Microsoft Power Platform Fundamentals

https://www.certleader.com/PL-900-dumps.html

NEW QUESTION 1
A user is trying to understand the differences between the various ways apps can be built by using Power Apps.
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can embed canvas apps in model-driven apps.	○	○
A Power Apps portal can use only one data source.	○	○
You must use Power BI to create reports in model-driven apps.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Yes
You can create a canvas app and then embed that within a model driven app. Box 2: No
With the capability to build a portal in PowerApps, you can create a website for external and internal users enabling them to interact with data stored in Common Data Service.
Note: Common Data Service lets you securely store and manage data that's used by business applications. Data within Common Data Service is stored within a set of entities. An entity is a set of records used to store data, similar to how a table stores data within a database. Common Data Service includes a base set of standard entities that cover typical scenarios, but you can also create custom entities specific to your organization and populate them with data using Power Query. App makers can then use PowerApps to build rich applications using this data.
Box 3: Yes
To get started building a report you'll need the latest version of Power BI Desktop and a PowerApps environment with the latest version of the Common Data Service.

NEW QUESTION 2
You create a user-owned custom entity by using Common Data Service.
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can change the entity ownership from User to Organization-owned.	○	○
You can create a business rule for a custom entity that can be used in a Flow.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: No
Common Data Service supports two types of record ownership. Organization owned, and User or Team owned. This is a choice that happens at the time the entity is created and can't be changed.
Box 2: Yes
By combining conditions and actions, you can do any of the following with business rules: Set field values
Clear field values
Set field requirement levels Show or hide fields

Enable or disable fields
Validate data and show error messages
Create business recommendations based on business intelligence.

NEW QUESTION 3
A company uses Microsoft Flow.
Each time a work order is created, a service manager must review and approve the work order before a worker is dispatched.
You need to create a flow to enforce the process. What should you create?

A. plug-in
B. approval flow
C. business rule
D. team flow
E. instant flow

Answer: B

Explanation:
With Power Automate, you can manage the approval of documents or processes across several services, including SharePoint, Dynamics 365, Salesforce, OneDrive for Business, Zendesk, or WordPress.

NEW QUESTION 4
Your company has an on premises Microsoft SQL Server database that contains legacy sales data. You must display information from the database in a new Power Apps app.
You need to establish a secure connection between the database and the app. What should you use?

A. Data source
B. App
C. Gateway
D. Flow

Answer: C

Explanation:
For an on-premises database, identify a data gateway that was shared with you (or create one).
Specify Connect using on-premises data gateway, type or paste the server name, the database name, the user name, and the password for the database that you want to use, and specify the authentication type and the gateway.

NEW QUESTION 5
You build a flow using a template. You want to add support for additional business scenarios.
You need to ensure that the new workflow does not break existing functionality.
Which flow editing utilities should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Tools	Answer Area	
Test	**Requirement**	**Tool**
Flow Checker	Check the new flow for any errors or warnings.	Tool
	Run the flow using previously processed data.	Tool
	Monitor the flow as it is running.	Tool

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Flow Checker
The Flow checker feature will promote higher quality flows by ensuring you follow best practices. By running the checker, you will be able to get answers to questions like: which areas of my flow implementation pose a performance or reliability risk?
For each issue identified, the Flow checker points to specific occurrences within the flow where improvements may be required. And more importantly, you learn how to implement these improvements by following detailed guidance.
Box 2: Test

Box 3: Test

NEW QUESTION 6

A toy company creates a text classification model in AI Builder to monitor customer feedback for specific key words.
When negative feedback is received for a toy, the company wants to proactively perform engineering reviews for the toy and schedule additional training sessions for workers who produce the toy.
What are two possible ways to achieve the goal? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Create a canvas app.
B. Implement the Virtual Agent.
C. Build a Microsoft Flow.
D. Use the Common Data Model.

Answer: AC

Explanation:
A (not D): AI Builder comes with:
A ready-to-use business card reader available in canvas as well as in model-driven apps. Business card reader (Canvas)
Business card reader (Model-driven)
Additional canvas components to leverage your AI Builder form processing or object detection models canvas apps.
C: Use the results from your AI model across Power Platform to create end-to-end solutions that meet your business needs, even if you have no coding skills. For example, create a flow that automates document processing in Power Automate, or an app created with PowerApps that predicts whether a supplier will be out of compliance.

NEW QUESTION 7

You need to explain the major components of the Common Data Model (CDM) and their functions. Match each term to its definition.
Instructions: To answer, drag the appropriate term from the column on the left to its definition on the right. Each term may be used once, more than once, or not at all. Each correct match is worth one point.
NOTE: Each correct selection is worth one point.

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: Microsoft Power Platform
Power Platform combines the robust power of PowerApps, PowerBI, and Microsoft Flow into one powerful business application platform – providing quick and easy app building and data insights. Each component of the Microsoft Power Platform is built on the Common Data Service for Apps. Each component is dynamic by itself, but brilliant and masterful when combined.
The Microsoft Power platform brings all your data together into a common data model. Box 2: Entities
An entity is a set of records used to store data, similar to how a table stores data within a database.

NEW QUESTION 8

A large retail company implements Power Apps, Microsoft Flow, and the Common Data Service.
The board of directors is asking whether users are finding value in the technology. The company would like to measure and report usage of the software.
You need to recommend a tool to determine software usage. What should you recommend?

A. Microsoft Intune
B. Azure Stream Analytics
C. Power Platform Analytics
D. Dynamics 365 Product Insights

Answer: C

Explanation:
The Power Platform Analytics Usage report is the default reports seen by the logged in environment admin. It provides total app launches and daily active users across all apps in the environment. Admins can filter the view with attributes like device platform, player version, country, state, and city.

NEW QUESTION 9
A coworker is creating an app in Power Apps and needs to automatically synchronize data from an external source. The coworker is unable to locate a suitable Microsoft approved connector template in AppSource.
You need to recommend a solution for the coworker. What should you recommend?

A. Create a custom connector.
B. Ask the outside source to send you the data once a week.
C. Use Microsoft Flow to connect to the database.
D. Open a ticket with Microsoft and request a new connector.
E. Use Microsoft Azure Service Bus.

Answer: A

Explanation:
There are 250 + predefined connectors that you can use in your PowerApps and in your Microsoft Flows. If you do not find any that suits your needs you have the possibility to create a Custom Connector.
Note: A Custom Connector is a wrapper around a REST API (Logic Apps also supports SOAP APIs) that allows Logic Apps, Microsoft Flow, or PowerApps to communicate with that REST or SOAP API.

NEW QUESTION 10
A company plans to implement solutions that use Common Data Service as a data storage. You need to recommend features to meet the company's needs. Which features should you recommend? To answer, drag the appropriate features to the correct requirements. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Features		Answer Area	
business rules		**Requirement**	**Feature**
business process flows		Validate data across multiple fields and entities regardless of the app used to create data.	Feature
Common Data Model		Create visual guides to ensure that users enter data and perform tasks in a consistent manner.	Feature
		Accelerate development by using a standard set of entities for the most common scenarios.	Feature

A. Mastered
B. Not Mastered

Answer: A

Explanation:
Box 1: business rules
You can create business rules and recommendations to apply logic and validations without writing code or creating plug-ins. Business rules provide a simple interface to implement and maintain fast-changing and commonly used rules.
Box 2: business process flows
Flows Power Automate includes several types of processes, each designed for a different purpose:

≫ Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.

≫ Button flows. Perform repetitive tasks simply by tapping a button on your mobile device.

≫ Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.

≫ Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.

≫ Workflows and actions. Dynamics 365 customizers may be familiar with the classic Common Data Service processes, which are workflows and actions.
Box 3: Common Data Model
Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

NEW QUESTION 10
You need to implement Microsoft Business Applications along with the Microsoft Power platform. Which three Microsoft products are part of the Power platform?
Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Microsoft Power Apps
B. Azure Active Directory
C. Microsoft Flow
D. Azure Machine Learning
E. Microsoft Power BI

Answer: ACE

Explanation:
The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

NEW QUESTION 12
This question requires that you evaluate the BOLD text to determine if it is correct.
You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.
Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

A. No change is needed.
B. one
C. three
D. four

Answer: C

Explanation:
Restore a canvas app to a previous version in PowerApps.
1. Open powerapps.com, and then click or tap Apps in the left navigation bar.
2. Near the right edge, click or tap the info icon for the app that you want to restore.
3. Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

4. In the confirmation dialog box, click or tap Restore. A new version is added to your list.

NEW QUESTION 15

Users within a company use Flow for personal productivity.
Users often overwrite their working flows by editing the definitions and are unable to undo changes after saving a flow.
You need to ensure that users can revert a flow to the current state.
Which two options can you use? Each correct answer presents a complete solution.
NOTE: Each correct selection is worth one point.

A. Export
B. Rename
C. Save As
D. Share

Answer: AC

Explanation:
A: You can export a flow as a package and import it into a different environment, or use it to restore the in the same environment at a later point in time.
C: The ability to make a copy of your flow is often useful when you want to create a flow similar to something you've already created. Or, if you want to maintain a draft of your working flow as you work on adding more functionality.
Here's how:
Go to your My flows page. Click on the More (…) menu item next to the flow that you want to create a copy of. Click on the Save As command.

NEW QUESTION 17
A company plans to implement Power Platform apps. The company does not plan to use any development tools or plug-ins.
Which actions can you perform?
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Statement	Yes	No
You can synchronize account names with a third-party proprietary database.	○	○
You can create invoices from orders and then send the invoices to the customer.	○	○

A. Mastered
B. Not Mastered

Answer: A

Explanation:
The Power Platform uses PowerApps, Power BI, and Power Automate (previously named Flow) to customize, extend, and build all the apps you need for your business and unlock the potential of Office 365 and Dynamics 365.

NEW QUESTION 19
This question requires that you evaluate the BOLD text to determine if it is correct.
A company requires that service representatives schedule customer visits every six months. Each service representative is required to enter a scheduled task for the next checkup as they are leaving a client site. A service representative wants to automate task entry by creating a business process flow that can be initiated from the service call screen on a phone.
Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

A. No change is needed.
B. a scheduled
C. an instant
D. an action

**Answer:** D

Explanation:
Note: Create a flow (see step 6 below)
1). Sign in to PowerApps.
2). In the left navigation bar, select Business logic, and then select Flows.
3). In the upper-left corner of the My Flows page, select New, and then select Create from blank.
4). Option to create a flow without using a template
Near the bottom of the page that appears, select Search hundreds of connections and triggers.
5). In the search box, type PowerApps, and then select the PowerApps icon.
6). Create a PowerApps trigger

7). On the next page, select the PowerApps icon again, and then select New step.
8). In the box that says Search connectors and actions, specify an action for your flow, as in this example:
