

Exam Questions MS-203

Microsoft 365 Messaging

<https://www.2passeasy.com/dumps/MS-203/>

NEW QUESTION 1

- (Exam Topic 1)

You need to resolve the email delivery delay issue. What should you do?

- A. From the Security & Compliance admin center, modify the safe attachments policy
- B. From the Security & Compliance admin center, create a supervision policy.
- C. From the Exchange admin center in Exchange Online, modify the antimalware policy.
- D. From the Exchange admin center in Exchange Online, modify the spam filter policy.

Answer: A

Explanation:

<https://docs.microsoft.com/en-us/office365/securitycompliance/dynamic-delivery-and-previewing>

NEW QUESTION 2

- (Exam Topic 1)

You need to recommend an Office 365 solution that meets the technical requirements for email from adatum.com.

Which two components should you recommend configuring from the Exchange admin center in Exchange Online? Each correct presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. DKIM signatures
- B. a spam filter
- C. a malware filter
- D. data loss prevention (DLP) policies
- E. a connection filter

Answer: BE

NEW QUESTION 3

- (Exam Topic 2)

You need to resolve the issue for the transport department users.

What is the best way to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

- A. Move the public folder mailbox that contains TransportPF to a server in the main office.
- B. Move TransportPF to a public folder mailbox hosted in the main office.
- C. Modify the default public folder mailbox for all the transport department users.
- D. Instruct the transport department users to add TransportPF to their Favorites list in Outlook.

Answer: B

Explanation:

References:

<https://docs.microsoft.com/en-us/exchange/recipients/mailbox-moves?view=exchserver-2019>

NEW QUESTION 4

- (Exam Topic 3)

You have a Microsoft Exchange Online tenant that contains 1,000 users.

A user recently sent an email message that was never received by a recipient on the internet. From the Exchange admin center, you successfully run a message trace but cannot see the message in the trace.

What is the most likely reason why the message fails to appear in the message trace?

- A. The user addressed the message to multiple internal and external receipts
- B. The user encrypted the email message.
- C. Your administrative user account requires additional rights.
- D. The message is in the user's Outbox folder.

Answer: D

NEW QUESTION 5

- (Exam Topic 3)

You have an Exchange Online tenant that contains several hundred mailboxes.

Several users report that email messages from an SMTP domain named @fabrikam.com often fail to be delivered to their mailbox.

You need to increase the likelihood that the email messages from the @fabrikam.com are delivered successfully to the users in the tenant.

- A. From the Security & Compliance admin center, modify the anti-spam policy settings.
- B. From the Security & Compliance admin center, modify the DKIM settings.
- C. From your public DNS zones, create a Sender Policy Framework (SPF) TXT record.
- D. From the Security & Compliance admin center, create a new ATP anti-phishing policy.

Answer: A

NEW QUESTION 6

- (Exam Topic 3)

You have a Microsoft Exchange Server 2019 hybrid deployment that contains the users shown in the following table.

Name	Mailbox location
User1	Exchange Online
User2	Exchange on-premises

You need to provide each user with an archive mailbox that is stored in Exchange Online.

Which admin center should you use to perform the configuration for each user? To answer, drag the appropriate admin centers to the correct users. Each admin center may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Admin Centers

The Exchange admin center from an on-premises server

The Exchange admin center from Exchange Online

The Microsoft 265 admin center

The Security and Compliance admin center

Answer Area

User1:

Admin Center

User2:

Admin Center

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 7

- (Exam Topic 3)

You manage a hybrid deployment between Microsoft Exchange Online and on-premises Exchange Server 2019. The deployment contains a primary SMTP domain named contoso.com.

Users have email addresses that use a syntax of firstname.lastname@contoso.com.

A user named Ben Smith receives a new client computer. You configure the computer1 to access Ben Smith's mailbox. Ben Smith reports that he cannot connect to his mailbox from the new computer.

You verify that other users can connect successfully to their mailbox and that new users can discover their mailboxes by using Autodiscover.

You need to ensure that Ben Smith can connect to his mailbox from the new computer. What should you do?

- A. Modify the primarySmtpAddress property for the mailbox of Ben Smith.
- B. Modify the email address of Ben Smith to use a syntax of firstname.lastname@contoso.onmicrosoft.com
- C. Modify the RemoteRoutingAddress parameter for the mailbox of Ben Smith.
- D. Modify the email address of Ben Smith to use a syntax of lastname.firstname@contoso.com

Answer: C

NEW QUESTION 8

- (Exam Topic 3)

Your network contains an Active Directory domain named corp.contoso.com. The domain contains client computers that have Microsoft Office 365 Apps installed. You have a hybrid deployment that contains a Microsoft Exchange Online tenant and an on-premises Exchange Server 2019 server named Server1. All recipients use an email address suffix of Contoso.com.

You migrate all the Exchange Server recipients to Exchange Online, and then decommission Server1. Users connected to the internal network report that they receive an Autodiscover error when they open Microsoft Outlook.

You need to ensure that all users can connect successfully to their mailbox by using Outlook. Which two actions should you perform? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. From the corp.contoso.com DNS zone, modify the Autodiscover host (A) record.
- B. Add an accepted domain.
- C. From the contoso.com DNS zone, modify the Autodiscover alias (CNAME) record
- D. Modify the name of the TLS certificate.
- E. From the domain, modify the Autodiscover service connection point (SCP).

Answer: CE

NEW QUESTION 9

- (Exam Topic 3)

You have 1,000 user accounts that are each licensed for Microsoft 365. Each user account has a Microsoft Exchange Online mailbox.

Ten of the user accounts are configured as service accounts for applications. The applications send event notifications to the mailboxes of the service accounts by using SMTP. The developers of each application have delegated access to the mailbox of their respective application.

You need to ensure that all the event notifications sent by the applications are retained in the service account mailboxes so that new developers can review older notifications. The developers must be able to view only the notifications for their respective application. What should you do?

- A. Replace the service account mailboxes with a single user mailbox that contains a folder for each application.
- B. Replace the service account mailboxes with a single user mailbox that contains Power Automate rules.
- C. Convert the service account mailboxes into shared mailboxes.
- D. Convert the service account mailboxes into mail-enabled users.

Answer: C

NEW QUESTION 10

- (Exam Topic 3)

You have a Microsoft Exchange Server 2019 organization.

A compliance manager plans to create retention policies for the mailboxes of executive users. The policies will move specific emails to an archive mailbox.

You need to create an archive mailbox for each executive user. What should you do?

- A. Run the New-Mailbox cmdlet
- B. Enable mailbox journaling.
- C. Enable In-Place Archiving for each mailbox.
- D. Run the set-Mailbox cmdlet.

Answer: C

Explanation:

<https://docs.microsoft.com/en-us/exchange/policy-and-compliance/in-place-archiving/in-place-archiving?view=>

NEW QUESTION 10

- (Exam Topic 3)

You need to create an address list that contains all the users who have a title of Director.

How should you complete the command? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

	▼
New-AddressList	
New-AddressBookPolicy	
New-DistributionList	
New-GlobalAddressList	

-Name "Directors"

	▼
-RecipientFilter	
-SearchBase	
-SearchScope	
-Where-Object	

```
{{(RecipientType -eq 'UserMailbox') -and (Title -eq 'Director')}}}
```

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powershell/module/exchange/email-addresses-and-address-books/new-address>

NEW QUESTION 13

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 organization that contains 200 mailboxes.

You need to add a second email address to each mailbox. The address must have a syntax that uses the first letter of each user's last name, followed by the user's first name, and then @fabrikam.com.

Solution: You convert all the mailboxes to shared mailboxes, and then you run the Set-Mailbox cmdlet and specify the -EmailAddressPolicyEnabled \$false parameter.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/exchange/email-addresses-and-address-books/email-address-policies/email-add> Email address policies define the rules that create email addresses for recipients in your Exchange organization.

The basic components of an email address policy are:

Email address templates: Define the email address format for the recipients (for example <firstname>@contoso.com or <lastname>.<firstname>@contoso.com).

Recipient filter: Specifies the recipients whose email addresses are configured by the policy.

Priority: Specifies the order to apply the email address policies (important if a recipient is identified by more than one policy).

The EmailAddressPolicyEnabled parameter specifies whether to apply email address policies to this recipient. Valid values are:

\$true: Email address policies are applied to this recipient. This is the default value.

\$false: Email address policies aren't applied to this recipient.

NEW QUESTION 18

- (Exam Topic 3)

You have a Microsoft Exchange Server 2016 hybrid deployment.

You plan to migrate mailboxes from the on-premises Exchange organization to Exchange Online. You have the appropriate permissions to perform the mailbox migrations.

You need to prepare the environment for the planned migration. What should you do?

- A. Disable Microsoft Outlook for the web.
- B. Install the Hybrid Agent.
- C. Run Get-MigrationBatch -Identity "MyMigrationBatch".
- D. Enable the MRSPProxy service on an on-premises Exchange server.

Answer: D

Explanation:

Mailbox replication service (MRS) proxy is used for cross forest mailbox move and remote move migration between on premise exchange and exchange online (Office 365)

Reference:

<https://docs.microsoft.com/en-us/Exchange/hybrid-deployment/move-mailboxes>

NEW QUESTION 20

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft Exchange Server 2019 hybrid deployment. All user mailboxes are hosted in Microsoft 365. All outbound SMTP email is routed through the on-premises Exchange organization.

A corporate security policy requires that you must prevent credit card numbers from being sent to internet recipients by using email.

You need to configure the deployment to meet the security policy requirement. Solution: From Microsoft 365, you create a data loss prevention (DLP) policy. Does this meet the goal?

- A. Yes
- B. No

Answer: A

Explanation:

Reference:

<https://docs.microsoft.com/en-us/microsoft-365/compliance/data-loss-prevention-policies?view=o365-worldwid>

NEW QUESTION 25

- (Exam Topic 3)

Your company has a Microsoft Exchange Server 2019 hybrid deployment.

The company has two departments that have the mailboxes configured as shown in the following table.

Department	Mailbox location	License
Accounting	On-premises	Exchange Server 2019 Standard CAL
Marketing	Exchange Online	Microsoft 365 E5

All the accounting department mailboxes reside in a database named ACCT-DB01. You create the mailboxes shown in the following table.

Name	Location
JRNL-MBX01	On-premises
JRNL-MBX02	Exchange Online

You need to record all the email communication of the users in each department. The solution must minimize costs.

What should you use for each department? To answer, drag the appropriate options to the correct departments.

Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options

- Database journaling
- A journal rule that uses JRNL-MBX01
- A journal rule that uses JRNL-MBX02

Answer Area

Accounting:	<input type="text"/>
Marketing:	<input type="text"/>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:
