

# Microsoft

## Exam Questions PL-100

Microsoft Power Platform App Maker

**NEW QUESTION 1**

- (Exam Topic 1)

You need to meet the requirements for sales representative that submit status reports. How should you configure the flow?

- A. Add a parallel branch that uses the value of a dynamic content variable
- B. Add a number functions action that evaluates the risk value by using a static variable to determine if an email is required
- C. Add a condition that evaluates the risk value by using a dynamic content variable
- D. Add a data operation action that evaluates a dynamic content variable

**Answer:** C

**Explanation:**

Salespeople often do not set status of RFQs in the Sales Log to Won when a sale is closed and the customer purchase order is received. Include a dashboard that shows all currently active quotes, their status in the sales cycle, the probability of closing, and estimated manufacturing and installation dates, by customer, product division, status, and salesperson.

**NEW QUESTION 2**

- (Exam Topic 1)

You need to provide the app to Tailwind Traders. What should you do?

- A. Within Managed Properties, set the value of the Allow customizations option to tru
- B. Export the app as a managed solution.
- C. Use the Share App feature.
- D. Within Managed Properties, set the value of the Allow customizations option to fals
- E. Export the app as a managed solution.
- F. Within Managed Properties, set the value of the Allow customizations option to fals
- G. Export the app as an unmanaged solution.

**Answer:** C

**Explanation:**

Scenario: The completed app and all supporting components must be provided to Tailwind Traders. Tailwind Traders must not be able to make changes to any of the components.

Managed Solution: A managed solution is a finalized solution that can be distributed and installed. They are created by exporting an unmanaged solution by setting restrictions to prevent any further customizations. The whole point of Managed is locking down the Component states so they cannot be edited. Deleting the Managed Solution will remove all its customisations as well as data contained. Managed Solutions become read only once deployed so they cannot be manipulated.

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

**NEW QUESTION 3**

- (Exam Topic 1)

You need to roll back the mobile app to an earlier version.

What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	Action
Identify the currently published version and view version notes.	<div>View the session details page for the app in Power Apps Studio.</div> <div>View environment details for the app in the Power Admin portal.</div> <div>View details for the app in the Power Apps Maker portal.</div>
Revert to an earlier version of the app.	<div>Select Restore on the previous version of the app.</div> <div>Export the previous version of the app and import as a new version.</div> <div>Delete versions of the app until the desired version is the most recent.</div>

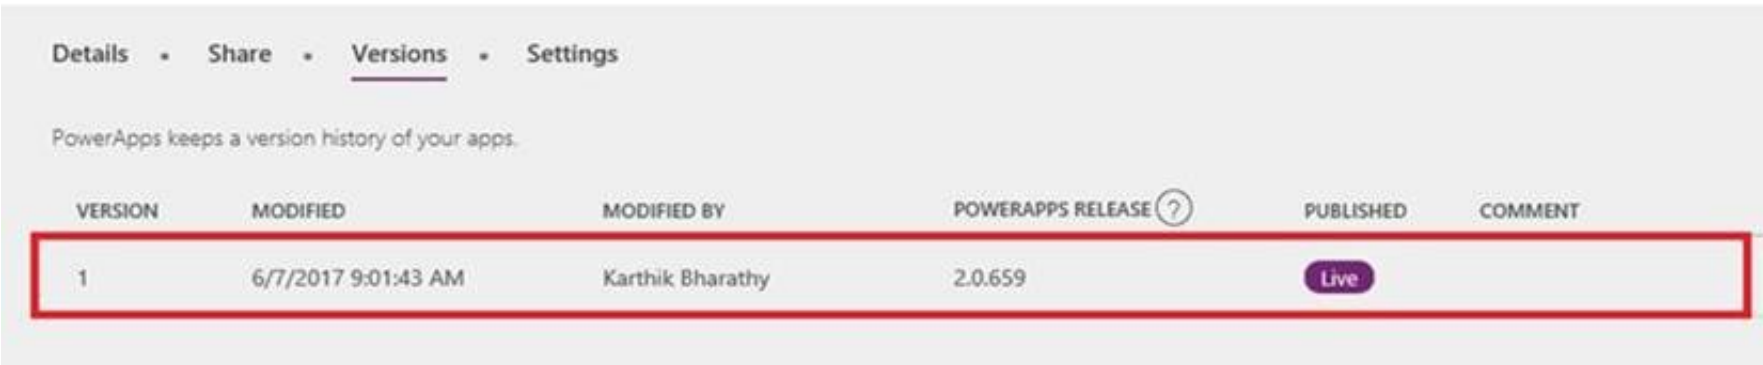

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: View the sessions details page for the app in Power Apps Studio

Use PowerApps Studio, select the App, and choose and you will be directed to the app's Versions tab in PowerApps portal. There should be one version marked Live.

VERSION	MODIFIED	MODIFIED BY	POWERAPPS RELEASE	PUBLISHED	COMMENT
1	6/7/2017 9:01:43 AM	Karthik Bharathy	2.0.659	Live	

Box 2: Select Restore on the previous version of the app. Restore an app from your account

- Open powerapps.com, and then click or tap Apps in the left navigation bar.
- Near the right edge, click or tap the info icon for the app that you want to restore.
- Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

Details • Share • Versions • Settings • Analytics (preview)					
PowerApps keeps a version history of your apps.					
VERSION	MODIFIED	MODIFIED BY	POWERAPPS RELEASE ?	PUBLISHED	COMMENT
2	8/20/2018 2:24:29 PM	Firstname Lastname	3.18081.19	Live	 Restore  Delete
1	7/9/2018 10:55:48 AM	Firstname LastName	3.18071.36		 Restore  Delete

Reference:  
<https://powerapps.microsoft.com/sk-sk/blog/saveandpublish/> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app>

**NEW QUESTION 4**

- (Exam Topic 1)

You need to configure the app to meet the requirements.

Which object properties should you configure? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	Property
Provide a visual indicator when the app is offline.	<div><div></div><div>Visible</div><div>OnSelect</div><div>DisplayMode</div><div>Fill</div></div>
Store data when the app is offline.	<div><div></div><div>OnSelect</div><div>LoadData</div><div>SubmitForm</div><div>Now</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Fill

Scenario: You must display a visual indicator in the app so that sales representatives know whether the app is offline before submitting reports.

Fill – The background color of a control. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-screen> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-form>

**NEW QUESTION 5**

- (Exam Topic 1)

You need to create the mobile app. Which type of app should you create?

- A. model-driven app
- B. portal app
- C. Microsoft 365 web app
- D. canvas app

**Answer:** D

**Explanation:**

An accessible canvas app will allow users with vision, hearing, and other impairments to successfully use the app. In addition to being a requirement for many governments and organizations, following the below guidelines increases usability for all users, regardless of their abilities.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessible-apps>

**NEW QUESTION 6**

- (Exam Topic 2)

You need to configure the system to meet the sales requirements.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Action
Ensure that work estimates are complete before entering estimated sales values into the Sales Log.	<div><div></div><div>Use a Business Process flow</div><div>Use a UI flow</div></div>
Prevent modification of timesheet entries by an employee.	<div><div></div><div>Add a custom control to the Business Process flow</div><div>Use a formula to set the DisplayMode property</div><div>Use a business rule</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: Use a Business Process flow

Scenario: The Sales Log app must enforce process standards related to the completion of estimates and supporting materials needed during the sales lifecycle.

Box 2: Use a formula to set the DisplayMode property

DisplayMode - The mode to use for data cards and controls within the form control. Derived from the Mode property based and cannot be set independently:

Graphical user interface, text, application, email Description automatically generated

Mode	DisplayMode	Description
FormMode.Edit	DisplayMode.Edit	Data cards and controls are editable, ready to accept changes to a record.
FormMode.New	DisplayMode.Edit	Data cards and controls are editable, ready to accept a new record.
FormMode.View	DisplayMode.View	Data cards and controls are not editable and optimized for viewing.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-form-detail>

NEW QUESTION 7

- (Exam Topic 2)

You need to implement the change requested by the operations manager. Which control should you use?

BF70D5D

- A. Camera
- B. Shape
- C. Add picture
- D. Image

Answer: D

Explanation:

Scenario: The operations manager asks that the time tracking app display the employee’s photo once they have scanned their badge.

Image control in Power Apps is a control that shows an image from, for example, a local file or a data source. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-image>

NEW QUESTION 8

- (Exam Topic 2)

You need to resolve the user’s issue with the time tracking app.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Add a component to the time tracking screen for tracking total time.
- B. Create a new component inside of the component library for the time tracking app.
- C. Upload the component to AppSource.
- D. Add the Total Time field to the screen and set the value of the field property to Rollup

Answer: AB

Explanation:

Scenario Issue: Users want to be able to see their weekly total time entered from all screens.

A component library provides a centralized and managed repository of components for reusability. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>

NEW QUESTION 9

- (Exam Topic 3)

An automobile company uses Power Apps. The company uses a model-driven app to manage customers and repairs. The Customer table has a custom column of type text named Best time to call. On the Repair form, employees require the Best time to call column to be displayed next to the customer name. You need to modify the model-driven app to display the Best time to call column. Which two steps should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

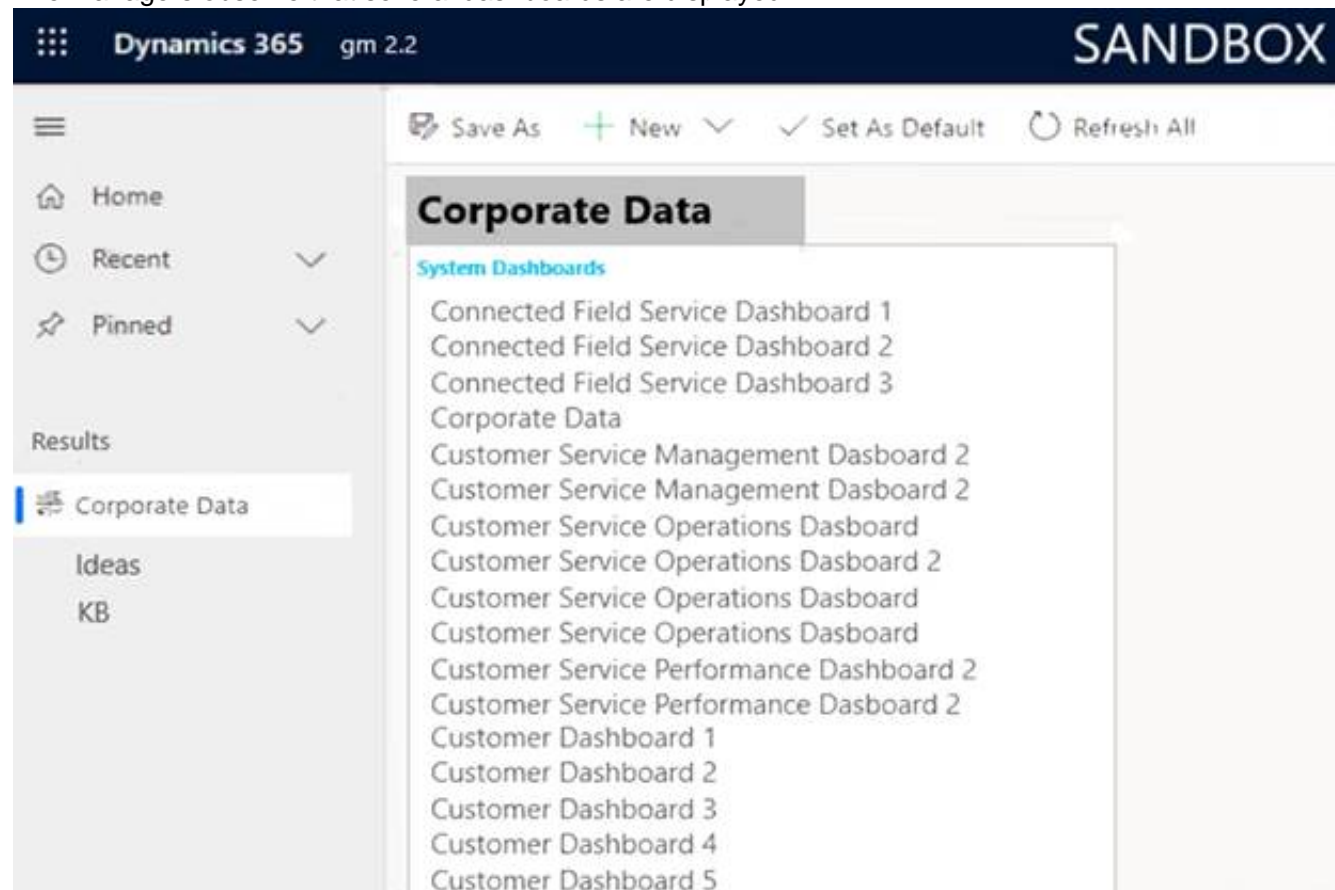

- A. Add The Best time to call column to the quick view Repair form.
- B. Create a quick view form for the Repair table.
- C. Create a quick view form for the Customer table.
- D. Add the Best time to call column to the quick view Customer form.

**Answer:** CD

#### NEW QUESTION 10

- (Exam Topic 3)

The managers in an organization use a model-driven app. The app should display only one dashboard named Corporate Data. The managers observe that several dashboards are displayed.

Use the drop-down menus to select the answer choice that answers each question based on the information presented in the graphic. NOTE: Each correct selection is worth one point.

How do you remove all the dashboards from the list of dashboards displayed?

	▼
Open the model-driven app in the app designer and clear all dashboard check boxes except the Corporate Data dashboard.	
Open the site map in the sitemap designer and clear all dashboard check boxes except the Corporate Data subarea except for the Corporate Data dashboard.	
Open the solution and delete all dashboards from the solution except for the Corporate Data dashboard.	

You need to remove the Ideas dashboard from the navigation bar. What should you do?

	▼
Open the model-driven app in the app designer and clear the check box for the ideas dashboard	
Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group	
Open the solutions and delete all the Ideas dashboards from the solution	

- A. Mastered
- B. Not Mastered

**Answer:** A

#### Explanation:

Table Description automatically generated

Box 1: Open the model-driven app in the app designer.

\* 1. On the app designer canvas, select the Dashboards tile.

On the app designer canvas, the right pane shows dashboards that are available in the default solution.

\* 2. Clearing the corresponding check box.

Box 2: Open the site map in the sitemap designer and delete the Ideas dashboard from the Results group Site maps define the manner by which users move between tables in a model-driven app.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/add-edit-app-components>

#### NEW QUESTION 10

- (Exam Topic 3)  
HOTSPOT  
A company uses Power Apps and Microsoft Data verse. You need to perform the following activities:  
\* Create a model-driven app.  
\* Design navigation for the app  
\* Show an approval name field on the form if the amount is greater than \$1,000.  
Which features should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Activity	Feature
Create model driven app.	<div>App designer</div> <div>App designer</div> <div>Solution checker</div> <div>App checker</div>
Design app navigation.	<div>Site map</div> <div>Site map</div> <div>Solutions area</div> <div>Table designer</div>
Show approval name field if amount > \$1,000.	<div>Table designer</div> <div>Form designer</div> <div>Table designer</div> <div>Business rule designer</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Answer Area

Activity	Feature
Create model driven app.	<div>App designer</div> <div>App designer</div> <div>Solution checker</div> <div>App checker</div>
Design app navigation.	<div>Site map</div> <div>Site map</div> <div>Solutions area</div> <div>Table designer</div>
Show approval name field if amount > \$1,000.	<div>Table designer</div> <div>Form designer</div> <div>Table designer</div> <div>Business rule designer</div>

NEW QUESTION 14

- (Exam Topic 3)  
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.  
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.  
You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.  
Development and testing must be performed using production data. Multiple testers must be used at each testing stage.  
You need to provision and configure new environments for development and testing. Solution:

- > Provision a developer environment named D1 and a sandbox environment named S1.
- > Copy the production environment to both D1 and S1.
- > Use D1 for development and S1 for testing. Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

Production: This is intended to be used for permanent work in an organization. Do not use production environment for testing.  
Note: Instead use two sandboxed environments: one for development and one for testing. Reference:  
<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

NEW QUESTION 17

- (Exam Topic 3)  
A company creates a Power Apps app that allows service representatives to record information about on-site client visits. Service representatives perform a one-hour site visit with each client each quarter.  
Service representatives use the app to perform the following activities:  
> View their scheduled visits for the day.  
>

Record notes from service visits.

> Schedule service technicians for issues uncovered during site visits.

> Scan and upload service quote forms to a folder named Service Quote folder on Microsoft OneDrive once the customer has signed a service quote.

Service quotes that are over \$10,000 are automatically sent to the service manager for review and approval. Visits that are not closed at the end of the day are automatically moved to the following day unless it is the last day of the quarter. All client visits not performed for the quarter are escalated to the service manager for follow-up.

You need to create flows to meet the requirements.

Which type of flows should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Type of flow
Move client visits not completed for the day.	<div>▼</div> <div> Scheduled flow  Automated flow  Adaptive card flow  Team flow </div>
Approve service quote.	<div>▼</div> <div> Automated flow  Button flow  Scheduled flow  Team flow </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

Box 1: Adaptive card flow

Adaptive Cards are a platform-agnostic method of sharing and displaying blocks of information without the complexity of customizing CSS or HTML to render them.

Directing content to Teams channels:

Post your own adaptive card as the Flow bot to a channel

This action posts an adaptive card as a Flow bot to a specific Teams channel. In this case, you will be prompted for Teams instance, and a channel where the card will be posted. The flow-maker will have to have access to the Teams instance in order to post an adaptive card there. In this case, only URL buttons function by redirecting to the URL configured within the flow.

Box 2: Button flow

Create a button flow to run routine tasks by simply tapping a button. Customize your flow by allowing the user to provide specific details that will be used when the flow runs.

Reference:

<https://docs.microsoft.com/en-us/power-automate/overview-adaptive-cards> <https://docs.microsoft.com/en-us/power-automate/button-flow-with-user-input-tokens>

**NEW QUESTION 21**

- (Exam Topic 3)

You create a canvas app named Hardware Order that suggests computer hardware to customers.

A value must be entered for the EmployeeID field when creating a new order if the value in the OrderType field does not contain the prefix test.

You need to configure the business rule.

Which two actions should you perform? Each correct answer presents part of the complete solution.

NOTE: Each correct selection is worth one point.

- A. Set the scope of the business rule to Entity.
- B. Add a Recommendation action and configure it to enter the order type.
- C. Set the scope of the business rule to All Forms.
- D. Use the following condition expression: (OrderType Does not begin with [test]) AND (Modified By Does not contain data)

**Answer:** AD

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/common-data-service/data-platform-create-business-rule>

**NEW QUESTION 23**

- (Exam Topic 3)

You are an app builder for a medical office. The medical office uses activities to book appointments and business process flows to track patient status. The cleaning staff wants the app to connect directly to a Microsoft Excel workbook to track cleaning tasks. The office does not have access to reporting tools including Power BI.

You need to create apps for the following groups of users. Apps must not require customizations or the use of additional products.

Groups	Comments	Requirements
Reception area staff	Users will access the app only from desktop devices in the office.	Users must be able to access contacts and display activities as a doughnut chart.
Medical staff	Users will access the app from tablet devices.	Users must be able to access activities and business process flows.
Cleaning staff	Users will access the app only from mobile phone devices.	Users must be able to interact with a checklist to mark cleaning tasks as completed.

Which type of app should you build for each group? To answer, drag the appropriate app types to the correct groups. Each app type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

App types

Canvas app

Model-driven app

Embedded canvas app

Answer Area

Group	App type
Reception area staff	App type
Medical staff	App type
Cleaning staff	App type

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/embedded-canvas-app-guidelines> <https://global.hitachi-solutions.com/blog/canvas-vs-model-driven-apps>

NEW QUESTION 27

- (Exam Topic 3)  
HOTSPOT

A company is creating an app to manage project status reports. Users will update a series of controls and dick a submit button. The submit button will calculate a risk score for the project and return to the previous screen with that risk score. The risk score will be used in two different forms. You need to create the formula on the button click. To answer, select the appropriate option in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Action	Formula component
Assign the scope for the variable.	<div>Global variable Collection Context variable Global variable Lookups</div>
Separate the calculate action from the previous screen.	<div></div>
Go to the next page.	<div>Navigate() Navigate() Revert() NewForm() SetFocus()</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 30

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Key Phrase Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The key phrase extraction prebuilt model identifies the main points in a text document. Reference:  
<https://docs.microsoft.com/en-us/ai-builder/prebuilt-key-phrase>

NEW QUESTION 31

- (Exam Topic 3)

You are creating an app for an organization's human resources (HR) department. You create an Employee entity in an unmanaged Common Data Service solution.

Another user creates the following Power Automate flows separately from the solution:

Flow	Description
FlowA	Send email to the HR manager when a new document is uploaded to Microsoft SharePoint.
FlowB	Send email to the HR manager after a user selects a document in Microsoft OneDrive for Business and runs the flow.
FlowC	Send email to the HR manager at 8 AM daily if new documents are uploaded in Microsoft OneDrive for Business since the previous day.
FlowD	Send email to the HR manager when a new employee record is added.

You need to incorporate the flows that can be added to the solution.

Which two flows can you include? Each correct selection presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. FlowA
- B. FlowB
- C. FlowC
- D. FlowD

Answer: AD

Explanation:

You can add any of these conditions to determine precisely when your flow is triggered.

 When a record is created, updated or deleted

\* Trigger condition

\* The entity name

\* Scope

<https://docs.microsoft.com/en-us/power-automate/connection-cds-native>

NEW QUESTION 32

- (Exam Topic 3)

You create an app with multiple screens.

Test users report that the size and type of gallery displayed on each screen are different. You must improve the consistency for the app screens.

You need to create a reusable gallery that displays information based on the current record.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Add a gallery control.

Add an input property.

Create a component.

Add a screen.

Create a form.

Add an output property.

Answer Area

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Create a component
- Add an input property
- Add a gallery control

From <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component> step 10 and 11

NEW QUESTION 35

- (Exam Topic 3)

You need to create a model-driven app without using code.

Which tools should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Requirement

## Tool

Select the forms and views that the app will use.

	▼
Site Map designer	
Solution Explorer	
App designer	
Entity view	

Design the navigation for the app.

	▼
Site Map designer	
Dynamics 365 Admin center	
Microsoft Azure DevOps	

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

Graphical user interface, application Description automatically generated

Box 1: App designer

As an app maker, you can create and edit public views by using Power Apps. Box 2: Site Map designer

Site maps define the navigation for your app. Create a site map for your app with ease by using the tile-based site map designer.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-edit-views-app-designer> <https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/create-site-map-app>

## NEW QUESTION 40

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Text Recognition model.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** A

### Explanation:

Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prebuilt-text-recognizer-component-in-powerapps>

## NEW QUESTION 43

- (Exam Topic 3)

DRAG DROP

You are creating a Power Automate cloud flow to update a column on each Item in a list of Microsoft Dataverse records. Records are sorted in order of priority.

You must use a complex expression to determine the column value. The column value must be stored in a variable to make future maintenance easier. Records must be processed based on the sorted order.

You need to add flow steps to process the list of records.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Filter the array.

Use the Apply to each loop running in parallel.

Initialize the variable.

Use the Apply to each loop running sequentially.

Set the variable.

Update the Microsoft Dataverse row.

>

<

Answer Area

>

NEW QUESTION 44

- (Exam Topic 3)

A company has an on-premises system that stores product information. The company plans to replace the information with a Power Platform solution that uses the Common Data Service.

The Power Platform solution needs to use data from the product information system. You need to transform and import the data from the product information system. Which two tools should you use? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Dataflow
- B. Business process flow
- C. Power BI Desktop
- D. Data gateway

Answer: AD

Explanation:

The on-premises data gateway acts as a bridge to provide quick and secure data transfer between onpremises data (data that isn't in the cloud) and several Microsoft cloud services. These cloud services include Power BI, PowerApps, Power Automate, Azure Analysis Services, and Azure Logic Apps. By using a gateway, organizations can keep databases and other data sources on their on-premises networks, yet securely use that on-premises data in cloud services.

Can use the Power Platform dataflows to load entity in CDS with the option to transform data. Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-onprem> <https://nishantrana.me/2020/07/07/load-data-from-sql-on-premise-to-cds-common-data-service-using-powerplat>

NEW QUESTION 49

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a canvas app.

You need to automatically detect bicycles in pictures taken with the camera. Proposed solution:

- > Create a Prediction custom model in AI Builder.
- > Train the model with pictures of bicycles and then publish the trained model.
- > Add the Object Detector control to your canvas app.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead create an Object Detection custom model

Note: AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data, and use them to predict future outcomes.

Reference:

<https://docs.microsoft.com/en-us/ai-builder/prediction-overview>

**NEW QUESTION 53**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents.

The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD. Proposed solution:

Create a custom rollup field of type currency on the country/region table that aggregates all the total amounts for the orders from that country/region and display this rollup field in a Power BI chart.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

**NEW QUESTION 55**

- (Exam Topic 3)

A company is building a Power Apps app to track key project tasks.

Users assign three tasks a risk status on a scale of 0 to 100 by using slider input controls named RiskStatus on the app. The highest risks use the risk status value of 100.

Task name	Slider input control name
Task1	RiskStatus1 [0–100]
Task2	RiskStatus2 [0–100]
Task3	RiskStatus3 [0–100]

If the combined value of all the tasks is 150 or above, a header bar on the screen must display the text HIGH RISK.

You need to configure a solution to change the text on the header bar.

How should you configure the app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Where should you apply logic to change the text?	<div><div></div><div>On the header control.</div><div>On each RiskStatus slider input.</div><div>In the global variables of the Power Apps app.</div><div>On the OnStart property of the Power Apps app.</div></div>
Which formula should you use?	<div><div></div><div>SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&gt;=150? "HIGH RiSK" : " "</div><div>IF(SUM(RiskStatus1.value,RiskStatus2.value,RiskStatus3.value)&lt;150, " ", HIGH RiSK")</div><div>Updateif((RiskStatus1.value+RiskStatus2.value+RiskStatis3.value)&gt;=150, "HIGH RiSK")</div><div>UpdateContext(IF(RiskStatus1.value+RiskStatus2.value+RiskStatus3.value&gt;=150), "HIGH RiSK")</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, application Description automatically generated

Box 1: On each RiskStatus slider input You can change the value based on input. Box 2: Updateif(..)

Use the UpdateIf function to modify one or more values in one or more records that match one or more conditions. The condition can be any formula that results in

a true or false and can reference columns of the data source by name. The function evaluates the condition for each record and modifies any record for which the result is true.  
Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-formulas#change-a-value-based-> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-update-updateif>

**NEW QUESTION 56**

- (Exam Topic 3)  
HOTSPOT

A bicycle shop uses Microsoft Dataverse to track bicycle rentals and renter information. The bicycle shop has a standalone tablet with a canvas app. Renters use the app to check out bicycles. Only one renter at a time can check out bicycles.  
Multiple renters can rent as a team. You must expand the app to allow team rentals in one step. All team members must be registered under a single phone number.  
You need to modify the canvas app to display team and team member information, along with bicycle information  
Which UI elements should you use for each requirement? To answer, select the appropriate options in the answer area  
NOTE: Each correct selection is worth one point.

Answer Area

Requirement	UI element
Phone number lookup	<input type="text" value="Choice"/>
	<input type="text" value="Text input"/>
	<input checked="" type="checkbox"/> Choice
	<input type="text" value="Pen input"/>
Team members and their bicycles	<input checked="" type="checkbox"/> Gallery
	<input type="text" value="List box"/>
	<input type="text" value="Container"/>
	<input type="text" value="Data table"/>
	<input checked="" type="checkbox"/> Gallery

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:  
Answer Area

Requirement	UI element
Phone number lookup	<input type="text" value="Choice"/>
	<input type="text" value="Text input"/>
	<input checked="" type="checkbox"/> Choice
	<input type="text" value="Pen input"/>
Team members and their bicycles	<input checked="" type="checkbox"/> Gallery
	<input type="text" value="List box"/>
	<input type="text" value="Container"/>
	<input type="text" value="Data table"/>

**NEW QUESTION 61**

- (Exam Topic 3)

You have a model-driven app that has an entity named Marinas. You have an entity named Boats that list the boats associated with each marina.  
You must add a list of boats to the Marinas form. You must also add an option for users to select different views including boat owners and marina members.  
You need to embed the list of boats associated with a Marina record in the entity form.  
In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add a Subgrid component to a form	
Select <b>Show related records</b> and then select the related entity and default view for the subgrid	
Save and publish the form	
Select the <b>Allow users to change view</b> option	

- A. Mastered  
 B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text, application Description automatically generated

Step 1: Add a Subgrid component to a form

You add a subgrid component the same way as you add any other component.

Step 2: Select Show related records and then select the related entity and default view for the subgrid Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

> Show related rows

When selected, the subgrid displays only rows related to the current row that is displayed on the form.

Step 3: Select the Allow users to change view option

Configure a subgrid component.

Properties available to configure when using a subgrid component on a form using the form designer include:

> Allow users to change view

When selected, app users can change from the Default view to another view of the table selected in the Table property.

Step 4: Save and publish the form Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/form-designer-add-configure-subgrid>

**NEW QUESTION 66**

- (Exam Topic 3)

You are creating a canvas app for a company that delivers packages. The app will display one screen for each delivery attempt.

Drivers must make three attempts to deliver a package before returning the package back to a warehouse. Drivers must enter details about delivery on a second screen in the app.

You need to display a list of delivery attempts on the delivery screen.

Which two components can you add to the app to display details about the delivery attempts? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Data table  
 B. Vertical gallery  
 C. Display form  
 D. Drop-down

**Answer:** AC

**Explanation:**

The Data table control shows a dataset.

In a canvas app, add and configure a Display form control to show all fields in a record. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/controls/control-data-table> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-form-layout>

**NEW QUESTION 67**

- (Exam Topic 3)

A company is implementing the Microsoft Power Platform to assist with consolidation of onsite inspections and audits of retail stores. Currently, the data used by the retail store inspections is located across multiple systems.

The canvas app must use one database to view and record all data used in the inspection process. You need to design the solution.

Which three capabilities should you implement? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Use an embedded access management framework for user security.  
 B. Execute real-time data operations against external data sources through virtual entities.  
 C. Use Azure Active Directory for access management.  
 D. Store data used by a Power Apps app on both iOS and Android mobile platforms.  
 E. Use Azure Data Lake storage to host the transactional data.

**Answer:** BCE

**Explanation:**

B: Virtual tables (also known as virtual entities) enable the integration of data residing in external systems by seamlessly representing that data as tables in Microsoft Dataverse, without replication of data and often without custom coding.

CE: Authenticating to a Gen 1 DataLakeStore Account Gen 1 uses OAuth 2.0 in Azure AD for authentication. Reference:  
<https://www.cdata.com/kb/tech/azuredatalake-odata-powerapps.rst>

**NEW QUESTION 69**

- (Exam Topic 3)

A company uses Power Apps. You embed a canvas app in a model-driven app form. You need to bind the app to a form component. Which form component should you use?

- A. Section
- B. View
- C. Column
- D. Tab

**Answer:** C

**NEW QUESTION 71**

- (Exam Topic 3)

DRAG DROP

You are designing a new model-driven app for salespeople at a company.

The company requires that all new line-of-business apps must use as much native functionality as possible to avoid having developers maintain code.

You need to determine how to implement the app's business logic.

Which method should you use? To answer, drag the appropriate methods to the correct requirements. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Requirement	Method
Business rules	Validate the postal code format based on the state or province entered by a user.	
Power Automate flows	Ensure that the app can communicate with other business applications by using existing connectors.	
Business process flows		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Methods	Requirement	Method
Business rules	Validate the postal code format based on the state or province entered by a user.	Business rules
Power Automate flows	Ensure that the app can communicate with other business applications by using existing connectors.	Power Automate flows
Business process flows		

**NEW QUESTION 72**

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use an Entity Extraction model.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

AI Builder entity extraction models recognize specific data in the text that you target based on your business needs.

The model identifies key elements in the text and then classifies them into predefined categories. This can help you transform unstructured data into structured data that's machine-readable. You can then apply processing to retrieve information, extract facts, and answer questions.

Note: Create a canvas app and add the text recognizer AI Builder component to your screen. This component takes a photo or loads an image from the local device, and then processes it to detect and extract text based on the text recognition prebuilt model. If it detects text in the image, the component outputs the text and identifies the instances by showing a rectangle for each instance in the image.

Prevent users from sharing the app.	<div>Remove access to the table.</div> <div>Export the app.</div> <div>Turn off the app.</div> <div>Remove access to the table.</div>

NEW QUESTION 76

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You build a canvas app for a manufacturing company. The company receives parts and materials from many vendors. You create a form to collect information from packing slips.

Receivers must be able to take a picture of packing slips to receive materials instead of manually entering data in the app.

You need to ensure that users can scan packing slip information into the form. Proposed solution: Use a Category classification model.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

A Category classification model categorizes text by its meaning. Reference:  
<https://knowledgefrommanish.com/powerplatform/ai-builder-entity-extraction-ai-model/>

NEW QUESTION 77

- (Exam Topic 3)

A company must use a Power Apps app custom control that is exported from a different canvas Power Apps app.

You need to insert the custom control into the Power Apps app.

Where should you complete the actions? To answer, drag the appropriate locations to the correct actions. Each location may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Objects

Display

Components

Screens

Answer Area

Action

Import a custom control from a file.

Add an alignment to the custom control to display it in the middle of the Power Apps app screen.

Location

- A. Mastered
- B. Not Mastered

Answer: A

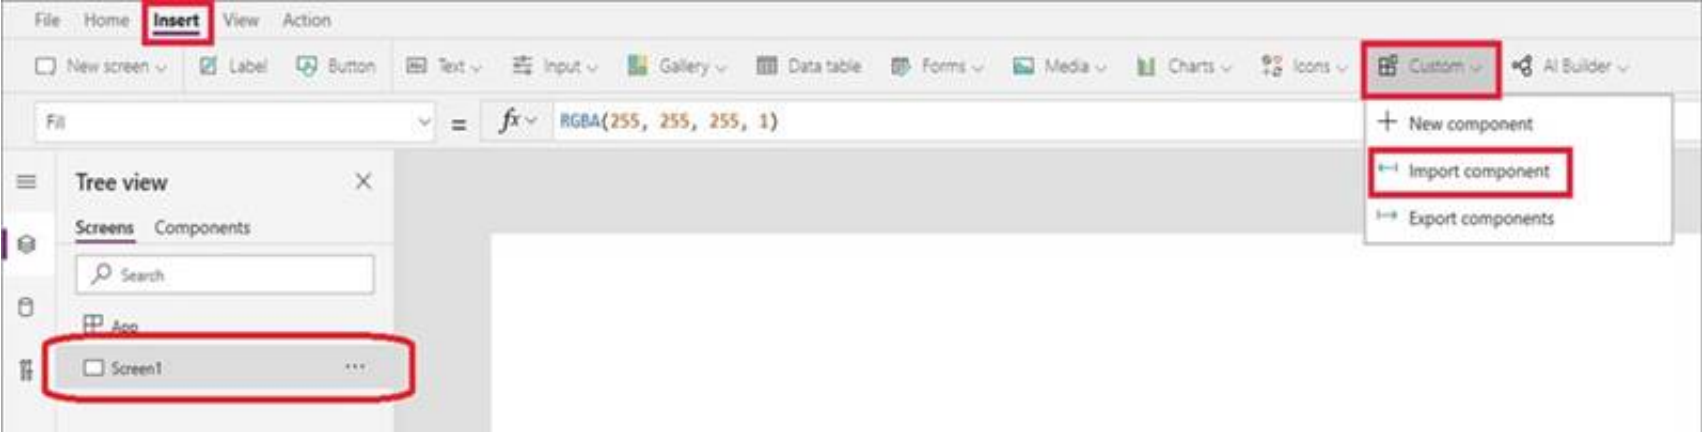

Explanation:

Graphical user interface, text, application Description automatically generated

Box 1: Components

- \* 1. To add code components to a canvas app:
- \* 2. Navigate to Power Apps Studio.
- \* 3. Create a new canvas app or edit an existing app to which you want to add the code component.
- \* 4. Go to Insert > Custom > Import component.

**NEW QUESTION 82**

- (Exam Topic 3)

HOTSPOT

A company uses Microsoft Teams and Microsoft 365. Employees use Microsoft Excel to create checklist and capture measurements.

The company requites a Microsoft Power Platform app to consolidate the checklists and perform the measurements- Network connectivity may not be available when measurements are taken.

You need to determine which features to use for the app

Which features should you use? To answer, select the appropriate options in the answer area NOTE: Each coned selection is worth one point.

Answer Area

Requirement	Feature
App type	<div><div>Model-driven app</div><div>Canvas app</div><div><b>Model-driven app</b></div></div>
Data source	<div><div>Cloud Excel table</div><div>Local Excel table</div><div><b>Cloud Excel table</b></div></div>
Offline mode	<div><div>Power Apps mobile</div><div>Field Service Mobile</div><div><b>Power Apps mobile</b></div><div>Power Apps for Windows</div><div>Power Apps wrap</div></div>

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Answer Area

Requirement	Feature
App type	<div><div>Model-driven app</div><div>Canvas app</div><div><b>Model-driven app</b></div></div>
Data source	<div><div>Cloud Excel table</div><div>Local Excel table</div><div><b>Cloud Excel table</b></div></div>
Offline mode	<div><div>Power Apps mobile</div><div>Field Service Mobile</div><div><b>Power Apps mobile</b></div><div>Power Apps for windows</div><div>Power Apps wrap</div></div>

**NEW QUESTION 87**

- (Exam Topic 3)

You create and publish a canvas app component library to perform complex calculations.

You discover an error in one of the calculations. You correct the issue and publish the component library. A co worker uses the original version of the component library in a canvas app.

You need to ensure that the co-worker uses the updated version of the component library. What should you do?

- A. Export the updated component library and instruct the co-worker to import the updated version into the canvas app
- B. Inform the co-worker to edit the canvas app and manually add the updated version of the component library
- C. Instruct the co-worker to edit the canvas app and update the component library

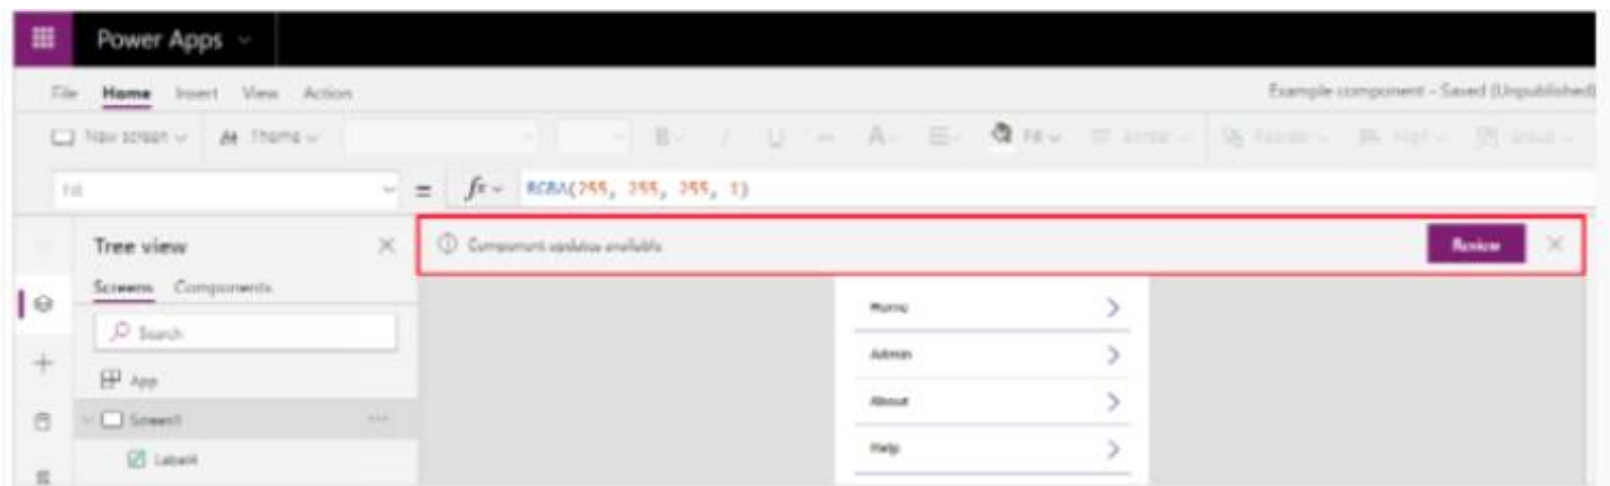

Answer: C

**Explanation:**

You can modify an existing component library and save any changes with additional version notes. However, the updated component library version must be published for use in existing apps that use the component library.

Makers of other apps are notified of updated components being available. The notification appears when makers edit the apps in canvas app studio. They can choose to update the components:

Graphical user interface, application Description automatically generated

Select Review, and you'll see the option to update the component: Graphical user interface, application Description automatically generated

Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library>

**NEW QUESTION 92**

- (Exam Topic 3)  
 You need to set the value for a global variable named RunningTotal to 5 and navigate to the previous screen named MainScreen.  
 Which formula should you use?

- A. UpdateContext( { RunningTotal: 5 } ); Navigate( MainScreen, ScreenTransition.Cover, RunningTotal );
- B. If( Value(TextBox1.Text) >= 0, (Set( RunningTotal, 5); Back();), Color.Green )
- C. UpdateContext( { RunningTotal:5 } ); Back()
- D. Set( RunningTotal, 5 ); Back();

**Answer:** D

**Explanation:**

You set the value of the global variable with the Set function. Set( MyVar, 1 ) sets the global variable MyVar to a value of 1.  
 Use the Back and Navigate function to change which screen is displayed. Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/working-with-variables> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate>

**NEW QUESTION 96**

- (Exam Topic 3)  
 DRAG DROP  
 A company uses Power Apps and Microsoft Dataverse.

The company has model driven apps across multiple Microsoft Dataverse environments in the same tenant. You must grant privileges to Power Apps makers to achieve the following:

- Share model-driven apps in multiple Microsoft Dataverse environments.
- Share model-driven apps in only one of the Microsoft Dataverse environments and view only table records that they create themselves.

You need to share the model-driven app with users by using the principle of least privilege.  
 Which security role privilege should you grant for each requirement? To answer, drag the appropriate security roles to the correct requirements. Each security the may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
 NOTE: Each correct answer is worth one point.

Security roles	Requirement	Security role
System Customizer	Share in all Microsoft Dataverse environments.	
Microsoft Power Platform Administrator	Share in one environment and view only table records they create.	
Environment Maker		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

System Customizer

Microsoft Power Platform Administrator

Environment Maker

Answer Area

Requirement

Share in all Microsoft Dataverse environments.

Share in one environment and view only table records they create.

Security role

Environment Maker

System Customizer

**NEW QUESTION 99**

- (Exam Topic 3)

A company uses Power Automate and Power Apps to streamline business processes. You need to use AI Builder to analyze customer reviews of the company's products.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Action

Publish the model.

Connect data to the model.

Train the model.

Use the model in a Power Automate flow.

Answer Area

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Step 1: Connect data to the model.

First create an AI Builder form processing model for the customer reviews you want to process.

Power Apps | AI Builder

Environment: All internal users

Contoso orders | Save and close

Select historical outcome  
Order > Order Status

Unmanaged

Managed

**NEW QUESTION 108**

- (Exam Topic 3)  
 You receive ideas from employees in a Microsoft Teams channel. Managers are not members of the Teams channel Submissions must be reviewed by three managers who are determined by submission type. You need approval from the managers to process submissions. What should you create?

- A. approval request in the Teams channel that requires a response from all approvers
- B. approval request in a chat with the three managers that requires a response from all approvers
- C. approval template that requires responses to be completed m order
- D. approval template that requires a response from all approvers

**Answer:** B

**NEW QUESTION 112**

- (Exam Topic 3)  
**HOTSPOT**  
 Users in your company vote on color choices for marketing materials by using the following canvas app:

Enter new color:  

Marine blue

Add color

**Color Options**  

☐ Sky blue
 ☒ Dark blue
 ☐ Marine blue

Clear Selection

Users enter color names into a text control and then select Add color to add the color to the Color options radio control. You must remove all the listed colors when a user selects Clear Selection  
 You need to implement the functionality.  
 Which Power Fx formulas should you use? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Action**  
 User selects **Add color.**  
  
 User selects **Clear Selection**

**Power Fx formula**  

If(txtColor.Value <> "", Collect(ColorList, txtColor.Value))  
 If(txtColor.Value <> "", Collect(ColorList, txtColor.Value))  
 If(Value(txtColor.Text) <> "", Collect(ColorList, txtColor.Text))  
 If(Value(txtColor.Color) <> "", Collect(ColorList, txtColor.Color))

Revert(radioselector); ClearCollect(ColorList, txtColor.Value)  
 Reset(radioselector); Clear(ColorList)  
 Reset(radioselector); Refresh(ColorList)  
 Revert(radioselector); Remove(ColorList)  
 Revert(radioselector); ClearCollect(ColorList, txtColor.Value)

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

NEW QUESTION 118

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company is deploying Microsoft Power Platform components to streamline a job candidate screening process.

The human resources (HR) representatives of the company plan to attend school career fairs. The HR representatives must qualify and enter potential job candidates into a Power Apps app. The HR representatives must enter the following information for each candidate:

Field name	Data type	Criteria for follow up
Name	Text	No
Degree	Text	Yes
First available hire date	Date	Yes
Initial impression	Integer 0-10	Yes
Resume	Picture	No
Not currently viable	Boolean	Yes
Follow up	Boolean	NA

If a candidate is currently unqualified for a job position but would eventually qualify based on follow-up criteria, the follow-up checkbox must be selected or cleared in the system immediately.

The company plans to create a similar Power Apps app that will contain the same business use case, but for internal employees and promotions.

You need to create a Power Apps app solution to automatically mark the candidate for follow up. Proposed solution: Create a custom action that has defined dataflows.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**Explanation:**

Instead use Common Data Service workflow with a PowerQuery on the data entity.

Note: Process (Workflow) table/entity reference is a set of logical rules that define the steps necessary to automate a specific business process, task, or set of actions to be performed.

Common Data Service workflow support: Filter triggers based on which attributes change - You can control which field changes trigger your automated flows. For example, trigger your flow only when the status field changes while ignoring all other fields that may change.

Reference:

<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/microsoft-flow/automated-parity-cl>

**NEW QUESTION 119**

- (Exam Topic 3)

A company uses a model-driven app. You create a Power BI sales report.

The executive of the company wants all users to see tiles from the report in the model-driven app. You need to ensure all users can see the tiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Step	Setting
Allow addition of Power BI visualization tiles.	<div>▼</div> <div>Power Platform Environment settings</div> <div>Power Apps settings</div> <div>Power BI Service settings</div> <div>Power BI Desktop settings</div>
Add tiles to a dashboard.	<div>▼</div> <div>Create a personal dashboard</div> <div>Create a Power BI dashboard.</div> <div>Create a system dashboard.</div>
Allow users to view tiles.	<div>▼</div> <div>Share tile and share dashboard.</div> <div>Share report and share dashboard.</div> <div>Share tile and publish dashboard.</div> <div>Share report and publish dashboard.</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Graphical user interface, text Description automatically generated

Box 1: Power Platform Environment settings

Before users can embed Power BI visualizations on personal dashboards, the organization-wide setting must be enabled.

- > In the Power Platform admin center, select an environment.
- > Select Settings > Product > Features.
- > Under Embedded content set Power BI visualization embedding to On to enable or Off to disable.
- > Select Save.

Box 2: Create a personal dashboard

You can embed Power BI tiles on your personal dashboard.

- Open your app and go to Dashboards.
- Select an existing personal dashboard or select New to create one.
- On the dashboard, select an area where you want the tile to appear, and then select Power BI Tile on the toolbar.
- Add new Power BI tile.
- In the Power BI Tile dialog, select the workspace and then select the Power BI tile that you want to display on your dashboard. Select Enable for mobile if you want to make the tile available for Dynamics 365 for tablets and Dynamics 365 for phones.
- Select another area of the dashboard and repeat this step to add another Power BI tile, or other component, such as a chart or list, to your dashboard.
- Select Save to save your dashboard.

Box 3: Share report and share dashboard.

To share your personal dashboard that contains Power BI visualizations you must configure sharing in both Dataverse and Power BI, and the user or group must have the same credentials and appropriate level of access in both services. To share your personal dashboard in your app, go to Dashboards. In the list of dashboards, select the personal dashboard you want, and then select SHARE DASHBOARD.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/use-power-bi#embed--visualizations-on-personal-dashb>

## NEW QUESTION 121

- (Exam Topic 3)

You are creating a capacity planning dashboard with Power BI desktop.

The dashboard must be able to be used within a model-driven manufacturing planning app as well as be embedded within a Microsoft Teams channel.

The data sources are as follows:

Type of data	Data source
Sales log that show pending sales by product	Microsoft Excel workbook
Work estimates, cost estimates, and start and ending dates for each job activity by employee	Common Data Service entity
Actual work values and associated costs of work to date by job activity and employee	On-premises Microsoft SQL Server-based ERP system
Employee information	On-premises Microsoft SQL Server-based ERP system

You need to determine the appropriate method for accomplishing each task.

Which methods should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Task	Method
Connect to the ERP system.	<div>▼</div> <div>Use a Data Gateway</div> <div>Use a Custom Connector</div> <div>Use a Service Content Pack</div>
Create the relationship between the employee file and the work estimates.	<div>▼</div> <div>Create a composite model</div> <div>Create an aggregated table</div> <div>Create entity relationships in the CDS Solution Explorer</div>
Create calculations for work remaining, remaining budget.	<div>▼</div> <div>Create a Data Analysis Expressions formula</div> <div>Create an aggregated table</div> <div>Create a modeling view</div>

- A. Mastered
- B. Not Mastered

**Answer: A**

### Explanation:

A picture containing graphical user interface Description automatically generated

Box 1: Use a Date Gateway

You can install an on-premises data gateway on the same local computer as SQL Server (in production, it would typically be a different computer).

Box 2: Create an entity relationship in CDS Solution Explorer You can create relationships with CDS Solution Explorer. Box 3: Create an aggregate table

Rollup columns help users obtain insights into data by monitoring key business metrics. A rollup column contains an aggregate value computed over the rows related to a specified row. This includes regular tables and activity tables such as emails and appointments.

Reference:

<https://docs.microsoft.com/en-us/power-bi/connect-data/service-gateway-sql-tutorial> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/define-rollup-fields>

## NEW QUESTION 122

- (Exam Topic 3)

A company is building multiple Power Apps apps to support a mobile sales team. The apps must all share a common control that has custom properties.

You need to create a solution for the apps.

Which objects should you use? To answer, drag the appropriate objects to the correct requirements. Each object may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Objects	Requirement	Object
Entity	Reuse the custom control for multiple canvas apps.	
Component		
Component library	Receive input data through a custom property.	
Component framework		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Component library  
Components are reusable building blocks for canvas apps so that app makers can create custom controls to use inside an app, or across apps using a component library. Components can use advanced features such as custom properties and enable complex capabilities.  
By creating a component library, app makers easily share and update one or more components with other makers.  
Component libraries are containers of component definitions that make it easy to: Discover and search components.  
Publish updates.  
Notify app makers of available component updates. Box 2: Component  
A component can receive input values and emit data if you create one or more custom properties. Reference:  
<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/component-library> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/create-component>

NEW QUESTION 127

- (Exam Topic 3)  
You create a canvas app that uses the following resources:

- Power Automate cloud flow
- Custom connector
- Microsoft Dataverse customization
- Connection

You need to export the app as a package to move the app to a different environment. Which resource type will be exported with the app?

- A. Custom connector
- B. Connection
- C. Microsoft Dataverse customization
- D. Power Automate cloud flow

Answer: D

NEW QUESTION 131

- (Exam Topic 3)  
You create a custom field on the Account entity.  
Members of TeamA must have full access to the field. Members of TeamB must have no access to the field. You need to configure security.  
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Add TeamA to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to <b>Yes</b> .	
Add TeamB to the field security profile.	
Create a field security profile and set all the permissions for the custom attribute to <b>No</b> .	
Enable field-level security for the field.	

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

- Step 1: Enable field security for the field  
Step 2: Create a field security profile and set all the permissions for the custom attribute to Yes.  
Step 3: Add TeamA to the field security profile.  
Note: Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles. To implement field-level security, a system administrator performs the following tasks.
- Enable field security on one or more fields for a given entity.
  - Associate one more existing security profiles, or create one or more new security profiles to grant the appropriate access to specific users or teams.

NEW QUESTION 134

- (Exam Topic 3)  
You are creating a Power Automate flow.  
You have an array that contains items with different color attributes. You plan to filter the array by using the following filter expression within the flow: @or(equals(item()['color'], 'red'),contains(item()['color'],'blue')) The filter returns results only when the expression resolves to true.  
For each of the following statements, select Yes if the statement is true. Otherwise, select No.  
NOTE: Each correct selection is worth one point.

Statements	Yes	No
The filter expression yields a result if the array contains the color orange	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color red	<input type="radio"/>	<input type="radio"/>
The filter expression yields a result if the array contains the color sky blue	<input type="radio"/>	<input type="radio"/>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

A screenshot of a computer Description automatically generated with medium confidence  
Box 1: No  
Box 2: Yes  
The item color must be red, or item color contains blue.  
Box 3: Yes

NEW QUESTION 138

- (Exam Topic 3)  
You create a model-driven app for a company. The app will be used to manage events that the company organizes.  
The Events entity ownership type is set to User or team. Members of the marketing team are assigned the MarketingTeam security role. All privileges for the role are set to User access.  
All employees must be able to view event records. Only members of the marketing team are permitted to create or edit event records. You create a role named OtherEmployees.  
You need to configure the MarketingTeam and OtherEmployees security roles.  
Which three actions should you perform? Each correct selection presents a part of the solution.  
NOTE: Each correct selection is worth one point.

- A. Set the access level for the OtherEmployees security role to Organization for the Read permission.  
B. Set the access level for the MarketingTeam security role to Organization for the Read permission.  
C. Set the access level for the OtherEmployees security role to None Selected for the Read permission.  
D. Set the access level for the MarketingTeam security role to None Selected for the Read permission.  
E. Set the access level for the MarketingTeam security role to None Selected for the Create and White permission.  
F. Set the access level for the OtherEmployees security role to None Selected for the Create and Write permission.

Answer: ABE

NEW QUESTION 139

- (Exam Topic 3)  
DRAG DROP  
A company uses Microsoft Power Platform in a production environment. The company is defining new business processes in a prototyping environment. You create components in both environments.  
You need to package the components you create.  
Which solution types should you use? To answer, drag the appropriate solution types to the connect components. Each solution type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

NEW QUESTION 142

- (Exam Topic 3)

A company is consolidating communications processes by using Microsoft Teams and Microsoft Power Platform technologies.

A Power Automate flow monitors social media channels to identify high-impact trends.

When the Power Automate flow identifies the trends, consistently formatted and standardized feedback must be collected from the channel members within Teams.

You need to streamline the Power Automate and Teams communication process. What should you use?

- A. AI Builder
- B. Common Data Service business process flows
- C. Adaptive cards
- D. Integrated approval flows

Answer: A

Explanation:

"Microsoft Power Platform and AI Builder components allowed us to quickly deliver an innovative and well-integrated solution within our Dynamics 365 platform for our marketing and sales business partners. The platform is a game-changer in this new world of rapid app delivery."

Jim Parker: Web and Collaboration Services Manager Reference:

<https://customers.microsoft.com/en-au/story/810656-hexion-manufacturing-power-platform>

NEW QUESTION 147

- (Exam Topic 3)

A company has the following divisions: wholesale and retail.

The manufacturer wants to create a single Power BI report to allow users to view data from a Microsoft SQL Server database.

You need to ensure that each user sees data only for the team to which the user is assigned. How should you secure the report?

To answer, drag the appropriate options to the correct action. Each option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Options

Power BI Service

Power BI Desktop

Common Data Service

Power Platform Admin center

Answer Area

Action

Create the team as a role.

Add members to the role.

Option

Option

Option

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Graphical user interface, application Description automatically generated

Box 1: Power BI Desktop

You can define roles and rules within Power BI Desktop. When you publish to Power BI, it also publishes the role definitions.

To define security roles, follow these steps.

- > Import data into your Power BI Desktop report, or configure a DirectQuery connection.
- > From the Modeling tab, select Manage Roles.
- > From the Manage roles window, select Create.
- > Etc.

Box 2: Power BI Service

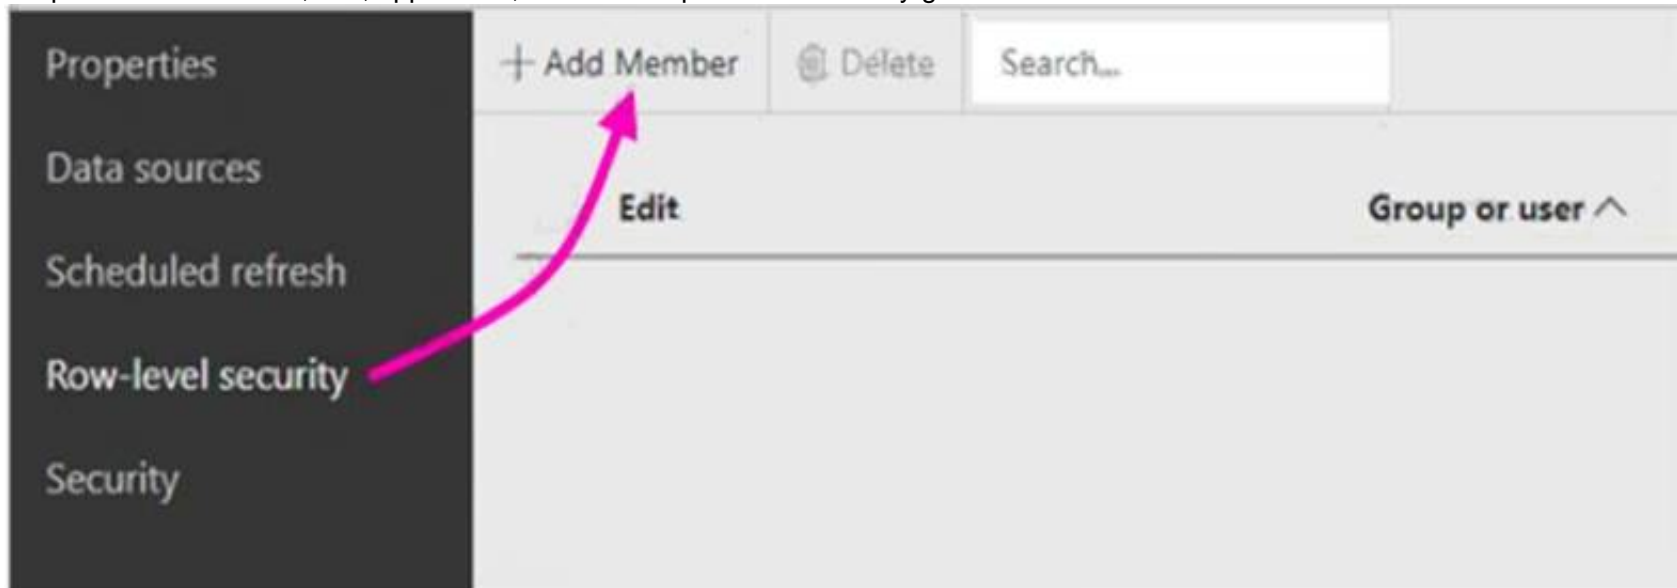

After you save your report in Power BI Report Server, you manage security and add or remove members on the server.

\* 1. In Power BI Desktop, save the report to Power BI Report Server. You need to use the version of Power BI Desktop for Power BI Report Server.

\* 2. In Power BI Report Service, select the ellipsis (...) next to the report.

\* 3. Select Manage > Row-level security.

Graphical user interface, text, application, email Description automatically generated

On the Row-level security page, you add members to a role you created in Power BI Desktop. Reference:

<https://docs.microsoft.com/en-us/power-bi/create-reports/desktop-rls>

#### NEW QUESTION 152

- (Exam Topic 3)

You are creating a canvas app. You plan to use variables that are scoped to a screen to store values. You need to create and update the value of the variables.

Which three functions can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Collect
- B. Patch
- C. Navigate
- D. Set
- E. UpdateContext

**Answer: BCE**

#### Explanation:

B: Use the Patch function to modify records in complex situations. Such as, when you do updates that require no user interaction or use forms that span multiple screens.

CE: Context variables are scoped for Screen. They are great for passing values to a screen, much like parameters to a procedure in other languages. Can be referenced from only one screen.

Functions available for context variables: UpdateContext

Navigate Note:

Use the UpdateContext function to create a context variable, which temporarily holds a piece of information, such as the number of times the user has selected a button or the result of a data operation.

Context variables are also preserved when a user navigates between screens. You can use Navigate to set one or more context variables for the screen that the formula will display, which is the only way to set a context variable from outside the screen.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-patch> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-navigate> <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/functions/function-updatecontext>

#### NEW QUESTION 154

- (Exam Topic 3)

Each maker at a company has a separate Common Data Service environment. You are customizing a canvas app. You create two new entities in your environment.

You are leaving for a vacation. Another maker will continue customizing the app in your absence.

You need to transfer the work to the other maker and ensure that you can work on the updated app when you return from your vacation.

What should you export?

- A. unmanaged solution that includes all customizations
- B. the default solution
- C. a managed solution that includes all customizations
- D. the app

**Answer: A**

#### Explanation:

Unmanaged Solution: The beginning state of solution is the unmanaged solution state. During this phase, you can add, edit, update, remove, delete, and test any of the components of the solution.

Reference:

<https://powerusers.microsoft.com/t5/Power-Apps-Pro-Dev-ISV/Managed-vs-Unmanaged/td-p/495685>

#### NEW QUESTION 159

- (Exam Topic 3)

You create a canvas app.

A user is not able to determine which field currently has focus. You run App checker to identify errors. You need to verify that the focused border thickness is set to a value greater than zero.

Which section of the App checker results should you check?

- A. Rules
- B. Performance
- C. Accessibility
- D. Runtime

**Answer: C**

#### Explanation:

The Accessibility checker classifies each issue as an error, a warning, or a tip based the issue's severity.

Issues include:

- Focus isn't showing

When the FocusBorderThickness of a control is set to 0. It is good practice to ensure a proper color-contrast ratio between the focus border and the control itself so it's clearly visible.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/accessibility-checker>

#### NEW QUESTION 161

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are developing a model-driven app that uses a Common Data Service database. App users will have a variety of different security roles.

Development and testing must be performed using production data. Multiple testers must be used at each testing stage.

You need to provision and configure new environments for development and testing. Solution:

- Provision production environments named P1 and P2.
- Copy the current production environment to P1 and P2.
- Use P1 for development and P2 for testing.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

#### Explanation:

Production: This is intended to be used for permanent work in an organization. Don't use production environment for development and testing.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

#### NEW QUESTION 162

- (Exam Topic 3)

You create a canvas app that connects to a Common Data Service database. Users report that they do not see any data in the app.

You need to ensure that users can view data in the app. What should you do?

- A. Share the app with the users
- B. Add a Power Apps license to the users
- C. Assign a security role to the users
- D. Publish the app

**Answer: C**

#### Explanation:

Sharing access to the data in the Common Data Service. The users need permission to access the entities the app uses. To grant them access, you will need to:

- \* 1. Create a security role
- \* 2. Assign users to the security role

Note: Common Data Service for Apps has a powerful enterprise grade security model that allows you to group users in security roles and give those roles varying levels of access to entities that some of our most sophisticated business apps are built on.

Reference:

<https://powerapps.microsoft.com/en-us/blog/sharing-a-canvas-app-built-on-top-of-common-data-service/> D18912E1457D5D1DDCBD40AB3BF70D5D

#### NEW QUESTION 165

- (Exam Topic 3)

DRAG DROP

A company uses Power Apps. The company has a SharePoint list that contains the names of partner organizations and the country/region of the partners The company requires a canvas app that has a gallery screen to display the information in the SharePoint list. Users must be able to:

\* Return results for the exact word that was searched.  
\* View the latest records at the top of the gallery.  
\* Use a dropdown control to list the countries/regions of the partners. The list must display each country/region only once.  
You need to create the gallery screen in a canvas app.  
Which functions should you use? To answer, drag the appropriate functions to the correct activities. Each function may be used once, more than once, or not at all.  
You may need to drag the split bar between panes or scroll to view content.

NEW QUESTION 167

- (Exam Topic 3)

Rangers in national parks report wildlife they encounter during patrols. The rangers record observations in a notebook when they are on patrol. The rangers manually enter observation data when they are in the office. You are designing an app that allows rangers to record their observations while they are on patrol. The wildlife is modeled as a custom table named Wildlife. The model has relationships to the annotation entity and to a custom entity named Wildlife Details. In the Wildlife Details entity, rangers capture more information as they observe an animal's habitat. When observing wildlife, rangers must indicate whether an animal requires medical attention. The app must synchronize and save data to Common Data Service when connectivity is available. You need to design the app. What should you do? To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Requirement	Action
Enter notes related to wildlife records.	<div><div></div><div>Enable the Wildlife entity and annotation entity for mobile offline.</div><div>Enable the attachments entity and the annotation entity for mobile offline.</div><div>Enable the Wildlife entity for mobile offline and enable attachments on the Wildlife entity.</div><div>Enable the Wildlife entity for mobile offline and use the timeline control for the Wildlife form.</div></div>
Enter wildlife details as related records.	<div><div></div><div>Allow feedback on the Wildlife Details entity.</div><div>Enable the Wildlife Details entity for mobile offline.</div><div>Enable change tracking on the Wildlife Details entity.</div><div>Enable attachments on the Wildlife Details entity and enable the Wildlife Details entity for mobile offline.</div></div>
Indicate that an animal requires medical attention.	<div><div></div><div>Create a business rule.</div><div>Create a business process.</div><div>Create a Power Automate flow</div></div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Enable the Wildlife entity and the annotation entity for mobile offline  
Note: As part of the 2020 Wave 2 release, we made generally available offline capabilities for model driven apps for users of Power Apps. Makers and administrators can now configure apps to be available offline on a user's device, and users can continue to complete their tasks against the local cache on their phone even with intermittent or no network connectivity. When the network is re-established, the users' changes are seamlessly synchronized back to the cloud.  
Box 2: Enable attachments on the Wildlife Details entity and enable Wildlife Details entity for mobile offline. Box 3: Create a business process.  
Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.  
Note: Power Automate includes several types of processes, each designed for a different purpose:  
> Automated flows. Create a flow that performs one or more tasks automatically after it's triggered by an event.  
> Button flows.

- Scheduled flows. Create a flow that performs one or more tasks on a schedule such as once a day, on a specific date, or after a certain time.
- Business process flows. Ensure that people enter data consistently and follow the same steps every time they work in an app by creating a business process flow.
- Workflows and actions. Dynamics 365 customizers may be familiar with the classic Microsoft Dataverse processes, which are workflows and actions. Reference:  
<https://powerapps.microsoft.com/en-us/blog/mobile-offline-for-power-apps/>  
<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/guide-staff-through-common-tasks-proce>

#### NEW QUESTION 168

- (Exam Topic 3)

The postal service uses a system based on the Microsoft Database to manage the delivery of packages.

To improve the delivery service, the management requires the delivery staff to use personal cell phones to communicate the location and the exact time of each delivery.

You need to design a solution. What should you do?

- A. Create a button flow with user input for the delivery time and location
- B. Create a button flow with full address and date trigger tokens
- C. Create a UI flow that sends the delivery time and location
- D. Create a button flow with full address and timestamp trigger tokens

**Answer:** D

#### Explanation:

Button trigger tokens are data points that are known and available to the device on which a button flow is running. These tokens change based on factors such as the current time or the geographic location of the device at a given moment.

Note: For example, if you are running a button flow on a smart phone, it is likely that the phone knows the time at your current location as well as the date and your current address. In this context, the time, date and address where the phone is located are all determined at the time the button flow runs. They are automatically available for use in any button flows that are executed on the device. You can use these trigger tokens to build useful flows that will minimize repetitive tasks such as providing your location to someone or tracking how much time you spent on a particular job/service call.

Reference:

<https://docs.microsoft.com/en-us/power-automate/introduction-to-button-trigger-tokens>

#### NEW QUESTION 173

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents.

The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD. Proposed solution:

Create a custom column that converts the order total to USD by using the relationship between order local currency and the USD exchange rate table in Power BI Desktop and display this column in a Power BI chart by country/region.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

#### Explanation:

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/calculated-rollup-attributes>

#### NEW QUESTION 174

- (Exam Topic 3)

You plan to create apps for a company.

You need to identify the Power Platform tools required.

What should you use? To answer, drag the appropriate tools to the correct requirements. Each tool may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Tools	Requirement	Tool
Power Virtual Agents bot	Create an app with a customized user interface that allows users to quickly create support tickets.	Tool
Power Automate	Create an app that uses a guided business process to navigate through all records associated with a support ticket.	Tool
Canvas app	Send an email to a customer support manager every time a support ticket is created.	Tool
Model-driven app	Create an automated chat tool that guides a customer through the support ticket creation process.	Tool

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Canvas App

Box 2: Model-driven app

Model-driven app design is a component-focused approach to app development. Model-driven app design doesn't require code and the apps you make can be simple or very complex. Unlike canvas app development where the designer has complete control over app layout, with model-driven apps much of the layout is determined for you and largely designated by the components you add to the app.

Box 3: Power Automate

Power Automate is a service that helps you create automated workflows between your favorite apps and services to synchronize files, get notifications, collect data, and more.

Box 4: Power Virtual Agents bot

When you create bots with Power Virtual Agents, you author and edit topics.

**NEW QUESTION 177**

- (Exam Topic 3)

A company uses Microsoft platforms for all accessibility, compliance, and security auditing.

The auditing and compliance division of the company flags a newly created Power Apps canvas app due to accessibility issues. The app must be unpublished until it conforms to Microsoft accessibility requirements and recommendations.

You need to identify all accessibility issues for a solution. What should you use?

- A. Microsoft Accessibility Conformance Reports  
B. Microsoft Compliance Center  
C. Power Apps Studio  
D. Microsoft Accessibility Guides  
E. Microsoft Visual Studio

**Answer:** C

**Explanation:**

- Find accessibility issues
- In the upper-right corner of Power Apps Studio, select the icon for the App checker.
- App checker icon.
- In the menu that appears, select Accessibility.
- A list of issues appears, sorted first by severity and then by screen.
- Select the arrow next to an item to show details about it.
- Accessibility checker details.
- Select the back arrow to return to the list of items.
- If you decide to address an issue, select it to open the affected property.
- After you change one or more properties, select Re-check to update the list of issues. Resolved items disappear from the list, and new items may appear.

**NEW QUESTION 180**

- (Exam Topic 3)

You create a canvas app within a Power Platform environment.

You need to identify potential accessibility issues for the canvas app before making the app available to other users.

Which tool should you use?

- A. Portal Checker  
B. App Checker  
C. Solution Checker

**Answer:** B

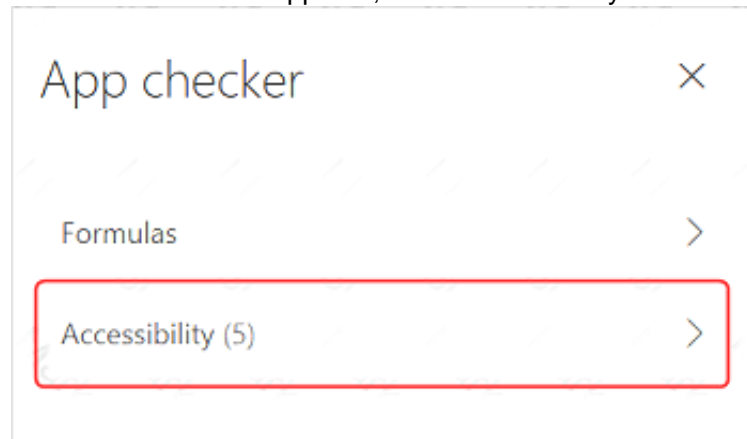

**Explanation:**

Find accessibility issues

\* 1. In the upper-right corner of Power Apps Studio, select the icon for the App checker.

\* 2. In the menu that appears, select Accessibility.

A list of issues appears, sorted first by severity and then by screen. Reference:

### NEW QUESTION 182

- (Exam Topic 3)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company has locations in multiple countries and regions across four continents.

The company stores the total amount of each order in the local currency of the country/region where the customer is located. The company stores the applicable exchange rates in a custom US dollars (USD) exchange rate table.

You need to create a visualization that displays the total amount of orders by country/region in USD. Proposed solution:

Create a custom calculated field of type currency on the order table that converts the order total to USD and displays the total amounts by region in a Power BI chart.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: A**

#### Explanation:

Instead use a calculated field.

Need to calculate the exchange rate in USD.

Calculated columns are calculated in real-time when they are retrieved.

### NEW QUESTION 183

- (Exam Topic 3)

A company is onboarding new workers to the Microsoft Power Platform.

A user reports an access issue with a Power Apps app. The user provides no additional information about the access issue.

You need to troubleshoot the app and data security configurations for the user. Which tool should you use?

- A. Azure AD Security review
- B. User information page
- C. Accessibility checker
- D. Run diagnostics

**Answer: D**

#### Explanation:

User access diagnostic tool in the Power Platform admin center:

Several factors influence user access in a Microsoft Dataverse environment. To help administrators with diagnosing user access to an environment and reasons for access or no access, the new "Run diagnostics" feature in the Power Platform admin center provides basic access diagnostics for individual users in the environment. The feature helps to detect potential causes to user sign-in and other issues and suggests potential mitigations.
