

IBM

Exam Questions C1000-132

IBM Maximo Manage v8.0 Implementation

NEW QUESTION 1

What is a core application in Maximo Manage?

- A. Maintenance Version Control
- B. Customer Billing
- C. Permit to Work
- D. Graphical Scheduling

Answer: D

Explanation:

The Permit to Work application is a core application in IBM Maximo Manage v8.0. This application allows users to manage work permits, ensure compliance with safety regulations, and ensure that work is authorized before it is started. Other core applications in Maximo Manage include Work Order Tracking, Asset Management, and Inventory Management.

NEW QUESTION 2

Which three coverage options can be included on a contract line in a Warranty Contract? (Choose three.)

- A. Financial Loss
- B. Labor
- C. Children
- D. Shipping
- E. Replacement
- F. Materials

Answer: BCF

NEW QUESTION 3

In the Purchase Requisitions application and with default settings, what status does the Purchase Requisition change to when all of its lines have been copied to a Purchase Order or a Contract?

- A. INPRG
- B. COMPLETE
- C. CLOSE
- D. APPR

Answer: B

Explanation:

In the Purchase Requisitions application with default settings in IBM Maximo Manage, when all lines of a Purchase Requisition have been copied to a Purchase Order or a Contract, the status of the Purchase Requisition changes to COMPLETE.

NEW QUESTION 4

In which three areas of Maximo can an inspection form be referenced to generate an Inspection result? (Choose three.)

- A. Work Order
- B. Ticket Template
- C. Route Stop
- D. Service Request
- E. Job Plan Task
- F. Preventive Maintenance

Answer: ACE

NEW QUESTION 5

What can be done when decommissioning a location that cannot be done when decommissioning an asset?

- A. Roll New Status down to All Assets in All Changed Locations?
- B. Remove All Reference to This Location from All Contracts?
- C. Remove All References to This Location from All Job Plans?
- D. Delete Associated Service Addresses That will be made Redundant?

Answer: A

Explanation:

When decommissioning a location in IBM Maximo Manage, you can roll the new status down to all assets in all changed locations. This cannot be done when decommissioning an asset.

NEW QUESTION 6

What is the result of selecting the Validate GL Component Combinations in the Chart of Accounts application on financial transactions?

- A. Any GL component can be used.
- B. Any valid GL component can be used.
- C. Only valid GL accounts can be used.
- D. Validates transactions occurred during an active financial period.

Answer: C

Explanation:

When selecting the Validate GL Component Combinations in the Chart of Accounts application on financial transactions in IBM Maximo Manage, only valid GL accounts can be used.

NEW QUESTION 7

Which field on a Work Order is used to only schedule work during working time?

- A. Flow Action Assist
- B. Split Shift
- C. Constrain to Shift
- D. Interruptible

Answer: D

NEW QUESTION 8

The IoT Connector provides Maximo Manage, Maximo Health and Maximo Predict the ability to connect to which two data sources?

- A. Maximo Spatial
- B. Maximo Assist
- C. IBM Watson IoT Platform
- D. Maximo Safety
- E. Maximo Monitor

Answer: CE

Explanation:

IoT Connector provides Maximo Manage, Maximo Health and Maximo Predict the ability to connect to C. IBM Watson IoT Platform and E. Maximo Monitor data sources. The IoT Connector in the Administration Work Center can be used to configure a connection to an IoT platform such as IBM Watson IoT Platform and IBM Maximo Asset Monitor1.

NEW QUESTION 9

In the Inventory Usage application when the type is TRANSFER, if a user changes the status to COMPLETE what type of transaction record is created?

- A. Transaction Type RETURN in MATUSETRANS table
- B. Transaction Type ISSUE in MATUSETRANS table
- C. Transaction Type SHIPTRANSFER in MATRECTRANS table
- D. Transaction Type TRANSFER in MATRECTRANS table

Answer: D

Explanation:

<https://maximosecrets.com/2020/07/03/a-summary-of-the-financial-processes-in-inventory-usage/>

NEW QUESTION 10

A client has a requirement to manage access permits and risk assessments in Maximo. Which add-on provides this capability?

- A. Maximo Safety
- B. Maximo Health Safety and Environment
- C. Maximo Asset Configuration Manager (ACM)
- D. Maximo Spatial

Answer: B

NEW QUESTION 10

Which two statuses of a Purchase Order will allow a receipt of new items to be processed in the Receiving application if the Purchase Order is not being revised?

- A. APPR
- B. HOLD
- C. INPRG
- D. REVISD
- E. PNDREV

Answer: AC

Explanation:

In IBM Maximo Manage, if a Purchase Order is not being revised, two statuses that will allow a receipt of new items to be processed in the Receiving application are APPR and INPRG.

NEW QUESTION 12

In which three applications can Asset Depreciation be configured?

- A. Chart of Accounts
- B. Tools
- C. Asset Templates

- D. Locations
- E. Assets
- F. Item Master

Answer: CEF

Explanation:

Asset Depreciation can be configured in the following three applications:

? C. Asset Templates: You can define depreciation settings within asset templates to standardize how assets of the same type depreciate. This ensures consistency and saves time when creating new assets. (Reference: IBM Maximo Manage v8.0 documentation - Asset Templates)

? E. Assets: Depreciation can be configured directly on individual asset records. This allows for flexibility if an asset has unique depreciation circumstances that differ from the template. (Reference: IBM Maximo Manage v8.0 documentation - Assets application)

? F. Item Master: When creating an item record that will be used as an asset, you can specify depreciation information. This is useful for items that are commonly capitalized and tracked as assets. (Reference: IBM Maximo Manage v8.0 documentation - Item Master application)

NEW QUESTION 14

Which statement is true regarding Master Preventative Maintenance (PM) records?

- A. Associated PM records can only be created for a rotating item's asset.
- B. Associated PM records can be created for a Master PM which does not have an item
- C. Associated PM records are temporary and expire after 90 days.
- D. Associated PM records can only be created for a rotating item's location.

Answer: B

Explanation:

Regarding Master Preventative Maintenance (PM) records in IBM Maximo Manage, associated PM records can be created for a Master PM which does not have an item.

NEW QUESTION 17

At what database level does a Job Plan exist?

- A. ORG
- B. SYSTEM
- C. SITE
- D. SYSTEMORGSITE

Answer: D

Explanation:

<https://maximosecrets.com/2022/04/28/job-plans/>

NEW QUESTION 18

Which Maximo application can be used to generate replacement plans for assets?

- A. Maximo Predict
- B. Maximo Health
- C. Maximo Health, Safety and Environmental (HSE)
- D. Maximo Manage

Answer: B

Explanation:

IBM Maximo Health, part of the Maximo Application Suite, is specifically designed to enable comprehensive asset performance monitoring, including the capability to generate replacement plans for assets. With Maximo Health, users can assess an asset's remaining useful life, criticality, and health scores to make data-driven decisions about whether to repair, refurbish, or replace an asset.

Key features in Maximo Health that facilitate replacement planning include:

? Expected Life and Replacement Planning: Users can evaluate assets approaching the end of their lifecycle. For assets flagged for replacement or nearing their projected end of life, Maximo Health offers views like the "Expected Life" or "Plan Costs" to initiate a replacement plan. This process allows for strategic planning of asset replacements to ensure operational reliability and cost-effectiveness

IBM GitHub

Maximo Health integrates data from asset condition monitoring, usage history, and criticality analysis, allowing for a proactive approach to asset management and enabling organizations to optimize maintenance budgets by planning replacements only when necessary. Thus, option B (Maximo Health) is the correct answer.

NEW QUESTION 21

In the Assets application a used engine needs to be replaced with a rebuilt engine, how might the rebuilt engine inherit the depreciation schedule from the used engine?

- A. Use the action Exchange Depreciation Schedules.
- B. Use the action Copy Depreciation Schedules.
- C. Use the action Swap Depreciation Schedules.
- D. Use the action Split Depreciation Schedules.

Answer: C

Explanation:

To replace a used engine with a rebuilt engine in the Assets application in IBM Maximo Manage v8.0 implementation and inherit the depreciation schedule from the used engine, you can use the "Copy Depreciation Schedules" action. This action allows you to copy the depreciation schedules from the old asset to the new

asset, including the depreciation terms and any calculation information.

NEW QUESTION 25

Where can API keys be created for setting up integrations with the Maximo framework?

- A. REST API
- B. System Properties
- C. Database Configuration
- D. Administration Work Center

Answer: D

NEW QUESTION 26

Which data storage level provides the sharing of items and company data across multiple organizations?

- A. SET
- B. SITE
- C. ORG
- D. SYSTEM

Answer: A

NEW QUESTION 27

Which statement describes Non-Rotating Items?

- A. It can be contained within a Kit.
- B. It has assets associated with it.
- C. It can be attached to a parent asset on issue.
- D. It can have a meter group associated with it.

Answer: A

NEW QUESTION 28

A company wishes to configure Flow Control for Work Orders. In which application can they change the Start Status and Complete Status that will be used?

- A. System Properties
- B. Work Order Tracking
- C. Job Plans
- D. Organizations

Answer: D

Explanation:

The Organizations application is used to configure Flow Control for Work Orders. In this application, you can change the Start Status and Complete Status that will be used.

NEW QUESTION 29

During the course of a Work Order an Asset is upgraded. This change requires the Specification of the Asset to be updated automatically when the Work Order is Completed. How can this be achieved?

- A. A Planned Modification should be defined in the Move/Swap/Modify dialog.
- B. An escalation should be created against the Asset record, triggered when the work order is completed.
- C. A related Service Request should be created of Type CHANGE.
- D. A Follow On Work Order should be created.

Answer: A

NEW QUESTION 33

In which three applications can a failure class be applied? (Choose three.)

- A. Work Order Tracking
- B. Job Plans
- C. Locations
- D. Item Masters
- E. Tools
- F. Assets

Answer: ACF

NEW QUESTION 35

Which two automation script launch points can be triggered directly by a workflow?

- A. Object
- B. Custom Condition
- C. Attribute - '

- D. Action
- E. Integration

Answer: BD

Explanation:

two automation script launch points that can be triggered directly by a workflow are B. Custom Condition and D. Action. An action launch point associates a script with an action and executes when the specified action occurs1. A custom condition launch point associates a script with a condition and executes when the specified condition is evaluated2.
<https://www.ibm.com/docs/en/mam/7.6.0?topic=lp-script-action-launch-point>

NEW QUESTION 36

Which type of inspection can be created in the Conduct an Inspection Work Center?

- A. Group
- B. Conditional
- C. Preventive Maintenance
- D. Unscheduled

Answer: D

NEW QUESTION 40

In the Receiving application, what are the three statuses that show the overall receipt status of the purchase order?

- A. COMPLETE
- B. RETURNED
- C. PARTIAL
- D. NONE
- E. WINSP
- F. VOID

Answer: ACD

Explanation:

In the Receiving application in IBM Maximo Manage, the three statuses that show the overall receipt status of the purchase order are COMPLETE, PARTIAL and NONE.

NEW QUESTION 45

How does a user make a GL account inactive in the Chart of Accounts application?

- A. populate the Expiration Date with a value in the past
- B. select action Add/Modify GL Account
- C. deselect the Active checkbox
- D. select action Change Status

Answer: A

NEW QUESTION 48

How is the Lock Out / Tag Outs application structured?

- A. Specify a Lock Out on an Asset with a Locking Device and define the Tag Out Operations.
- B. Specify a Lock Out on the Location or Asset and define the Tag Out Operations.
- C. Specify a Tag Out on the Location or Asset and define the Lock Out Operations.
- D. Define the isolation procedures on a set of related assets and specify a sequence.

Answer: C

NEW QUESTION 52

In the Security Groups application which security group are all users added to using default settings?

- A. MAXIMOUSERS
- B. DEFLTREG
- C. DEFUSRREG
- D. NEWUSER

Answer: B

NEW QUESTION 57

In the Assets application when reporting downtime, what is an example of a Downtime Type?

- A. Starting Up
- B. Line Change Over
- C. Shutting Down
- D. Non-Operational

Answer: D

NEW QUESTION 59

Calendars can be associated with which three record types?

- A. Items
- B. Locations
- C. Job Plan
- D. Person
- E. Contracts
- F. Assets

Answer: BDF

NEW QUESTION 60

What three types of periods can be defined for a Budget Monitoring record? (Choose three.)

- A. Financial Periods
- B. A period defined with a start date and end date.
- C. Month
- D. Quarter
- E. Year
- F. Budget Period

Answer: ABE

NEW QUESTION 63

A user wishes to perform the same work tasks on several assets simultaneously. How can this be configured?

- A. A Route should be created with each stop being one Asset and the Job Plan associated with the Route record.
- B. A Master Job Plan should be created with Tasks for each Asset.
- C. A Work Order Hierarchy should be created against the same Job Plan used for all stops.
- D. The Assets should be specified on the Multiple Assets, Locations and CIs table on the Work Order.

Answer: D

Explanation:

In IBM Maximo Manage, when the same work tasks need to be applied simultaneously to multiple assets, the recommended method is to use the Multiple Assets, Locations, and CIs table on a single Work Order. This approach allows users to specify multiple assets for the work order without creating separate child work orders or task hierarchies, streamlining record management and reducing complexity.

? Multiple Assets, Locations and CIs Table: This table allows the user to list all assets requiring the same work on a single work order. When tasks are defined on the work order, they apply uniformly across all assets listed in this table. This method is efficient for routine inspections, simple tasks, or other repetitive maintenance where the same task applies to multiple assets

? Routes as an Alternative: A route could also be configured so that each route stop (representing different assets or locations) populates the Multiple Assets, Locations, and CIs table on a single work order when applied. This allows for sequence control and record management while still using a single main work order. This setup minimizes the need to manage multiple child work orders or complex work order hierarchies, particularly when performing similar tasks on several assets simultaneously.

NEW QUESTION 65

Where can Default Values be specified for Service Requests created using the Service Request Work Center?

- A. Service Desk Application
- B. in the users Profile
- C. Administration Work Center
- D. Application Designer

Answer: C

NEW QUESTION 66

What are the three default classes of a Ticket?

- A. Problem
- B. Activity
- C. Service Request
- D. Change
- E. Incident
- F. Release

Answer: ACE

Explanation:

The three default classes of a Ticket in IBM Maximo Manage are Problem, Service Request and Incident.

NEW QUESTION 67

What are the three usage types in the Inventory Usage application?

- A. MIXED
- B. ISSUE
- C. STAGED
- D. MOVE
- E. TRANSFER
- F. RECEIV

Answer: BCE

Explanation:

In IBM Maximo Manage v8.0 implementation, the usage types in the Inventory Usage application are ISSUE, STAGED, and TRANSFER. ISSUE is used to relieve items from inventory for use in maintenance or other processes. STAGED is used to reserve items for future use. TRANSFER is used to move items from one inventory location to another, typically within the same organization.

NEW QUESTION 70

In what Maximo Manage application are the specifications of an asset for calibration entered?

- A. Classifications
- B. Asset
- C. Data Sheet Template
- D. Improvements

Answer: C

Explanation:

In IBM Maximo Manage, the specifications of an asset for calibration are entered in the Data Sheet Template application.

NEW QUESTION 74

At which data storage level are locations, assets and storerooms defined?

- A. Set
- B. Site
- C. System
- D. Organization

Answer: B

Explanation:

Locations, assets and storerooms are defined at the Site level in IBM Maximo Manage.

NEW QUESTION 75

What information can be updated in the Master PM application for an associated Preventive Maintenance record (PM)?

- A. Work Order Status
- B. PM Forecast
- C. Generate Work Orders
- D. PM Hierarchy

Answer: D

Explanation:

In IBM Maximo Manage v8.0, the Master PM application is used to manage and control multiple Preventive Maintenance (PM) records through a central template known as the Master PM. The primary purpose of the Master PM application is to provide a standardized structure for PMs and streamline the maintenance process by enabling centralized updates to associated PM records.

The key updates that can be made to associated PMs through the Master PM application include:

? Frequency and Scheduling Information - The Master PM can dictate the time- or

meter-based frequency at which work orders are generated, and apply this to all associated PMs (or selectively if desired)

? Job Plans and Sequence - Users can specify job plans on a sequential basis, which helps in scheduling varied levels of maintenance activities. Changes to the job plan sequence in the Master PM can be propagated to all associated PMs

? Seasonal Dates - Active dates or seasonal adjustments to maintenance activities can be set up within the Master PM, and these adjustments can be transferred to associated PMs as necessary

? PM Hierarchy - The Master PM application allows users to configure and manage PM hierarchies, which helps in establishing parent-child relationships among PM

records. This hierarchical structure is especially useful in organizing maintenance tasks for complex assets with interrelated components, ensuring that all relevant maintenance tasks are triggered appropriately

Thus, option D (PM Hierarchy) correctly represents the feature that can be updated in the Master PM application for associated PM records.

NEW QUESTION 77

In the Preventive Maintenance (PM) application, how is the Estimated Next Due Date calculated when Adjust Next Due Date is selected?

- A. Extended Date + Alert Lead (Days)
- B. Extended Date + Frequency
- C. Extended Date + Target Start Time
- D. Extended Date -Alert Lead (Days)

Answer: B

NEW QUESTION 82

In the Manage Inventory Work Center a pick list can be created, its initial status is Entered. Which three actions will cause the status to change to in Progress? (Choose three.)

- A. Picked
- B. Restocked
- C. Prepared
- D. Issued
- E. Staged
- F. Returned

Answer: ADE

Explanation:

In the IBM Maximo Manage Inventory Work Center, a pick list starts with a status of "Entered." To change this status to "In Progress," certain actions need to be performed on the items within the pick list. The following actions trigger the transition from "Entered" to "In Progress":

? Picked: When items on the pick list are marked as "Picked," it signals that the

inventory has been gathered and is ready for further processing. This action moves the pick list status to "In Progress"

? Staged: Staging items on the pick list moves them to an intermediate location or prepares them for issuance. Moving items to this state changes the pick list status to "In Progress" as well

? Issued: Issuing items from the pick list directly fulfills the reservation and removes the inventory from the system. This also updates the pick list status to "In Progress" as it reflects the inventory movement out of storage

Thus, actions A (Picked), D (Issued), and E (Staged) are the correct answers, as they all cause the pick list to shift from "Entered" to "In Progress."

NEW QUESTION 85

In the Purchase Orders application, what is the result of the action Complete Receipts?

- A. It will set the Receipt status to COMPLETE, but will not create the receipt lines.
- B. It will send a notification to the requester that the Purchase Order has been completed.
- C. It will set the Receipt status to COMPLETE and create the receiving lines for the remaining items.
- D. The status of the Purchase Order will be changed to CLOSED.

Answer: A

NEW QUESTION 89

In the Item Master application, with what can a Kit Item be associated?

- A. Non Rotating item
- B. Lot item
- C. Condition enabled item
- D. Service item

Answer: A

Explanation:

a Kit Item can be associated with A. Non Rotating item. When you create a kit record for an item in the Item Master application, you can define the structure of the kit using the Item Assembly Structure tab¹. When adding a kit to a storeroom, if the component items do not exist in the storeroom, inventory records are created for these items¹. However, you cannot create item kits that contain condition-enabled, rotating or lotted items¹.

NEW QUESTION 94

When a Service Level Agreement is applied to a WORKORDER object, what Commitment Type will be missing from the lookup?

- A. DOWNTIME
- B. DELIVERY
- C. AVAILABILITY
- D. CONTACT

Answer: D

Explanation:

When a Service Level Agreement (SLA) is applied to a WORKORDER object in IBM Maximo Manage v8.0 implementation, the Commitment Type that will be missing from the lookup is DELIVERY. The other possible Commitment Types in Maximo Manage are DOWNTIME, AVAILABILITY, and CONTACT.

NEW QUESTION 99

In the Work Order Tracking application when the Create Work Order action is used, what occurs on the follow-up Work Order?

- A. The Asset and Location fields are cleared.
- B. The Originating Record field is populated.
- C. The Work Type field is cleared.
- D. The Status is set to INPRG.

Answer: B

NEW QUESTION 100

If additional attributes are added to the Work View, how can they be automatically updated from changes made to a corresponding Ticket and Work Order fields?

- A. by modifying the existing Crossover Domains TKT2WV or W02WV
- B. by adding a Crossover Domain to TICKETID or WONUM
- C. by updating the existing Cron Task UpdateWorkView that has two instances TKT2WV and W02WV that use the Crossover Domains of the same name

D. by modifying the existing Object Launch Point automation script UpdateWV

Answer: B

Explanation:

In IBM Maximo Manage v8.0 implementation, if you add additional attributes to the Work View and want them to be automatically updated from changes made to corresponding Ticket and Work Order fields, you can modify the existing Crossover Domains TKT2WV or W02WV. Crossover Domains define a mapping between fields on two different objects, allowing data to be synchronized between them.

NEW QUESTION 102

What are three available associations in the Hazards application?

- A. Lock Outs
- B. Material Safety Data Sheets (MSDS)
- C. Hazardous Materials
- D. Tag Outs
- E. Precautions
- F. Safety Plans

Answer: CDE

Explanation:

The Hazards application in IBM Maximo Manage v8.0 allows users to associate Material Safety Data Sheets (MSDS), Hazardous Materials, and Precautions with a particular hazard. These associations help in managing safety information related to hazards and in ensuring compliance with safety regulations.

NEW QUESTION 106

In the Master PM application, which two meter-based fields can be updated on associated Preventive Maintenance records? (Choose two.)

- A. Estimation Type
- B. Current Meter Reading
- C. Generate WO Ahead By
- D. Meter Type
- E. Frequency

Answer: CE

Explanation:

In the IBM Maximo Master PM application, certain meter-based fields can be updated on associated Preventive Maintenance (PM) records when changes are made to the Master PM. Specifically:

? Generate WO Ahead By: This field sets a lead time for generating work orders

ahead of their scheduled due date based on meter readings. Updating this field on the Master PM will adjust when work orders are generated on associated PMs

? Frequency: The frequency determines how often maintenance should occur based on meter readings. When the frequency is updated on the Master PM, this adjustment is applied to associated PMs, ensuring they reflect the updated maintenance interval

These updates allow for consistent and centralized management of preventive maintenance intervals and scheduling, essential for meter-based maintenance tracking in Maximo. Other fields like "Current Meter Reading" or "Meter Type" are not directly updated on associated PMs through the Master PM.

NEW QUESTION 111

What are the three default values used with the position of a Crew Type or Crew?

- A. Helper
- B. Supervisor
- C. Driver
- D. Leader
- E. Apprentice
- F. Technician

Answer: ADE

Explanation:

In IBM Maximo Manage v8.0 implementation, the three default values used with the position of a Crew Type or Crew are Helper, Leader, and Apprentice. These values represent the different roles that members of a crew can assume.

NEW QUESTION 115

In the Work Order Tracking application, a Work Order is generated from a Preventive Maintenance (PM) record. How is the target finish date calculated?

- A. the Job Plan finish date
- B. the PM target finish date
- C. the Work Order target start date + the Job Plan duration
- D. the Job Plan start date + the Job Plan duration

Answer: C

Explanation:

In the Work Order Tracking application, when a Work Order is generated from a Preventive Maintenance (PM) record, the target finish date is calculated as the Work Order target start date + the Job Plan duration.

NEW QUESTION 118

What are two of the filters in the Select Value of a Location or Asset in the Service Requests application?

- A. Public
- B. Service Address
- C. Service Group/Services
- D. User/Custodians
- E. Work Zones

Answer: AD

Explanation:

Two of the filters in the Select Value of a Location or Asset in the Service Requests application in IBM Maximo Manage are Service Address and Service Group/Services

<https://www.ibm.com/support/pages/maximo-support-desk-change-default-filter-asset-lookup-create-service-request-application>

NEW QUESTION 119

In which two places can Service Request Categories be created for use in the Service Request Work Center?

- A. Classifications Application
- B. Administration Work Center
- C. Business Analysis Work Cen
- D. Service Desk Application
- E. Service Catalog Application

Answer: AB

Explanation:

<https://www.ibm.com/support/pages/creating-service-request-categories-and-category-options-service-request-work-center#:~:text=In%20the%20Service%20Request%20Work%20Center%2C%20an%20administrator,Object%20parameter%20and%20Asset%20parameter%20set%20to%20SR.>

In IBM Maximo Manage v8.0, Service Request Categories for the Service Request Work Center can be created in the Administration Work Center and through the Classifications Application:

? Administration Work Center: The Service Request Configuration section within the

Administration Work Center enables administrators to set up and customize service request categories specifically for use in the Service Request Work Center.

This involves defining properties, categories, and issues users select when creating service requests

? Classifications Application: Categories are also managed by setting up

classifications associated with service requests in the Classifications application. When a classification is created with associations to the "Asset" and "SR"

(Service Request) objects, it becomes available as a category option in the Service Request tool. This approach allows issues to be assigned to specific categories using ticket templates tied to classifications

These configurations provide a structured way to set up service categories that enhance service request management by ensuring users select relevant, predefined options during request creation.

NEW QUESTION 122

In the Inventory Usage application, which three statuses will activate the Split Usage Quantity feature? (Choose three.)

- A. CANCELED
- B. RETURNED
- C. ENTERED
- D. STAGED
- E. COMPLETE
- F. SHIPPED

Answer: DEF

NEW QUESTION 123

What happens if the Specification of a rotating item is updated in the Item Master application?

- A. New locations and assets that reference the rotating item will inherit the changes, there are no changes to existing locations and assets.
- B. By default, existing assets referencing the rotating item will be updated with the changes, there are no changes to existing locations.
- C. By default, all locations and assets referencing the rotating item will be updated with the changes.
- D. Only locations inherit the specification from a rotating item and only when new locations are create
- E. Assets only inherit the specification from an asset template.

Answer: C

Explanation:

It works on both locations and assets. <https://maximosecrets.com/2020/08/17/item-and-locations/> and <https://maximosecrets.com/2020/08/03/item-specifications-for-rotating-items/>

NEW QUESTION 124

Which two search types can be found on an attribute in the Database Configuration application when using an Oracle or SQL Server database? (Choose two.)

- A. INDEXED
- B. NONE
- C. FUNCTION
- D. HIERARCHY
- E. TEXT

Answer: BE

NEW QUESTION 125

When creating a labor record, what must be associated with it?

- A. User Record
- B. Person Record
- C. Crew
- D. Supervisor

Answer: B

Explanation:

When you create a labor record in IBM Maximo Manage v8.0, you enable a person to report time against a work request¹. Before you create a labor record, you must create a corresponding person record¹. A person record is defined at the System level and when a person works across multiple organizations, they need multiple Labor records linked to the same Person record².

NEW QUESTION 130

.....

Thank You for Trying Our Product

We offer two products:

1st - We have Practice Tests Software with Actual Exam Questions

2nd - Questions and Answers in PDF Format

C1000-132 Practice Exam Features:

- * C1000-132 Questions and Answers Updated Frequently
- * C1000-132 Practice Questions Verified by Expert Senior Certified Staff
- * C1000-132 Most Realistic Questions that Guarantee you a Pass on Your First Try
- * C1000-132 Practice Test Questions in Multiple Choice Formats and Updates for 1 Year

100% Actual & Verified — Instant Download, Please Click
