NEW QUESTION 1
- (Exam Topic 5)
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are hosted in Microsoft 365. All outbound SMTP email is routed through the on-premises Exchange organization.
A corporate security policy requires that you must prevent credit card numbers from being sent to internet recipients by using email.
You need to configure the deployment to meet the security policy requirement. Solution: From Microsoft 365, you create a data loss prevention (DLP) policy. Does this meet the goal?

A. Yes
B. No

Answer: A

NEW QUESTION 2
- (Exam Topic 5)
You have a hybrid deployment that contains a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 server named Server1. All users use an email address suffix of @contoso.com.
You migrate 200 mailboxes from Server1 to Exchange Online by using Exchange PowerShell cmdlets. Users hosted on Server1 can send email messages to the migrated mailboxes.
In Microsoft 365, you create a new mailbox that uses an email address of user1@contoso.com.
When email is sent from the mailboxes hosted on Server1 to user1@contoso.com, the senders receive a non-delivery report (NDR) that contains the following text:
"550 5.1.10 RESOLVER.ADR.RecipientNotFound; Recipient not found by SMTP address lookup."
You verify that Microsoft 365 mailboxes can send email to user1@contoso.com successfully. You delete the user account and mailbox of User1.
You need to ensure that when new mailboxes are created, all the users at your company can exchange email successfully
Which two actions should you perform? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. From Azure AD Connect, modify the synchronization settings
B. From Server1, run the New-RemoteMailbox cmdlet
C. From Server1, run the Enable-Mailbox cmdlet
D. From the on-premises network, create new mailboxes, and then migrate the mailboxes to Microsoft 365
E. From the Exchange admin center, modify the properties of the Outbound connector

Answer: BD

Explanation:
The problem happens because the on-premise Exchange server is not aware of the existence of the mailbox created in Exchange Online. To prevent this happening, new mailboxes need to be created from the on-premise Exchange server.
You can create on Exchange Online mailbox from the on-premise server by running New-RemoteMailbox cmdlet. Alternatively, you can create a local mailbox on the on-premise server and then migrate the mailbox to Exchange Online.

NEW QUESTION 3

C. Outbound SMTP Email
D. Message Analyzer

Answer: D

NEW QUESTION 120

Please wait while the virtual machine loads. Once loaded, you may proceed to the lab section. This may take a few minutes, and the wait time will not be deducted from your overall test time.
When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.
Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.
Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use
as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.
Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.

Answer: A

Explanation:

> Navigate to the Exchange Admin Center, and then choose the Advanced Threats
section of the EAC.

> Click the Safe Links
tab to examine all existing Safe Links policies:

> After navigating to the Safe Links policy page, choose the Add
button (+) to create a new policy. The
New Safe Links Policy
window opens.
- In the resulting window we'll be presented with the options available for creating our new Safe Links policy.

> In Name
enter an appropriate, unique, name that describes this policy. In the description enter some text
that provides a little more detail for anyone trying to make sense of the options selected here.

> Next we'll choose the action to take for URLs. We can leave this Off, if for example we are creating a policy to exclude a group of users that would otherwise
be affected by another Safe Links policy.

> The checkbox Do not track user click
can be selected if you do not wish to use the reporting
functionality available at a later date. This is a key feature when understanding which users clicked a link that was later found to be a threat, so be careful about
choosing to disable user click tracking.

> Our final check box provides options for click-through is a link is found to be dangerous. In some circumstances you may trust users to click-through links, or
they may request the ability to do so. In
most circumstances you will not
want a user to click-through the malicious link.

> Some URLs, such as those for internal addresses or even trusted partners, may not require re-writing.
Enter these URLs here.

> Finally, we will select the scope for the rule under the Applied to

section.

≫ Using similar conditions to transport rules we can select who this rule applies to including:
- Individual recipients
- Recipient domains
- Members of distribution groups

≫ The same conditions can be used for exceptions. When you have configured your rule, choose Save.
After saving the new Safe Links rule it will be shown in the EAC list. Just like Transport Rules, you can use the Enabled column to enable or disable the Safe Links policy.

When the Next button is available, click it to access the lab section. In this section, you will perform a set of tasks in a live environment. While most functionality will be available to you as it would be in a live environment, some functionality (e.g., copy and paste, ability to navigate to external websites) will not be possible by design.

Scoring is based on the outcome of performing the tasks stated in the lab. In other words, it doesn't matter how you accomplish the task, if you successfully perform it, you will earn credit for that task.

Labs are not timed separately, and this exam may have more than one lab that you must complete. You can use as much time as you would like to complete each lab. But, you should manage your time appropriately to ensure that you are able to complete the lab(s) and all other sections of the exam in the time provided.

Please note that once you submit your work by clicking the Next button within a lab, you will NOT be able to return to the lab.
