Already have Microsoft Defender for Endpoint P2? Sign up for a free trial of the Defender Vulnerability Management Add-on.

Configuration score is now part of vulnerability management as Microsoft Secure Score for Devices.

Your score for devices is visible in the Defender Vulnerability Management dashboard of the Microsoft 365 Defender portal. A higher Microsoft Secure Score for Devices means your endpoints are more resilient from cybersecurity threat attacks. It reflects the collective security configuration state of your devices across the following categories:

? Application

? Operating system

? Network

? Accounts

? Security controls

Select a category to go to the Security recommendations page and view the relevant recommendations.

Turn on the Microsoft Secure Score connector

Forward Microsoft Defender for Endpoint signals, giving Microsoft Secure Score visibility into the device security posture. Forwarded data is stored and processed in the same location as your Microsoft Secure Score data.

Changes might take up to a few hours to reflect in the dashboard.

? In the navigation pane, go to Settings > Endpoints > General > Advanced features

? Scroll down to Microsoft Secure Score and toggle the setting to On.

? Select Save preferences. How it works

Microsoft Secure Score for Devices currently supports configurations set via Group Policy. Due to the current partial Intune support, configurations which might have been set through Intune might show up as misconfigured. Contact your IT Administrator to verify the actual configuration status in case your organization is using Intune for secure configuration management.

The data in the Microsoft Secure Score for Devices card is the product of meticulous and ongoing vulnerability discovery process. It is aggregated with configuration discovery assessments that continuously:

? Compare collected configurations to the collected benchmarks to discover misconfigured assets

? Map configurations to vulnerabilities that can be remediated or partially remediated (risk reduction)

? Collect and maintain best practice configuration benchmarks (vendors, security feeds, internal research teams)

? Collect and monitor changes of security control configuration state from all assets

**NEW QUESTION 73**

Advanced Audit in Microsoft 365 supports the same retention period of audit logs as core auditing.	<input type="radio"/>	<input type="radio"/>
Advanced Audit in Microsoft 365 allocates customer-dedicated bandwidth for accessing audit data.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

The MailItemsAccessed event is a mailbox auditing action and is triggered when mail data is accessed by mail protocols and mail clients.

Box 2: No

Basic Audit retains audit records for 90 days.

Advanced Audit retains all Exchange, SharePoint, and Azure Active Directory audit records for one year. This is accomplished by a default audit log retention policy that retains any audit record that contains the value of Exchange, SharePoint, or AzureActiveDirectory for the Workload property (which indicates the service in which the activity occurred) for one year.

Box 3: yes

Advanced Audit in Microsoft 365 provides high-bandwidth access to the Office 365 Management Activity API.

What is an assessment in Compliance Manager?

- A. A grouping of controls from a specific regulation, standard or policy.
- B. Recommended guidance to help organizations align with their corporate standards.
- C. A dictionary of words that are not allowed in company documents.
- D. A policy initiative that includes multiple policies.

**Answer:** A

**Explanation:**

Microsoft Purview Compliance Manager is a feature in the Microsoft Purview compliance portal that helps you manage your organization's compliance requirements with greater ease and convenience. Compliance Manager can help you throughout your compliance journey, from taking inventory of your data protection risks to managing the complexities of implementing controls, staying current with regulations and certifications, and reporting to auditors.

Watch the video below to learn how Compliance Manager can help simplify how your organization manages compliance:

Compliance Manager helps simplify compliance and reduce risk by providing:

? Pre-built assessments for common industry and regional standards and regulations, or custom assessments to meet your unique compliance needs (available assessments depend on your licensing agreement; learn more).

? Workflow capabilities to help you efficiently complete your risk assessments through a single tool.

? Detailed step-by-step guidance on suggested improvement actions to help you comply with the standards and regulations that are most relevant for your organization. For actions that are managed by Microsoft, you'll see implementation details and audit results.

? A risk-based compliance score to help you understand your compliance posture by measuring your progress in completing improvement actions.
