates with a third-party system. The client reports that unexpected updates are being made to the Accounts table. You need to determine the root cause of the issue. In which three locations should you investigate? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Audit summary view
- B. Solution history
- C. SDK Message Processing Steps
- D. Plug-in trace log
- E. System job run history

**Answer: ABD**

**Explanation:**

A: How to View Auditing Log Details?  
 System administrators can see activities for the entities that are enabled for audit logging. To view the audit logs:  
 ? Go to Settings > System > Auditing.  
 ? Choose Audit Summary View.  
 ? Under Audit Summary View, you will see the list of audit entries

B: You can view details about solution operations from the Solutions area of Power Apps. An operation can be a solution import, export, or uninstall. The solution history displays information such as solution version, solution publisher, type of operation, operation start and end time, and operation status.

D: Trace log records are written to the PluginTraceLog Table. Writing of these records is controlled by the trace settings mentioned in Enable trace logging. This data can be found in model-driven applications by navigating to Settings and choosing the Plug-in Trace Log tile. Reference:

**NEW QUESTION 70**

HOTSPOT - (Topic 4)

You are supporting a recent go-live for a model-driven app that includes mobile offline functionality.

Users report the following issues:

? The process of downloading initial metadata for the app takes hours to complete.

? Some account views are unavailable when the app is offline.

? Changes to users' security privileges are not reflected in the mobile app.

? Contact data is not available when the app is offline.

You need to resolve the mobile app performance issues.

What should you review? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	<ul style="list-style-type: none"> <li>Synchronize the mobile app.</li> <li>Remove organization data filters.</li> <li>Reduce records included in the profile filter.</li> </ul>
Changes to users' security privileges are not reflected in the mobile app.	<ul style="list-style-type: none"> <li>Synchronize the mobile app.</li> <li>Reduce records included in the profile filter.</li> <li>Remove reference to tables not included in mobile profile.</li> </ul>
Some account views are unavailable when the app is offline.	<ul style="list-style-type: none"> <li>Synchronize the mobile app.</li> <li>Reduce records included in the profile filter.</li> <li>Remove reference to tables not included in mobile profile.</li> </ul>
Contact data is not available when the app is offline.	<ul style="list-style-type: none"> <li>Reduce records included in the profile filter.</li> <li>Update mobile profile to include contact information.</li> <li>Remove reference to tables not included in mobile profile.</li> </ul>

Answer:

Issue	Resolution
The process of downloading initial metadata for the app takes hours to complete.	<ul style="list-style-type: none"> <li>Synchronize the mobile app.</li> <li><del>Remove organization data filters.</del></li> <li>Reduce records included in the profile filter.</li> </ul>
Changes to users' security privileges are not reflected in the mobile app.	<ul style="list-style-type: none"> <li>Synchronize the mobile app.</li> <li>Reduce records included in the profile filter.</li> <li>Remove reference to tables not included in mobile profile.</li> </ul>
Some account views are unavailable when the app is offline.	<ul style="list-style-type: none"> <li>Synchronize the mobile app.</li> <li>Reduce records included in the profile filter.</li> <li>Remove reference to tables not included in mobile profile.</li> </ul>
Contact data is not available when the app is offline.	<ul style="list-style-type: none"> <li>Reduce records included in the profile filter.</li> <li>Update mobile profile to include contact information.</li> <li>Remove reference to tables not included in mobile profile.</li> </ul>

- A. Mastered
- B. Not Mastered

Answer: A

**NEW QUESTION 75**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Install the Power Automate app in Microsoft Teams. Create a cloud flow for approval to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 76**

- (Topic 4)

A client uses Dynamics 365 Sales, Power BI datasets, and Power BI dataflows.

The Dynamics 365 Sales implementation has security roles that restrict data export. You need to ensure that data has the same restrictions in Power BI as it does in Dynamics 365 Sales.

You need to design the security to avoid sensitive data from being seen.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Use Microsoft Dataverse restrictions before setting up the Power BI reports.
- B. Limit the role in Dynamics 365 Sales to only data allowed so it cannot be exported to Microsoft Excel.
- C. Limit the role and ensure that exporting to Microsoft Excel is not allowed in both Dynamics 365 Sales and Power BI.
- D. Share Power BI dashboards only with users who are supported to see this data.

**Answer:** AB

**Explanation:**

A: When you share a dashboard or report, the people you share it with can view it and interact with it, but can't edit it. They see the same data that you see in the dashboard and reports and get access to the entire underlying dataset unless row-level security (RLS) is applied to the underlying dataset.

B: Depending on the sensitivity of an organization's data, it is often necessary to disable the ability to export or print reports.

Reference:

<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards>

**NEW QUESTION 77**

DRAG DROP - (Topic 4)

You are designing a business strategy for a client who has a Power Platform solution. The client works with critical data where any data loss creates a high risk.

You need to document the failover process for the stakeholders.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

**Answer Area**

If the second call is successful, the application continues normally.

The application makes a service call to the datacenter.

The application receives an exception after attempting the service call.

The application automatically tries the call again.

The application redirects calls to an on-premises server.

- A. Mastered
- B. Not Mastered

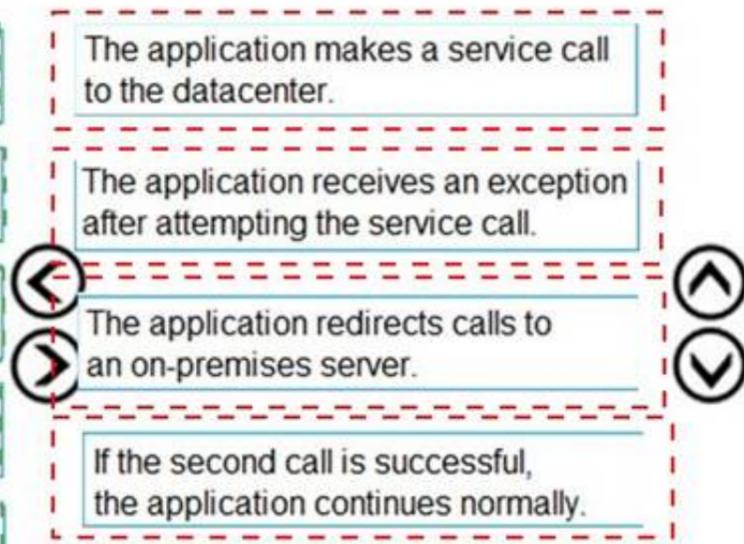

**Answer:** A

**Explanation:**

**Actions**

- If the second call is successful, the application continues normally.
- The application makes a service call to the datacenter.
- The application receives an exception after attempting the service call.
- The application automatically tries the call again.
- The application redirects calls to an on-premises server.

**Answer Area**

**NEW QUESTION 82**

- (Topic 4)

A company plans to automate business processes by using Power Automate. You identify a subprocess that must be implemented across multiple flows. You need to implement the subprocess so that it is maintainable and easy to navigate. What should you do?

- A. Save a copy of the subprocess and then add any additional actions into the flow.
- B. Initiate the subprocess with an automated trigger.
- C. Copy the actions of the subprocess into the flow by using the clipboard.
- D. Initiate the subprocess with an instant trigger.

**Answer:** B

**NEW QUESTION 85**

DRAG DROP - (Topic 4)

You are designing data loss policies for a Microsoft Power Platform implementation. You have the following requirements:

- Solutions that use the HTTP connector must not include any other connectors.
- Prevent the use of the Microsoft Forms connector.
- Allow the use of the Azure DevOps connector.

You need to determine in which data policy group to add each connector.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Business

If you put a connector in the Business group, it can only be used with other connectors from that group in any given app or flow.

Box 2: Non-business

DLP policies enforce rules for which connectors can be used together by classifying connectors as either Business or Non-Business.

Box 3: Blocked

Sometimes you might want to block the usage of certain connectors altogether by classifying them as Blocked.

Data policy group Business blocked

**NEW QUESTION 89**

HOTSPOT - (Topic 4)

An automobile parts manufacturer wants to replace an existing system with a Microsoft Power Platform solution. The company has been experiencing undesired data changes in their current system. The cause of the changes is due to the relationships that are set up between tables in the database that the system uses. The new solution must meet the following requirements:

- Track vehicle manufacturers and models.

- Display a list of all models that a manufacturer produces.  
 Ensure that each vehicle model can be associated to only one manufacturer.
  - Delete all associated models when a user deletes a manufacturer.
  - Automatically populate information from the manufacturer when creating a new model from the model list on the manufacturer page.
- You need to recommend table relationships to meet the business requirements. Which relationship settings should you recommend? To answer, select the appropriate options in the answer area.
- NOTE: Each correct selection is worth one point.

**Answer Area**

Business requirement	Relationship
The system must delete all associated models when a user deletes a manufacturer.	<ul style="list-style-type: none"> <li>Use a parental 1:N relationship between manufacturer and model.</li> <li>Use a parental 1:N relationship between manufacturer and model.</li> <li>Use a referential 1:N relationship between manufacturer and model.</li> <li>Use field mappings in 1:N relationship between manufacturer and model.</li> <li>Use an N:N relationship between manufacturer and model.</li> </ul>
The system must auto-populate information from the manufacturer when creating a new model from the model list on the manufacturer page.	<ul style="list-style-type: none"> <li>Use field mappings in 1:N relationship between manufacturer and model.</li> <li>Use a parental 1:N relationship between manufacturer and model.</li> <li>Use a referential 1:N relationship between manufacturer and model.</li> <li>Use field mappings in 1:N relationship between manufacturer and model.</li> <li>Use an N:N relationship between manufacturer and model.</li> </ul>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

**Answer Area**

Business requirement	Relationship
The system must delete all associated models when a user deletes a manufacturer.	<ul style="list-style-type: none"> <li>Use a parental 1:N relationship between manufacturer and model.</li> <li>Use a parental 1:N relationship between manufacturer and model.</li> <li>Use a referential 1:N relationship between manufacturer and model.</li> <li>Use field mappings in 1:N relationship between manufacturer and model.</li> <li>Use an N:N relationship between manufacturer and model.</li> </ul>
The system must auto-populate information from the manufacturer when creating a new model from the model list on the manufacturer page.	<ul style="list-style-type: none"> <li>Use field mappings in 1:N relationship between manufacturer and model.</li> <li>Use a parental 1:N relationship between manufacturer and model.</li> <li>Use a referential 1:N relationship between manufacturer and model.</li> <li>Use field mappings in 1:N relationship between manufacturer and model.</li> <li>Use an N:N relationship between manufacturer and model.</li> </ul>

**NEW QUESTION 90**

- (Topic 4)

You are designing a Microsoft Power Platform solution that uses Microsoft Dataverse.

You need to recommend a way to update currency exchange rates within Microsoft Dataverse.

What are two possible ways to achieve this goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Review AppSource for prebuilt solutions.
- B. Create a Power Automate flow that uses a custom connection or HTTP request to an outside source for exchange rates.
- C. Embed an iframe that points to a currency exchange service into a model-driven app.
- D. Use the Power BI connector to establish a link that updates Microsoft Dataverse with the current exchange rate.

**Answer:** AB

**Explanation:**

B: We need is a source for exchange rates. There are some published connectors, but you also use a free service called Exchange Rates API, which are based on the European Central Bank, and create a custom connection.

Now that we have our custom connector defined and have a way to request the latest exchange rates, the next step is to create a Power Automate flow that will update all of currencies setup in our Dataverse environment.

Dataverse is a multicurrency system, in which each record can be associated with its own currency. This currency is called the transaction currency. The multicurrency features enable users to perform financial transactions like opportunities, quotes, orders, and invoices in multiple currencies. This feature also provides a currency choice to the end user when a financial transaction occurs.

Reference:

<https://readyxrm.blog/2021/03/10/updating-currency-exchange-rates-in-dataverse/>

**NEW QUESTION 92**

HOTSPOT - (Topic 4)

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Team type
Cleaning teams	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> <span style="font-size: 0.8em;">▼</span> </div> <div style="padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>
Emergency room teams	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> <span style="font-size: 0.8em;">▼</span> </div> <div style="padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>
Billing teams	<div style="border: 1px solid black; padding: 2px;"> <div style="background-color: #ccc; padding: 2px; display: flex; justify-content: space-between; align-items: center;"> <span style="font-size: 0.8em;">▼</span> </div> <div style="padding: 2px;"> <p>Access</p> <p>Owner</p> </div> </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

**NEW QUESTION 95**

HOTSPOT - (Topic 4)

A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sales. The solution must meet the following requirements:

- Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.
- An external system needs to send data to the company's Dynamics 365 Sales solution. You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

Answer Area

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	<div style="border: 1px solid black; padding: 2px;"> <p>Use virtual tables.</p> <p>Use a custom plug-in.</p> <p>Use Dynamics 365 Web API.</p> <p>Use a web resource to display data.</p> </div>
External system sends data to Dynamics 365 Sales.	<div style="border: 1px solid black; padding: 2px;"> <p>Use a custom plug-in.</p> <p>Use Dynamics 365 Web API.</p> <p>Use a web resource to display data.</p> </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Integration requirement

Have read-only visibility of data from an external Azure SQL database.

Solutions

Use virtual tables.  
 Use a custom plug-in.  
 Use Dynamics 365 Web API.  
 Use a web resource to display data.

External system sends data to Dynamics 365 Sales.

Use a custom plug-in.  
 Use Dynamics 365 Web API.  
 Use a web resource to display data.

**NEW QUESTION 98**

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform architect.

You need to design a process to transport configuration and test data from one environment to a separate environment

Which four actions should you recommend be performed in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Import the ZIP file data.	1
Import the CSV file data.	2
Define the schema of the source data to be exported.	3
Use the schema to export data.	4
Download the Configuration Migration tool from NuGet.	
Create personal views to define the source data to be exported.	
Download the schema of the source data to be exported.	
Download the Configuration Migration tool from AppSource.	

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

<https://learn.microsoft.com/en-us/power-platform/admin/manage-configuration-data>

**NEW QUESTION 99**

DRAG DROP - (Topic 4)

A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.

You need to recommend a solution for each requirement.

Which components should you recommend for the requirements?

To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Solutions	Requirement	Solution
Custom API	Display information about the contact in the Omnichannel app.	
Custom pages	Ensure only tables needed are exposed for integration purposes.	
Microsoft Power Virtual Agent	Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.	

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Solutions	Requirement	Solution
Custom API	Display information about the contact in the Omnichannel app.	Microsoft Power Virtual Agent
Custom pages	Ensure only tables needed are exposed for integration purposes.	Custom API
Microsoft Power Virtual Agent	Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.	Custom pages

**NEW QUESTION 104**

- (Topic 4)

A company is struggling to gather insights from won and lost opportunities.

Users must be able to access the company's solution from mobile and desktop devices. The solution must meet the following requirements:  
 ? context of other related data.

? Display data to users as charts and tables and provide drill-through capabilities.

You need to recommend a Power Platform tool to help the client visualize the data.

Which two technologies should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Power BI
- B. Power Automate
- C. Power Virtual Agents
- D. Power Apps

**Answer:** AD

**Explanation:**

A: Power BI is a business analytics service by Microsoft. It aims to provide interactive visualizations and business intelligence capabilities with an interface simple enough for end users to create their own reports and dashboards. It is part of the Microsoft Power Platform.  
 D: Power BI Apps are an easy way for designers to share different types of content at one time. App designers create the dashboards and reports and bundle them together into an app. The designers then share or publish the app to a location where you, the business user, can access it. Because related dashboards and reports are bundled together, it's easier for you to find and install in both the Power BI service (<https://powerbi.com>) and on your mobile device. After you install an app, you don't have to remember the names of a lot of different dashboards or reports because they're all together in one app, in your browser or on your mobile device.  
 Reference:  
<https://docs.microsoft.com/en-us/power-bi/consumer/end-user-apps>

**NEW QUESTION 107**

HOTSPOT - (Topic 4)

You are designing a solution to continually import data from several data sources into Microsoft Dataverse. The solution must meet the following requirements:

- Include integrated error handling for records that fail to import successfully into Dataverse.

Augment data with AI and machine learning models. You need to select a component for each requirement

Which components should you use? To answer, select the appropriate options in the answer area

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Component
Augment data with AI and machine learning models.	<ul style="list-style-type: none"> <li>Analytical dataflow</li> <li>Power Apps dataflow</li> <li>Logic Apps</li> <li>Analytical dataflow</li> <li>Azure Data Factory</li> </ul>
Include integrated error handling in place for records that fail to import.	<ul style="list-style-type: none"> <li>Power Apps dataflow</li> <li>Power Apps dataflow</li> <li>Logic Apps</li> <li>Analytical dataflow</li> </ul>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Answer Area

Requirement	Component
Augment data with AI and machine learning models.	<ul style="list-style-type: none"> <li>Analytical dataflow</li> <li>Power Apps dataflow</li> <li>Logic Apps</li> <li>Analytical dataflow</li> <li>Azure Data Factory</li> </ul>
Include integrated error handling in place for records that fail to import.	<ul style="list-style-type: none"> <li>Power Apps dataflow</li> <li>Power Apps dataflow</li> <li>Logic Apps</li> <li>Analytical dataflow</li> </ul>

**NEW QUESTION 112**

- (Topic 4)

You are a Power Platform consultant for an internet support company. The company lacks a budget to buy third-party ISVs or add-ons.

The company requires a new system that achieves the following:

- ? All support issues must come in by email, need to be logged, and assigned to the support group.
- ? Accounts must synchronize with the parent company Oracle database.
- ? Reports must be sent to the executives on a weekly basis.
- ? No custom code will be used in the system.

You need to recommend the components that should be configured.

Which two components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Power Virtual Agents
- B. Microsoft Dataverse
- C. server-side synchronization
- D. Microsoft Customer Voice

**Answer:** BD

**Explanation:**

The Dynamics 365 Customer Voice data is stored in Microsoft Dataverse.  
 Dynamics 365 Customer Voice is an enterprise feedback management application you can use to easily keep track of the customer metrics that matter the most to your business. ... It provides a personalized experience, enabling you to collect customer feedback and get relevant insights quickly and easily, all in a few clicks.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-voice/about> <https://docs.microsoft.com/en-us/dynamics365/customer-voice/data-flow>

**NEW QUESTION 113**

DRAG DROP - (Topic 4)

A company uses Microsoft Power Platform solutions.

The company plans to set up application lifecycle management (ALM) capabilities to store the solutions in source control, which will be used to automate the release process.

You need to set up the initial ALM infrastructure to store the solutions in source control. Which four actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**NEW QUESTION 116**

DRAG DROP - (Topic 4)

A company plans to integrate a model-driven app with external data sources. The company has the following requirements:

- Consume data in its data warehouse from Microsoft Dataverse.
- Use a plug-in to retrieve information from an external service.

You need to recommend a Microsoft Azure component for each requirement.

Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements.

Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

**NEW QUESTION 118**

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform architect. You have identified several project risks.

You need to categorize potential risks that are specific to your customer.

How should you categorize the risks? To answer, drag the appropriate categories to the correct risks. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Categories	Answer Area	Risk	Category
Resource risk		The project requires integration to custom-built on-premises systems that store business-sensitive data.	
Business risk		The organization is currently making significant go-to-market strategy adjustments.	
External risk		The customer has a limited budget in relation to the project requirements.	
Security risk			

- A. Mastered
- B. Not Mastered

**Answer: A**

**Explanation:**

Categories	Answer Area	Risk	Category
Resource risk		The project requires integration to custom-built on-premises systems that store business-sensitive data.	Security risk
Business risk		The organization is currently making significant go-to-market strategy adjustments.	Business risk
External risk		The customer has a limited budget in relation to the project requirements.	Resource risk
Security risk			

**NEW QUESTION 121**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use process mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

**NEW QUESTION 123**

- (Topic 4)

You are designing a Power Platform solution for a company.

Users must be granted access only to data that is relevant to them.

You need to recommend actions to meet the requirements.

Which two recommendations should you make? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add column security profiles to applicable teams.
- B. Define and configure security roles.
- C. Create teams and assign security roles and users to the teams.
- D. Create business units and assign security roles to the business units.

**Answer: BD**

**Explanation:**

To control data access, you must set up an organizational structure that both protects sensitive data and enables collaboration. You do this by setting up business units, security roles, and field security profiles.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/security-roles-privileges>

**NEW QUESTION 126**

- (Topic 4)

A company wants to add an interactive checklist to a Power Platform solution to ensure that salespeople are following the same steps when qualifying leads.

You need to recommend a solution that will incorporate this checklist. What should you recommend?

- A. Mastered
- B. Not Mastered

**Answer: A**

**NEW QUESTION 130**

- (Topic 4)

A company uses two separate unlinked apps to manage sales leads: a Power Apps app and a third-party application.

The client has the following requirements:

- ? Manage all leads by using the Power Apps app.
- ? Create a lead in the Power Apps app when a user creates a lead in the third-party application.
- ? Update leads in the Power Apps app when a user updates a lead in the third-party application.

? Connect to the third-party application by using an API.

You need to recommend strategies to integrate the Power Apps app and the third-party application. Which three options can you use to achieve the goal? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Dual-write
- B. Custom connector
- C. Dataflow
- D. Power Automate cloud flow
- E. DataService connector

**Answer:** ADE

**Explanation:**

A: Customers should be able to adopt business applications from Microsoft and expect they speak the same language and seamlessly work together. Dual Write allows our customers to not think about these apps as different systems to write to independently; rather, the underlying infrastructure makes it seamless for these apps to write simultaneously.

D: Use Custom APIs to create your own APIs in Dataverse. With a Custom API you can consolidate a group of operations into an API that you and other developers can call in their code. The Common Data Service (current environment) connector enables calling Custom APIs actions in Power Automate.

E: Common Data Service provides access to the environment database on the Microsoft Common Data Service. It is available for Logic Apps, Power Automate, and Power Apps. Reference:  
<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/cdm-data-integration/dual-writelink-common-data-service-apps>  
<https://docs.microsoft.com/en-us/connectors/commondataservice/> <https://docs.microsoft.com/en-us/powerapps/developer/data-platform/custom-api>

**NEW QUESTION 131**

HOTSPOT - (Topic 4)

A company has an on-premises data warehouse and analytics solution- The data warehouse consists of multiple multi-dimensional data cubes representing over five years of operational data. The data warehouse consolidates and normalizes data that is sourced from 20 different systems. The company plans to replace the existing solution with a Microsoft Power Platform solution that connects to the data warehouse. The company wants to provide analytical information to executives in a Microsoft Teams channel to support business planning. The new solution must meet these requirements: Support the current data warehouse. The solution must support drill-through capabilities into the data. You need to recommend a solution. What should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Solution
Data storage and normalization.	<input type="checkbox"/> Data Gateway <input type="checkbox"/> Azure Data Lake <input type="checkbox"/> Dataverse for Teams <input type="checkbox"/> Azure Analysis Services
Visibility to key operational metrics from various Teams	<input type="checkbox"/> Power BI <input type="checkbox"/> AI Builder <input type="checkbox"/> Teams adaptive cards <input type="checkbox"/> Microsoft Teams integration object

Answer:

Answer Area

Requirement	Solution
Data storage and normalization.	<input checked="" type="checkbox"/> Data Gateway <input checked="" type="checkbox"/> Azure Data Lake <input checked="" type="checkbox"/> Dataverse for Teams <input type="checkbox"/> Azure Analysis Services
Visibility to key operational metrics from various Teams	<input type="checkbox"/> Power BI <input type="checkbox"/> AI Builder <input checked="" type="checkbox"/> Teams adaptive cards <input checked="" type="checkbox"/> Microsoft Teams integration object

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Azure Data Lake  
 A data warehouse is a centralized repository of integrated data from one or more disparate sources. Data warehouses store current and historical data and are used for reporting and analysis of the data.

**NEW QUESTION 136**

HOTSPOT - (Topic 4)

You are designing a Microsoft Power Platform solution for a company. Which components should you recommend? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Requirement**

**Component**

Allow users to change the status of a record only if a custom column named Reason is populated.

	▼
Business rule	
Power Automate flow	
Asynchronous plug-in	
Background workflow	

Prompt users to update each opportunity product record when an opportunity is won or lost.

	▼
JavaScript code	
Real-time workflow	
Power Automate flow	
Asynchronous plug-in	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Business rule

You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.

Box 2: Power Automate flow

Trigger the Power Automate flow with “When a record is updated”, then add a Condition in the flow and configure it with Status Label equals to Won.

**NEW QUESTION 137**

- (Topic 4)

You are evaluating a solution design for a model-driven app that will have a large number of complex forms.

Many of the forms take up to 10 seconds to load.

You need to recommend solution to speed up loading times for the forms.

Which two solutions should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Consolidate and reduce scripts.
- B. Use synchronous JavaScript requests.
- C. Move scripts into the OnLoad event.
- D. Remove unnecessary fields.

**Answer:** AD

**Explanation:**

Controls that require extra data beyond the primary record produce the most strain on form responsiveness and loading speed. These controls fetch data over the network and often involve a waiting period (seen as progress indicators) because it can take time to transmit the data.

Keep only the most frequently used of these controls on the default tab.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/design-performant-forms>

**NEW QUESTION 142**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Record the actions required to complete the loan application process in the process advisor feature. Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 146**

- (Topic 4)

You are designing a model-driven app that allows a company to manage sales opportunities.

The company has a complex security model that includes the following requirements:

? The vice president of sales must be able to see opportunities for sales managers and sales representatives.  
 ? Sales managers must be able to see opportunities for all sales representatives.  
 ? Sales representatives must only see opportunities that they own.  
 You need to recommend security tools for controlling user access.

Which two tools should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Account hierarchy
- B. Field security profile
- C. Position hierarchy
- D. Security roles

**Answer:** CD

**Explanation:**

With the position hierarchy security, a user at a higher position has access to the records owned by a lower position user or by the team that a user is a member of, and to the records that are directly shared to the user or the team that a user is a member of.

The hierarchy security model is an extension to the earlier security models that use business units, security roles, sharing, and teams. It can be used in conjunction with all other existing security models.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/developer/security-dev/hierarchical-security-control-access-entities>

**NEW QUESTION 147**

DRAG DROP - (Topic 4)

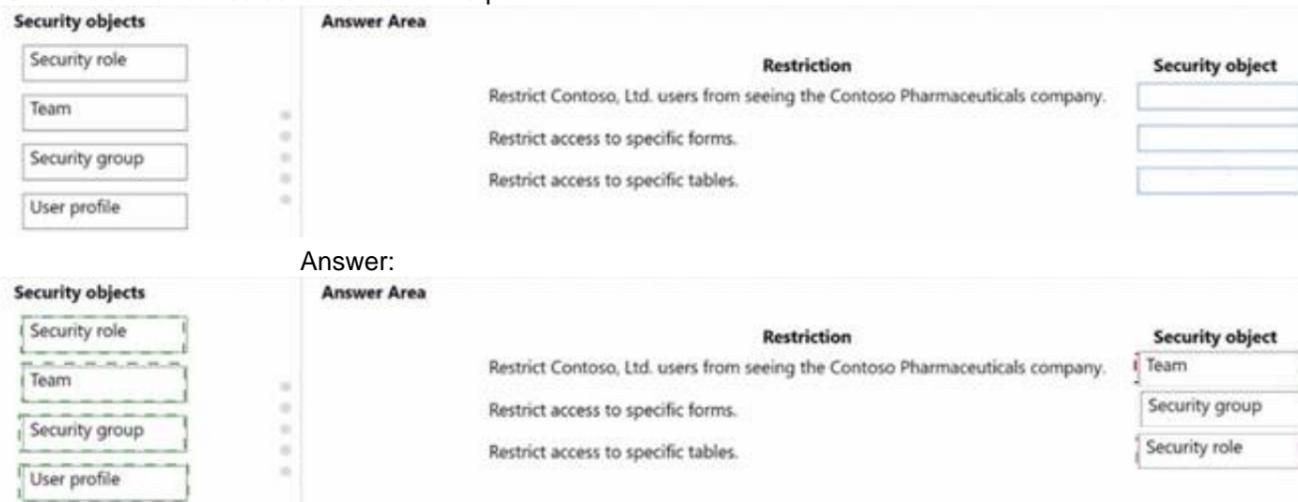

You are designing a Microsoft Power Platform solution that will be deployed to two separate companies in the same Microsoft Office 365 tenant: Contoso, Ltd. and Contoso Pharmaceuticals.

The solution must meet the following security requirements:

- Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.
- Restrict access to specific forms.
- Restrict access to specific tables.

What should you recommend? To answer, drag the appropriate security types to the correct restrictions. Each security type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

The screenshot shows a drag-and-drop interface with three columns: 'Security objects', 'Restriction', and 'Security object'. The 'Security objects' column contains 'Security role', 'Team', 'Security group', and 'User profile'. The 'Restriction' column contains three items: 'Restrict Contoso, Ltd. users from seeing the Contoso Pharmaceuticals company.', 'Restrict access to specific forms.', and 'Restrict access to specific tables.'. The 'Security object' column is empty. The 'Answer' section shows the correct selections: 'Team' for the first restriction, 'Security group' for the second, and 'Security role' for the third.

- A. Mastered
- B. Not Mastered

**Answer:** A

**NEW QUESTION 148**

HOTSPOT - (Topic 4)

You need to design a Power Platform solution that meets the following requirements:

- ? Capture data from a row during deletion to be used in an automated process.
- ? Use AI to process forms and automate data entry from paper-based forms.

Which requirements can be met by using out-of-the box Power Platform components?

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Capture data from a row during deletion to be used in an automated process.	<input type="radio"/>	<input type="radio"/>
Use AI to process forms and automate data entry from paper-based forms.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.

Box 2: Yes

AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.

**NEW QUESTION 149**

HOTSPOT - (Topic 4)

A multinational organization uses a single Microsoft Power Platform environment. The instance hosts multiple customizations for different users in different regions.

Users in some regions complain about slow load time of the customizations. You need to architect a solution based on the main requirement.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Goal	Suggested solution
Divisions actively collaborate on customers.	<ul style="list-style-type: none"> <li>Single instance; use Microsoft Azure Traffic Manager where needed</li> <li>Multi-tenant with one Power Platform environment in each region</li> <li>Multiple instances in different regions; Power BI for reporting</li> <li>Single multi-geo instance</li> </ul>
Regions have separate customers but use the same functionality and need global reporting.	<ul style="list-style-type: none"> <li>Multiple instances in different regions with data replication</li> <li>Multi-tenant with one Power Platform environment in each region</li> <li>Multiple instances in different regions; Power BI for reporting</li> <li>Single multi-geo instance</li> </ul>
Regions have separate functionality and customers but need global reporting on data.	<ul style="list-style-type: none"> <li>Single instance; use Microsoft Azure Traffic Manager</li> <li>Multi-tenant with one Power Platform environment in each region</li> <li>Multiple instances in different regions; Power BI for reporting</li> <li>Single multi-geo instance</li> </ul>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Answer Area

Goal	Suggested solution
Divisions actively collaborate on customers.	<ul style="list-style-type: none"> <li>Single instance; use Microsoft Azure Traffic Manager where needed</li> <li>Multi-tenant with one Power Platform environment in each region</li> <li>Multiple instances in different regions; Power BI for reporting</li> <li>Single multi-geo instance</li> </ul>

Regions have separate functionality and customers but need global reporting on data.	<ul style="list-style-type: none"> <li>Single instance; use Microsoft Azure Traffic Manager</li> <li>Multi-tenant with one Power Platform environment in each region</li> <li>Multiple instances in different regions; Power BI for reporting</li> <li>Single multi-geo instance</li> </ul>

**NEW QUESTION 152**

- (Topic 4)

You are creating a scope of work document for a solution. You have the following requirements:

- Track support cases, first response time, and resolution time.
- Include a chat-like interface that allows managers to check the status of cases with minimal manual searching.
- Allow cases to have multiple different priority levels.

You need to include the required Dynamics 365 and Microsoft Power Platform components. Which two components should you include? Each correct answer presents part of the solution.

NOT: Each correct selection is worth one point.

- A. Dynamics 365 Customer Service
- B. Power virtual Agents
- C. PowerBI
- D. Dynamics 365 Customer Voice

Answer: AB

**Explanation:**

Power Virtual Agents lets you create powerful chatbots that can answer questions posed by your customers, other employees, or visitors to your website or service.

Use Dynamics 365 Customer Service to:

- ? Track customer issues through cases
- ? Record all interactions related to a case
- ? Share information in the knowledge base
- ? Create queues and route cases to the right channels

- ? Create and track service levels through service-level agreements (SLAs)
- ? Define service terms through entitlements
- ? Manage performance and productivity through reports and dashboards
- ? Create and schedule services
- ? Participate in chats
- ? Manage conversations across channels

<https://docs.microsoft.com/en-us/power-virtual-agents/fundamentals-what-is-power-virtual-agents>

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

#### NEW QUESTION 154

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a desktop flow. Create a cloud flow for approval and trigger the desktop flow to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### NEW QUESTION 156

- (Topic 4)

You are designing a Microsoft Power Platform solution.

You need to identify the non-functional requirements for the organization.

Which three non-functional requirements should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. usability of business process flows
- B. customer maintenance procedures
- C. business rules to identify top customers
- D. solution regulatory compliance
- E. time-to-load forms

**Answer: BDE**

#### Explanation:

Non-functional requirements capture the elements that users might not directly care about but are important to support the proposed architecture and operational viability of the solution. Non-functional requirements often influence user adoption and perceived satisfaction with the solution.

Examples of common non-functional requirement types include:

- ? Availability
- ? Compliance/regulatory
- ? Data retention/residency
- ? Performance (response time, and so on)
- ? Privacy
- ? Recovery time
- ? Security
- ? Scalability

Reference:

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

#### NEW QUESTION 161

- (Topic 4)

You are designing a solution for a national vehicle repair company. You have the following requirements:

- Customers must search for vehicle issues by using natural language expressions.
- Customers must contact a customer service agent as required. You need to recommend a solution.

Which two features should you include? Each correct answer presents part of the solution.

- A. Power Virtual Agents
- B. Business process flow
- C. Power Apps portal
- D. Customer Insights

**Answer: BC**

#### NEW QUESTION 162

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. Mastered
- B. Not Mastered

**Answer:** A

**NEW QUESTION 167**

- (Topic 4)

You are designing a Power Platform solution.

During quality assurance testing the API limits are reached. You need to identify and resolve the issue.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Allocate Microsoft Dataverse capacity add-on subscriptions.
- B. Use the out-of-the-box User Summary report from the Reports section of the solution's model-driven app.
- C. In the Power Platform admin center Review the Home tab Dataverse analytics dashboard.
- D. In the Power Platform admin center, review the Usage section of the Power Apps analytics dashboard.
- E. In the Power Platform admin center, review the Runs section of the Power Automate analytics dashboard.

**Answer:** AC

**Explanation:**

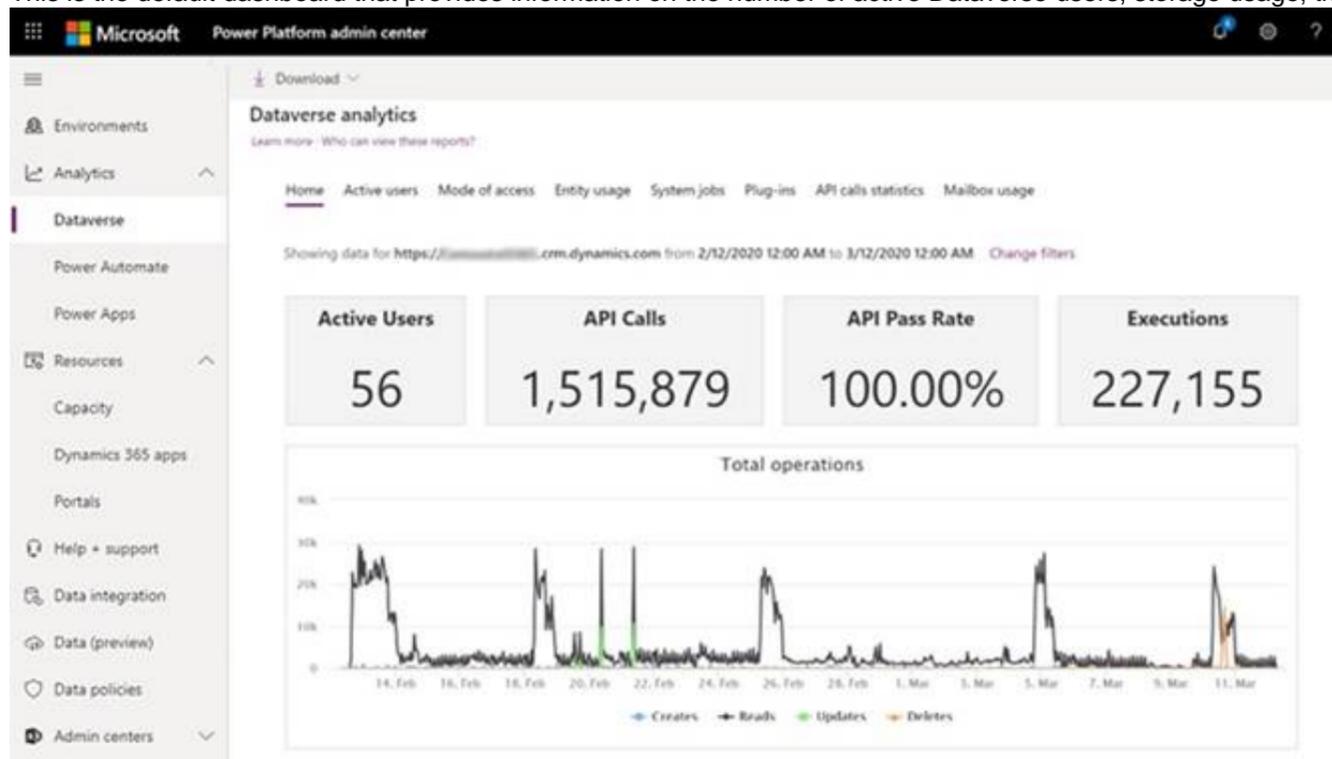

A: When users exceed their limits, administrators can see this in the admin center (see below). You can do either one of the following:

? Adjust the app or flow to use fewer API requests

? Purchase the Power Apps and Power Automate capacity add-on for your organization.

C: Home (default) Dashboard.

This is the default dashboard that provides information on the number of active Dataverse users, storage usage, the most active workflows, and more.

API Calls: API Calls Number of API calls that were made by the Dataverse environment for the selected time period.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/api-request-limits-allocations> <https://docs.microsoft.com/en-us/power-platform/admin/analytics-common-data-service>

**NEW QUESTION 170**

HOTSPOT - (Topic 4)

A company is creating a Power Platform solution to manage employees.

The company has the following requirements:

? Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

? Allow only approved device types to access the solution and company data.

You need to recommend a solution that meets the requirements.

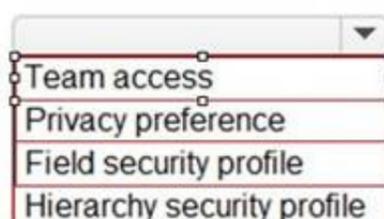

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

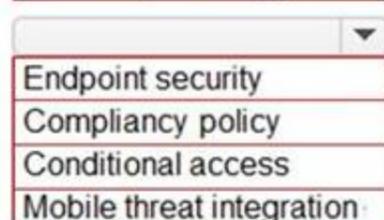

**Requirement**

**Configuration**

Allow only the human resource manager to change an employee's employment status when an employee is dismissed.

Allow only approved device types to access the solution and company data.

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Field security profile

Record-level permissions are granted at the entity level, but you may have certain fields associated with an entity that contain data that is more sensitive than the other fields. For these situations, you use field-level security to control access to specific fields.

Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles.

Box 2: Compliancy policy

Compliance policy settings – Tenant-wide settings that are like a built-in compliance policy that every device receives. Compliance policy settings set a baseline for how compliance policy works in your Intune environment, including whether devices that haven't received any device compliance policies are compliant or noncompliant.

Note: Mobile device management (MDM) solutions like Intune can help protect organizational data by requiring users and devices to meet some requirements. In Intune, this feature is called compliance policies.

Compliance policies in Intune:

Define the rules and settings that users and devices must meet to be compliant.

Include actions that apply to devices that are noncompliant. Actions for noncompliance can alert users to the conditions of noncompliance and safeguard data on noncompliant devices.

Can be combined with Conditional Access, which can then block users and devices that don't meet the rules.

**NEW QUESTION 175**

DRAG DROP - (Topic 4)

A client plans to implement Microsoft Power Platform solutions.

The client identifies the following requirements for handling opportunities:

- Users must follow the same set of steps each time they process opportunities
- For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.
- An error message must display if a follow-up date is not within seven days of the opportunity creation date.

You need to recommend tools to meet the client requirements.

What should you recommend? To answer, drag the appropriate tools to the correct requirement. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Tools	Requirement	Tool
Business Rule	Users must follow the same set of steps each time they process opportunities.	Business process flow
Business process flow	For opportunities with values greater than \$20,000, a follow-up date and second contact field must appear on the form.	Business Rule
Workflows	An error message must display if a follow-up date is not within seven days of the opportunity creation date.	Workflows

**NEW QUESTION 176**

HOTSPOT - (Topic 4)

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.

The company reports the following access issues:

- Users can access account records but cannot read a column in the table.  
 A licensed user receives an insufficient permission error when opening leads.
- A licensed user does not appear in the list of users available for security assignment. You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Issue	Action
Users can access account records but cannot read a column in the table.	Security role Security group Field security profile
A licensed user receives an insufficient permission error when opening leads.	Security role Security group Field security profile
A licensed user does not appear in the list of users available for security assignment.	Security role Security group Field security profile

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

References:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/field-security-entities>
