

## PL-100 Dumps

### Microsoft Power Platform App Maker

<https://www.certleader.com/PL-100-dumps.html>

### NEW QUESTION 1

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Use a Common Data Service workflow with a PowerQuery on the data entity.

Does the solution meet the goal?

A. Yes

B. No

**Answer: A**

#### Explanation:

Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

### NEW QUESTION 2

DRAG DROP - (Topic 4)

You have a basic user security role in a test environment. You create a canvas app without customization in the environment.

You need to send the app to production administrators for production deployment. Which three actions should you perform in sequence? To answer, move the appropriate

actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Add the app to the solution.
Export the solution.
Send the solution to production administrators.
Select the canvas app in the Maker portal.
Export the package.
Send the package to production administrators.

➤
➤

**Answer Area**

⬅
⬅

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

**Actions**

Add the app to the solution.
Export the solution.
Send the solution to production administrators.
Select the canvas app in the Maker portal.
Export the package.
Send the package to production administrators.

➤
➤

**Answer Area**

Select the canvas app in the Maker portal.
Export the package.
Send the package to production administrators.

### NEW QUESTION 3

#### HOTSPOT - (Topic 4)

You create a canvas app for a service company.

Using the Tree view, you navigate to the ViewServices screen. The screen contains a form named DetailForm1 that only contains Label controls. You add the People icon to the header of the ViewServices screen as shown below:

When you select the icon a new Activity form opens. You must set the value of the Name field on the new Activity form to the value of the name field from DetailForm1.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Which formula must you enter in the Name field on the Activity form to default the Name from DetailForm1?

▼

Name\_DataCard1.Default

Name\_DataCardKey1.Default

Name\_DataCardValue1.Default

Which action should you perform on the People icon?

▼

In the On Select property, set the Activity form to Edit mode.

In the On Select property, set the Activity form to View mode.

Move the icon to the Activity form and set the On Select property to the Activity screen.

Move the icon to the DetailForm1 and set the On Select property to open the Activity screen.

- A. Mastered
- B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: Name\_DataCardValue1.Default

Box 2: Move the icon to the Activity form and set the On Select property to the Activity screen.

The Select function simulates a select action on a control as if the user had clicked or tapped the control. As a result, the OnSelect formula on the target control is evaluated.

#### NEW QUESTION 4

- (Topic 4)

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen\_Accounts and add a gallery named Gallery\_Accounts to the screen. You set the data source of Gallery\_Accounts to Accounts and add another blank screen named Screen\_AccountDetail.

You need to complete the app.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to Vie
- B. Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).Set the data source of the form to Account
- C. Set the Item property of the form to Selected.Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).
- D. Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to Vie
- E. Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).Set the data source of the form to Accounts.Set the Item property of the form

to First(Accounts).Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).  
F. Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to Ne  
G. Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).Set the data source of the form to Account  
H. Set the Item property of the form to Selected.Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).  
I. Add a display form to Screen\_AccountDetail.Set the data source of the form to Account  
J. Set the Item property of the form to Selected.Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).

**Answer:** AD

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

**NEW QUESTION 5**

- (Topic 4)

A large construction company has 120 departments. Each department has a Microsoft Teams channel.

The company creates training content for each department. All training content for a department is hosted in the channel for that department You must create a chatbot for the company that helps employees find relevant training. Employees must not be able to modify the chatbot.

You need to create the chatbot

Which three actions should you perform?"\* Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a bot for each departmental channel.
- B. Create one training bot for organization-wide deployment.
- C. Create an entity for each department
- D. Create a topic for each department.
- E. Create a topic for each trade.

**Answer:** BCD

**NEW QUESTION 6**

DRAG DROP - (Topic 4)

You create an app with multiple screens.

Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.

You need to create a reusable gallery that displays information based on the current record.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

**Actions**

- Add a gallery control.
- Add an input property.
- Create a component.
- Add a screen.
- Create a form.
- Add an output property.

**Answer Area**

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

- Create a component
- Add an input property
- Add a gallery control

From <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component> step 10 and 11

**NEW QUESTION 7**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

- ? Provision production environments named P1 and P2.
- ? Copy the current production environment to P1 and P2.
- ? Use P1 for development and P2 for testing.

Does the solution meet the goal?

- A. Yes

B. No

**Answer:** B

**Explanation:**  
Production: This is intended to be used for permanent work in an organization. Don't use production environment for development and testing.  
Reference:  
<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

**NEW QUESTION 8**

DRAG DROP - (Topic 4)  
: 186 DRAG DROP  
A company uses Power Apps.  
The company requites a canvas app that connects to the following sources:

- SharePoint list
- Microsoft 365 mailbox
- SOAP API

You need to select connector types.  
Which connector types should you use' To answer, drag the appropriate connector types to the correct sources. Each connector type may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Connector types

StandardCustom

Answer Area

#### NEW QUESTION 10

DRAG DROP - (Topic 4)

You are developing a Power BI report for a company.

The Power BI report must display company performance metrics in Power BI service. The report must include three fields in a visualization. The data for the report exists in a dataset.

The company will display the report on a large television screen during team meetings. You need to create the report.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer and arrange them in the correct order.

Actions		Answer Area
Add the report to a new dashboard		
Create a report		
Add a visualization to the report	➤	⬆
Create a paginated report	⬅	⬇
Select a dataset		

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Select a dataset

Sign in to your Power BI online account, or sign up, if you don't have an account yet. Open the Power BI service.

Get some data and open it in report view.

Box 2: Create a report

Use that data to create visualizations and save it as a report. Box 3: Add a visualization to the report

Box 4: Add the report to a new dashboard

Visualizations (known as visuals for short) display insights that have been discovered in the data. A Power BI report might have a single page with one visual or it might have pages full of visuals. In the Power BI service, visuals can be pinned from reports to dashboards.

#### NEW QUESTION 10

DRAG DROP - (Topic 4)

You create a canvas app for a store.

The logo must appear as the background image for the app. A loading spinner must display on the screen as the app loads.

You need to add the features to the app.

What should you modify? To answer, drag the appropriate form areas to the correct requests. Each form area may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Screen areas	Feature request	Screen area
Form	Add logo.	
Gallery		
Screen	Add loading spinner.	

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Screen

You can add an image to a screen in several different ways. One way is to upload an image to the app, go to the Media tab, and then click on the image to add it to a screen.

Note: Configure graphical elements in your app, including images, photos, and elements of a pen control.

BackgroundImage – The name of an image file that appears in the background of a screen. Applies to the Screen control.

Box 2: Screen

Out Of Box Canvas App, provide a property called LoadingSpinner and LoadingSpinnerColor.

LoadingSpinner property is used to displaying a Canvas App OOB Loader Image unless your screen finishes loading.

Click on the Screen in your Canvas App and then You'll be able to see LoadingSpinner and LoadingSpinnerColor Property.

#### NEW QUESTION 13

HOTSPOT - (Topic 4)

A company uses a model-driven app. You create a Power BI sales report.

The executive of the company wants all users to see tiles from the report in the model- driven app.  
You need to ensure all users can see the tiles.  
What should you do? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Step	Setting
Allow addition of Power BI visualization tiles.	<div>▼</div> <div>Power Platform Environment settings</div> <div>Power Apps settings</div> <div>Power BI Service settings</div> <div>Power BI Desktop settings</div>
Add tiles to a dashboard.	<div>▼</div> <div>Create a personal dashboard</div> <div>Create a Power BI dashboard.</div> <div>Create a system dashboard.</div>
Allow users to view tiles.	<div>▼</div> <div>Share tile and share dashboard.</div> <div>Share report and share dashboard.</div> <div>Share tile and publish dashboard.</div> <div>Share report and publish dashboard.</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Power Platform Environment settings

Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.

? In the Power Platform admin center, select an environment.

? Select Settings > Product > Features.

? Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.

? Select Save.

Box 2: Create a personal dashboard

You can embed Power BI tiles on your personal dashboard.

? Open your app and go to Dashboards.

? Select an existing personal dashboard or select New to create one.

? On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.

? Add new Power BI tile.

? In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.

? Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.

? Select Save to save your dashboard.

Box 3: Share report and share dashboard.

To share your personal dashboard that contains Power BI visualizations you must

same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

**NEW QUESTION 14**

- (Topic 4)

A company has an on-premises system that stores product information. The company plans to replace the information with a Power Platform solution that uses the Common Data Service.

The Power Platform solution needs to use data from the product information system. You need to transform and import the data from the product information system. Which two tools should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Business process flow
- C. Power BI Desktop
- D. Data gateway

**Answer:** AD

**Explanation:**

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services. Can use the Power Platform dataflows to load entity in CDS with the option to transform data.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-onprem> <https://nishantrana.me/2020/07/07/load-data-from-sql-on-premise-to-cds-common-data-service-using-powerplatform-dataflows-in-power-apps/>

**NEW QUESTION 15**

DRAG DROP - (Topic 4)

DRAG DROP

A company uses Microsoft Power Platform. All users in the company have read/write and create access to SharePoint. You create a canvas app that displays data from a SharePoint list. A group of users must use the app without the ability to change the data source. You need to shore the app with the users. What should you do? To answer, drag the appropriate actions to the correct components. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

<b>Actions</b>	<b>Answer Area</b>	<b>Component</b>	<b>Action</b>
Send all users an email invitation.		Canvas app	
Enable Can use permission.		SharePoint connection	
Set the users as co-owners.			
Enable Can edit permission.			

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

<b>Actions</b>	<b>Answer Area</b>	<b>Component</b>	<b>Action</b>
Send all users an email invitation.		Canvas app	Send all users an email invitation.
Enable Can use permission.		SharePoint connection	Enable Can use permission.
Set the users as co-owners.			
Enable Can edit permission.			

NEW QUESTION 20

- (Topic 4)  
You create an app with multiple screens. Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens. You need to create a reusable gallery that displays information based on the current record. Which three actions should you perform? NOTE: Each correct selection is worth one point.

- A. Add a gallery control
- B. Add an input property
- C. Create a component
- D. Create a form
- E. Add a screen
- F. Add an output property

Answer: ABC

Explanation:

Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/add-gallery> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component>

NEW QUESTION 24

DRAG DROP - (Topic 4)  
DRAG DROP  
A company is creating Power Apps apps for their customer service team. You must create a final released solution to export to their test environment that cannot be changed in the new environment. You need to determine the types of solutions to use. Which type of solution should you use? To answer, drag the appropriate solution types to the correct conditions. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content. NOTE: Each correct selection is worth one point.

<b>Solution type</b>	<b>Answer Area</b>	<b>Solution type</b>
Managed	<b>Condition</b>	Solution type
Unmanaged	Assign a publisher for the first time	Solution type
	Export the solution	Solution type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Unmanaged  
Unmanaged solutions are used in development environments while you make changes to your application.  
Box 2: Managed  
Managed solutions are used to deploy to any environment that isn't a development environment for that solution.

NEW QUESTION 26

- (Topic 4)

You are an app maker. You are creating a canvas app. You do not have access to Power BI.

You need to add charts to the app.

Which three chart types can you add directly to the canvas app? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. pie
- B. area
- C. funnel
- D. column
- E. line

Answer: ADE

Explanation:

You can use line charts, pie charts, and bar charts to display your data in a canvas app. Add a bar chart to display your data:

- \* 1. On the Home tab, add a screen.
- \* 2. On the Insert tab, select Charts, and then select Column Chart.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/use-line-pie-bar-chart>

NEW QUESTION 29

- (Topic 4)

A company uses Power Apps and Microsoft Dataverse. The company has a managed solution in the production environment

You make changes to the solution m the development environment. Some components are unused. The changes to the solution must be reflected in the production environment

You need to ensure that all unused components are removed. What should you do?

- A. Create a new solution
- B. Upgrade the solution.
- C. Update the solution.
- D. Patch the solution.

Answer: B

NEW QUESTION 34

DRAG DROP - (Topic 4)

You are designing a data model for a new app. The app will be supported by two tables. TableA will contain data that is unique to your industry. TableB will provide access to readonly data from an Azure SQL database.

You need to configure the tables.

Which table type should you use? To answer, drag the appropriate table types to the correct tables. Each table type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 38

- (Topic 4)

A company has hundreds of warehouses. You are developing an app for the shipping department at the company. The app must be able to provide the warehouse address for shipments. You need to create the warehouse field on the app form. Which field type should you use?

- A. Lookup
- B. Choice
- C. Choices
- D. Text

Answer: A

NEW QUESTION 39

- (Topic 4)

You design a canvas app that has multiple screens. Each screen will have multiple button controls. The button controls must all have the same background color. You must be able to change You need to configure the button fill property. What should you do?

- A. Update the Fill property to a variable created by using the Navigate function.
- B. Update the Fill property to a variable created by using the Set function.
- C. Select all the buttons while holding the Ctrl key, and then change the color property.
- D. Use a background image property in place of setting a color property.

Answer: A

NEW QUESTION 43

- (Topic 2)

You need to create a flow for moving data from the Sales Log to the Job Setup entity. Which type of flow should you use?

- A. a scheduled flow for the Job Setup entity
- B. an instant (button) flow for the Sales Log
- C. a business process flow for the Job Setup entity
- D. an automated flow for the Sales Log

Answer: A

Explanation:

Scenario: Automatically perform the following actions immediately when a sale is won:

- ? Generate a sequential job number.
- ? Copy key sales information to the Job Setup entity used by manufacturing.

NEW QUESTION 46

HOTSPOT - (Topic 2)

You need to implement features for the solution.

Which Power Platform component should you use for each feature? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Feature	Component
Mobile app for Sales Log workbook	<div><div></div><div>Canvas app</div><div>Model-driven app</div><div>Power Virtual Agents chatbot</div></div>
Embed KPIs for sales quotas by region	<div><div></div><div>Content Pack</div><div>Power BI Desktop</div><div>Power BI service</div></div>
Transfer of key sales information to the Job Setup entity	<div><div></div><div>Power Automate</div><div>Business process flow</div><div>Power Virtual Agents</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Model-driven app

The Sales app must meet the following requirements:

? Provide a central location for all sales pipeline and quote information that is easily accessible and maintains all of the versions of the estimate, quote, and engineering documents.

Compared to canvas apps, model-driven apps in PowerApps are based on underlying data — specifically, the data stored in Common Data Service (CDS).

Box 2: Power BI Desktop

You can create a KPI in Power BI Desktop.

? Open your report editor in Power BI Desktop then select a report on which you are working.

? On your right, you will see a Visualizations pane and a Fields pane.

? From the Visualizations pane, select the KPI visual.

? Etc.

Box 3: Power Automate

NEW QUESTION 50

- (Topic 2)

You need to resolve the user’s issue with the time tracking app.  
Which two actions should you perform? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Add a component to the time tracking screen for tracking total time.
- B. Create a new component inside of the component library for the time tracking app.
- C. Upload the component to AppSource.
- D. Add the Total Time field to the screen and set the value of the field property to Rollup

Answer: AB

**Explanation:**  
Scenario Issue: Users want to be able to see their weekly total time entered from all screens.  
A component library provides a centralized and managed repository of components for reusability.  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>

NEW QUESTION 53

HOTSPOT - (Topic 2)  
If you add one or more Image controls to your app, you can show individual images that aren't part of a data set, or you can incorporate images from records in data sources.  
You need to configure the system to meet the requirements.  
What should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Feature	Setting
Create the relationship between the Job Setup and Time Tracking entities.	<div><div></div><div>1:N</div><div>N:N</div><div>Self-referential</div></div>
Configure ownership for the Time Tracking entity.	<div><div></div><div>Business-owned</div><div>Organization-owned</div><div>User or Team owned</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**  
Box 1: 1:N  
Scenario: A sortable listing of all in-process jobs from the Job Setup table, by customer, start date, and product.  
Box 2: User or Team owned  
Scenario: Employees must only be able to access their own time tracking records from the app.  
User or team: Data belongs to a user or a team. Actions that can be performed on these records can be controlled on a user level.

NEW QUESTION 55

HOTSPOT - (Topic 2)  
You need to meet the requirement for the time tracking app.  
Which controls should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Solution
Automatically record the duration of work when a job number is read.	<div><div></div><div>Card</div><div>Rating</div><div>Slider</div><div>Timer</div></div>
Read the employee’s number into the app.	<div><div></div><div>Barcode-scanner</div><div>Card</div><div>Image</div><div>Shape</div></div>
Display a photo of an employee when the employee badge is read.	<div><div></div><div>Camera</div><div>Card</div><div>Icon</div><div>Image</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Timer

A Timer control in Power Apps is a control that can determine how your app responds after a certain amount of time passes.

Box 2: Barcode scanner

The Barcode scanner control for canvas apps scans barcodes, QR codes, and data-matrix codes on an Android or iOS device.

Box 3: Image

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source.

#### NEW QUESTION 57

DRAG DROP - (Topic 1)

You need to ensure that the app can support the needs of User2 and User3, and meets the production deployment requirements.

Which tools should you use? To answer, select the appropriate tool in the answer area. NOTE: Each correct selection is worth one point.

Tools	Answer Area	
	Requirement	Tool
Solution Checker		
App Checker	Accessibility	Tool
Object Detector		
Preview the app	Deployment	Tool

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: App Checker

Scenario: Several sales representatives have accessibility restrictions. User2 is visually impaired and cannot see images. User3 is unable to use a mouse.

Users who have vision, hearing, or other impairments can use your canvas app more easily and successfully if you consider accessibility as you design how the app looks and behaves. If you're not sure how to make your app more accessible, you can run the AppChecker Accessibility checker in Power Apps Studio.

Box 2: Solution Checker

Scenario: Before deploying the app to production, you must ensure that the app conforms to Microsoft accessibility and performance guidelines.

Use solution checker to validate your model-driven apps in Power Apps.

#### NEW QUESTION 61

- (Topic 1)

You need to create the mobile app. Which type of app should you create?

A. model-driven app

B. portal app

C. Microsoft 365 web app

D. canvas app

**Answer: D**

#### Explanation:

An accessible canvas app will allow users with vision, hearing, and other impairments to successfully use the app. In addition to being a requirement for many governments and organizations, following the below guidelines increases usability for all users, regardless of their abilities.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessible-apps>

#### NEW QUESTION 66

- (Topic 4)

A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.

A Power Automate flow monitors social media channels to identify high-impact trends. When the Power Automate flow identifies the trends, consistently formatted and

standardized feedback must be collected from the channel members within Teams.

You need to streamline the Power Automate and Teams communication process.

What should you use?

A. AI Builder

B. Common Data Service business process flows

C. Adaptive cards

D. Integrated approval flows

**Answer: A**

#### Explanation:

"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid app delivery."

Jim Parker: Web and Collaboration Services Manager

Reference:

<https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform>

#### NEW QUESTION 70

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app that displays a list of accounts.

Users must be able to select an account and view details for the account. The app must include a feature that brings the user back to the list of accounts.

You add a blank screen named Screen\_Accounts and add a gallery named and add another blank screen named Screen\_AccountDetail.

You need to complete the app. Solution:

? Add an edit form to Screen\_AccountDetail and set the Default Mode of the form to View.

? Set the OnSelect property of Gallery\_Accounts to Navigate(Screen\_AccountDetail).

? Set the data source of the form to Accounts.

? Set the Item property of the form to Selected.

? Add a back icon on Screen\_AccountDetail and set its OnSelect property to Navigate(Screen\_Accounts).

Does the solution meet the goal?

A. Yes

B. No

**Answer: A**

#### Explanation:

View, edit, or create an item, save the contents, and reset the controls in an Edit form control.

FormMode.View: The form is populated with an existing record but the user cannot modify the values of the fields.

This function is often invoked from the OnSelect formula of a Button or Image control.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

#### NEW QUESTION 72

- (Topic 4)

You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.

Which formula should you use?

A. UpdateContext( { RunningTotal: 5 } ); Navigate( MainScreen, ScreenTransition.Cover, RunningTotal );

B. If( Value(TextBox1.Text) >= 0, (Set( RunningTotal, 5); Back();), Color.Green )

C. UpdateContext( { RunningTotal:5 } ); Back()

D. Set( RunningTotal, 5 ); Back();

**Answer: D**

#### Explanation:

You set the value of the global variable with the Set function. Set( MyVar, 1 ) sets the global variable MyVar to a value of 1.

Use the Back and Navigate function to change which screen is displayed. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables>

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>

#### NEW QUESTION 75

DRAG DROP - (Topic 4)

You are creating a model-driven app for onboarding new employees. You need to implement business logic for the app.

Which tool should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tools
<div>Business rule</div>	Guide a user through the set of steps needed for onboarding a new employee.	<div></div>
<div>Power Automate</div>	Make date of birth mandatory when creating a new employee record.	<div></div>
<div>Business process flow</div>	Implement an approval flow for expense reports submitted by employees.	<div></div>

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: Business process flow

A business process flow is a visual guide meant to help users complete a business process by using a set of predefined stages. Users are not limited on how long they run a business process or how long they have a stage open.

Box 2: Business rule Box 3: Power Automate

A Power Automate flow does not have any visual components like a business process flow.

Power Automate flows can be configured to work with many different data sources, and a flow can connect to many different data sources within the same flow. A flow can be configured to time out if it is not completed in a certain time and can be triggered to move between steps based on data or user interaction.

**NEW QUESTION 78**

HOTSPOT - (Topic 4)

A coworker creates a canvas app.

The canvas app contains the following formula. The formula is attached to the OnVisible property of the first screen that users see:

```
Collect(  
Toolbox,  
{  
    Tool: "Hammer",  
    Quantity: 1  
},  
{  
    Tool: "Screwdriver",  
    Quantity: 2  
}  
)
```

You are updating the canvas app.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area	Yes	No
The formula will update multiple records in a data source named Toolbox if the records exist.	<input type="radio"/>	<input type="radio"/>
A local collection is created to store data if a data source named Toolbox does not already exist.	<input type="radio"/>	<input type="radio"/>
If a collection named Toolbox exists the formula will clear any existing records before making any changes.	<input type="radio"/>	<input type="radio"/>

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: No

Records are added, not updated.

Box 2: Yes

The Collect function adds records to a data source. Syntax: Collect( DataSource, Item, ... )

DataSource – Required. The data source that you want to add data to. If it doesn't already exist, a new collection is created.

Item(s) - Required. One or more records or tables to add to the data source.

Box 3: No

No records are cleared.

**NEW QUESTION 82**

DRAG DROP - (Topic 4)

You are design ng a dashboard for a model driven app Users are licensed to use Dynamics 365 Seles Professional

Users must be able to filter the dashboard. You need to determine how to apply the filters.

Which type of dashboard should you use? To answer, drag the appropriate dashboard types to the correct requirements. Each dashboard type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Dashboard types	Requirement	Dashboard type
Standard	Filter all dashboard elements using a timeframe.	
Interactive	Display data from multiple tables and views.	
Power BI embedded		

A. Mastered

B. Not Mastered

**Answer: A**

**Explanation:**

Dashboard types	Requirement	Dashboard type
Standard	Filter all dashboard elements using a timeframe.	Interactive
Interactive	Display data from multiple tables and views.	Standard
Power BI embedded		

**NEW QUESTION 87**

- (Topic 4)

You have a Power Platform solution that uses Common Data Service.

You need to secure all fields that support field-level security. Which field can you secure?

- A. createdon
- B. accountid
- C. owninguser
- D. description

**Answer:** D

**Explanation:**

Which fields can be secured?

Although most attributes can be secured, there are system attributes, such as IDs, timestamps, and record tracking attributes, that can't. Below are a few examples of attributes that can't be enabled for field security.

ownerid, processid, stageid, accountid, contactid createdby, modifiedby, OwningTeam, OwningUser

createdon, EntityImage\_Timestamp, modifiedon, OnHoldTime, overriddencreatedon statecode, statuscode

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/field-level-security>

**NEW QUESTION 90**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs.

The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.

Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

**NEW QUESTION 94**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a business rule on the appropriate data entity with a scope of entity.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead use Common Data Service workflow with a PowerQuery on the data entity.  
Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.  
Reference:  
<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft->

**NEW QUESTION 95**

- (Topic 4)  
A company has ten sales regions. Each salesperson is assigned to one region. You create a set of five standard views that all salespeople will use. Sales users only want to see information for their own region. Sales users must call sales leads within a week of receiving a lead.  
You need to recommend a solution for sales users.  
Which two actions will you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Instruct users to create personal views that filter by region.
- B. Instruct users to filter the view by region.
- C. Configure the definition for each view to sort by region.
- D. Configure the definition for each view to filter by region.

**Answer:** BD

**NEW QUESTION 98**

DRAG DROP - (Topic 4)  
DRAG DROP  
You develop Microsoft Power Platform solutions for Contoso, Ltd You create a Power Virtual Agents chatbot in a Microsoft Teams team.  
You need to make the chatbot available to all users in your organization.  
Which three actions should you perform in sequence? To answer, move all actions from the list of actions to the answer area and arrange them m the correct order.

Actions

Access the chatbot in the Teams app store in the Built by your colleagues category.

Publish the chatbot.

Access the chatbot in the Teams app store in the Built for Contoso category.

Submit the chatbot for admin approval.

Answer area

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Actions

Access the chatbot in the Teams app store in the Built by your colleagues category.

Publish the chatbot.

Access the chatbot in the Teams app store in the Built for Contoso category.

Submit the chatbot for admin approval.

Answer area

Publish the chatbot.

Access the chatbot in the Teams app store in the Built for Contoso category.

Submit the chatbot for admin approval.

**NEW QUESTION 103**

DRAG DROP - (Topic 4)  
You are designing a canvas app.  
You need to select user interface controls to include in the app.  
Which control should you use? To answer, drag the appropriate controls to the correct requirements. Each control may be used once, more than once, or not at all.  
You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Controls	Requirement	Control
List box	Allow users to select multiple items in a list.	
Radio	Allow users to select multiple items from a list of options by typing in a phrase.	
Combo box		
Drop-down list		

- A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: List box

A List Box control always shows all available choices (unlike a Drop down control) and in which the user can choose more than one item at a time (unlike a Radio control).

Box 2: Combo box

A Combo box control allows you to search for items you will select. The search is performed server-side on the SearchField property so performance is not affected by large data sources.

Single or multi-select mode is configured via the SelectMultiple property.

When searching for items to select, for each item you can choose to show a single data value, two values, or a picture and two values (Person) by modifying the Layout settings in the Data pane.

**NEW QUESTION 107**

HOTSPOT - (Topic 4)

A company is building a Power Apps app to track key project tasks.

Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.

You need to configure a solution to change the text on the header bar.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	<div><div></div><div>On the header control. On each RiskStatus slider input. In the global variables of the Power Apps app. On the OnStart property of the Power Apps app.</div></div>
Which formula should you use?	<div><div></div><div>SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&gt;=150? "HIGH RISK" : "" IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&lt;150, "", HIGH RISK") Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatis3.value)&gt;=150, "HIGH RISK") UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value&gt;=150), "HIGH RISK")</div></div>

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: On each RiskStatus slider input

You can change the value based on input.

Box 2: Updateif(..)

Use the UpdateIf function to modify one or more values in one or more records that match one or more conditions. The condition can be any formula that results in a true or false and can reference columns of the data source by name. The function evaluates the condition for each record and modifies any record for which the result is true.

**NEW QUESTION 112**

DRAG DROP - (Topic 4)

You store data about products in two Microsoft Excel worksheets. The data contains duplicate rows.

You need to consolidate data from the two worksheets into a Microsoft Dataverse custom table.

In which order should you perform the actions? To answer, move all actions from the list of

Actions	Answer Area
Upload the worksheets to OneDrive	
Add conditional columns to perform checks on the data	
Create queries for the worksheets	
Append the output from the queries	
Create a dataflow	

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Upload the worksheets to OneDrive

A data source needs to be specified. The data needs to be available. Step 2: Create a dataflow

Step 3: Create queries for the worksheets

You can shape your data selection into a form that works best for your table using a Power Query editing experience, similar to the Power Query Editor in Power BI Desktop.

Step 4: Add conditional columns to perform checks on the data Step 5: Append the output of the queries

#### NEW QUESTION 116

DRAG DROP - (Topic 4)

You use Microsoft Dynamics 365 Sales.

Business processes must use data from multiple applications. You need to implement the correct type of automation.

Which flow type should you use? To answer, drag the appropriate flow types to the correct application types. Each flow type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Flow Types		Application Type	Flow Type
cloud flow	• • • •	Update a record after it was created as part of a sales process	
desktop flow		Extract a list of prices from a competitor's website	
business process flow			

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Flow Types		Application Type	Flow Type
cloud flow	• • • •	Update a record after it was created as part of a sales process	business process flow
desktop flow		Extract a list of prices from a competitor's website	cloud flow
business process flow			

#### NEW QUESTION 119

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD.

Proposed solution:

Create a custom rollup field of type currency on the country/region table that aggregates all the total amounts for the orders from that country/region and display this rollup field in a Power BI chart.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

#### NEW QUESTION 122

- (Topic 4)

A company delivers products to multiple communities. The company creates a canvas app connected to a Common Data Service database. The app tracks communities to see where

Drivers must enter delivery information on a form that uses an entity named Delivery. Depot staff must enter information on a pick-up form that uses an entity named Pick-up. Each form contains a community field that is based on a shared list across both forms.

You need to create the community field. Which type of field should you create?

- A. local option set
- B. text
- C. global option set
- D. text area

**Answer:** C

**Explanation:**

Can use a global option set, no need to use localized option sets.

Note: In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here

comes the Option Set advantage – once you define its text values you can centrally managed it. Reference:  
<https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/>

**NEW QUESTION 127**

HOTSPOT - (Topic 4)

A company is using Power Automate to send an email with all active projects that are at risk. Projects that are stored in a table in Microsoft Dataverse are deemed at risk if the column for a risk score is greater than 70 or has a zero value. The flow will loop over all the records in the Dataverse Projects table and update the risk status field based on the risk score. You need to create a single evaluation expression to update the risk status field. Which expression component should you use? To answer, select the appropriate options in NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Expression component
Return a true value if a value in the risk column meets one of the two conditions.	<div>@or</div> <div>@or</div> <div>@and</div> <div>if</div> <div>equals</div>

| Return a true value if a value in the risk column is 0. | equals  @if  contains  @startsWith  equals |
| Return a true value if the value in the risk column is above 70. | greater  @greaterOrEquals  greater  contains  @if |

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Answer Area

Requirement	Expression component
Return a true value if a value in the risk column meets one of the two conditions.	<div>@or</div> <div>@or</div> <div>@and</div> <div>if</div> <div>equals</div>
Return a true value if a value in the risk column is 0.	<div>equals</div> <div>@if</div> <div>contains</div> <div>@startsWith</div> <div>equals</div>
Return a true value if the value in the risk column is above 70.	<div>greater</div> <div>@greaterOrEquals</div> <div>greater</div> <div>contains</div> <div>@if</div>

**NEW QUESTION 130**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution. After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen. A company has locations in multiple countries and regions across four continents. The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table. You need to create a visualization that displays the total amount of orders by country/region in USD. Proposed solution: Create a custom column that converts the order total to USD by using the relationship between order local currency and the USD exchange rate table in Power BI Desktop and display this column in a Power BI chart by country/region. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

**Explanation:**

Instead use a calculated field.  
Need to calculate the exchange rate in USD.  
Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

#### NEW QUESTION 134

- (Topic 4)

You create a canvas app.

You need to ensure that there are no screen reader issues in the app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Open Test Studio.	
Select Formula.	
Open the App checker.	
Select Accessibility.	
Select Error.	

➤  
➤

⬆  
⬆

- A. Mastered  
B. Not Mastered

#### NEW QUESTION 137

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera.

Proposed solution:

? Create a Category Classification custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer: B**

#### Explanation:

Instead create an Object Detection custom model Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

#### NEW QUESTION 141

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

? Create an Object Detection custom model in AI Builder.

? Train the model with pictures of bicycles and then publish the trained model.

? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes  
B. No

**Answer: A**

#### Explanation:

To train an object detection model to recognize your objects, you have to gather images that contain those objects.

The first thing you'll do when you create an AI Builder object detection model is to define its domain.

Upload images

Then Train and publish your object detection model

The object detector component takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo

or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.  
Reference:  
<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

**NEW QUESTION 143**

HOTSPOT - (Topic 4)  
HOTSPOT

Users in your company vote on color choices for marketing materials by using the following canvas app:

Users enter color names into a text control and then select Add color to add the color to the Color options radio control. You must remove all the listed colors when a user selects Clear Selection  
You need to implement the functionality.  
Which Power Fx formulas should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Answer Area

Action	Power Fx formula
User selects <b>Add color</b> .	<div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(Value(txtColor.Text) &lt;&gt;"", Collect(ColorList, txtColor.Text))</div><div>If(Value(txtColor.Color) &lt;&gt;"", Collect(ColorList, txtColor.Color))</div></div>
User selects <b>Clear Selection</b> .	<div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div><div>Reset(radioselector); Clear(ColorList)</div><div>Reset(radioselector); Refresh(ColorList)</div><div>Revert(radioselector); Remove(ColorList)</div><div>Revert(radioselector); ClearCollect(ColorList, txtColor.Value)</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Action	Power Fx formula
User selects <b>Add color</b> .	<div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(txtColor.Value &lt;&gt;"", Collect(ColorList, txtColor.Value))</div><div>If(Value(txtColor.Text) &lt;&gt;"", Collect(ColorList, txtColor.Text))</div><div>If(Value(txtColor.Color) &lt;&gt;"", Collect(ColorList, txtColor.Color))</div></div>

**NEW QUESTION 148**

- (Topic 4)

A company uses data loss prevention (DLP) policies. You have a Power Automate flow that posts Twitter mentions into a Microsoft SharePoint list. You are not able to activate the flow. You need to troubleshoot the issue.  
What are two possible reasons why you cannot activate the flow? Each correct answer presents a complete solution.  
NOTE: Each correct selection is worth one point.

- A. You are not assigned the Power Platform Admin role.
- B. You placed all connectors into the Business group within the DLP policy.
- C. You placed all connectors into the Non-Business group within the DLP policy.
- D. You are not assigned the Environment Admin role.

Answer: BD

Explanation:

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>

**NEW QUESTION 153**

DRAG DROP - (Topic 4)

You perform repeatable tasks using software installed on a home computer. The operating system includes Microsoft Power Automate Desktop.

You need to decide which tasks to automate using Power Automate Desktop.

Which tasks can you automate? To answer, drag the appropriate can automate responses to the correct tasks. Each can automate response may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content

NOTE: Each correct selection is worth one point.

Options

Yes

No

Answer Area

Task

Can automate

Move files from one folder to another, rename them, and put into archive.

When an email arrives, save attachments from Outlook to your OneDrive folder.

Read product prices from an online shop and add them to an Excel file.

Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Options

Yes

No

Answer Area

Task

Can automate

Move files from one folder to another, rename them, and put into archive.

Yes

When an email arrives, save attachments from Outlook to your OneDrive folder.

Yes

Read product prices from an online shop and add them to an Excel file.

Yes

Schedule reading currency exchange rates and save them to an Excel file each day at 7:00 a.m.

Yes

**NEW QUESTION 155**

- (Topic 4)

You are creating an app for a company. You need to evaluate the default solution.

Which two behaviors should you expect from the default solution? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. You can change the prefix of the publisher of the default solution
- B. If you create a Power Automate flow in a solution, the flow uses the prefix defined in the publisher in the publisher
- C. You can change the version number of the default solution

Answer: AC

Explanation:

<https://docs.microsoft.com/en-us/dynamics365/customerengagement/on-premises/customize/use-solutions-for-your-customizations?view=op-9-1>

**NEW QUESTION 158**

- (Topic 4)

You are an app maker.

You want to create apps and track customizations as part of the default solution. You need to determine the impact of performing the work in the default solution.

What should you conclude?

- A. The default solution does not contain all components and customizations from all solutions in the environment.
- B. The prefix used when creating components as part of the default solution can be set to a specific value.
- C. The default solution cannot be exported and distributed to another environment.

Answer: C

Explanation:

Default Solution. This is a special solution that contains all components in the system. The default solution is useful for discovering all the components and configurations in your system.

Why you shouldn't use the default solutions to manage customizations

There are a few reasons why you shouldn't create apps and make customizations in either of the default solutions:

? The default solution can't be exported; therefore, you can't distribute the default solution to another environment.

The default solution contains all components and customizations from all solutions in the environment.

By default, all enabled users can create apps and customize components in the Common Data Services Default Solution.

It's difficult to locate or identify the customizations you've made in the environment by using either default solution.

When you use either default solution to create components, you'll also use the default publisher assigned to the solution. This often results in the wrong publisher prefix being applied to some components.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/use-solutions-for-your-customizations>

**NEW QUESTION 159**

- (Topic 4)

A company stores financial files in Microsoft SharePoint document libraries. When a user uploads a new file, the user's manager must approve the request. You need to design a cloud flow to meet The requirement.

Which three actions should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. When a file is created trigger
- B. Get direct reports action
- C. Wait for an approval action
- D. When an item or a file is modified trigger
- E. When an item is created trigger
- F. Assign manager action
- G. Start and wait for an approval action
- H. Get manager action

**Answer:** AFG

**NEW QUESTION 162**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up.

Proposed solution: Create a Power Automate flow with conditions that use entered data as default data.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed. Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-classic-common-data-service-workflows>

**NEW QUESTION 164**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

The key phrase extraction prebuilt model identifies the main points in a text document.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase>

NEW QUESTION 167

- (Topic 4)

You create an automated flow by using Power Automate. The flow appears under My Flows and is connected to the development environment. The development environment has a solution to move components into a production environment. You need to ensure that you can transfer the flow to another environment. What should you do?

- A. Add the flow to the default solution of the development environment and export as a managed solution.
- B. Change the environment for the flow.
- C. Add the flow to the existing solution.
- D. Add the flow to the default solution of the production environment.

Answer: A

Explanation:

It is very normal for a developer to build the power automate in one environment and then export that automate & import it to another destination environment. Exporting our Solution  
After validating our flows work in our test environment, we now want to promote it to our production environment. We can export our solution by finding it in our Solutions experience, clicking on the ..., selecting Export.  
Reference:  
<https://flow.microsoft.com/en-us/blog/solutions-in-microsoft-flow/>

NEW QUESTION 169

- (Topic 4)

A company creates multiple cases in Microsoft Dataverse each day with a status of New. For all cases with a status of New, the system must send an email to the customer and then change the status to in Process. You need to create a Microsoft Power Automate cloud flow to automatically send the email. What should you do?

- A. Trigger the flow on a schedule and then configure the flow to use the Compose data operation to get a list of cases and send email to each from inside a loop.
- B. Trigger the flow on a schedule and then configure the flow to use the Dataverse Listrows action to query case records using a filter and send email to each from inside a loop.
- C. Trigger the flow manually on the case and then configure the flow to send the email.

Answer: B

NEW QUESTION 174

HOTSPOT - (Topic 4)

HOTSPOT

A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:  
\* Create a model-driven app.  
\* Design navigation for the app  
\* Show an approval name field on the form if the amount is greater than \$1,000.

Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Create model driven app.	<div>App designer</div> <div>App designer</div> <div>Solution checker</div> <div>App checker</div>
Design app navigation.	<div>Site map</div> <div>Site map</div> <div>Solutions area</div> <div>Table designer</div>
Show approval name field if amount > \$1,000.	<div>Table designer</div> <div>Form designer</div> <div>Table designer</div> <div>Business rule designer</div>

- A. Mastered
- B. Not Mastered

Answer: A

NEW QUESTION 177

- (Topic 4)  
A company uses Microsoft Teams. A coworker creates a chatbot. The coworker observes unexpected behavior with the chatbot. You need to troubleshoot the chatbot.  
Which two actions should you recommend to the coworker? Each correct answer presents part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Ask the coworker to assign you to the owner role for the team.
- B. In Advanced tools, select Monitor.
- C. Ask the coworker to add you to their team.
- D. Select the chatbot and then select the Share button.

Answer: AB

NEW QUESTION 180

HOTSPOT - (Topic 4)  
A company uses several forms for biannual performance evaluations. The company several performance areas that have a score of 1-10. A paragraph explains the score.  
The company must scan completed performance evaluations into a Common Data Service entity by using a Power Apps app. The information in the documents must automatically map to entities and convert into quantifiable information.  
If any key phrases in the scored topics cause concern, the company must follow a series of actions to prepare for a follow up.  
You need to extract the information and perform the actions when the evaluations are scanned.  
Which component should you use? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Requirement	Component
Convert the evaluations from images to data	<div><div></div><div>AI Builder</div><div>Power BI</div><div>Dataflows</div><div>Business rules</div></div>
Convert a form processing variable to an integer	<div><div></div><div>Initialize variable</div><div>Add dynamic content</div><div>Append to string variable</div><div>Extract entities and their types from text</div></div>
Use the flow action to convert a form processing variable to an integer	<div><div></div><div>Scope</div><div>Do until</div><div>Condition</div><div>Apply to each</div></div>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: AI Builder

The object detection component of AI Builder for PowerApps takes a photo or loads an image file to do an object detection scan. On a mobile device, the user chooses between taking a photo or selecting one already available in the device user interface. When an image is selected, the component automatically scans it to identify objects.

Box 2: Extract entities and their types from text

The Entity extraction prebuilt model identifies and classifies key elements from text into pre-defined entities. You can use the prebuilt model out of the box in power apps and power automate.

Box 3: Scope

Scope is a simple way to put similar actions and conditions together like a Stage.

**NEW QUESTION 181**

DRAG DROP - (Topic 4)

A company uses Power Apps. You design the interface for a new model-driven app.

Users must interact with data from records related to the primary record form in the following ways:

- Use related business process flows.
- Display primary and related form columns.

You need to configure the forms without using additional customizations.

Which form types should you use? To answer, drag the appropriate form types to the correct requirements. Each form type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct answer is worth one point.

**Form types**

Quick view form

Main form dialog

Quick create form

Main form component control

**Requirement**

Use related business process flows.

Display related columns along with other primary form columns.

**Form type**

**NEW QUESTION 186**

DRAG DROP - (Topic 4)

An insurance broker uses a Microsoft Dataverse environment with custom tables. You create a Power Apps app to manage vehicle insurance policies.

The app has a drop-down field that allows users to categorize a policy holder's driving record. This category field is not mandatory.

You need to ensure that insurance agents enter the correct categories when creating a new vehicle policy.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the

correct order.

Actions

In the vehicle policy table, click on Add subcomponents and navigate to Business rules.

Add a Recommendation card, select the driver record drop-down field and enter the recommendation details.

In the vehicle policy table, navigate to Business rules.

Add a business rule and enter a meaningful business rule name.

Click on the Condition card, select the Vehicle Policy and check for new driver.

NEW QUESTION 193

- (Topic 4)

You create a canvas app named Hardware Order that suggests computer hardware to customers. A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test. You need to configure the business rule. Which two actions should you perform? Each correct answer presents part of the complete solution. NOTE: Each correct selection is worth one point.

- A. Set the scope of the business rule to Entity.  
B. Add a Recommendation action and configure it to enter the order type.  
C. Set the scope of the business rule to All Forms.  
D. Use the following condition expression:(OrderType Does not begin with [test]) AND (Modified By Does not contain data)

**Answer:** AD

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

**NEW QUESTION 197**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario.

Each question in the series contains a unique solution that might meet the stated might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

A. Yes

B. No

**Answer:** A

**Explanation:**

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

**NEW QUESTION 198**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes

**NEW QUESTION 201**

- (Topic 4)

You are creating an employee directory canvas app. The app must display name, address, and a photo of each employee. You need to select a control type that will display the

A. Address input

B. List box

C. Gallery

D. Data table

Answer: C

#### NEW QUESTION 204

HOTSPOT - (Topic 4)

A company is creating new app for use by technicians.

Previous versions of the app do not render properly on tablets and phones. You need to ensure that the new app renders properly on all devices.

Which design element should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Requirement

#### Design element

Create an app that does not specify a screen size in the design

	▼
Phone form factor	
Tablet form factor	
Blank canvas app	
Model-driven app	

Lock the screen size for an app that needs to be set to a specific resolution

	▼
Aspect ratio	
Orientation	
Image positioning	
Display mode	

- A. Mastered
- B. Not Mastered

Answer: A

#### Explanation:

Box 1: Tablet form factor Box 2: Aspect version

Customize a canvas app by changing its screen size.

? Sign in to Power Apps.

? Open the app to edit.

? Select Settings.

? Select Display.

? (Tablet apps only) Under Aspect ratio, perform either of these steps:

? Select the ratio that matches the target device for this app.

? Select Custom to set your own size, and then specify a width between 50 - 3840 and a height between 50 - 2160.

### Settings

- General
- Display**
- Upcoming features
- Support

### Display

Select the screen size and orientation for your app.

Orientation

 Landscape

16:9 Default

3:2 Surface Pro 3

16:10 Widescreen

4:3 iPad

Custom

Locking this automatically maintains the ratio between height

#### NEW QUESTION 209

- (Topic 4)

You are creating a multi-page canvas app that loads tabular data from an external data source.

Once loaded, the data must be available to all screens within the canvas app.

You need to reduce the number of times that the app must retrieve data from the data source.

Which two data stores can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. parameter
- B. collection
- C. environment variable

**Answer:** CD

#### Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-data-sources>

#### NEW QUESTION 213

- (Topic 4)

You are designing an interactive report for a model-driven app. The report will use more than five million records. The query that retrieves data for the report requires more than five minutes to complete.

You need to create the report. Which option should you use?

- A. Interactive dashboard
- B. Power BI
- C. Standard dashboard

**Answer:** B

#### NEW QUESTION 214

DRAG DROP - (Topic 4)

You are designing an app for a bank. You plan to use the following entities in the app:

Entity	Comments
Clients	Clients are assigned to a branch office
Bank accounts	A client may have multiple bank accounts. A bank account may have multiple clients as bank account owners
Branch offices	Clients are assigned to a branch office
Employees	Each employee works at only one branch office

You need to configure the relationships between the entities.

Which relationship types should you use? To answer, drag the appropriate relationship types to the correct relationships. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Relationship types

- One-to-one
- One-to-many
- Many-to-one
- Many-to-many

#### Answer Area

Relationship		
Source entity	Target entity	Relationship type
Clients	Bank accounts	Relationship type
Clients	Branch offices	Relationship type
Branch offices	Employees	Relationship type

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Box 1: Many-to-many

Box 2: Many-to-one

A client have a single branch office.

A branch office can have many clients.

Box 3: One-to-many

A branch office can have many employees. An employee only works at one branch office.

#### NEW QUESTION 216

HOTSPOT - (Topic 4)

You use Microsoft Power BI Desktop to create a report. Users note that column headings are confusing.

You need to modify some columns and delete other columns.  
Which tool should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Modification	Tool
Rename a column	<div>Power Query Editor</div> <div>Report canvas</div> <div>Filters pane</div> <div>Power Query Editor</div>
Delete a column	<div>Fields pane</div> <div>Report canvas</div> <div>Fields pane</div> <div>Filters pane</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

**Answer Area**

Modification	Tool
Rename a column	<div>Power Query Editor</div> <div>Report canvas</div> <div>Filters pane</div> <div>Power Query Editor</div>
Delete a column	<div>Fields pane</div> <div>Report canvas</div> <div>Fields pane</div> <div>Filters pane</div>

NEW QUESTION 218

- (Topic 4)  
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
You are creating a canvas app.  
You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:  
? Create a Category Classification custom model in AI Builder.  
? Train the model with pictures of bicycles and then publish the trained model.  
? Add the Object Detector control to your canvas app.  
Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model Reference:  
<https://docs.microsoft.com/en-us/ai-builder/prediction-overview> <https://docs.microsoft.com/en-us/ai-builder/object-detector-component-in-powerapps>

NEW QUESTION 223

DRAG DROP - (Topic 4)  
A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.  
You need to insert the custom control into the Power Apps app.  
Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Objects	Answer Area	
	Action	Location
<div>Display</div> <div>Screens</div> <div>Components</div>	Import a custom control from a file.	<div></div>
	Add an alignment to the custom control to display it in the middle of the Power Apps app screen.	<div></div>

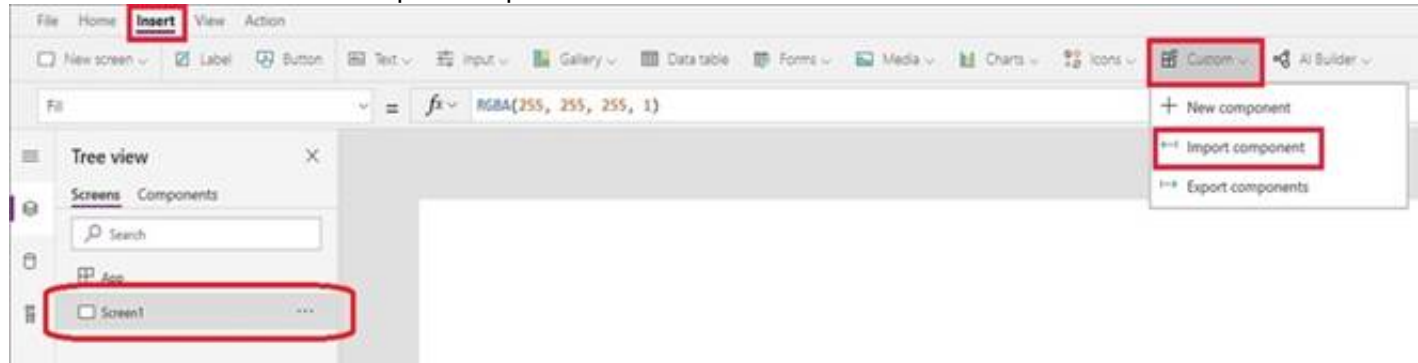

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Components

- \* 1. To add code components to a canvas app:
- \* 2. Navigate to Power Apps Studio.
- \* 3. Create a new canvas app or edit an existing app to which you want to add the code component.
- \* 4. Go to Insert > Custom > Import component.

**NEW QUESTION 227**

DRAG DROP - (Topic 4)

You are an app maker for a college. You create an app for student enrollment. The app captures the education level of the applicants.

The education level at the time of enrollment is an option set in the student entity. The

? High school

? College

? Bachelor

You must split the College option into two option sets:

? College – 1 Year

? College – 2 years

The split must not impact existing data. You need to create the two option sets.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

Open the maker app and navigate to the student table

Publish the student entity

Save the student table

Open settings in the Power Platform admin center

Create new options for College - 1 Year and College - 2 years

**Answer Area**

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

**Actions**

Open the maker app and navigate to the student table

Publish the student entity

Save the student table

Open settings in the Power Platform admin center

Create new options for College - 1 Year and College - 2 years

**Answer Area**

Open the maker app and navigate to the student table

Create new options for College - 1 Year and College - 2 years

Publish the student entity

**NEW QUESTION 229**

- (Topic 4)

You use a Microsoft SharePoint list to record information about customers.

You must perform a series of actions only when a new item is added to a SharePoint list. You need to configure a Power Automate flow.

Which trigger should you use?

- A. When an item is created
- B. When an item is created or modified
- C. When a file is created (properties only)
- D. For a selected item

**Answer:** A

**Explanation:**

Trigger - When an item is created Triggers when an item is created.

MS Flow will trigger when an item is created in the list. It will return all list item properties which can be used in the Flow.

**NEW QUESTION 234**

DRAG DROP - (Topic 4)

A company uses Power Automate and Power Apps to streamline business processes. You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Action	Answer Area
Publish the model.	
Connect data to the model.	
Train the model.	
Use the model in a Power Automate flow.	

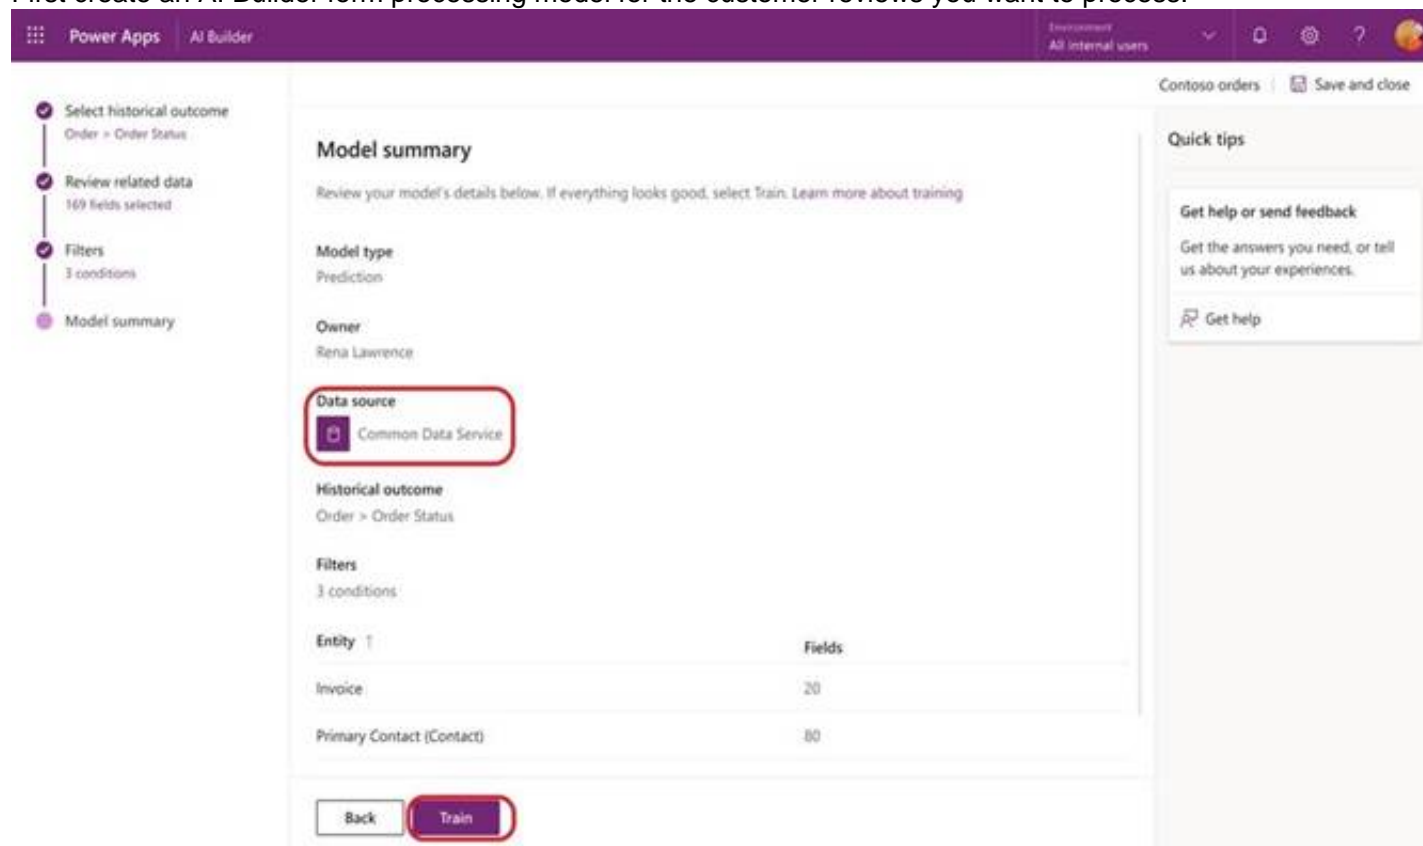

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Connect data to the model.

First create an AI Builder form processing model for the customer reviews you want to process.

Step 2: Train the model. Step 3: Publish the model.

Step 4: Use the model in a Power Automate flow.

Once you train and publish the model, create a solution-aware flow in Power Automate.

**NEW QUESTION 235**

DRAG DROP - (Topic 4)

You create a canvas app. You run App checker to validate the app. App checker returns error results.

You need to locate where the errors occur.

Which areas should you review? To answer drag the appropriate areas to the correct error messages. Each area may be used once, more than once, or not at all

You may need to drag the spirit bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

NEW QUESTION 240

- (Topic 4)

You have a Power Apps solution that includes three model-driven apps, a business process flow, and a scheduled flow. The solution is deployed to a datacentre in the United States.

You plan to deploy the solution to Canada.

You need to identify applicable government regulations for all components of the solution. Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. View results in the Service Trust portal.
- B. Check the results of the Solution checker.
- C. Identify regulations for the region where the tenant resides.
- D. Identify all regulations for the region where the Common Data Service database resides.
- E. Configure data loss prevention (DLP) policies in the Power Platform Admin center.

Answer: ADE

Explanation:

A: The Microsoft Service Trust Portal provides a variety of content, tools, and other resources about Microsoft security, privacy, and compliance practices.

D: The Service Trust Portal contains details about Microsoft's implementation of controls and processes that protect our cloud services and the customer data therein.

NEW QUESTION 244

- (Topic 4)

You are creating a canvas app.

You need to display a limited list of choices to the end user. You must standardize the values and appearance of the list across all forms.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a drop-down field in the app
- B. Create a Global Option Set
- C. Add a new business rule
- D. Add a component to the component library

Answer: AB

Explanation:

A global Option Set can be shared across entities. Reference:

<https://powerapps.microsoft.com/en-us/blog/option-sets-and-many-to-many-relationships-for-canvas-apps/>

NEW QUESTION 245

HOTSPOT - (Topic 4)

HOTSPOT

A bicycle shop uses Microsoft Dataverse to track bicycle rentals and renter information. The bicycle shop has a standalone tablet with a canvas app. Renters use the app to check out bicycles. Only one renter at a time can check out bicycles.

Multiple renters can rent as a team. You must expand the app to allow team rentals in one step. All team members must be registered under a single phone number.

You need to modify the canvas app to display team and team member information, along with bicycle information

Which UI elements should you use for each requirement? To answer, select the appropriate options m the answer area

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	UI element
Phone number lookup	<div>Choice</div> <div>Text input</div> <div>Choice</div> <div>Pen input</div>
Team members and their bicycles	<div>Gallery</div> <div>List box</div> <div>Container</div> <div>Data table</div> <div>Gallery</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Requirement	UI element	
Phone number lookup	<div>Choice</div>	
Team members and their bicycles	<div>Gallery</div>	

NEW QUESTION 249

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- ? Create a Prediction custom model in AI Builder.
- ? Train the model with pictures of bicycles and then publish the trained model.
- ? Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Instead create an Object Detection custom model

Note: AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data, and use them to predict future outcomes.
