

## PL-600 Dumps

### Microsoft Power Platform Solution Architect

<https://www.certleader.com/PL-600-dumps.html>

**NEW QUESTION 1**

DRAG DROP - (Topic 1)

You need to recommend solutions to meet the organization's communication needs.

What should you recommend? To answer, drag the appropriate technologies to the correct groups of users. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Technologies	Group of users	Technology
Microsoft Teams	First Up employees	
Power Apps portals	Workers	
Microsoft 365 Business Voice		

Answer:

Technologies	Group of users	Technology
Microsoft Teams	First Up employees	Microsoft Teams
Power Apps portals	Workers	Microsoft 365 Business Voice
Microsoft 365 Business Voice		

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Microsoft Teams

First up employees must be able to contact each other by using a secure system to ask and answer questions about medical cases.

Microsoft Teams key capabilities:

? Connected

? Secure

? Managed

? Collaborative and productive Box 2: Microsoft 365 Business Voice

Workers must be able to communicate in near real-time with worker support agents.

Microsoft 365 Business Voice makes it easy for small and medium organizations to turn Microsoft Teams into a powerful and flexible telephone system. It's a replacement for

traditional telephony providers and in-house phone systems that can be difficult and costly to manage.

**NEW QUESTION 2**

HOTSPOT - (Topic 1)

You need to recommend solutions for the organization's technical challenges.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Provide workers a self-service option for viewing personal and skills information.	<div><div></div><div>Power Automate</div><div>QnA Maker</div><div>Azure Cognitive Services</div></div>
Authenticate workers who use the self-service option for updating skills information.	<div><div></div><div>Azure Active Directory B2B</div><div>Azure Active Directory B2C</div><div>Dynamics 365 owner team</div></div>
Plan routes for audit teams.	<div><div></div><div>Azure traffic routing</div><div>Address input component</div><div>Dynamics 365 Field Service</div></div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Power Automate

Self-service purchase is available for Power Platform (Power BI, Power Apps, and Power Automate), Project, and Visio.

Box 2: Azure Active Directory B2B

Scenario: First Up Consulting recruits information technology (IT) workers for temporary or permanent positions at client companies.

Azure Active Directory (Azure AD) business-to-business (B2B) collaboration is a feature within External Identities that lets you invite guest users to collaborate with your organization. With B2B collaboration, you can securely share your company's applications and services with guest users from any other organization, while maintaining control over your own corporate data. Work safely and securely with external partners, large or small, even if they don't have Azure AD or an IT department. A simple invitation and redemption process lets partners use their own credentials to access your company's resources.

Note, Scenario:

? Workers must be able to sign into a portal by using their own email address.

Workers must be required to use a secure method of authentication to be able to view their data.

? User security roles must be customized to ensure that users are able to interact only with the specific data in which they need access.

Box 3: Dynamics 365 Field Service

Dynamics 365 Field Service functionality include:

An interactive schedule board helps dispatchers assign work orders to the best resources based on location, availability, skill set, priority, and more. This is done via a manual drag- and-drop method, a semi-automated scheduling assistant, or fully automated with Resource Scheduling Optimization.

The schedule board displays each resource--whether an employee, contractor, or equipment--and their scheduled work orders. Resources and their assigned jobs are also displayed on a map along with routes and traffic patterns in real time.

**NEW QUESTION 3**

DRAG DROP - (Topic 1)

You need to recommend the appropriate messaging channel solutions for the organization.

What should you recommend? To answer, drag the appropriate messaging options to the correct user types. Each messaging option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Messaging options	User type	Messaging option
Power Apps portals	Worker support agents	
Dynamics 365 Customer Service	Patients	
Omnichannel for Customer Service dashboard		

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

Box 1: Omnichannel for Customer Service dashboard

Scenario: Workers must be able to communicate in near real-time with worker support agents.

The company has a team or worker support agents that respond to inquiries from current and prospective workers. Some of the worker support agents are multilingual.

If you choose to expand your customer service offering to provide chat and channels, the Customer Service workspace seamlessly adjusts to support managing conversations as well.

Note: As an agent with the Customer Service Representative security role, when you open Customer Service workspace, you start on the Customer Service Agent Dashboard unless your administrator has changed the default view. This dashboard shows you your active cases, cases you can work in queues you are assigned to, and your open activities. You can open existing cases and activities or begin working new cases from the queues you are assigned to and create activities.

Box 2: Dynamics 365 Customer Service

Scenario: First Up uses an on-premises system to manage current and historical patient data including medications and medical visits.

**NEW QUESTION 4**

DRAG DROP - (Topic 1)

You need to recommend methods for assigning security to each group of users.

What should you recommend? To answer, drag the appropriate methods to the correct groups of users. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Methods	Answer Area	
<div>Dataverse Application User</div>	<div>Group of users</div>	<div>Method</div>
<div>Power Platform Local Business Owner Team</div>	<div>Full-time employees</div>	<div>Method</div>
<div>Azure Active Directory B2B Guest Access</div>	<div>Automation</div>	<div>Method</div>
<div>Azure Active Directory Security Group Team</div>	<div>Corporate governance auditing team</div>	<div>Method</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Power Platform Local Business Owner Team  
Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.  
Scenario: Employee authentication with the existing system is provided by an on-premises Active Directory instance that is linked to Azure Active Directory.  
Box 2: Azure Active Directory Security Group Team  
An Azure Active Directory (Azure AD) group team. Similar to owner team, an Azure AD group team can own records and can have security roles assigned to the team.  
Note: The administration of app and data access for Microsoft Dataverse has been extended to allow administrators to use their organization's Azure Active Directory (Azure AD) groups to manage access rights for licensed Dataverse users.  
Box 3: Azure Active Directory B2B Guest Access  
An Azure AD B2B collaboration user is an external user, typically from a partner organization, that you invite to sign into your Azure AD organization using their own credentials. This B2B collaboration user (also generally referred to as a guest user) can then access the apps and resources you want to share with them. A user object is created for the B2B collaboration user in the same directory as your employees. B2B collaboration user objects have limited privileges in your directory by default, and they can be managed like employees, added to groups, and so on.

Scenario: Before First Up signs a contract to place workers at a client company, a member of the audit team visits the company and interviews company management. Audit members use different types of devices including Android and iOS devices. First Up has no plans to require the use of a single type of device.

NEW QUESTION 5

HOTSPOT - (Topic 2)  
You need to recommend tools for agents and management.  
Which tools should you recommend? To answer, select the appropriate option in the answer area.  
NOTE: Each correct selection is worth one point.

## User type

## Tool

Agent

	▼
Power BI	
Dashboard	
Microsoft Power Automate	
Microsoft Power Apps	

Management

	▼
Power BI	
Microsoft Power Apps	
Microsoft AppSource	
Microsoft Power Automate	

Answer:

## User type

## Tool

Agent

	▼
Power BI	
Dashboard	
Microsoft Power Automate	
Microsoft Power Apps	

Management

	▼
Power BI	
Microsoft Power Apps	
Microsoft AppSource	
Microsoft Power Automate	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Dashboard

Agents need dashboards to show a current count of all reservations on the entity.

Box 2: Power BI

Management requires paginated reports for stakeholders.

**NEW QUESTION 6**

- (Topic 2)

You need to recommend a feature that erases agent workloads and resolves reported issues.

What should you recommend?

A. Dynamics 365 Customer Service default functionality

B. Microsoft AppSource

C. Microsoft Store

**Answer:** A

**Explanation:**

Scenario: Agents need a way to track reservation issues. Use Dynamics 365 Customer Service to:

? Track customer issues through cases

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

**NEW QUESTION 7**

- (Topic 2)

You need to recommend the field type to use for configuring meal selections during reservation.

Which field type should you recommend?

A. Mastered

B. Not Mastered

**Answer:** A

**Explanation:**

Scenario:

? Customers can select a meal when they make a reservation and can save the meal choices as a customer preference.

? The company offers two types of meals: standard and vegetarian. Meal types can be temporarily unavailable. The airline is considering offering other meal types, such as gluten-free and low-sodium options.

In PowerApps Option set is one of the field types you can use in your Entity. The information type that Option Set stores is a list of text values. And here comes the Option Set advantage – once you define its text values you can centrally managed it.

Example:

Country Name 

Poland

USA

England

India

Reference:  
<https://michalguzowski.pl/how-to-work-with-option-set-in-powerapps/>

**NEW QUESTION 8**  
DRAG DROP - (Topic 2)  
You need to recommend a solution for integrating luggage information.  
What should you recommend? To answer, drag the appropriate types to the correct tables. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types	Table	Type
Custom table	Luggage	
Virtual table		
Activity table	Passenger	
Custom activity table		

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Luggage: Custom activity table

An activity can be thought of as any action for which an entry can be made on a calendar. An activity has time dimensions (start time, stop time, due date, and duration) that help determine when the action occurred or will occur. Activities also contain data that helps determine what action the activity represents, for example, subject and description.

Passenger: Customer table

The account and contact tables in Microsoft Dataverse are essential for identifying and managing customers, selling products and services, and providing superior service to the customers. A customer address table is used to store address and shipping information for a customer.

Scenario: The company has a custom app for managing and tracking passenger luggage. The app uses Microsoft Dataverse.

Agents need to view which pieces of luggage match to each passenger, and then need to add the total on the passenger record.

#### NEW QUESTION 9

- (Topic 2)

You need to select an appropriate app for Relecloud. Which app should you recommend?

- A. Dynamics 365 Field Service
- B. Dynamics 365 Sales
- C. Dynamics 365 Project Operations
- D. Dynamics 365 Customer Service

**Answer:** D

**Explanation:**

Microsoft Dynamics 365 Customer Service is a module for customer service automation that streamlines case and knowledge management, enables personalized customer service with a 360-degree customer view, and provides visibility into customer service department performance with dashboards and reports.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

#### NEW QUESTION 10

- (Topic 3)

You need to recommend a method for transferring machine information to Dynamics 365 Field Service.

What should you recommend?

- A. Microsoft Dataverse connector

- B. Dual-write
- C. Lifecycle Services

**Answer:** A

**Explanation:**

Scenario: Information about each machine produced must be transferred to Dynamics 365 Field Service.

Use the Microsoft Dataverse connector when connecting to the Microsoft Dataverse used for Microsoft Dynamics 365 Sales, Microsoft Dynamics 365 Customer Service, Microsoft Dynamics 365 Field Service, Microsoft Dynamics 365 Marketing, and Microsoft Dynamics 365 Project Service Automation.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/connections/connection-dynamics-crmonline>

**NEW QUESTION 10**

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Requirement**

**Solution**

View, assign, and resolve inspection bottlenecks.

	▼
Booking rules	
Schedule board	
Proficiency models	

Automatically input measurement readings from inspection gauges

	▼
Custom connector	
Azure IoT Hub connector	
Azure IoT Central connector	
Microsoft Dataverse connector	

Answer:

**Requirement**

**Solution**

View, assign, and resolve inspection bottlenecks.

	▼
Booking rules	
Schedule board	
Proficiency models	

Automatically input measurement readings from inspection gauges

	▼
Custom connector	
Azure IoT Hub connector	
Azure IoT Central connector	
Microsoft Dataverse connector	

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Schedule board

The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.

Box 2: Azure IoT Central connector

Information about each machine produced must be transferred to Dynamics 365 Field Service.

The difference between IoT hub and IoT central is that IoT is an application platform that simplifies the creation of Internet of Things solutions. IoT central helps to reduce the challenges of implementing IoT development, operations, and management. IoT Central is a fully managed Software as a Service solution.

Note: There are three ways you can use to connect IoT-enabled devices into the Field Service solution:

? Connected Field Service for Azure IoT Central

? Connected Field Service for Azure IoT Hub

? Connected Field Service for non-Azure IoT providers using the extensible IoT provider framework

**NEW QUESTION 15**

HOTSPOT - (Topic 3)

You need to recommend components to meet the re-inspection requirements.

Which components should you recommend? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

## Requirement

## Component

Initiate the creation of re-inspection orders.

	▼
Dataflow	
Business rule	
Power Automate flow	

Automatically set overall inspection ratings based on the checklist ratings.

	▼
From event	
Business rule	
Custom action	
Rollup data type	

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

Box 1: Power Automate flow

Scenario: Inspection orders must be automatically marked for re-inspection should a machine fail inspection. The new inspection order must be created by using the originating inspection order as a template.

Box 2: Business rule

? By combining conditions and actions, you can do any of the following with business rules:

- ? Set column values
- ? Clear column values
- ? Set column requirement levels
- ? Show or hide columns
- ? Enable or disable columns
- ? Validate data and show error messages
- ? Create business recommendations based on business intelligence.

### NEW QUESTION 20

- (Topic 3)

You need to recommend a solution to collect the information required to meet reporting requirements.  
What should you recommend?

- A. Business process flow
- B. Business rule
- C. Business event
- D. Business process modeler

**Answer:** A

### Explanation:

Business rule can create business recommendations based on business intelligence. Scenario: Analytics and reporting

The solution must:

- ? Provide metrics including existing and upcoming demand by inspection station, average time spent per user at a station, and average time a machine spends at each inspection point.
- ? Provide metrics per inspector including number of inspections performed by month, and number of inspections per rating type (pass, fail).
- ? Provide a printed quality certificate to be included with each machine.

Reference:

<https://docs.microsoft.com/en-us/learn/modules/define-create-business-rules/>

### NEW QUESTION 22

HOTSPOT - (Topic 3)

You need to recommend the appropriate components to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
Prevent editing of finalized inspection orders.	<div><div></div><div>Business rule</div><div>Security role</div><div>User permission</div></div>
Prepare documentation for failed inspection steps.	<div><div></div><div>Data flow</div><div>Business rule</div><div>Form property</div></div>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

? You must prevent users from changing inspection order data once an inspection is marked as final.

? Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

**NEW QUESTION 23**

HOTSPOT - (Topic 3)

You need to recommend solutions to meet the integration requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Solution
View, assign, and resolve inspection bottlenecks.	<div><div></div><div>Booking rules</div><div>Schedule board</div><div>Proficiency models</div></div>
Automatically input measurement readings from inspection gauges	<div><div></div><div>Custom connector</div><div>Azure IoT Hub connector</div><div>Azure IoT Central connector</div><div>Microsoft Dataverse connector</div></div>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Schedule board

Note: The Dynamics 365 Field Service schedule board provides an overview of resource availability and bookings you can make.

When you're looking at the schedule board for the current day, you'll see a blue line that indicates the current time of day. You can also see a picture of all the resources listed on the schedule board. To quickly view contact information for a resource, hover over their name to view the contact card.

Box 2: Azure IoT Central connector

Azure IoT Central makes it easy to connect, monitor, and manage your IoT devices at scale. With the IoT Central V3 connector, you can trigger workflows when a rule has fired, and take actions by executing commands, updating properties, getting telemetry from devices, and more. Use this connector with your Azure IoT Central V3 application. This connector is available in the following products and regions:

Service	Class	Regions
Logic Apps	Standard	All <a href="#">Logic Apps regions</a> except the following: <ul style="list-style-type: none"><li>- Azure Government regions</li><li>- Azure China regions</li></ul>
Power Automate	Premium	All <a href="#">Power Automate regions</a> except the following: <ul style="list-style-type: none"><li>- US Government (GCC)</li><li>- US Government (GCC High)</li><li>- China Cloud operated by 21Vianet</li></ul>
Power Apps	Premium	All <a href="#">Power Apps regions</a> except the following: <ul style="list-style-type: none"><li>- US Government (GCC)</li><li>- US Government (GCC High)</li><li>- China Cloud operated by 21Vianet</li></ul>

NEW QUESTION 26

- (Topic 4)

A large company experiences high staff turnover rates. As a result, the company must add or remove multiple system user accounts daily.

You need to recommend a security concept which will facilitate complex security profiles to entities for large groups of users across the Power Apps and Dynamics 365 applications.

What should you recommend?

- A. Hierarchy security
- B. Field-level security
- C. User access management
- D. Team privileges

Answer: D

Explanation:

User and team management is the area of Microsoft Dataverse where you can create and maintain user accounts and profiles. A user is any person who works for a business unit who uses Dataverse. Each user has a user account. A team is a group of users. Teams let users across an organization collaborate and share information.

Note: Why use Dataverse?

Easy to secure – Data is securely stored so that users can see it only if you grant them access. Role-based security allows you to control access to tables for different users within your organization.

Data from your Dynamics 365 applications is also stored within Dataverse, allowing you to quickly build apps that use your Dynamics 365 data and extend your apps with Power Apps. Reference: <https://docs.microsoft.com/en-us/powerapps/developer/data-platform/user-team-entities> <https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-intro>

NEW QUESTION 27

DRAG DROP - (Topic 4)

You are designing a solution to automate the following processes:

- Import data into Microsoft Dataverse from systems that have an API available.

• Import data into Microsoft Dataverse from systems that do not have an API available.  
• Validate that contacts in a Microsoft Excel file Dataverse forms in a specified order. You need to implement automation methods.  
Which components should you use' To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point

Components

Cloud flow

Business process flow

Robotic process automation

Answer Area

Requirement

Interact with applications that do not have an API.

Guide users through business steps in a specific order.

Interact with applications that have an API.

Component

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Components

Cloud flow

Business process flow

Robotic process automation

Answer Area

Requirement

Interact with applications that do not have an API.

Guide users through business steps in a specific order.

Interact with applications that have an API.

Component

Cloud flow

NEW QUESTION 30

HOTSPOT - (Topic 4)

A company uses Dynamics 365 Sales and Power BI.  
Sales managers must be able to keep track of changes to their pipeline in the following ways:  
? Notify the sales managers when an Opportunity changes sales stage.  
? Notify the sales managers when the pipeline drops below 2.5M USD.  
? When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.  
You need to recommend a solution that meets the company requirements.  
Which combination of solutions should you recommend? To answer, select the appropriate option in the answer area.  
NOTE: Each correct selection is worth one point.

Notify the sales manager when an Opportunity changes sales stage.

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 users

Microsoft Power Automate, data alerts, and Microsoft Office 365 connector

Notify the sales managers when the pipeline drops below 2.5 USD.

Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector

Microsoft Power Automate, Power BI data alerts, and Microsoft Office 365 connector

Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

When reviewing the pipeline in Power BI, a sales executive must be able to add a Playbook to an Opportunity.

Power BI, Power Apps, Microsoft Dataverse connector, and Microsoft Office 365 Outlook connector

Microsoft Power Automate, Data alerts, Microsoft Dataverse connector, and Microsoft Office 365 users

Microsoft Power Automate, Data alerts, and Microsoft Office 365 connector

Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Box 1: Microsoft Power Automate, Microsoft Dataverse connector, and Microsoft 365 Outlook connector  
Use Microsoft Dataverse as the data source.  
While Power Automate is a robust tool with ever-expanding capabilities, it also handles simple tasks with grace. A universal business need for many organizations is the ability to automate email notifications based on certain criteria: an opportunity is won, send an email to the sales manager; a case is closed, send an email to the customer; a work order is completed, send an email to the customer.  
Power Automate can easily accommodate this using the Microsoft 365 Outlook connector.  
Box 2: Microsoft Power Automate, Power Bi data alerts, and Microsoft 365 connector Data alerts in the Power BI service: Set alerts to notify you when data in your dashboards changes beyond limits you set.  
Box 3: Microsoft Power Automate, Power BI, Power Apps, and Microsoft Dataverse connector

NEW QUESTION 34

- (Topic 4)

You are a Power Apps architect for a company. The IT administrator designs a Power Apps app that is ready to be tested. The company uses application lifecycle management (ALM).  
Each version and solution component must be tracked as it is tested.  
You need to recommend a strategy to deploy solutions for the user acceptance testing environment.  
What should you recommend?

- A. Use Package Deployer and deploy a managed solution.  
B. Use Package Deployer and deploy an unmanaged solution.  
C. Use Solution Packager and deploy a managed solution.  
D. Use Solution Packager and deploy an unmanaged solution.

**Answer:** D

**Explanation:**

Solution Packager is a tool that can unpack a compressed solution file into multiple XML files and other files, so they can be easily managed by a source control system.

Unmanaged solution: An open solution with no restrictions on what can be added, removed, or modified. This is recommended during development of a solution.

C: Managed solution

A completed solution ready to be imported into an organization. Once imported, components can't be added or removed, although they can optionally allow further customization. This is recommended when development of the solution is complete.

Reference:

<https://docs.microsoft.com/en-us/power-platform/alm/solution-packager-tool>

**NEW QUESTION 38**

- (Topic 4)

A car dealership has a custom financing table.

You are working with a developer to add a button to a ribbon that displays a hidden section of a form when specific criteria are met.

You need to recommend tools and technologies for the developer

Which two tools or technologies should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point

A. Write a business rule.

Write JavaScript code.

B. Use the Ribbon Workbench.

D. Use the form editor.

**Answer:** BC

**Explanation:**

Client-side scripting using JavaScript is one of the ways to apply custom business process logic for displaying data on a form in a model-driven app.

You can use a community tool, Ribbon Workbench, to visually edit ribbons using the UI. Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/client-scripting>

<https://docs.microsoft.com/en-us/powerapps/developer/model-driven-apps/customize-commands-ribbon>

**NEW QUESTION 41**

- (Topic 4)

You are designing a Power Platform solution for a company. The company issues each employee a tablet device.

The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

? Users must have a visual guide to know which data to enter in each step of the opportunity management process.

? The system must automatically assign the opportunity to a manager for approval once all data is entered.

? The system must notify an assignee each time an opportunity is assigned to them by using push notifications.

? When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.

Which three Power Platform components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Business process flows

B. Power Apps mobile apps

C. Power Virtual Agents chatbots

D. Power Automate desktop flows

E. Power Automate cloud flows

**Answer:** ABE

**Explanation:**

A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome. These steps provide a visual indicator that tells people where they are in the business process.

B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.

E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

\_ Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Reference:

<https://docs.microsoft.com/en-us/power-automate/business-process-flows-overview> <https://docs.microsoft.com/en-us/powerapps/mobile/power-apps-mobile-notification>

**NEW QUESTION 46**

HOTSPOT - (Topic 4)

You are implementing a Microsoft Power Platform solution for a customer to include data migration from multiple legacy systems. The data includes lead and contact data. The environment includes an assigned security group.

The following issues have occurred during a go-live deployment attempt:

- Lookup values are not populated when data migration is complete.

- Data is being added to the contacts table that is not part of the data migration.

- Various users do not appear in the list of users available for record assignment. You need to resolve the go-live deployment issues.

How should you resolve the issue? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

A. Mastered  
B. Not Mastered

**Answer: A**

**Explanation:**

### NEW QUESTION 47

- (Topic 4)

You are designing a self-service portal for a company. The portal must meet the following requirements:

? Customers must be able to submit and review cases.

? Customers must be able to chat with service representatives in near real time.

? Allow service representatives to select cases from queues and use knowledge articles to resolve customer concerns.

You need to recommend solutions for the company that do not require custom development.

Which three apps or services should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dynamics 365 Field Service  
B. Dynamics 365 Customer Service  
C. Omnichannel for Customer Service  
D. Customer Insights  
E. Customer self-service portal

**Answer: BCE**

**Explanation:**

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates>

<https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal>

**NEW QUESTION 50**

## HOTSPOT - (Topic 4)

You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store. You are managing the go-live process for the solution.

The customer reports the following performance issues:

? Form load time is much slower than it was during testing.

? Overall system performance has been significantly slower than it was during testing.

You need to recommend how to troubleshoot system performance.

Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

A. Mastered  
B. Not Mastered

**Answer: A**

**Explanation:**

Box 1: Review the fields that are on the form

Keep the number of table columns (fields) to a minimum.

The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.

Box 2: Review one to many relationships to verify whether cascade settings are necessary.

### NEW QUESTION 55

- (Topic 4)

A company uses manual processes to track interactions with customers. The company wants to use Power Platform to improve productivity.

The company has the following requirements:

? Provide customers with an online portal where they can submit and review cases.

? Ensure that customers can chat online with a customer service representative at any time.

? Route chats to customer service representatives based on skill and availability.

You need to recommend a solution to the company.

Which three components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Dynamics 365 Virtual Agents chatbots

B. Customer self-service portal

C. Dynamics 365 Field Service

D. Business process flows

E. Omnichannel for Customer Service

**Answer: BDE**

#### Explanation:

B: Customer self-service portal: A customer self-service portal enables customers to access self-service knowledge, support resources, view the progress of their cases, and provide feedback.

Note: Based on the selected environment in Power Apps, you can create a Dataverse starter portal or a portal in an environment containing customer engagement apps (Dynamics 365 Sales, Dynamics 365 Customer Service, Dynamics 365 Field Service, Dynamics 365 Marketing, and Dynamics 365 Project Service Automation).

E: Omnichannel for Customer Service offers a suite of capabilities that extend the power of Dynamics 365 Customer Service Enterprise to enable organizations to instantly connect and engage with their customers across digital messaging channels.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/portals/portal-templates> <https://docs.microsoft.com/en-us/dynamics365/customer-service/embed-chat-widget-portal>

### NEW QUESTION 59

HOTSPOT - (Topic 4)

You are designing a Power Platform solution for a company. You have the following requirements:

? Users in the human resources department must be able to create tasks.

? Users in the human resources department must be able to assign cases to other users.

You need to recommend security settings to the company.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Business requirement	Solution
Users in the human resources department must be able to create tasks.	<div><div></div><div>Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.</div></div>
Users in the human resources department must be able to assign cases to other users.	<div><div></div><div>Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.</div></div>

Answer:

Business requirement	Solution
Users in the human resources department must be able to create tasks.	<div><div></div><div>Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level rights to the human resources case table.</div></div>
Users in the human resources department must be able to assign cases to other users.	<div><div></div><div>Assign only Create rights to activities. Assign Create and Read rights to activities. Assign user-level assign rights to the human resources case table. Assign organization-level assign rights to the human resources case table.</div></div>

A. Mastered

B. Not Mastered

**Answer: A**

#### Explanation:

Box 1: Assign only Create rights to activities

You require the same set of Dataverse privileges and access rights to work with custom activities as those required to work with custom entities. Task-based privileges, at the bottom of the form, give a user privileges to perform specific tasks, such as publish articles.

Box 2: Assign User-level assign rights to human resources case table.

Record-level privileges define which tasks a user with access to the record can do, such as Read, Create, Delete, Write, Assign, Share, Append, and Append To.

For user and team owned records, the access level choices for most privileges are tiered Organization, Business Unit, Business Unit and Child Business Unit or only the user's own records. That means for read privilege on contact, I could set user owned, and the user would only see their own records.

**NEW QUESTION 64**

HOTSPOT - (Topic 4)

A food distribution terminal uses Microsoft Dynamics 365 Field Service and Microsoft Dynamics 365 Supply Chain Management to manage inventory and fulfill customer orders. Customers place custom orders through a Power Pages customer portal. Customers can enter different receiving times and dates on fresh produce order lines.

The terminal needs to expose fresh produce order details from Dynamics 365 to its customers in the portal. Customers can control how much detail they see in the portal.

You need to design a solution that meets the requirements. Which mechanism should you use for each requirement?

To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Mechanism
Retrieve data representing fresh produce details.	<div>Custom connector</div> <div>Basic form</div> <div>Data gateway</div> <div>Advanced form</div> <div>Custom connector</div>

| Expose the fresh produce details. | Portal Management app  Portal Management app  Customer Service Insights  Microsoft Power Platform admin center  Microsoft 365 Apps admin center |

Answer:

Answer Area

Requirement	Mechanism
Retrieve data representing fresh produce details.	<div>Custom connector</div> <div>Basic form</div> <div>Data gateway</div> <div>Advanced form</div> <div>Custom connector</div>

- A. Mastered
- B. Not Mastered

Answer: A

**NEW QUESTION 69**

- (Topic 4)

A company has a website that contains a form named Contact Us. Data from completed forms is saved to a shared document. An office administrator periodically reviews the document. The office administrator sends new submissions to another employee who creates contacts or updates existing contacts.

You need to recommend a solution to automate the process.

What should you recommend?

- A. Excel Online Connector
- B. Dynamics 365 Customer Insights
- C. Dynamics 365 Customer Service
- D. Dynamics 365 Marketing

Answer: D

**Explanation:**

Microsoft designed Customer Insights to allow organizations to map, match, merge, and enrich customerbased data from different sources. A classic scenario would be to merge data from customer service software, like Freshdesk, and online sales, such as Shopware, into one source for reporting and further data analysis.

Reference:

<https://msdynamicsworld.com/story/microsoft-dynamics-365-customer-insights-overview>

**NEW QUESTION 72**

DRAG DROP - (Topic 4)

You are reviewing a list of business requirements submitted by a plumbing company. The company has the following requirements:

- ? Send articles to technicians to allow technicians to help customers resolve issues.
- ? Track work progress and inspections at customer sites.
- ? Schedule technicians for service appointments.

You need to recommend solutions to meet the customer's requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct business requirements. Each solution may be used once, more than once,

or not at all. You may need to drag the split bar between panes or scroll to view content.  
NOTE: Each correct selection is worth one point.

Solutions

Dynamics 365 Field Service

Dynamics 365 Customer Voice

Dynamics 365 Customer Insights

Answer Area

Business requirement

Solution

Send articles to technicians to allow technicians to help customers resolve issues.

Solution

Track work progress and inspections at customer sites.

Solution

Schedule technicians for service appointments.

Solution

Answer:

Solutions

Dynamics 365 Field Service

Dynamics 365 Customer Voice

Dynamics 365 Customer Insights

Answer Area

Business requirement

Solution

Send articles to technicians to allow technicians to help customers resolve issues.

Dynamics 365 Customer Insights

Track work progress and inspections at customer sites.

Dynamics 365 Field Service

Schedule technicians for service appointments.

Dynamics 365 Field Service

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Box 1: Dynamics 365 Customer Insights  
Dynamics 365 Customer Insights is a part of Microsoft's customer data platform (CDP) that helps deliver personalized customer experiences. The platform's capabilities provide insights into who your customers are and how they engage with your platform. Unify customer data across multiple sources to get a single view of customers.

Box 2: Dynamics 365 Field Service  
Dynamics 365 Field Service helps to:

- \_ Organize and track resolution of customer issues
- \_ Keep customers updated with the status of their service call and when it's resolved

Note: The Dynamics 365 Field Service business application helps organizations deliver onsite service to customer locations. The application combines workflow automation, scheduling algorithms, and mobility to set up mobile workers for success when they're onsite with customers fixing issues.

The Field Service application enables you to: Improve first-time fix rate  
Complete more service calls per technician per week  
Manage follow-up work and take advantage of upsell and cross sell opportunities Reduce travel time, mileage, and vehicle wear and tear  
Organize and track resolution of customer issues Communicate an accurate arrival time to customers  
Provide accurate account and equipment history to the field technician  
Keep customers updated with the status of their service call and when it's resolved Schedule onsite visits when it's convenient for the customer  
Avoid equipment downtime through preventative maintenance

Box 3: Dynamics 365 Field Service  
Dynamics 365 Field Service: Schedule onsite visits when it's convenient for the customer.

NEW QUESTION 75

HOTSPOT - (Topic 4)  
An organization is optimizing its Microsoft Power Platform solution architecture. The optimization needs to address the following:

- ? Label names for option sets and multiselect option sets should be added as separate fields for reporting.
- ? Users complain that when a case is assigned to another user, all the activities are also assigned.
- ? Some Power BI reports based on Microsoft Dataverse data need near-real-time updating.

You need to recommend a design solution to meet these requirements.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Design

Users report that when a case is assigned to another user, all activities are also assigned.

For each activity entity relationship, set Cascading rules to Configurable Cascading and Assign to Cascade None

Do not implement, but train users on best practices for assigning cases.

Create a 1:N relationship between the user entity/table and the Activities table.

Some Power BI reports based on Microsoft Dataverse data require near-real-time updates.

Create Power BI reports using the Microsoft Dataverse connector.

Implement the Data Export Service; create Power BI reports that point to Microsoft Azure SQL Database.

Create Power BI dataflows based on the Microsoft Dataverse connector; point the Power BI report to the dataflows.

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

Requirement

Design

Users report that when a case is assigned to another user, all activities are also assigned.

For each activity entity relationship, set Cascading rules to Configurable Cascading and Assign to Cascade None  
Do not implement, but train users on best practices for assigning cases.  
Create a 1:N relationship between the user entity/table and the Activities table.

Some Power BI reports based on Microsoft Dataverse data require near-real-time updates.

Create Power BI reports using the Microsoft Dataverse connector.  
Implement the Data Export Service; create Power BI reports that point to Microsoft Azure SQL Database.  
Create Power BI dataflows based on the Microsoft Dataverse connector; point the Power BI report to the dataflows.

NEW QUESTION 79

- (Topic 4)

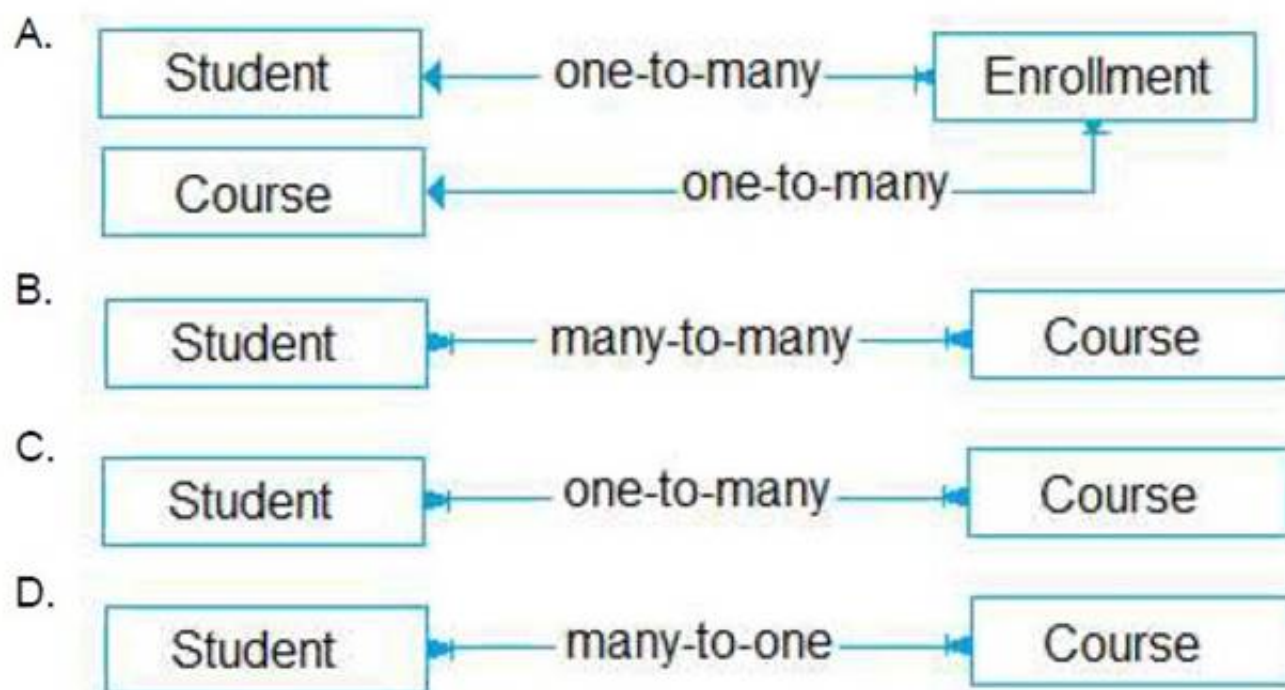

You are designing the data model for a school. The school wants to track students' enrollments in courses.

The system must meet the following requirements: Track the courses in which each student is enrolled. Track the students that are enrolled in each course.

Track dates when each student enrolled in each course and the person who approved the enrollment.

Allow users to create a report that details which students are enrolled in which courses. You need to recommend a data model that will fit the school's requirements.

Which logical model should you recommend?

- A. Option A  
B. Option B

Option C

C. Option D

Answer: A

Explanation:

Need a relationship table.

N:N (Many-to-Many): A table relationship that depends on a special Relationship table, sometimes called an Intersect table, so that many rows of one table can be related to many rows of another table.

When viewing rows of either table in a N:N relationship you can see a list of any rows of the other table that are related to it. Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-entity-relationships>

NEW QUESTION 80

DRAG DROP - (Topic 4)

A company has a call center that manages customer-related issues.

The company has the following customer experience improvement requirements:

- Simulate a human conversation with a customer by providing a chat interface.
- Ensure the initial conversation is passed to a live agent upon escalation. You need to recommend a solution for each requirement.

Which solutions should you recommend? To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions	Requirement	Solution
Power Virtual Agents	Provide an automated chat interface.	
Dynamics 365 Remote Assist	Pass conversation to a live agent upon escalation.	
Dynamics 365 Customer Service		
Omnichannel for Customer Service		

Answer:

Solutions	Requirement	Solution
Power Virtual Agents	Provide an automated chat interface.	Power Virtual Agents
Dynamics 365 Remote Assist	Pass conversation to a live agent upon escalation.	Omnichannel for Customer Service
Dynamics 365 Customer Service		
Omnichannel for Customer Service		

- A. Mastered  
B. Not Mastered

**Answer:** A

## NEW QUESTION 82

DRAG DROP - (Topic 4)

You need to recommend methods for assigning security to each group of users. The customer provides the following requirements:

? Customers need the ability to submit a case through an online portal.

? Portal must handle 75 concurrent users submitting cases.

? Service data must be retained for at least six years.

You need to determine which requirements are functional or non-functional.

Which requirements are functional or non-functional? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Types	Requirement	Type
Functional	Customers need the ability to submit a case through an online portal.	
Non-functional	Portal must handle 75 current users submitting cases.	
	Service data must be retained for at least six years.	

Answer:

Types	Requirement	Type
Functional	Customers need the ability to submit a case through an online portal.	Functional
Non-functional	Portal must handle 75 current users submitting cases.	Non-functional
	Service data must be retained for at least six years.	Non-functional

- A. Mastered  
B. Not Mastered

**Answer:** A

## Explanation:

Box 1: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 2: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 3: Non-functional

Examples of common non-functional requirement types include:

? Availability

? Compliance/regulatory

- ? Data retention/residency
- ? Performance (response time, and so on)
- ? Privacy
- ? Recovery time
- ? Security
- ? Scalability

**NEW QUESTION 84**

- (Topic 4)

A company is implementing Dynamics 365 Sales.

The company has turned off out-of-the-box quote calculations in order to implement its own custom calculations.

When users update a line item on a quote, they expect to see an updated total for the quote in real time. Users are reporting inconsistent behavior, with some aggregations taking up to two hours.

You review the system design and notice many asynchronous workflows. You need to recommend a solution to enable the calculation in real time.

Which two options should you recommend? Each answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Consolidate asynchronous workflow into a single real-time workflow.
- B. Consolidate multiple asynchronous workflows into a single asynchronous workflow.
- C. Implement a business process flow to replace the existing workflows.
- D. Convert the asynchronous workflows to a synchronous plug-in.

**Answer:** AB

**Explanation:**

**NEW QUESTION 86**

DRAG DROP - (Topic 4)

You are designing a business strategy for a client who has a Power Platform solution. The client works with critical data where any data loss creates a high risk.

You need to document the failover process for the stakeholders.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
If the second call is successful, the application continues normally.	
The application makes a service call to the datacenter.	
The application receives an exception after attempting the service call.	⬅️⬆️
The application automatically tries the call again.	⬆️⬇️
The application redirects calls to an on-premises server.	

- A. Mastered
- B. Not Mastered

**Answer:** A

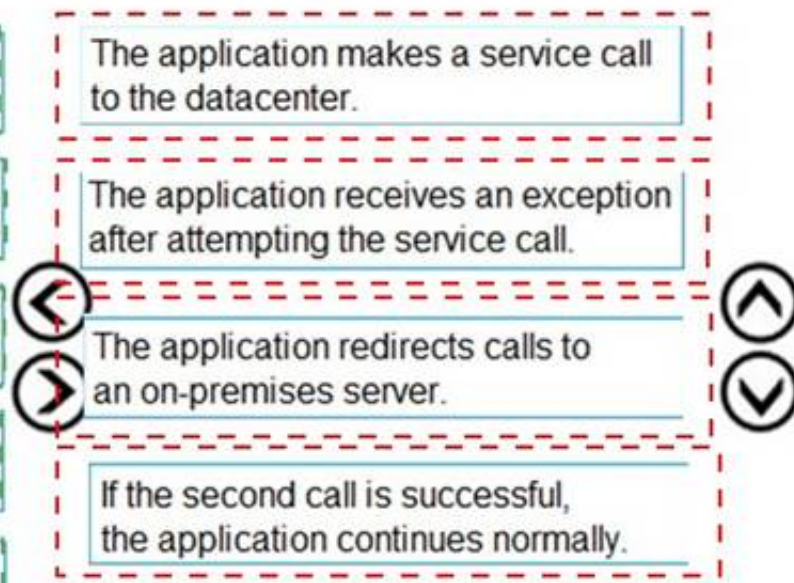

**Explanation:**

## Actions

- If the second call is successful, the application continues normally.
- The application makes a service call to the datacenter.
- The application receives an exception after attempting the service call.
- The application automatically tries the call again.
- The application redirects calls to an on-premises server.

## Answer Area

### NEW QUESTION 87

- (Topic 4)

A company is struggling to gather insights from won and lost opportunities.

Users must be able to access the company's solution from mobile and desktop devices. The solution must meet the following requirements:

- Track opportunities and reasons for the win or loss of opportunities in the context of other related data.
- Display data to users as charts and tables and provide drill-through capabilities.

You need to recommend a Microsoft Power Platform tool to help the client visualize the data. Which two technologies should you recommend? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Power BI
- B. Power Virtual Agents
- C. Power Apps
- D. Power Automate

**Answer:** AC

### NEW QUESTION 89

HOTSPOT - (Topic 4)

An animal welfare organization wants to track the movement of wolf packs in a region. Cameras at specific locations capture images when motion is detected within the camera sensor range. Staff upload the images manually to a shared drive and then analyze the images.

The organization wants to automate image capture and analysis. The organization has the following requirements:

- ? Save captured images in an appropriate location.
- ? Analyze saved images by using an image recognition process.
- ? Display data in real-time dashboards.

You need to recommend the correct technology for the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Requirement

## Technology option

Save captured images in an appropriate location.

- Business process flow
- Desktop flow
- Instant cloud flow
- Automated cloud flow

Analyze saved images by using an image recognition process.

- Instant cloud flow and AI Builder
- Automated cloud flow and AI Builder
- Desktop flow and AI Builder

Display data in real-time dashboards.

- Dynamics 365 interactive experience dashboard
- Model-driven app dashboard with native graphs
- Model-driven app dashboard with Power BI

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Automated cloud flow.

Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Automated flows: Create an automation that is triggered by an event such as arrival of an email from a specific person, or a mention of your company in social media.

Box 2: Desktop flow and AI Builder

Desktop flows are used to automate tasks on the Web or the desktop. Using Power Automate Desktop you can automate tasks on the desktop as well as the Web.

Box 3: Model-driven app dashboard with Power BI

The Power BI cloud service works with Microsoft Dataverse apps to provide a self-service analytics solution. Power BI automatically refreshes the app's data displayed.

**NEW QUESTION 90**

HOTSPOT - (Topic 4)

A company has a Power Platform environment that connects to a third-party marketing application.

The company reports that the data in the Power Platform lead table does not match data from the marketing application.

Issues include:

- \_ The owner data in the lead table and the third-party application do not match.
- \_ The Topic column has more information than the related record from the marketing application.
- \_ There are differences in how telephone numbers are formatted. You need to determine which processes are causing the issues.

Which three processes may be causing the differences observed? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

**Issue**

**Solution**

Migration processes fail due to operation timeouts.

	▼
Increase multithreading and/or batch size settings.	
Decrease multithreading and/or batch size settings.	
Ensure you are loading data into all tables at the same time.	
Ensure you are loading data into tables in a particular order.	

Records that include lookup columns often fail to load.

	▼
Increase multithreading and/or batch size settings.	
Decrease multithreading and/or batch size settings.	
Ensure you are loading data into all tables at the same time.	
Ensure you are loading data into tables in a specific order.	

Answer:

**Issue**

**Solution**

Migration processes fail due to operation timeouts.

	▼
Increase multithreading and/or batch size settings.	
Decrease multithreading and/or batch size settings.	
Ensure you are loading data into all tables at the same time.	
Ensure you are loading data into tables in a particular order.	

Records that include lookup columns often fail to load.

	▼
Increase multithreading and/or batch size settings.	
Decrease multithreading and/or batch size settings.	
Ensure you are loading data into all tables at the same time.	
Ensure you are loading data into tables in a specific order.	

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Increase multithreading and/or batch size settings  
Box 2: Ensure you are loading data in a specific order.  
Load the base tables in the hierarchies first.

**NEW QUESTION 93**

- (Topic 4)

A company is creating a Microsoft Power Platform app to enable employees to log daily time entries. Employee user accounts are in multiple Azure AD tenants and are not located in the tenant that is running the app.

Employees must be added as Azure AD guest accounts within the tenant that will be running the app. Employees must access the model-driven app by being a member of a security team. The security team has been assigned the Employee Security role. Employees must create personal views of records to view within the system.

You need to implement a security solution. Which privilege should you use?

- A. Direct basic level
- B. Azure AD security group
- C. Team
- D. Shared app access

**Answer:** C

**NEW QUESTION 94**

- (Topic 4)

A company has a list of contacts in a Microsoft Excel file. The company wants to load the contact information into a Microsoft Power Platform solution. You need to recommend a data-loading solution. What should you recommend?

- A. Add the contacts to a static worksheet
- B. Use the Excel Template feature
- C. Use the import from Excel feature.

**Answer:** B

**NEW QUESTION 96**

HOTSPOT - (Topic 4)

A company uses Microsoft Dataverse to store patient Information-Patient information is managed using Dataverse forms. The company must enforce the following rules to manage data quality:

- Show or hide tabs in the main form based on the column value selected.
- Add a discount code automatically when a new patient row is added. You need to recommend a solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

**Requirement**

Show or hide tabs in the main form based on the column value selected.

Add a discount code automatically when a new patient row is added.

**Solution**

Business process flow	▼

**NEW QUESTION 98**

HOTSPOT - (Topic 4)

A company plans to create a Power Apps portal to manage support cases for customers. The company has an account hierarchy for customers. The hierarchy supports accounts, cases, and contacts where both contacts and cases belong to their relevant account.

The company has the following requirements:

- ? Portal users must only see the notes for the cases that they manage.
- ? Portal users must only see cases that are submitted by their colleagues.

You need to design the security model for the portal.

Which entity permission scope should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Requirement

## Scope

Portal users must only see the notes for the cases that they manage.

	▼
Self	
Parent	
Contact	
Account	

Portal users must only see cases that are submitted by their colleagues.

	▼
Self	
Global	
Contact	
Account	

- A. Mastered
- B. Not Mastered

**Answer:** A

### Explanation:

Box 1: Contact

With Contact scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's contact record via a defined relationship.

Box 2: Account

With Account Scope, a signed-in user in the role for which the permission record is defined will have the rights granted by that permission only for records that are related to that user's parent account record via a defined relationship.

This scope means that the entity list will only show the records of the selected entity that are associated to the user's parent account. For example, if an entity permission allows Read access to Lead entity with the Account scope, the user having this permission can view all the leads of only the parent account of the user.

### NEW QUESTION 100

- (Topic 4)

You are a Power Platform consultant for an internet support company. The company lacks a budget to buy third-party ISVs or add-ons.

The company requires a new system that achieves the following:

- ? All support issues must come in by email, need to be logged, and assigned to the support group.
- ? Accounts must synchronize with the parent company Oracle database.
- ? Reports must be sent to the executives on a weekly basis.
- ? No custom code will be used in the system.

You need to recommend the components that should be configured.

Which two components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Power Virtual Agents
- B. Microsoft Dataverse
- C. server-side synchronization
- D. Microsoft Customer Voice

**Answer:** BD

### Explanation:

The Dynamics 365 Customer Voice data is stored in Microsoft Dataverse.

Dynamics 365 Customer Voice is an enterprise feedback management application you can use to easily keep track of the customer metrics that matter the most to your business. ... It provides a personalized experience, enabling you to collect customer feedback and get relevant insights quickly and easily, all in a few clicks.

Reference:

<https://docs.microsoft.com/en-us/dynamics365/customer-voice/about> <https://docs.microsoft.com/en-us/dynamics365/customer-voice/data-flow>

### NEW QUESTION 101

DRAG DROP - (Topic 4)

A company uses Microsoft Power Platform solutions.

The company plans to set up application lifecycle management (ALM) capabilities to store the solutions in source control, which will be used to automate the release process.

You need to set up the initial ALM infrastructure to store the solutions in source control. Which four actions should you perform in sequence?

To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

**Actions**

- Run the pipeline.
- Create an Export pipeline.
- Create an Azure DevOps Project.
- Install the Microsoft Power Platform Build Tools.
- Create a Release pipeline.
- Add a task for Microsoft Power Platform Import Solution.

**Steps**

- 1
- 2
- 3
- 4

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

**Actions**

- Run the pipeline.
- Create an Export pipeline.
- Create an Azure DevOps Project.
- Install the Microsoft Power Platform Build Tools.
- Create a Release pipeline.
- Add a task for Microsoft Power Platform Import Solution.

**Steps**

- 1
- 2
- 3
- 4

NEW QUESTION 104

DRAG DROP - (Topic 4)

A company plans to integrate a model-driven app with external data sources. The company has the following requirements:

- Consume data in its data warehouse from Microsoft Dataverse.
- Use a plug-in to retrieve information from an external service.

You need to recommend a Microsoft Azure component for each requirement.

Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements.

Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer Area**

**Requirement**

Consume data in a data warehouse.

Consume data from an external source.

**Azure component**

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

**Answer Area**

**Requirement**

Consume data in a data warehouse.

Consume data from an external source.

**Azure component**

Azure Data Factory

Azure Service Bus

NEW QUESTION 109

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform architect. You have identified several project risks.

You need to categorize potential risks that are specific to your customer.

How should you categorize the risks? To answer, drag the appropriate categories to the correct risks. Each category may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Categories**

- Resource risk
- Business risk
- External risk
- Security risk

**Answer Area**

**Risk**

The project requires integration to custom-built on-premises systems that store business-sensitive data.

The organization is currently making significant go-to-market strategy adjustments.

The customer has a limited budget in relation to the project requirements.

**Category**

- A. Mastered
- B. Not Mastered

Answer: A

**Explanation:**

**Categories**

- Resource risk
- Business risk
- External risk
- Security risk

**Answer Area**

**Risk**

- The project requires integration to custom-built on-premises systems that store business-sensitive data.
- The organization is currently making significant go-to-market strategy adjustments.
- The customer has a limited budget in relation to the project requirements.

**Category**

- Security risk
- Business risk
- Resource risk

**NEW QUESTION 112**

HOTSPOT - (Topic 4)

You are evaluating a solution design. You need to test the following scenarios: Mimic a user using an app.

- Obtain formal approval that an app meets customer-provided criteria.
- Confirmation that an app can manage expected peak loads.

Which test types should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Scenario

Mimic a user using an app.

Test type

- Acceptance testing
- UI testing
- Acceptance testing
- Performance testing
- Load testing

Obtain formal approval that an app meets customer-provided criteria.

Test type

- Acceptance testing
- Migration testing
- Acceptance testing
- Performance testing
- UI testing

Confirmation that an app can manage expected peak loads.

Test type

- Performance testing
- Unit testing
- Acceptance testing
- Performance testing
- Integration testing

Answer:

**Answer Area**

Scenario

Mimic a user using an app.

Test type

- Acceptance testing
- UI testing
- Acceptance testing
- Performance testing
- Load testing

Obtain formal approval that an app meets customer-provided criteria.

Test type

- Acceptance testing
- Migration testing
- Acceptance testing
- Performance testing
- UI testing

Confirmation that an app can manage expected peak loads.

Test type

- Acceptance testing
- Performance testing
- Integration testing

- A. Mastered
- B. Not Mastered

**Answer: A**

**NEW QUESTION 113**

HOTSPOT - (Topic 4)

A company plans to use a combination of model-driven and canvas apps for data interaction and Power BI for data reporting. The company has the following requirements:

- Share a canvas app with the auditor team.
- Ensure account balance values in Power BI are only viewable by the investment team.
- Streamline user administration and role assignment.

You need to recommend a security component to use for each requirement.

Which security components should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	Security component
Share a canvas app.	<div> <div>Microsoft Entra ID security group</div> <div>Security roles</div> <div>Column-level security</div> <div>Manager hierarchy model</div> <div>Microsoft Entra ID security group</div> </div>
Control account balance visibility.	<div> <div>Report access</div> <div>Report access</div> <div>Column-level security</div> <div>Microsoft Entra ID security group</div> </div>
Streamline user administration and role assignment.	<div> <div>Manager hierarchy model</div> <div>Security roles</div> <div>Column-level security</div> <div>Manager hierarchy model</div> <div>Microsoft Entra ID security group</div> </div>

Answer:

**Answer Area**

Requirement	Security component
Share a canvas app.	<div> <div>Microsoft Entra ID security group</div> <div>Security roles</div> <div>Column-level security</div> <div>Manager hierarchy model</div> <div>Microsoft Entra ID security group</div> </div>
Control account balance visibility.	<div> <div>Report access</div> <div>Report access</div> <div>Column-level security</div> <div>Microsoft Entra ID security group</div> </div>
Streamline user administration and role assignment.	<div> <div>Manager hierarchy model</div> <div>Security roles</div> <div>Column-level security</div> <div>Manager hierarchy model</div> <div>Microsoft Entra ID security group</div> </div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**NEW QUESTION 114**

DRAG DROP - (Topic 4)

You are performing a requirements analysis for a customer. The customer provides the following requirements:

- ? Power Platform storage capacity must remain under 100 percent.
- ? Customer service representatives must be sent an email when they are assigned a case.
- ? Help desk technicians must be shown an error message when they try to delete a task row.
- ? The plug-in pass rate must remain over 99 percent for the production environment.

You need determine if the requirements are functional or non-functional.

Which requirement type should you use? To answer, drag the appropriate requirement types to the correct requirements. Each requirement type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Requirement types	Requirement	Requirement type
	Power Platform storage capacity must remain under 100 percent.	<input type="text"/>
<input type="text" value="Functional"/>	Customer Service representatives must be sent an email when they are assigned a case.	<input type="text"/>
<input type="text" value="Non-functional"/>	Help desk technicians must be shown an error message when they try to delete a task row.	<input type="text"/>
	The plug-in pass rate must remain over 99 percent for the production environment.	<input type="text"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 2: Functional

Functional requirements describe what the solution needs to do or its behaviors. Box 3: Functional

Box 4: Non-functional

Examples of common non-functional requirement types include:

- ? Availability
- ? Compliance/regulatory
- ? Data retention/residency
- ? Performance (response time, and so on)
- ? Privacy
- ? Recovery time
- ? Security
- ? Scalability

#### NEW QUESTION 118

- (Topic 4)

A company uses two separate unlinked apps to manage sales leads: a Power Apps app and a third-party application.

The client has the following requirements:

- ? Manage all leads by using the Power Apps app.
- ? Create a lead in the Power Apps app when a user creates a lead in the third-party application.
- ? Update leads in the Power Apps app when a user updates a lead in the third-party application.
- ? Connect to the third-party application by using an API.

You need to recommend strategies to integrate the Power Apps app and the third-party application.

Which three options can you use to achieve the goal? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Dual-write
- B. Custom connector
- C. Dataflow
- D. Power Automate cloud flow
- E. DataService connector

**Answer:** ADE

#### Explanation:

A: Customers should be able to adopt business applications from Microsoft and expect they speak the same language and seamlessly work together. Dual Write allows our customers to not think about these apps as different systems to write to independently; rather, the underlying infrastructure makes it seamless for these apps to write simultaneously.

D: Use Custom APIs to create your own APIs in Dataverse. With a Custom API you can consolidate a group of operations into an API that you and other developers can call in their code. The Common Data Service (current environment) connector enables calling Custom APIs actions in Power Automate.

E: Common Data Service provides access to the environment database on the Microsoft Common Data Service. It is available for Logic Apps, Power Automate, and Power Apps. Reference:  
<https://docs.microsoft.com/en-us/business-applications-release-notes/april19/cdm-data-integration/dual-writelink-common-data-service-apps>  
<https://docs.microsoft.com/en-us/connectors/commondataservice/> <https://docs.microsoft.com/en-us/powerapps/developer/data-platform/custom-api>

#### NEW QUESTION 120

HOTSPOT - (Topic 4)

A company offers continuing education courses for medical professionals. Each time a course is offered, the company tracks that the session has taken place in an Excel workbook.

The company maintains a list of required qualifications for an educator to teach a course. Educator qualifications range from languages spoken to advanced degrees.

The company needs the following custom table relationships defined:

- ? Associate educators with a list of their professional qualifications.
- ? Assign a primary educator to each course that is held.
- ? Collect information about every course that is held.

You need to determine the type of relationship that best fits the requirement.

Which type of table relationship should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Relationship
Educators must be associated with their qualifications.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
When a course is held there must be a primary educator assigned.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
When a course is held, the company needs to collect information on that session.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>

- A. Mastered
- B. Not Mastered

Answer: A

Explanation:

Requirement	Relationship
Educators must be associated with their qualifications.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
When a course is held there must be a primary educator assigned.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>
When a course is held, the company needs to collect information on that session.	<div>▼</div> <div>Many-to-many relationship that uses a system generated table</div> <div>Many-to-many relationship that uses a custom table</div> <div>One-to-many relationship</div>

NEW QUESTION 122

- (Topic 4)

You are designing tables and columns for a Microsoft Power Platform solution The solution will contain an interactive experience dashboard.

You need to ensure that the columns you create can be used as global filters for the dashboard

Which two data types can you use? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point

- A. Yes/No
- B. Choice
- C. Text
- D. Multiline Text
- E. Lookup

Answer: AB

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-solution-explorer#column-data-types>

With interactive dashboards, a chart uses the color assigned to the categories that make up the different values, even if the chart is configured to use random colors, when the chart is configured to be grouped by any of the following column types:

Choice Yes/No

Status Reason

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/configure-interactive-experience-dashboards>

NEW QUESTION 123

DRAG DROP - (Topic 4)

You are a Microsoft Power Platform solution architect capturing requirements for a national retail chain protect. The project has the following requirements

- Retail employees must use the application on a company- prowled tablet device.
- The app must store data offline
- Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity
- Apps are shared with security group teams for users to access.

You need to identify the project s functional and non-functional requirements.

How should you categorize the requirements? To answer, drag the appropriate categories to the correct requirements. Each category may be used once, more than once, or not at all You may need to drag the split bar between panes or scroll to view content.

Categories

Functional

Non-functional

Answer Area

Requirement

Retail employees must use the application on a company- provided tablet device.

The app must store data offline.

Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.

Apps are shared with security group teams for users to access.

Category

Answer:

Categories

Functional

Non-functional

Answer Area

Requirement

Retail employees must use the application on a company- provided tablet device.

The app must store data offline.

Environment capacity must be monitored to ensure usage stays within 80 percent of available capacity.

Apps are shared with security group teams for users to access.

Non-functional

- A. Mastered
- B. Not Mastered

**Answer:** A

**NEW QUESTION 127**

HOTSPOT - (Topic 4)

You need to design a Power Platform solution that meets the following requirements:

? Capture data from a row during deletion to be used in an automated process.

? Use AI to process forms and automate data entry from paper-based forms.

Which requirements can be met by using out-of-the box Power Platform components?

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

	Yes	No
Capture data from a row during deletion to be used in an automated process.	<input type="radio"/>	<input type="radio"/>
Use AI to process forms and automate data entry from paper-based forms.	<input type="radio"/>	<input type="radio"/>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Yes

This can be done with Dataverse flows: The When a row is added, modified or deleted trigger runs a flow whenever a row of a selected table and scope changes or is created.

Box 2: Yes

AI Builder is a Microsoft Power Platform capability that provides AI models that are designed to optimize your business processes. AI Builder enables your business to use AI to automate processes and glean insights from your data in Power Apps and Power Automate.

**NEW QUESTION 132**

- (Topic 4)

You are creating a scope of work document for a solution. You have the following requirements:

- Track support cases, first response time, and resolution time.
- Include a chat-like interface that allows managers to check the status of cases with minimal manual searching.
- Allow cases to have multiple different priority levels.

You need to include the required Dynamics 365 and Microsoft Power Platform components. Which two components should you include? Each correct answer presents part of the solution.

NOT: Each correct selection is worth one point.

- A. Dynamics 365 Customer Service
- B. Power virtual Agents
- C. PowerBI
- D. Dynamics 365 Customer Voice

**Answer:** AB

**Explanation:**

Power Virtual Agents lets you create powerful chatbots that can answer questions posed by your customers, other employees, or visitors to your website or service.

Use Dynamics 365 Customer Service to:

- ? Track customer issues through cases
- ? Record all interactions related to a case
- ? Share information in the knowledge base
- ? Create queues and route cases to the right channels
- ? Create and track service levels through service-level agreements (SLAs)
- ? Define service terms through entitlements
- ? Manage performance and productivity through reports and dashboards
- ? Create and schedule services
- ? Participate in chats
- ? Manage conversations across channels

Reference:

<https://docs.microsoft.com/en-us/power-virtual-agents/fundamentals-what-is-power-virtual-agents>

<https://docs.microsoft.com/en-us/dynamics365/customer-service/overview>

**NEW QUESTION 134**

HOTSPOT - (Topic 4)

You are designing a Power Platform solution for a company that provides in-home appliance maintenance. When a customer schedules a service appointment, a dispatcher assigns one technician for a specific time and location.

The solution must capture information about the technician assigned to each appointment and the list of tools that the technician must bring to the appointment.

You need to recommend the data type for the captured information.

Which data type should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Data type
Capture information about the technician assigned to each service appointment.	<div>▼</div> <div>Choice</div> <div>Choices</div> <div>Customer</div> <div>Lookup</div>
Select the tools that the technician must bring to an appointment.	<div>▼</div> <div>Choices</div> <div>Customer</div> <div>Lookup</div> <div>Text</div>

- A. Mastered
- B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Choice

Like Choices below, but can only select one of the option.

Box 2: Choices

You can customize forms (main, quick create, and quick view) and email templates by adding multi-select columns that are called Choices. When you add a choices column, you can specify multiple values that will be available for users to select. When users fill out the form they can select one, multiple, or all the values displayed in a drop-down list.

**NEW QUESTION 138**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company plans to automate the expense approval process.

Users currently enter data into an on-premises SQL Server database. You need to allow users to submit expenses from mobile devices.

Solution: Create a canvas app for expense data entry. Create a desktop flow. Create a cloud flow for approval and trigger the desktop flow to add data to the SQL Server database.

Does the solution meet the goal?

- A. Yes
- B. No

**Answer:** B

**NEW QUESTION 140**

- (Topic 4)

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A company uses a Microsoft Excel sheet to manage its loan application process. The company wants to optimize the process.

You need to discover inefficiencies in the process.

Solution: Upload the activity data stored in the Excel sheet to the process advisor feature. Use task mining to discover inefficiencies in the process.

Does the solution meet the goal?

- A. Mastered
- B. Not Mastered

**Answer:** A

**NEW QUESTION 142**

- (Topic 4)

You are designing a Power Platform solution.

During quality assurance testing the API limits are reached. You need to identify and resolve the issue.

Which two actions should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Allocate Microsoft Dataverse capacity add-on subscriptions.
- B. Use the out-of-the-box User Summary report from the Reports section of the solution's model-driven app.
- C. In the Power Platform admin center Review the Home tab Dataverse analytics dashboard.

- D. In the Power Platform admin center, review the Usage section of the Power Apps analytics dashboard.  
E. In the Power Platform admin center, review the Runs section of the Power Automate analytics dashboard.

**Answer:** AC

**Explanation:**

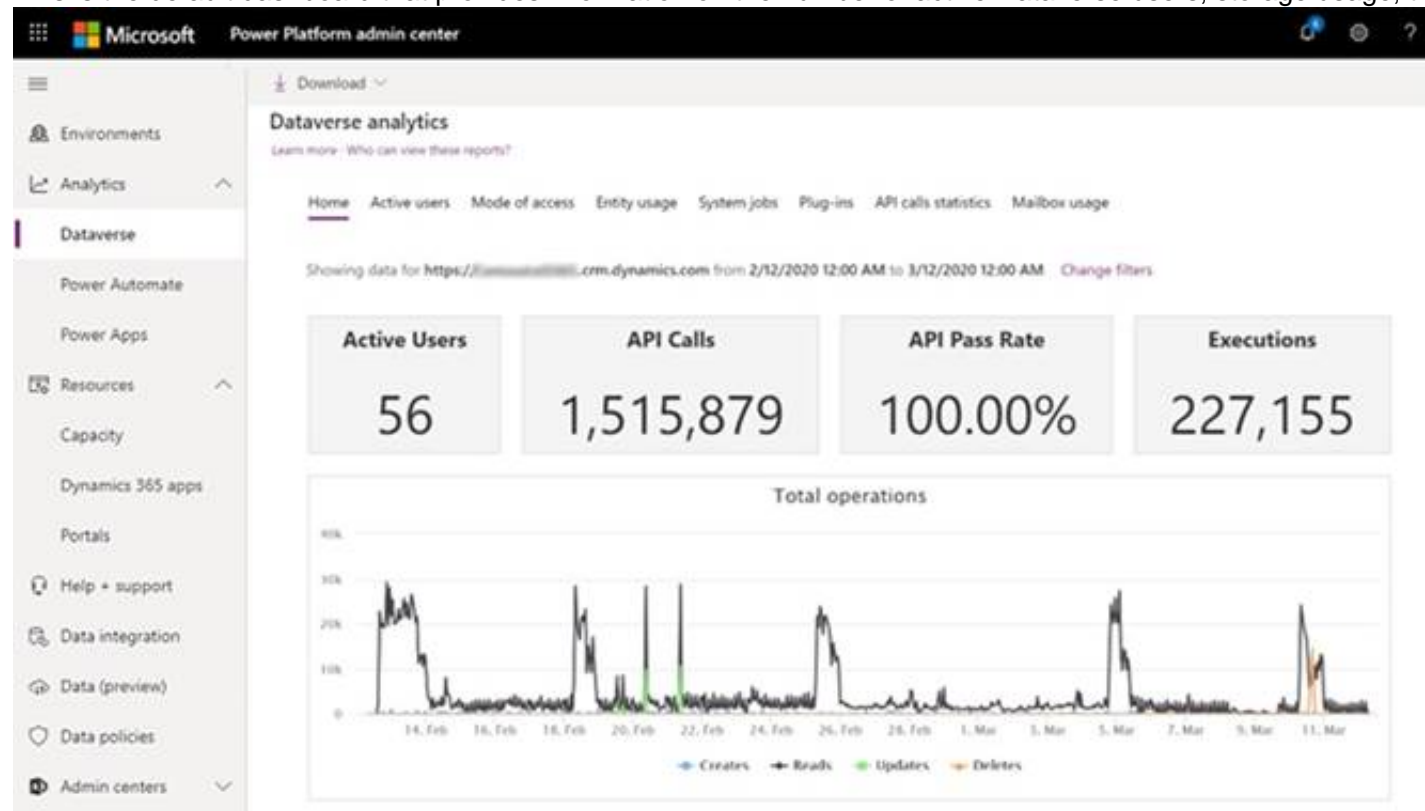

A: When users exceed their limits, administrators can see this in the admin center (see below). You can do either one of the following:

? Adjust the app or flow to use fewer API requests

? Purchase the Power Apps and Power Automate capacity add-on for your organization.

C: Home (default) Dashboard.

This is the default dashboard that provides information on the number of active Dataverse users, storage usage, the most active workflows, and more.

API Calls: API Calls Number of API calls that were made by the Dataverse environment for the selected time period.

Reference:

<https://docs.microsoft.com/en-us/power-platform/admin/api-request-limits-allocations> <https://docs.microsoft.com/en-us/power-platform/admin/analytics-common-data-service>

**NEW QUESTION 144**

- (Topic 4)

You are designing an integration between an Azure SQL database and a model-driven app-You have the following requirements:

- Audit updates to the data.
- Assign security role access to tables at the user level.
- Assign security role access to tables at the organization level.
- Enable change tracking.
- Add and update data.

You need to implement virtual tables.

Which two requirements can you meet by using virtual tables? Each correct answer presents a complete solution.

NOTE Each correct selection is worth one point.

- A. Enable change tracking.  
B. Assign security role access to tables at the user level.  
C. Add and update data.  
D. Assign security role access to tables at the organization level.  
E. Audit updates to the data.

**Answer:** BD

**NEW QUESTION 146**

HOTSPOT - (Topic 4)

A company is creating a Power Platform solution to manage employees.

The company has the following requirements:

- ? Allow only the human resource manager to change an employee's employment status when an employee is dismissed.  
? Allow only approved device types to access the solution and company data.

You need to recommend a solution that meets the requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Configuration
Allow only the human resource manager to change an employee's employment status when an employee is dismissed.	<div><div></div><div>Team access</div><div>Privacy preference</div><div>Field security profile</div><div>Hierarchy security profile</div></div>
Allow only approved device types to access the solution and company data.	<div><div></div><div>Endpoint security</div><div>Compliance policy</div><div>Conditional access</div><div>Mobile threat integration</div></div>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Field security profile

Record-level permissions are granted at the entity level, but you may have certain fields associated with an entity that contain data that is more sensitive than the other fields. For these situations, you use field-level security to control access to specific fields.

Field-level security is available for the default fields on most out-of-box entities, custom fields, and custom fields on custom entities. Field-level security is managed by the security profiles.

Box 2: Compliance policy

Compliance policy settings – Tenant-wide settings that are like a built-in compliance policy that every device receives. Compliance policy settings set a baseline for how compliance policy works in your Intune environment, including whether devices that haven't received any device compliance policies are compliant or noncompliant.

Note: Mobile device management (MDM) solutions like Intune can help protect organizational data by requiring users and devices to meet some requirements. In Intune, this feature is called compliance policies.

Compliance policies in Intune:

Define the rules and settings that users and devices must meet to be compliant.

Include actions that apply to devices that are noncompliant. Actions for noncompliance can alert users to the conditions of noncompliance and safeguard data on noncompliant devices.

Can be combined with Conditional Access, which can then block users and devices that don't meet the rules.

**NEW QUESTION 150**

HOTSPOT - (Topic 4)

A company plans to transition from an existing proprietary solution to a Power Platform solution. The company is consolidating data from several sources.

The company reports the following data quality issues with the existing solution:

? Users often encounter a character limit when entering data.

? The database includes multiple instances of duplicate records.

You need to recommend solutions to ensure that the data quality issues are not present in the Power Platform solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Issue	Solution
Users often encounter a character limit when entering data.	<div><div></div><div>Define a data mask.</div><div>Define and implement duplicate detection rules.</div><div>Define the data type and format for each column.</div></div>
The database includes multiple instances of some records.	<div><div></div><div>Define requirements for data entry.</div><div>Define and implement duplicate detection rules.</div><div>Define the data type and format for each column.</div></div>

- A. Mastered  
B. Not Mastered

**Answer:** A

**Explanation:**

Box 1: Define the data type and format for each column Increase the data type size of the column.

Box 2: Define and implement duplicate detection rules

**NEW QUESTION 155**

HOTSPOT - (Topic 4)

A company plans to deploy multiple Microsoft Dataverse environments. You are supporting the go-live process.

The company reports the following access issues:

- Users can access account records but cannot read a column in the table.

A licensed user receives an insufficient permission error when opening leads.

- A licensed user does not appear in the list of users available for security assignment. You need to resolve the issues.

What should you do? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer Area

Issue	Action
Users can access account records but cannot read a column in the table.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user receives an insufficient permission error when opening leads.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>
A licensed user does not appear in the list of users available for security assignment.	<div>Security role</div> <div>Security group</div> <div>Field security profile</div>

- A. Mastered  
B. Not Mastered

Answer: A

Explanation:

References:

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/field-security-entities>
