## Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

### NEW QUESTION 1

What common customer desire is addressed by HPE Aruba Networking Central network management?

- A. eliminating the need for network admins and letting server admins maintain the network
- B. deploying the network and then letting it run without the need for further management and monitoring
- C. managing each network silo with tools specialized for that silo's needs
- D. managing the network without having to install and maintain on-prem management tools

**Answer: D**

#### Explanation:

HPE Aruba Networking Central is a cloud-based network management solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure. It eliminates the need for customers to invest in, deploy, and maintain on-premises management tools, and provides a single pane of glass for managing campus, branch, remote, data center, and IoT networks from one dashboard.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: “Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services.”
- Aruba Central for Cloud-managed networking | HPE Aruba Networking: “Built on a cloud- native, microservices architecture, Central is an AI-powered solution that simplifies IT operations, improves agility, and reduces costs by unifying management of all network infrastructure.”
- HPE Aruba Central | HPE United Kingdom - Hewlett Packard Enterprise: “Simplify how you provision, configure, and maintain networks by orchestrating all operations from a cloud-native dashboard. Aruba Central is your single point of visibility and control to oversee every aspect of wired and wireless LANs, WANs, and VPNs across campus, branch, remote, and data center locations.”

### NEW QUESTION 2

What is one way that HPE Aruba Networking ESP (Edge Services Platform) helps customers reduce operational costs?

- A. Customers can use HPE Aruba Networking NetEdit to manage multiple wired and wireless devices from a single console.
- B. HPE Aruba Networking ESP offloads all network management to common third-party solutions that customers likely already use.
- C. AI embedded in HPE Aruba Networking Central helps IT to troubleshoot more quickly and solve issues before they cause larger problems
- D. HPE Aruba Networking ESP solutions are plug-and-play and do not require any ongoing management.

**Answer: C**

#### Explanation:

HPE Aruba Networking ESP is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all your edges<sup>1</sup>. One of the ways that it helps customers reduce operational costs is by embedding AI in HPE Aruba Networking Central, which is a cloud-based network management solution. HPE Aruba Networking Central with AIOps uses data-driven analytics, root cause analysis, and proactive remediation to help IT troubleshoot issues faster, optimize network performance, and improve user experience<sup>23</sup>.

### NEW QUESTION 3

What is one of the advantages of selling HPE GreenLake for Aruba NaaS Service Packs?

- A. They are the only HPE GreenLake for Aruba solutions that include Customer Experience Management at no extra cost.
- B. They enable you to add HPE Aruba Networking Intelligent Operations at discounted rate.
- C. They simplify the process of designing and selling network-as-a-service solutions to customers.
- D. They enable you to customize network as-a-service solutions as needed to meet customer requirements.

**Answer: C**

#### Explanation:

HPE GreenLake for Aruba NaaS Service Packs are pre-defined bundles of HPE Aruba Networking solutions that can be consumed as a service with HPE GreenLake for Networking. They simplify the process of designing and selling network-as-a-service solutions to customers by providing a standardized and easy-to-quote solution for common use cases, such as hybrid work, connected retail, and hybrid learning<sup>12</sup>.

### NEW QUESTION 4

Which characteristic indicates a good opportunity for an HPE GreenLake for Aruba solution?

- A. Preferring to use network equipment beyond typical refresh cycles
- B. Being focused on budget and price-per-unit
- C. Preferring in-house support and maintenance
- D. Being under pressure to prove regulatory compliance

**Answer: D**

#### Explanation:

HPE GreenLake for Aruba is a network-as-a-service (NaaS) solution that enables customers to consume HPE Aruba Networking solutions as a service with HPE GreenLake for Networking. It provides customers with the flexibility, scalability, and security of a cloud- like experience, while reducing capital expenditures and operational costs<sup>1</sup>. One of the characteristics that indicates a good opportunity for this solution is being under pressure to prove regulatory compliance, as HPE GreenLake for Aruba helps customers meet compliance requirements such as SOC 2 Type 2, PCI DSS, HIPAA, and GDPR by providing secure and auditable network services<sup>23</sup>.

**NEW QUESTION 5**

You have recently upgraded a customer's campus network with HPE Aruba Networking CX switches. How might you pursue an additional opportunity?

- A. Discuss whether the customer is interested in enhancing users' experience with the location-based services embedded in HPE Aruba Networking CX switches.
- B. Discuss whether the customer is deploying new, more demanding applications, which might mean that it is time to upgrade the new switches again.
- C. Investigate opportunities for selling additional CX Advanced licenses or Advanced Central subscriptions to unlock advanced switching features.
- D. Investigate whether the customer needs an upgrade to their data center network, explaining that HPE Aruba Networking offers the same switching OS and operating model for the data center.

**Answer: D**

**Explanation:**

HPE Aruba Networking CX switches are designed to deliver a consistent and simplified operating experience across the campus and data center networks, using the same cloud-native operating system (AOS-CX), management platform (Aruba Central), and automation tools (NetEdit and Fabric Composer)<sup>12</sup>. This can help the customer to reduce complexity, improve efficiency, and ensure high availability in their data center network. HPE Aruba Networking CX switches also support advanced features such as EVPN, VXLAN, and MLAG for data center fabrics<sup>3</sup>.

**NEW QUESTION 6**

You are discussing a network upgrade with a mid-sized customer. The customer is worried about future-proofing the network. What should you explain about HPE Aruba Networking ESP?

- A. The customer will need to replace APs to migrate from a mid-sized to an enterprise architecture; however, HPE Aruba Networking offers buy-back incentives.
- B. HPE Aruba Networking makes it easy for customers to obtain enterprise-level features on existing switches; the customers must simply purchase Enterprise licenses.
- C. The customer can easily expand from a mid-sized to an enterprise deployment using the same HPE Aruba Networking Central management platform.
- D. HPE Aruba Networking can guarantee the customer access to future Wi-Fi standards through software upgrades rather than hardware upgrades.

**Answer: C**

**Explanation:**

HPE Aruba Networking ESP (Edge Services Platform) is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all network domains. It is designed to scale from small to large deployments, and to support customers' evolving business needs and technologies. HPE Aruba Networking Central is the single pane of glass for managing Aruba ESP, and it provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services. Customers can use the same HPE Aruba Networking Central platform to manage their network regardless of the size, complexity, or location of their network.

**NEW QUESTION 7**

An organization has adopted a hybrid work model and is concerned about security. Which distinguishing value of HPE Aruba Networking ESP should you emphasize?

- A. HPE Aruba Networking ESP relays all user traffic through the HPE Aruba Networking cloud to filter and secure the traffic.
- B. HPE Aruba Networking ESP makes it easy to enforce consistent role-based policies whether users connect from home, while traveling, or at an office.
- C. HPE Aruba Networking ESP takes an Internet perimeter-focused approach to security, which is ideal for organizations with remote workers
- D. HPE Aruba Networking ESP empowers admins to define manual security policies based on criteria such as switch port and SSID.

**Answer: B**

**Explanation:**

HPE Aruba Networking ESP is a cloud-native platform that unifies infrastructure, security, policies, and AI-powered management across all your edges<sup>1</sup>. One of its distinguishing values is that it enables Zero Trust security, which applies consistent role-based policies to users and devices regardless of where they connect from<sup>2</sup>. This ensures that only authorized and authenticated users and devices can access the network and its resources. References: 1: Aruba ESP (Edge

Services Platform) | HPE Aruba Networking2: A network that's always protected, everywhere | HPE Aruba Networking

#### NEW QUESTION 8

What is one feature that sets HPE Aruba Networking location-based services apart from the competition?

- A. HPE Aruba Networking offers developers access to a GitHub with example scripts for automating the placement of APs on local maps.
- B. The latest HPE Aruba Networking APs can locate themselves with GPS and help automate the placement of APs on maps.
- C. The latest HPE Aruba Networking switches provide location-based services so customers can unify wired and wireless services.
- D. HPE Aruba Networking offers specialized devices for delivering location-based services, rather than using APs.

**Answer: B**

#### Explanation:

HPE Aruba Networking location-based services provide geographic context for applications such as wayfinding, asset tracking, and marketing campaigns. One of the features that sets them apart from the competition is that the latest HPE Aruba Networking APs can automatically locate themselves using GPS and help automate the placement of APs on maps, eliminating the need for costly and error-prone manual surveys<sup>12</sup>.

#### NEW QUESTION 9

How does selling HPE GreenLake for Aruba solutions benefit Channel selling partners?

- A. They can offer their customers a significantly lower price per unit cost than a traditional networking purchase.
- B. They can sell HPE Aruba Networking ESP solutions not available as traditional purchases.
- C. They can convert their existing customers to lease agreements to extend the customer engagement.
- D. They can add another source of income by increasing their annual recurring revenue.

**Answer: D**

#### Explanation:

HPE GreenLake for Aruba is a network-as-a-service (NaaS) solution that enables customers to consume HPE Aruba Networking solutions as a service with HPE GreenLake for Networking. It provides customers with the flexibility, scalability, and security of a cloud-like experience, while reducing capital expenditures and operational costs<sup>1</sup>. For channel selling partners, HPE GreenLake for Aruba benefits them by providing them with a new source of income by increasing their annual recurring revenue, as well as unlocking new revenue and margin opportunities by offering value-added services to their customers<sup>23</sup>. References: 1: Network as a Service (NaaS) solutions from HPE Aruba Networking2: HPE GreenLake for Aruba partner benefits3: Hewlett Packard Enterprise introduces channel programs and new HPE GreenLake cloud services to help partners deliver the cloud experience everywhere

#### NEW QUESTION 10

Which customer requirement would HPE Aruba Networking Central with AIOps address?

- A. The customer needs to implement role-based security across the wired and wireless networks.
- B. The customer wants to develop sophisticated maps for location-based services.
- C. The customer's IT team is understaffed or underqualified to troubleshoot and optimize the network.
- D. The customer wants to allow users to access applications remotely.

**Answer: C**

#### Explanation:

HPE Aruba Networking Central with AIOps is a cloud-based networking solution that empowers IT with AI-powered insights, intuitive visualizations, workflow automation, and edge-to-cloud security to manage campus, branch, remote, data center, and IoT networks from one dashboard<sup>1</sup>. It can address the customer requirement of having an efficient and effective IT team by simplifying network operations, reducing manual tasks, providing proactive remediation, and optimizing network performance<sup>2</sup>.
