

Exam Questions CIPP-E

Certified Information Privacy Professional/Europe (CIPP/E)

<https://www.2passeasy.com/dumps/CIPP-E/>

NEW QUESTION 1

If a French controller has a car-sharing app available only in Morocco, Algeria and Tunisia, but the data processing activities are carried out by the appointed processor in Spain, the GDPR will apply to the processing of the personal data so long as?

- A. The individuals are European citizens or residents.
- B. The data processing activities are in Spain.
- C. The data controller is in France.
- D. The EU individuals are targeted.

Answer: D

NEW QUESTION 2

What must be included in a written agreement between the controller and processor in relation to processing conducted on the controller's behalf?

- A. An obligation on the processor to report any personal data breach to the controller within 72 hours.
- B. An obligation on both parties to report any serious personal data breach to the supervisory authority.
- C. An obligation on both parties to agree to a termination of the agreement if the other party is responsible for a personal data breach.
- D. An obligation on the processor to assist the controller in complying with the controller's obligations to notify the supervisory authority about personal data breaches.

Answer: B

NEW QUESTION 3

A German data subject was the victim of an embarrassing prank 20 years ago. A newspaper website published an article about the prank at the time, and the article is still available on the newspaper's website. Unfortunately, the prank is the top search result when a user searches on the victim's name. The data subject requests that SearchCo delist this result. SearchCo agrees, and instructs its technology team to avoid scanning or indexing the article. What else must SearchCo do?

- A. Notify the newspaper that its article it is delisting the article.
- B. Fully erase the URL to the content, as opposed to delist which is mainly based on data subject's name.
- C. Identify other controllers who are processing the same information and inform them of the delisting request.
- D. Prevent the article from being listed in search results no matter what search terms are entered into the search engine.

Answer: A

NEW QUESTION 4

Which sentence best describes proper compliance for an international organization using Binding Corporate Rules (BCRs) as a controller or processor?

- A. Employees must sign an ad hoc contractual agreement each time personal data is exported.
- B. All employees are subject to the rules in their entirety, regardless of where the work is taking place.
- C. All employees must follow the privacy regulations of the jurisdictions where the current scope of their work is established.
- D. Employees who control personal data must complete a rigorous certification procedure, as they are exempt from legal enforcement.

Answer: C

NEW QUESTION 5

Which of the following entities would most likely be exempt from complying with the GDPR?

- A. A South American company that regularly collects European customers' personal data.
- B. A company that stores all customer data in Australia and is headquartered in a European Union (EU) member state.
- C. A Chinese company that has opened a satellite office in a European Union (EU) member state to service European customers.
- D. A North American company servicing customers in South Africa that uses a cloud storage system made by a European company.

Answer: C

NEW QUESTION 6

Which statement is correct when considering the right to privacy under Article 8 of the European Convention on Human Rights (ECHR)?

- A. The right to privacy is an absolute right
- B. The right to privacy has to be balanced against other rights under the ECHR
- C. The right to freedom of expression under Article 10 of the ECHR will always override the right to privacy
- D. The right to privacy protects the right to hold opinions and to receive and impart ideas without interference

Answer: B

NEW QUESTION 7

Which type of personal data does the GDPR define as a "special category" of personal data?

- A. Educational history.
- B. Trade-union membership.
- C. Closed Circuit Television (CCTV) footage.
- D. Financial information.

Answer: B

NEW QUESTION 8

Which change was introduced by the 2009 amendments to the e-Privacy Directive 2002/58/EC?

- A. A voluntary notification for personal data breaches applicable to all data controllers.
- B. A voluntary notification for personal data breaches applicable to electronic communication providers.
- C. A mandatory notification for personal data breaches applicable to all data controllers.
- D. A mandatory notification for personal data breaches applicable to electronic communication providers.

Answer: D

NEW QUESTION 9

SCENARIO

Please use the following to answer the next question:

The fitness company Vigotron has recently developed a new app called M-Health, which it wants to market on its website as a free download. Vigotron's marketing manager asks his assistant Emily to create a webpage that describes the app and specifies the terms of use. Emily, who is new at Vigotron, is excited about this task. At her previous job she took a data protection class, and though the details are a little hazy, she recognizes that Vigotron is going to need to obtain user consent for use of the app in some cases. Emily sketches out the following draft, trying to cover as much as possible before sending it to Vigotron's legal department.

Registration Form

Vigotron's new M-Health app makes it easy for you to monitor a variety of health-related activities, including diet, exercise, and sleep patterns. M-Health relies on your smartphone settings (along with other third-party apps you may already have) to collect data about all of these important lifestyle elements, and provide the information necessary for you to enrich your quality of life. (Please click here to read a full description of the services that M-Health provides.)

Vigotron values your privacy. The M-Health app allows you to decide which information is stored in it, and which apps can access your data. When your device is locked with a passcode, all of your health and fitness data is encrypted with your passcode. You can back up data stored in the Health app to Vigotron's cloud provider, Stratculous. (Read more about Stratculous here.)

Vigotron will never trade, rent or sell personal information gathered from the M-Health app. Furthermore, we will not provide a customer's name, email address or any other information gathered from the app to any third-party without a customer's consent, unless ordered by a court, directed by a subpoena, or to enforce the manufacturer's legal rights or protect its business or property.

We are happy to offer the M-Health app free of charge. If you want to download and use it, we ask that you first complete this registration form. (Please note that use of the M-Health app is restricted to adults aged 16 or older, unless parental consent has been given to minors intending to use it.)

- > First name:
- > Surname:
- > Year of birth:
- > Email:
- > Physical Address (optional*):
- > Health status:

*If you are interested in receiving newsletters about our products and services that we think may be of interest to you, please include your physical address. If you decide later that you do not wish to receive these newsletters, you can unsubscribe by sending an email to unsubscribe@vigotron.com or send a letter with your request to the address listed at the bottom of this page.

Terms and Conditions 1.Jurisdiction. [...] 2.Applicable law. [...] 3.Limitation of liability. [...] Consent

By completing this registration form, you attest that you are at least 16 years of age, and that you consent to the processing of your personal data by Vigotron for the purpose of using the M-Health app. Although you are entitled to opt out of any advertising or marketing, you agree that Vigotron may contact you or provide you with any required notices, agreements, or other information concerning the services by email or other electronic means. You also agree that the Company may send automated emails with alerts regarding any problems with the M-Health app that may affect your well being.

If a user of the M-Health app were to decide to withdraw his consent, Vigotron would first be required to do what?

- A. Provide the user with logs of data collected through use of the app.
- B. Erase any data collected from the time the app was first used.
- C. Inform any third parties of the user's withdrawal of consent.
- D. Cease processing any data collected through use of the app.

Answer: D

NEW QUESTION 10

What is a reason the European Court of Justice declared the Data Retention Directive invalid in 2014?

- A. The requirements affected individuals without exception.
- B. The requirements were financially burdensome to EU businesses.
- C. The requirements specified that data must be held within the EU.
- D. The requirements had limitations on how national authorities could use data.

Answer: D

NEW QUESTION 10

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion

process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

For what reason would JaphSoft be considered a controller under the GDPR?

- A. It determines how long to retain the personal data collected.
- B. It has been provided access to personal data in the MarketIQ database.
- C. It uses personal data to improve its products and services for its client-base through machine learning.
- D. It makes decisions regarding the technical and organizational measures necessary to protect the personal data.

Answer: D

NEW QUESTION 15

When hiring a data processor, which action would a data controller NOT be able to depend upon to avoid liability in the event of a security breach?

- A. Documenting due diligence steps taken in the pre-contractual stage.
- B. Conducting a risk assessment to analyze possible outsourcing threats.
- C. Requiring that the processor directly notify the appropriate supervisory authority.
- D. Maintaining evidence that the processor was the best possible market choice available.

Answer: A

NEW QUESTION 19

Article 9 of the GDPR lists exceptions to the general prohibition against processing biometric data. Which of the following is NOT one of these exceptions?

- A. The processing is done by a non-profit organization and the results are disclosed outside the organization.
- B. The processing is necessary to protect the vital interests of the data subject when he or she is incapable of giving consent.
- C. The processing is necessary for the establishment, exercise or defense of legal claims when courts are acting in a judicial capacity.
- D. The processing is explicitly consented to by the data subject and he or she is allowed by Union or Member State law to lift the prohibition.

Answer: A

NEW QUESTION 21

Article 58 of the GDPR describes the power of supervisory authorities. Which of the following is NOT among those granted?

- A. Legislative powers.
- B. Corrective powers.
- C. Investigatory powers.
- D. Authorization and advisory powers.

Answer: D

NEW QUESTION 23

Under which of the following conditions does the General Data Protection Regulation NOT apply to the processing of personal data?

- A. When the personal data is processed only in non-electronic form
- B. When the personal data is collected and then pseudonymised by the controller
- C. When the personal data is held by the controller but not processed for further purposes
- D. When the personal data is processed by an individual only for their household activities

Answer: B

NEW QUESTION 28

Article 5(1)(b) of the GDPR states that personal data must be "collected for specified, explicit and legitimate purposes and not further processed in a way incompatible with those purposes." Based on Article 5(1)(b), what is the impact of a member state's interpretation of the word "incompatible"?

- A. It dictates the level of security a processor must follow when using and storing personal data for two different purposes.
- B. It guides the courts on the severity of the consequences for those who are convicted of the intentional misuse of personal data.
- C. It sets the standard for the level of detail a controller must record when documenting the purpose for collecting personal data.
- D. It indicates the degree of flexibility a controller has in using personal data in ways that may vary from its original intended purpose.

Answer: A

NEW QUESTION 31

Why is advisable to avoid consent as a legal basis for an employer to process employee data?

- A. Employee data can only be processed if there is an approval from the data protection officer.
- B. Consent may not be valid if the employee feels compelled to provide it.
- C. An employer might have difficulty obtaining consent from every employee.
- D. Data protection laws do not apply to processing of employee data.

Answer: A

NEW QUESTION 36

SCENARIO

Please use the following to answer the next question:

BHealthy, a company based in Italy, is ready to launch a new line of natural products, with a focus on sunscreen. The last step prior to product launch is for BHealthy to conduct research to decide how extensively to market its new line of sunscreens across Europe. To do so, BHealthy teamed up with Natural Insight, a company specializing in determining pricing for natural products. BHealthy decided to share its existing customer information – name, location, and prior purchase history – with Natural Insight. Natural Insight intends to use this information to train its algorithm to help determine the price point at which BHealthy can sell its new sunscreens.

Prior to sharing its customer list, BHealthy conducted a review of Natural Insight's security practices and concluded that the company has sufficient security measures to protect the contact information. Additionally, BHealthy's data processing contractual terms with Natural Insight require continued implementation of technical and organization measures. Also indicated in the contract are restrictions on use of the data provided by BHealthy for any purpose beyond provision of the services, which include use of the data for continued improvement of Natural Insight's machine learning algorithms.

What is the nature of BHealthy and Natural Insight's relationship?

- A. Natural Insight is BHealthy's processor because the companies entered into data processing terms.
- B. Natural Insight is BHealthy's processor because BHealthy is sharing its customer information with Natural Insight.
- C. Natural Insight is the controller because it determines the security measures to implement to protect data it processes; BHealthy is a co-controller because it engaged Natural Insight to determine pricing for the new sunscreens.
- D. Natural Insight is a controller because it is separately determine the purpose of processing when it uses BHealthy's customer information to improve its machine learning algorithms.

Answer: A

NEW QUESTION 39

Under the GDPR, which essential pieces of information must be provided to data subjects before collecting their personal data?

- A. The authority by which the controller is collecting the data and the third parties to whom the data will be sent.
- B. The name/s of relevant government agencies involved and the steps needed for revising the data.
- C. The identity and contact details of the controller and the reasons the data is being collected.
- D. The contact information of the controller and a description of the retention policy.

Answer: C

NEW QUESTION 42

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father's company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company's online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers' philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer's personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend's daughter, Alice, who just graduated from law school in the U.S., to be the company's new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company's operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm.

In preparing the company for its impending lawsuit, Alice's instruction to the company's IT Department violated Article 5 of the GDPR because the company failed to first do what?

- A. Send out consent forms to all of its employees.
- B. Minimize the amount of data collected for the lawsuit.
- C. Inform all of its employees about the lawsuit.
- D. Encrypt the data from all of its employees.

Answer: B

NEW QUESTION 47

In which scenario is a Controller most likely required to undertake a Data Protection Impact Assessment?

- A. When the controller is collecting email addresses from individuals via an online registration form for marketing purposes.
- B. When personal data is being collected and combined with other personal data to profile the creditworthiness of individuals.
- C. When the controller is required to have a Data Protection Officer.
- D. When personal data is being transferred outside of the EEA.

Answer: C

NEW QUESTION 50

In which of the following cases would an organization MOST LIKELY be required to follow both ePrivacy and data protection rules?

- A. When creating an untargeted pop-up ad on a website.
- B. When calling a potential customer to notify her of an upcoming product sale.
- C. When emailing a customer to announce that his recent order should arrive earlier than expected.
- D. When paying a search engine company to give prominence to certain products and services within specific search results.

Answer: A

NEW QUESTION 51

What is the MAIN reason GDPR Article 4(22) establishes the concept of the “concerned supervisory authority”?

- A. To encourage the consistency of local data processing activity.
- B. To give corporations a choice about who their supervisory authority will be.
- C. To ensure the GDPR covers controllers that do not have an establishment in the EU but have a representative in a member state.
- D. To ensure that the interests of individuals residing outside the lead authority's jurisdiction are represented.

Answer: A

NEW QUESTION 53

If a multi-national company wanted to conduct background checks on all current and potential employees, including those based in Europe, what key provision would the company have to follow?

- A. Background checks on employees could be performed only under prior notice to all employees.
- B. Background checks are only authorized with prior notice and express consent from all employees including those based in Europe.
- C. Background checks on European employees will stem from data protection and employment law, which can vary between member states.
- D. Background checks may not be allowed on European employees, but the company can create lists based on its legitimate interests, identifying individuals who are ineligible for employment.

Answer: C

NEW QUESTION 55

Which judicial body makes decisions on actions taken by individuals wishing to enforce their rights under EU law?

- A. Court of Auditors
- B. Court of Justice of European Union
- C. European Court of Human Rights
- D. European Data Protection Board

Answer: B

NEW QUESTION 59

SCENARIO

Please use the following to answer the next question:

Anna and Frank both work at Granchester University. Anna is a lawyer responsible for data protection, while Frank is a lecturer in the engineering department. The University maintains a number of types of records:

- Student records, including names, student numbers, home addresses, pre-university information, university attendance and performance records, details of special educational needs and financial information.
- Staff records, including autobiographical materials (such as curricula, professional contact files, student evaluations and other relevant teaching files).
- Alumni records, including birthplaces, years of birth, dates of matriculation and conferrals of degrees.

These records are available to former students after registering through Granchester's Alumni portal. Department for Education records, showing how certain demographic groups (such as first-generation students) could be expected, on average, to progress. These records do not contain names or identification numbers.

➤ Under their security policy, the University encrypts all of its personal data records in transit and at rest. In order to improve his teaching, Frank wants to investigate how his engineering students perform in relational to Department for Education expectations. He has attended one of Anna's data protection training courses and knows that he should use no more personal data than necessary to accomplish his goal. He creates a program that will only export some student data: previous schools attended, grades originally obtained, grades currently obtained and first time university attended. He wants to keep the records at the individual student level. Mindful of Anna's training, Frank runs the student numbers through an algorithm to transform them into different reference numbers. He uses the same algorithm on each occasion so that he can update each record over time.

One of Anna's tasks is to complete the record of processing activities, as required by the GDPR. After receiving her email reminder, as required by the GDPR. After receiving her email reminder, Frank informs Anna about his performance database.

Ann explains to Frank that, as well as minimizing personal data, the University has to check that this new use of existing data is permissible. She also suspects that, under the GDPR, a risk analysis may have to be carried out before the data processing can take place. Anna arranges to discuss this further with Frank after she has done some additional research.

Frank wants to be able to work on his analysis in his spare time, so he transfers it to his home laptop (which is not encrypted). Unfortunately, when Frank takes the laptop into the University he loses it on the train. Frank has to see Anna that day to discuss compatible processing. He knows that he needs to report security incidents, so he decides to tell Anna about his lost laptop at the same time.

Anna will find that a risk analysis is NOT necessary in this situation as long as?

- A. The data subjects are no longer current students of Frank's
- B. The processing will not negatively affect the rights of the data subjects
- C. The algorithms that Frank uses for the processing are technologically sound
- D. The data subjects gave their unambiguous consent for the original processing

Answer: D

NEW QUESTION 64

SCENARIO

Please use the following to answer the next question:

Joe is the new privacy manager for Who-R-U, a Canadian business that provides DNA analysis. The company is headquartered in Montreal, and all of its employees are located there. The company offers its services to Canadians only: Its website is in English and French, it accepts only Canadian currency, and it blocks internet traffic from outside of Canada (although this solution doesn't prevent all non-Canadian traffic). It also declines to process orders that request the DNA report to be sent outside of Canada, and returns orders that show a non-Canadian return address.

Bob, the President of Who-R-U, thinks there is a lot of interest for the product in the EU, and the company is exploring a number of plans to expand its customer base.

The first plan, collegially called We-Track-U, will use an app to collect information about its current Canadian customer base. The expansion will allow its Canadian customers to use the app while traveling abroad. He suggests that the company use this app to gather location information. If the plan shows promise, Bob proposes to use push notifications and text messages to encourage existing customers to pre-register for an EU version of the service. Bob calls this work plan, We-Text-U. Once the company has gathered enough pre-registrations, it will develop EU-specific content and services.

Another plan is called Customer for Life. The idea is to offer additional services through the company's app, like storage and sharing of DNA information with other applications and medical providers. The company's contract says that it can keep customer DNA indefinitely, and use it to offer new services and market them to customers. It also says that customers agree not to withdraw direct marketing consent. Paul, the marketing director, suggests that the company should fully exploit these provisions, and that it can work around customers' attempts to withdraw consent because the contract invalidates them.

The final plan is to develop a brand presence in the EU. The company has already begun this process. It is in the process of purchasing the naming rights for a building in Germany, which would come with a few offices that Who-R-U executives can use while traveling internationally. The office doesn't include any technology or infrastructure; rather, it's simply a room with a desk and some chairs.

On a recent trip concerning the naming-rights deal, Bob's laptop is stolen. The laptop held unencrypted DNA reports on 5,000 Who-R-U customers, all of whom are residents of Canada. The reports include customer name, birthdate, ethnicity, racial background, names of relatives, gender, and occasionally health information.

Who-R-U is NOT required to notify the local German DPA about the laptop theft because?

- A. The company isn't a controller established in the Union.
- B. The laptop belonged to a company located in Canada.
- C. The data isn't considered personally identifiable financial information.
- D. There is no evidence that the thieves have accessed the data on the laptop.

Answer: A

NEW QUESTION 68

Under what circumstances might the "soft opt-in" rule apply in relation to direct marketing?

- A. When an individual has not consented to the marketing.
- B. When an individual's details are obtained from their inquiries about buying a product.
- C. Where an individual's details have been obtained from a bought-in marketing list.
- D. Where an individual is given the ability to unsubscribe from marketing emails sent to him.

Answer: B

NEW QUESTION 69

Bioface is a company based in the United States. It has no servers, personnel or assets in the European Union. By collecting photographs from social media and other web-based services, such as newspapers and blogs, it uses machine learning to develop a facial recognition algorithm. The algorithm identifies individuals in photographs who are not in its data set based the algorithm and its existing data. The service collects photographs of data subjects in the European Union and will identify them if presented with their photographs. Bioface offers its service to government agencies and companies in the United States and Canada, but not to those in the European Union. Bioface does not offer the service to individuals.

Why is Bioface subject to the territorial scope of the General Data Protection Regulation?

- A. It collects data from European Union websites, which constitutes an establishment in the European Union.
- B. It offers services in the European Union by identifying data subjects in the European Union.
- C. It collects data from subjects and uses it for automated processing.
- D. It monitors the behavior of data subjects in the European Union.

Answer: A

NEW QUESTION 72

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Iman, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Iman recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

Which of the following BEST describes the relationship between Liem, EcoMick and JaphSoft?

- A. Liem is a controller and EcoMick is a processor because Liem provides specific instructions regarding how the marketing campaigns should be rolled out.
- B. EcoMick and JaphSoft are is a controller and Liem is a processor because EcoMick is sharing its marketing data with Liem for contacts in Europe.
- C. JaphSoft is the sole processor because it processes personal data on behalf of its clients.
- D. Liem and EcoMick are joint controllers because they carry out joint marketing activities.

Answer: B

NEW QUESTION 74

Which of the following would MOST likely trigger the extraterritorial effect of the GDPR, as specified by Article 3?

- A. The behavior of suspected terrorists being monitored by EU law enforcement bodies.
- B. Personal data of EU citizens being processed by a controller or processor based outside the EU.
- C. The behavior of EU citizens outside the EU being monitored by non-EU law enforcement bodies.
- D. Personal data of EU residents being processed by a non-EU business that targets EU customers.

Answer: B

NEW QUESTION 75

What are the obligations of a processor that engages a sub-processor?

- A. The processor must give the controller prior written notice and perform a preliminary audit of the sub- processor.
- B. The processor must obtain the controller's specific written authorization and provide annual reports on the sub-processor's performance.
- C. The processor must receive a written agreement that the sub-processor will be fully liable to the controller for the performance of its obligations in relation to the personal data concerned.
- D. The processor must obtain the consent of the controller and ensure the sub-processor complies with data processing obligations that are equivalent to those that apply to the processor.

Answer: C

NEW QUESTION 76

What should a controller do after a data subject opts out of a direct marketing activity?

- A. Without exception, securely delete all personal data relating to the data subject.
- B. Without undue delay, provide information to the data subject on the action that will be taken.
- C. Refrain from processing personal data relating to the data subject for the relevant type of communication.
- D. Take reasonable steps to inform third-party recipients that the data subject's personal data should be deleted and no longer processed.

Answer: C

NEW QUESTION 77

Under the GDPR, where personal data is not obtained directly from the data subject, a controller is exempt from directly providing information about processing to the data subject if?

- A. The data subject already has information regarding how his data will be used
- B. The provision of such information to the data subject would be too problematic
- C. Third-party data would be disclosed by providing such information to the data subject
- D. The processing of the data subject's data is protected by appropriate technical measures

Answer: A

NEW QUESTION 81

SCENARIO

Please use the following to answer the next question:

T-Craze, a German-headquartered specialty t-shirt company, was successfully selling to large German metropolitan cities. However, after a recent merger with another German-based company that was selling to a broader European market, T-Craze revamped its marketing efforts to sell to a wider audience. These efforts included a complete redesign of its logo to reflect the recent merger, and improvements to its website meant to capture more information about visitors through the use of cookies.

T-Craze also opened various office locations throughout Europe to help expand its business. While Germany Target, a renowned marketing firm based in the Philippines, to run its latest marketing campaign. After thorough research, Right Target determined that T-Craze is most successful with customers between the ages of 18 and 22. Thus, its first campaign targeted university students in several European capitals, which yielded nearly 40% new customers for T-Craze in one quarter. Right Target also ran subsequent campaigns for T-Craze, though with much less success.

The last two campaigns included a wider demographic group and resulted in countless unsubscribe requests, including a large number in Spain. In fact, the Spanish data protection authority received a complaint from Sofia, a mid-career investment banker. Sofia was upset after receiving a marketing communication even after unsubscribing from such communications from the Right Target on behalf of T-Craze.

What is the best option for the lead regulator when responding to the Spanish supervisory authority's notice that it plans to take action regarding Sofia's complaint?

- A. Accept, because it did not receive any complaints.
- B. Accept, because GDPR permits non-lead authorities to take action for such complaints.
- C. Reject, because Right Target's processing was conducted throughout Europe.
- D. Reject, because GDPR does not allow other supervisory authorities to take action if there is a lead authority.

Answer: D

NEW QUESTION 83

Which of the following is an example of direct marketing that would be subject to European data protection laws?

- A. An updated privacy notice sent to an individual's personal email address.
- B. A charity fundraising event notice sent to an individual at her business address.
- C. A service outage notification provided to an individual by recorded telephone message.
- D. A revision of contract terms conveyed to an individual by SMS from a marketing organization.

Answer: B

NEW QUESTION 86

SCENARIO

Please use the following to answer the next question:

Due to rapidly expanding workforce, Company A has decided to outsource its payroll function to Company B. Company B is an established payroll service provider with a sizable client base and a solid reputation in the industry.

Company B's payroll solution for Company A relies on the collection of time and attendance data obtained via a biometric entry system installed in each of Company A's factories. Company B won't hold any biometric data itself, but the related data will be uploaded to Company B's UK servers and used to provide the payroll service. Company B's live systems will contain the following information for each of Company A's employees:

- Name
- Address
- Date of Birth
- Payroll number
- National Insurance number
- Sick pay entitlement
- Maternity/paternity pay entitlement
- Holiday entitlement
- Pension and benefits contributions
- Trade union contributions

Jenny is the compliance officer at Company A. She first considers whether Company A needs to carry out a data protection impact assessment in relation to the new time and attendance system, but isn't sure whether or not this is required.

Jenny does know, however, that under the GDPR there must be a formal written agreement requiring Company B to use the time and attendance data only for the purpose of providing the payroll service, and to apply appropriate technical and organizational security measures for safeguarding the data. Jenny suggests that Company B obtain advice from its data protection officer. The company doesn't have a DPO but agrees, in the interest of finalizing the contract, to sign up for the provisions in full. Company A enters into the contract.

Weeks later, while still under contract with Company A, Company B embarks upon a separate project meant to enhance the functionality of its payroll service, and engages Company C to help. Company C agrees to extract all personal data from Company B's live systems in order to create a new database for Company B. This database will be stored in a test environment hosted on Company C's U.S. server. The two companies agree not to include any data processing provisions in their services agreement, as data is only being used for IT testing purposes.

Unfortunately, Company C's U.S. server is only protected by an outdated IT security system, and suffers a cyber security incident soon after Company C begins work on the project. As a result, data relating to Company A's employees is visible to anyone visiting Company C's website. Company A is unaware of this until Jenny receives a letter from the supervisory authority in connection with the investigation that ensues. As soon as Jenny is made aware of the breach, she notifies all affected employees.

The GDPR requires sufficient guarantees of a company's ability to implement adequate technical and organizational measures. What would be the most realistic way that Company B could have fulfilled this requirement?

- A. Hiring companies whose measures are consistent with recommendations of accrediting bodies.
- B. Requesting advice and technical support from Company A's IT team.
- C. Avoiding the use of another company's data to improve their own services.
- D. Vetting companies' measures with the appropriate supervisory authority.

Answer: A

NEW QUESTION 90

Which EU institution is vested with the competence to propose new data protection legislation on its own initiative?

- A. The European Council
- B. The European Parliament
- C. The European Commission
- D. The Council of the European Union

Answer: D

NEW QUESTION 95

What is the most frequently used mechanism for legitimizing cross-border data transfer?

- A. Standard Contractual Clauses.
- B. Approved Code of Conduct.
- C. Binding Corporate Rules.
- D. Derogations.

Answer: A

NEW QUESTION 97

SCENARIO

Please use the following to answer the next question:

Zandelay Fashion ('Zandelay') is a successful international online clothing retailer that employs approximately 650 people at its headquarters based in Dublin, Ireland. Martin is their recently appointed data protection officer, who oversees the company's compliance with the General Data Protection Regulation (GDPR) and other privacy legislation.

The company offers both male and female clothing lines across all age demographics, including children. In doing so, the company processes large amounts of information about such customers, including preferences and sensitive financial information such as credit card and bank account numbers.

In an aggressive bid to build revenue growth, Jerry, the CEO, tells Martin that the company is launching a new mobile app and loyalty scheme that puts significant emphasis on profiling the company's customers by analyzing their purchases. Martin tells the CEO that: (a) the potential risks of such activities means that Zandelay needs to carry out a data protection impact assessment to assess this new venture and its privacy implications; and (b) where the results of this assessment indicate a high risk in the absence of appropriate protection measures, Zandelay may have to undertake a prior consultation with the Irish Data Protection Commissioner before implementing the app and loyalty scheme.

Jerry tells Martin that he is not happy about the prospect of having to directly engage with a supervisory authority and having to disclose details of Zandelay's business plan and associated processing activities.

What would MOST effectively assist Zandelay in conducting their data protection impact assessment?

- A. Information about DPIAs found in Articles 38 through 40 of the GDPR.
- B. Data breach documentation that data controllers are required to maintain.
- C. Existing DPIA guides published by local supervisory authorities.
- D. Records of processing activities that data controllers are required to maintain.

Answer: A

NEW QUESTION 100

SCENARIO

Please use the following to answer the next question:

T-Craze, a German-headquartered specialty t-shirt company, was successfully selling to large German metropolitan cities. However, after a recent merger with another German-based company that was selling to a broader European market, T-Craze revamped its marketing efforts to sell to a wider audience. These efforts included a complete redesign of its logo to reflect the recent merger, and improvements to its website meant to capture more information about visitors through the use of cookies.

T-Craze also opened various office locations throughout Europe to help expand its business. While Germany continued to host T-Craze's headquarters and main product-design office, its French affiliate became responsible for all marketing and sales activities. The French affiliate recently procured the services of Right Target, a renowned marketing firm based in the Philippines, to run its latest marketing campaign. After thorough research, Right Target determined that T-Craze is most successful with customers between the ages of 18 and 22. Thus, its first campaign targeted university students in several European capitals, which yielded nearly 40% new customers for T-Craze in one quarter. Right Target also ran subsequent campaigns for T-Craze, though with much less success.

The last two campaigns included a wider demographic group and resulted in countless unsubscribe requests, including a large number in Spain. In fact, the Spanish data protection authority received a complaint from Sofia, a mid-career investment banker. Sofia was upset after receiving a marketing communication even after unsubscribing from such communications from the Right Target on behalf of T-Craze.

Why does the Spanish supervisory authority notify the French supervisory authority when it opens an investigation into T-Craze based on Sofia's complaint?

- A. T-Craze has a French affiliate.
- B. The French affiliate procured the services of Right Target.
- C. T-Craze conducts its marketing and sales activities in France.
- D. The Spanish supervisory authority is providing a courtesy notification not required under the GDPR.

Answer: C

NEW QUESTION 103

Which of the following countries will continue to enjoy adequacy status under the GDPR, pending any future European Commission decision to the contrary?

- A. Greece
- B. Norway
- C. Australia
- D. Switzerland

Answer: D

NEW QUESTION 105

A worker in a European Union (EU) member state has ceased his employment with a company. What should the employer most likely do in regard to the worker's personal data?

- A. Destroy sensitive information and store the rest per applicable data protection rules.
- B. Store all of the data in case the departing worker makes a subject access request.
- C. Securely store the data that is required to be kept under local law.
- D. Provide the employee the reasons for retaining the data.

Answer: A

NEW QUESTION 108

Which of the following is NOT recognized as being a common characteristic of cloud-computing services?

- A. The service's infrastructure is shared among the supplier's customers and can be located in a number of countries.
- B. The supplier determines the location, security measures, and service standards applicable to the processing.
- C. The supplier allows customer data to be transferred around the infrastructure according to capacity.
- D. The supplier assumes the vendor's business risk associated with data processed by the supplier.

Answer: D

NEW QUESTION 110

When assessing the level of risk created by a data breach, which of the following would NOT have to be taken into consideration?

- A. The ease of identification of individuals.
- B. The size of any data processor involved.

- C. The special characteristics of the data controller.
- D. The nature, sensitivity and volume of personal data.

Answer: B

NEW QUESTION 114

Pursuant to Article 4(5) of the GDPR, data is considered “pseudonymized” if?

- A. It cannot be attributed to a data subject without the use of additional information.
- B. It cannot be attributed to a person under any circumstances.
- C. It can only be attributed to a person by the controller.
- D. It can only be attributed to a person by a third party.

Answer: A

NEW QUESTION 117

The GDPR forbids the practice of “forum shopping”, which occurs when companies do what?

- A. Choose the data protection officer that is most sympathetic to their business concerns.
- B. Designate their main establishment in member state with the most flexible practices.
- C. File appeals of infringement judgments with more than one EU institution simultaneously.
- D. Select third-party processors on the basis of cost rather than quality of privacy protection.

Answer: B

NEW QUESTION 122

SCENARIO

Please use the following to answer the next question:

Louis, a long-time customer of Bedrock Insurance, was involved in a minor car accident a few months ago. Although no one was hurt, Louis has been plagued by texts and calls from a company called Accidentable offering to help him recover compensation for personal injury. Louis has heard about insurance companies selling customers’ data to third parties, and he’s convinced that Accidentable must have gotten his information from Bedrock Insurance.

Louis has also been receiving an increased amount of marketing information from Bedrock, trying to sell him their full range of their insurance policies.

Perturbed by this, Louis has started looking at price comparison sites on the internet and has been shocked to find that other insurers offer much cheaper rates than Bedrock, even though he has been a loyal customer for many years. When his Bedrock policy comes up for renewal, he decides to switch to Zantrum Insurance.

In order to activate his new insurance policy, Louis needs to supply Zantrum with information about his No Claims bonus, his vehicle and his driving history. After researching his rights under the GDPR, he writes to ask Bedrock to transfer his information directly to Zantrum. He also takes this opportunity to ask Bedrock to stop using his personal data for marketing purposes.

Bedrock supplies Louis with a PDF and XML (Extensible Markup Language) versions of his No Claims Certificate, but tells Louis it cannot transfer his data directly to Zantrum as this is not technically feasible. Bedrock also explains that Louis’s contract included a provision whereby Louis agreed that his data could be used for marketing purposes; according to Bedrock, it is too late for Louis to change his mind about this. It angers Louis when he recalls the wording of the contract, which was filled with legal jargon and very confusing.

In the meantime, Louis is still receiving unwanted calls from Accidentable Insurance. He writes to Accidentable to ask for the name of the organization that supplied his details to them. He warns Accidentable that he plans to complain to the data protection authority, because he thinks their company has been using his data unlawfully. His letter states that he does not want his data being used by them in any way.

Accidentable’s response letter confirms Louis’s suspicions. Accidentable is Bedrock Insurance’s wholly owned subsidiary, and they received information about Louis’s accident from Bedrock shortly after Louis submitted his accident claim. Accidentable assures Louis that there has been no breach of the GDPR, as Louis’s contract included, a provision in which he agreed to share his information with Bedrock’s affiliates for business purposes.

Louis is disgusted by the way in which he has been treated by Bedrock, and writes to them insisting that all his information be erased from their computer system. Which statement accurately summarizes Bedrock’s obligation in regard to Louis’s data portability request?

- A. Bedrock does not have a duty to transfer Louis’s data to Zantrum if doing so is legitimately not technically feasible.
- B. Bedrock does not have to transfer Louis’s data to Zantrum because the right to data portability does not apply where personal data are processed in order to carry out tasks in the public interest.
- C. Bedrock has failed to comply with the duty to transfer Louis’s data to Zantrum because the duty applies wherever personal data are processed by automated means and necessary for the performance of a contract with the customer.
- D. Bedrock has failed to comply with the duty to transfer Louis’s data to Zantrum because it has an obligation to develop commonly used, machine-readable and interoperable formats so that all customer data can be ported to other insurers on request.

Answer: B

NEW QUESTION 125

What was the aim of the European Data Protection Directive 95/46/EC?

- A. To harmonize the implementation of the European Convention of Human Rights across all member states.
- B. To implement the OECD Guidelines on the Protection of Privacy and trans-border flows of Personal Data.
- C. To completely prevent the transfer of personal data out of the European Union.
- D. To further reconcile the protection of the fundamental rights of individuals with the free flow of data from one member state to another.

Answer: B

NEW QUESTION 129

Under Article 80(1) of the GDPR, individuals can elect to be represented by not-for-profit organizations in a privacy group litigation or class action. These organizations are commonly known as?

- A. Law firm organizations.
- B. Civil society organizations.
- C. Human rights organizations.

D. Constitutional rights organizations.

Answer: A

NEW QUESTION 132

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Ben graduated with a PhD in computer software from a top university. Ben decided to join his father's company, but is also secretly working on launching a new global online dating website company called Ben Knows Best.

Ben is aware that the Gummy Bear Company has millions of customers and believes that many of them might also be interested in finding their perfect match. For Project Big, Ben redesigns the company's online web portal and requires customers in the European Union and elsewhere to provide additional personal information in order to remain a customer. Project Ben begins collecting data about customers' philosophical beliefs, political opinions and marital status.

If a customer identifies as single, Ben then copies all of that customer's personal data onto a separate database for Ben Knows Best. Ben believes that he is not doing anything wrong, because he explicitly asks each customer to give their consent by requiring them to check a box before accepting their information. As Project Big is an important project, the company also hires a first year college student named Sam, who is studying computer science to help Ben out.

Ben calls out and Sam comes across the Ben Knows Best database. Sam is planning on going to Ireland over Spring Break with 10 of his friends, so he copies all of the customer information of people that reside in Ireland so that he and his friends can contact people when they are in Ireland.

Joe also hires his best friend's daughter, Alice, who just graduated from law school in the U.S., to be the company's new General Counsel. Alice has heard about the GDPR, so she does some research on it. Alice approaches Joe and informs him that she has drafted up Binding Corporate Rules for everyone in the company to follow, as it is important for the company to have in place a legal mechanism to transfer data internally from the company's operations in the European Union to the U.S.

Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm.

When Ben had the company collect additional data from its customers, the most serious violation of the GDPR occurred because the processing of the data created what?

- A. An information security risk by copying the data into a new database.
- B. A potential legal liability and financial exposure from its customers.
- C. A significant risk to the customers' fundamental rights and freedoms.
- D. A significant risk due to the lack of an informed consent mechanism.

Answer: C

NEW QUESTION 133

WP29's "Guidelines on Personal data breach notification under Regulation 2016/679" provides examples of ways to communicate data breaches transparently. Which of the following was listed as a method that would NOT be effective for communicating a breach to data subjects?

- A. A postal notification
- B. A direct electronic message
- C. A notice on a corporate blog
- D. A prominent advertisement in print media

Answer: C

NEW QUESTION 137

What is true if an employee makes an access request to his employer for any personal data held about him?

- A. The employer can automatically decline the request if it contains personal data about a third person.
- B. The employer can decline the request if the information is only held electronically.
- C. The employer must supply all the information held about the employee.
- D. The employer must supply any information held about an employee unless an exemption applies.

Answer: D

NEW QUESTION 140

SCENARIO

Please use the following to answer the next question:

Joe started the Gummy Bear Company in 2000 from his home in Vermont, USA. Today, it is a multi-billion-dollar candy company operating in every continent. All of the company's IT servers are located in Vermont. This year Joe hires his son Ben to join the company and head up Project Big, which is a major marketing strategy to triple gross revenue in just 5 years. Joe believes that Alice is doing a great job, and informs her that she will also be in-charge of handling a major lawsuit that has been brought against the company in federal court in the U.S. To prepare for the lawsuit, Alice instructs the company's IT department to make copies of the computer hard drives from the entire global sales team, including the European Union, and send everything to her so that she can review everyone's information. Alice believes that Joe will be happy that she did the first level review, as it will save the company a lot of money that would otherwise be paid to its outside law firm. The data transfer mechanism that Alice drafted violates the GDPR because the company did not first get approval from?

- A. The Court of Justice of the European Union.
- B. The European Data Protection Board.
- C. The Data Protection Authority.
- D. The European Commission.

Answer: C

NEW QUESTION 145

A key component of the OECD Guidelines is the "Individual Participation Principle". What parts of the General Data Protection Regulation (GDPR) provide the closest equivalent to that principle?

- A. The lawful processing criteria stipulated by Articles 6 to 9
- B. The information requirements set out in Articles 13 and 14
- C. The breach notification requirements specified in Articles 33 and 34
- D. The rights granted to data subjects under Articles 12 to 22

Answer: D

NEW QUESTION 149

How is the retention of communications traffic data for law enforcement purposes addressed by European data protection law?

- A. The ePrivacy Directive allows individual EU member states to engage in such data retention.
- B. The ePrivacy Directive harmonizes EU member states' rules concerning such data retention.
- C. The Data Retention Directive's annulment makes such data retention now permissible.
- D. The GDPR allows the retention of such data for the prevention, investigation, detection or prosecution of criminal offences only.

Answer: D

NEW QUESTION 152

A data controller appoints a data protection officer. Which of the following conditions would NOT result in an infringement of Articles 37 to 39 of the GDPR?

- A. If the data protection officer lacks ISO 27001 auditor certification.
- B. If the data protection officer is provided by the data processor.
- C. If the data protection officer also manages the marketing budget.
- D. If the data protection officer receives instructions from the data controller.

Answer: D

NEW QUESTION 156

Which of the following would most likely NOT be covered by the definition of "personal data" under the GDPR?

- A. The payment card number of a Dutch citizen
- B. The U.
- C. social security number of an American citizen living in France
- D. The unlinked aggregated data used for statistical purposes by an Italian company
- E. The identification number of a German candidate for a professional examination in Germany

Answer: D

NEW QUESTION 160

SCENARIO

Please use the following to answer the next question:

TripBliss Inc. is a travel service company which has lost substantial revenue over the last few years. Their new manager, Oliver, suspects that this is partly due to the company's outdated website. After doing some research, he meets with a sales representative from the up-and-coming IT company Techiva, hoping that they can design a new, cutting-edge website for TripBliss Inc.'s foundering business.

During negotiations, a Techiva representative describes a plan for gathering more customer information through detailed Questionnaires, which could be used to tailor their preferences to specific travel destinations. TripBliss Inc. can choose any number of data categories – age, income, ethnicity – that would help them best accomplish their goals. Oliver loves this idea, but would also like to have some way of gauging how successful this approach is, especially since the Questionnaires will require customers to provide explicit consent to having their data collected. The Techiva representative suggests that they also run a program to analyze the new website's traffic, in order to get a better understanding of how customers are using it. He explains his plan to place a number of cookies on customer devices. The cookies will allow the company to collect IP addresses and other information, such as the sites from which the customers came, how much time they spend on the TripBliss Inc. website, and which pages on the site they visit. All of this information will be compiled in log files, which Techiva will analyze by means of a special program. TripBliss Inc. would receive aggregate statistics to help them evaluate the website's effectiveness. Oliver enthusiastically engages Techiva for these services.

Techiva assigns the analytics portion of the project to longtime account manager Leon Santos. As is standard practice, Leon is given administrator rights to TripBliss Inc.'s website, and can authorize access to the log files gathered from it. Unfortunately for TripBliss Inc., however, Leon is taking on this new project at a time when his dissatisfaction with Techiva is at a high point. In order to take revenge for what he feels has been unfair treatment at the hands of the company, Leon asks his friend Fred, a hobby hacker, for help. Together they come up with the following plan: Fred will hack into Techiva's system and copy their log files onto a USB stick. Despite his initial intention to send the USB to the press and to the data protection authority in order to denounce Techiva, Leon experiences a crisis of conscience and ends up reconsidering his plan. He decides instead to securely wipe all the data from the USB stick and inform his manager that the company's system of access control must be reconsidered.

With regard to TripBliss Inc.'s use of website cookies, which of the following statements is correct?

- A. Because not all of the cookies are strictly necessary to enable the use of a service requested from TripBliss Inc., consent requirements apply to their use of cookies.
- B. Because of the categories of data involved, explicit consent for the use of cookies must be obtained separately from customers.
- C. Because Techiva will receive only aggregate statistics of data collected from the cookies, no additional consent is necessary.
- D. Because the use of cookies involves the potential for location tracking, explicit consent must be obtained from customers.

Answer: B

NEW QUESTION 165

A grade school is planning to use facial recognition to track student attendance. Which of the following may provide a lawful basis for this processing?

- A. The school places a notice near each camera.
- B. The school gets explicit consent from the students.
- C. Processing is necessary for the legitimate interests pursued by the school.
- D. A state law requires facial recognition to verify attendance.

Answer: A

NEW QUESTION 170

An unforeseen power outage results in company Z's lack of access to customer data for six hours. According to article 32 of the GDPR, this is considered a breach. Based on the WP 29's February, 2018 guidance, company Z should do which of the following?

- A. Notify affected individuals that their data was unavailable for a period of time.
- B. Document the loss of availability to demonstrate accountability
- C. Notify the supervisory authority about the loss of availability
- D. Conduct a thorough audit of all security systems

Answer: C

NEW QUESTION 174

SCENARIO

Please use the following to answer the next question:

Anna and Frank both work at Granchester University. Anna is a lawyer responsible for data protection, while Frank is a lecturer in the engineering department. The University maintains a number of types of records:

- Student records, including names, student numbers, home addresses, pre-university information, university attendance and performance records, details of special educational needs and financial information.
- Staff records, including autobiographical materials (such as curricula, professional contact files, student evaluations and other relevant teaching files).
- Alumni records, including birthplaces, years of birth, dates of matriculation and conferrals of degrees.

These records are available to former students after registering through Granchester's Alumni portal. Department for Education records, showing how certain demographic groups (such as first-generation students) could be expected, on average, to progress. These records do not contain names or identification numbers.

- Under their security policy, the University encrypts all of its personal data records in transit and at rest.

In order to improve his teaching, Frank wants to investigate how his engineering students perform in relational to Department for Education expectations. He has attended one of Anna's data protection training courses and knows that he should use no more personal data than necessary to accomplish his goal. He creates a program that will only export some student data: previous schools attended, grades originally obtained, grades currently obtained and first time university attended. He wants to keep the records at the individual student level. Mindful of Anna's training, Frank runs the student numbers through an algorithm to transform them into different reference numbers. He uses the same algorithm on each occasion so that he can update each record over time.

One of Anna's tasks is to complete the record of processing activities, as required by the GDPR. After receiving her email reminder, as required by the GDPR.

After receiving her email reminder, Frank informs

Anna about his performance database.

Ann explains to Frank that, as well as minimizing personal data, the University has to check that this new use of existing data is permissible. She also suspects that, under the GDPR, a risk analysis may have to be carried out before the data processing can take place. Anna arranges to discuss this further with Frank after she has done some additional research.

Frank wants to be able to work on his analysis in his spare time, so he transfers it to his home laptop (which is not encrypted). Unfortunately, when Frank takes the laptop into the University he loses it on the train. Frank has to see Anna that day to discuss compatible processing. He knows that he needs to report security incidents, so he decides to tell Anna about his lost laptop at the same time.

Which of the University's records does Anna NOT have to include in her record of processing activities?

- A. Student records
- B. Staff and alumni records
- C. Frank's performance database
- D. Department for Education records

Answer: C

NEW QUESTION 178

The GDPR specifies fines that may be levied against data controllers for certain infringements. Which of the following infringements would be subject to the less severe administrative fine of up to 10 million euros (or in the case of an undertaking, up to 2% of the total worldwide annual turnover of the preceding financial year)?

- A. Failure to demonstrate that consent was given by the data subject to the processing of their personal data where it is used as the basis for processing.
- B. Failure to implement technical and organizational measures to ensure data protection is enshrined by design and default.
- C. Failure to process personal information in a manner compatible with its original purpose.
- D. Failure to provide the means for a data subject to rectify inaccuracies in personal data.

Answer: D

NEW QUESTION 182

Under Article 30 of the GDPR, controllers are required to keep records of all of the following EXCEPT?

- A. Incidents of personal data breaches, whether disclosed or not.
- B. Data inventory or data mapping exercises that have been conducted.
- C. Categories of recipients to whom the personal data have been disclosed.
- D. Retention periods for erasure and deletion of categories of personal data.

Answer: D

NEW QUESTION 186

According to the GDPR, how is pseudonymous personal data defined?

- A. Data that can no longer be attributed to a specific data subject without the use of additional information kept separately.
- B. Data that can no longer be attributed to a specific data subject, with no possibility of re-identifying the data.
- C. Data that has been rendered anonymous in such a manner that the data subject is no longer identifiable.
- D. Data that has been encrypted or is subject to other technical safeguards.

Answer: A

NEW QUESTION 188

SCENARIO

Please use the following to answer the next question:

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores. Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales.

The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's Questions: on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well. The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a question, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure. The answer is given through the figure's integrated speakers, making it appear as though that the toy is actually responding to the child's question. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this.

In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of the home and have the character's abilities remain intact.

What presents the BIGGEST potential privacy issue with the company's practices?

- A. The NFC portal can read any data stored in the action figures
- B. The information about the data processing involved has not been specified
- C. The cloud service provider is in a country that has not been deemed adequate
- D. The RFID tag in the action figures has the potential for misuse because of the toy's evolving capabilities

Answer: B

NEW QUESTION 190

SCENARIO

Please use the following to answer the next question:

ABC Hotel Chain and XYZ Travel Agency are U.S.-based multinational companies. They use an internet-based common platform for collecting and sharing their customer data with each other, in order to integrate their marketing efforts. Additionally, they agree on the data to be stored, how reservations will be booked and confirmed, and who has access to the stored data.

Mike, an EU resident, has booked travel itineraries in the past through XYZ Travel Agency to stay at ABC Hotel Chain's locations. XYZ Travel Agency offers a rewards program that allows customers to sign up to accumulate points that can later be redeemed for free travel. Mike has signed the agreement to be a rewards program member.

Now Mike wants to know what personal information the company holds about him. He sends an email requesting access to his data, in order to exercise what he believes are his data subject rights.

What is the time period in which Mike should receive a response to his request?

- A. Not more than one month of receipt of Mike's request.
- B. Not more than two months after verifying Mike's identity.
- C. When all the information about Mike has been collected.
- D. Not more than thirty days after submission of Mike's request.

Answer: D

NEW QUESTION 192

Under Article 9 of the GDPR, which of the following categories of data is NOT expressly prohibited from data processing?

- A. Personal data revealing ethnic origin.
- B. Personal data revealing genetic data.
- C. Personal data revealing financial data.
- D. Personal data revealing trade union membership.

Answer: C

NEW QUESTION 195

What is the key difference between the European Council and the Council of the European Union?

- A. The Council of the European Union is helmed by a president.
- B. The Council of the European Union has a degree of legislative power.
- C. The European Council focuses primarily on issues involving human rights.
- D. The European Council is comprised of the heads of each EU member state.

Answer: D

NEW QUESTION 199

Based on GDPR Article 35, which of the following situations would trigger the need to complete a DPIA?

- A. A company wants to combine location data with other data in order to offer more personalized service for the customer.
- B. A company wants to use location data to infer information on a person's clothes purchasing habits.
- C. A company wants to build a dating app that creates candidate profiles based on location data and data from third-party sources.
- D. A company wants to use location data to track delivery trucks in order to make the routes more efficient.

Answer: C

NEW QUESTION 203

There are three domains of security covered by Article 32 of the GDPR that apply to both the controller and the processor. These include all of the following EXCEPT?

- A. Consent management and withdrawal.
- B. Incident detection and response.
- C. Preventative security.
- D. Remedial security.

Answer: A

NEW QUESTION 205

In addition to the European Commission, who can adopt standard contractual clauses, assuming that all required conditions are met?

- A. Approved data controllers.
- B. The Council of the European Union.
- C. National data protection authorities.
- D. The European Data Protection Supervisor.

Answer: A

NEW QUESTION 209

SCENARIO

Please use the following to answer the next question:

Due to rapidly expanding workforce, Company A has decided to outsource its payroll function to Company B.

Company B is an established payroll service provider with a sizable client base and a solid reputation in the industry.

Company B's payroll solution for Company A relies on the collection of time and attendance data obtained via a biometric entry system installed in each of Company A's factories. Company B won't hold any biometric data itself, but the related data will be uploaded to Company B's UK servers and used to provide the payroll service. Company B's live systems will contain the following information for each of Company A's employees:

- Name
- Address
- Date of Birth
- Payroll number
- National Insurance number
- Sick pay entitlement
- Maternity/paternity pay entitlement
- Holiday entitlement
- Pension and benefits contributions
- Trade union contributions

Jenny is the compliance officer at Company A. She first considers whether Company A needs to carry out a data protection impact assessment in relation to the new time and attendance system, but isn't sure whether or not this is required.

Jenny does know, however, that under the GDPR there must be a formal written agreement requiring Company B to use the time and attendance data only for the purpose of providing the payroll service, and to apply appropriate technical and organizational security measures for safeguarding the data. Jenny suggests that Company B obtain advice from its data protection officer. The company doesn't have a DPO but agrees, in the interest of finalizing the contract, to sign up for the provisions in full. Company A enters into the contract.

Weeks later, while still under contract with Company A, Company B embarks upon a separate project meant to enhance the functionality of its payroll service, and engages Company C to help. Company C agrees to extract all personal data from Company B's live systems in order to create a new database for Company B. This database will be stored in a test environment hosted on Company C's U.S. server. The two companies agree not to include any data processing provisions in their services agreement, as data is only being used for IT testing purposes.

Unfortunately, Company C's U.S. server is only protected by an outdated IT security system, and suffers a cyber security incident soon after Company C begins work on the project. As a result, data relating to

Company A's employees is visible to anyone visiting Company C's website. Company A is unaware of this until Jenny receives a letter from the supervisory

authority in connection with the investigation that ensues. As soon as Jenny is made aware of the breach, she notifies all affected employees. Under the GDPR, which of Company B's actions would NOT be likely to trigger a potential enforcement action?

- A. Their omission of data protection provisions in their contract with Company C.
- B. Their failure to provide sufficient security safeguards to Company A's data.
- C. Their engagement of Company C to improve their payroll service.
- D. Their decision to operate without a data protection officer.

Answer: C

NEW QUESTION 213

Many businesses print their employees' photographs on building passes, so that employees can be identified by security staff. This is notwithstanding the fact that facial images potentially qualify as biometric data under the GDPR. Why would such practice be permitted?

- A. Because use of biometric data to confirm the unique identification of data subjects benefits from an exemption.
- B. Because photographs qualify as biometric data only when they undergo a "specific technical processing".
- C. Because employees are deemed to have given their explicit consent when they agree to be photographed by their employer.
- D. Because photographic ID is a physical security measure which is "necessary for reasons of substantial public interest".

Answer: B
