

## CCSK Dumps

### Certificate of Cloud Security Knowledge

<https://www.certleader.com/CCSK-dumps.html>

**NEW QUESTION 1**

What is known as the interface used to connect with the metastructure and configure the cloud environment?

- A. Administrative access
- B. Management plane
- C. Identity and Access Management
- D. Single sign-on
- E. Cloud dashboard

**Answer:** B

**NEW QUESTION 2**

Sending data to a provider's storage over an API is likely as much more reliable and secure than setting up your own SFTP server on a VM in the same provider

- A. False
- B. True

**Answer:** B

**NEW QUESTION 3**

Without virtualization, there is no cloud.

- A. False
- B. True

**Answer:** B

**NEW QUESTION 4**

CCM: A hypothetical company called: "Health4Sure" is located in the United States and provides cloud based services for tracking patient health. The company is compliant with HIPAA/HITECH Act among other industry standards. Health4Sure decides to assess the overall security of their cloud service against the CCM toolkit so that they will be able to present this document to potential clients.

Which of the following approach would be most suitable to assess the overall security posture of Health4Sure's cloud service?

- A. The CCM columns are mapped to HIPAA/HITECH Act and therefore Health4Sure could verify the CCM controls already covered as a result of their compliance with HIPAA/HITECH Act
- B. They could then assess the remaining control
- C. This approach will save time.
- D. The CCM domain controls are mapped to HIPAA/HITECH Act and therefore Health4Sure could verify the CCM controls already covered as a result of their compliance with HIPAA/HITECH Act
- E. They could then assess the remaining controls thoroughly
- F. This approach saves time while being able to assess the company's overall security posture in an efficient manner.
- G. The CCM domains are not mapped to HIPAA/HITECH Act
- H. Therefore Health4Sure should assess the security posture of their cloud service against each and every control in the CCM
- I. This approach will allow a thorough assessment of the security posture.

**Answer:** C

**NEW QUESTION 5**

What is the most significant security difference between traditional infrastructure and cloud computing?

- A. Management plane
- B. Intrusion detection options
- C. Secondary authentication factors
- D. Network access points
- E. Mobile security configuration options

**Answer:** A

**NEW QUESTION 6**

ENISA: A reason for risk concerns of a cloud provider being acquired is:

- A. Arbitrary contract termination by acquiring company
- B. Resource isolation may fail
- C. Provider may change physical location
- D. Mass layoffs may occur
- E. Non-binding agreements put at risk

**Answer:** E

**NEW QUESTION 7**

How does running applications on distinct virtual networks and only connecting networks as needed help?

- A. It reduces hardware costs
- B. It provides dynamic and granular policies with less management overhead
- C. It locks down access and provides stronger data security

- D. It reduces the blast radius of a compromised system
- E. It enables you to configure applications around business groups

**Answer:** D

#### NEW QUESTION 8

What is true of security as it relates to cloud network infrastructure?

- A. You should apply cloud firewalls on a per-network basis.
- B. You should deploy your cloud firewalls identical to the existing firewalls.
- C. You should always open traffic between workloads in the same virtual subnet for better visibility.
- D. You should implement a default allow with cloud firewalls and then restrict as necessary.
- E. You should implement a default deny with cloud firewalls.

**Answer:** E

#### NEW QUESTION 9

Which governance domain focuses on proper and adequate incident detection, response, notification, and remediation?

- A. Data Security and Encryption
- B. Information Governance
- C. Incident Response, Notification and Remediation
- D. Compliance and Audit Management
- E. Infrastructure Security

**Answer:** C

#### NEW QUESTION 10

What are the encryption options available for SaaS consumers?

- A. Any encryption option that is available for volume storage, object storage, or PaaS
- B. Provider-managed and (sometimes) proxy encryption
- C. Client/application and file/folder encryption
- D. Object encryption Volume storage encryption

**Answer:** B

#### NEW QUESTION 10

What is true of companies considering a cloud computing business relationship?

- A. The laws protecting customer data are based on the cloud provider and customer location only.
- B. The confidentiality agreements between companies using cloud computing services is limited legally to the company, not the provider.
- C. The companies using the cloud providers are the custodians of the data entrusted to them.
- D. The cloud computing companies are absolved of all data security and associated risks through contracts and data laws.
- E. The cloud computing companies own all customer data.

**Answer:** C

#### NEW QUESTION 14

For third-party audits or attestations, what is critical for providers to publish and customers to evaluate?

- A. Scope of the assessment and the exact included features and services for the assessment
- B. Provider infrastructure information including maintenance windows and contracts
- C. Network or architecture diagrams including all end point security devices in use
- D. Service-level agreements between all parties
- E. Full API access to all required services

**Answer:** C

#### NEW QUESTION 15

What can be implemented to help with account granularity and limit blast radius with IaaS and PaaS?

- A. Configuring secondary authentication
- B. Establishing multiple accounts
- C. Maintaining tight control of the primary account holder credentials
- D. Implementing least privilege accounts
- E. Configuring role-based authentication

**Answer:** B

#### NEW QUESTION 17

What is the newer application development methodology and philosophy focused on automation of application development and deployment?

- A. Agile
- B. DevOps

- C. DevOps
- D. SecDevOps
- E. Scrum

**Answer:** C

#### NEW QUESTION 21

Which of the following statements is true in regards to Data Loss Prevention (DLP)?

- A. DLP can provide options for quickly deleting all of the data stored in a cloud environment.
- B. DLP can classify all data in a storage repository.
- C. DLP never provides options for how data found in violation of a policy can be handled.
- D. DLP can provide options for where data is stored.
- E. DLP can provide options for how data found in violation of a policy can be handled.

**Answer:** E

#### NEW QUESTION 25

What are the primary security responsibilities of the cloud provider in compute virtualizations?

- A. Enforce isolation and maintain a secure virtualization infrastructure
- B. Monitor and log workloads and configure the security settings
- C. Enforce isolation and configure the security settings
- D. Maintain a secure virtualization infrastructure and configure the security settings
- E. Enforce isolation and monitor and log workloads

**Answer:** A

#### NEW QUESTION 30

In which type of environment is it impractical to allow the customer to conduct their own audit, making it important that the data center operators are required to provide auditing for the customers?

- A. Multi-application, single tenant environments
- B. Long distance relationships
- C. Multi-tenant environments
- D. Distributed computing arrangements
- E. Single tenant environments

**Answer:** C

#### NEW QUESTION 33

Which of the following statements best defines the "authorization" as a component of identity, entitlement, and access management?

- A. The process of specifying and maintaining access policies
- B. Checking data storage to make sure it meets compliance requirements
- C. Giving a third party vendor permission to work on your cloud solution
- D. Establishing/asserting the identity to the application
- E. Enforcing the rules by which access is granted to the resources

**Answer:** D

#### NEW QUESTION 38

The containment phase of the incident response lifecycle requires taking systems offline.

- A. False
- B. True

**Answer:** B

#### NEW QUESTION 43

What does it mean if the system or environment is built automatically from a template?

- A. Nothing.
- B. It depends on how the automation is configured.
- C. Changes made in production are overwritten by the next code or template change.
- D. Changes made in test are overwritten by the next code or template change.
- E. Changes made in production are untouched by the next code or template change.

**Answer:** D

#### NEW QUESTION 45

What should every cloud customer set up with its cloud service provider (CSP) that can be utilized in the event of an incident?

- A. A data destruction plan
- B. A communication plan

- C. A back-up website
- D. A spill remediation kit
- E. A rainy day fund

**Answer:** B

#### NEW QUESTION 47

When configured properly, logs can track every code, infrastructure, and configuration change and connect it back to the submitter and approver, including the test results.

- A. False
- B. True

**Answer:** B

#### NEW QUESTION 51

CCM: The Cloud Service Delivery Model Applicability column in the CCM indicates the applicability of the cloud security control to which of the following elements?

- A. Mappings to well-known standards and frameworks
- B. Service Provider or Tenant/Consumer
- C. Physical, Network, Compute, Storage, Application or Data
- D. SaaS, PaaS or IaaS

**Answer:** D

#### NEW QUESTION 55

Cloud services exhibit five essential characteristics that demonstrate their relation to, and differences from, traditional computing approaches. Which one of the five characteristics is described as: a consumer can unilaterally provision computing capabilities such as server time and network storage as needed.

- A. Rapid elasticity
- B. Resource pooling
- C. Broad network access
- D. Measured service
- E. On-demand self-service

**Answer:** E

#### NEW QUESTION 59

Which of the following statements best describes an identity federation?

- A. A library of data definitions
- B. A group of entities which have decided to exist together in a single cloud
- C. Identities which share similar attributes
- D. Several countries which have agreed to define their identities with similar attributes
- E. The connection of one identity repository to another

**Answer:** E

#### NEW QUESTION 60

ENISA: “VM hopping” is:

- A. Improper management of VM instances, causing customer VMs to be commingled with other customer systems.
- B. Looping within virtualized routing systems.
- C. Lack of vulnerability management standards.
- D. Using a compromised VM to exploit a hypervisor, used to take control of other VMs.
- E. Instability in VM patch management causing VM routing errors.

**Answer:** D

#### NEW QUESTION 61

What is resource pooling?

- A. The provider’s computing resources are pooled to serve multiple consumers.
- B. Internet-based CPUs are pooled to enable multi-threading.
- C. The dedicated computing resources of each client are pooled together in a colocation facility.
- D. Placing Internet (“cloud”) data centers near multiple sources of energy, such as hydroelectric dams.
- E. None of the above.

**Answer:** A

#### NEW QUESTION 66

How should an SDLC be modified to address application security in a Cloud Computing environment?

- A. Integrated development environments
- B. Updated threat and trust models

- C. No modification is needed
- D. Just-in-time compilers
- E. Both B and C

**Answer:** A

**NEW QUESTION 67**

Containers are highly portable code execution environments.

- A. False
- B. True

**Answer:** B

**NEW QUESTION 71**

Which type of application security testing tests running applications and includes tests such as web vulnerability testing and fuzzing?

- A. Code Review
- B. Static Application Security Testing (SAST)
- C. Unit Testing
- D. Functional Testing
- E. Dynamic Application Security Testing (DAST)

**Answer:** E

**NEW QUESTION 72**

Which of the following is NOT a cloud computing characteristic that impacts incidence response?

- A. The on demand self-service nature of cloud computing environments.
- B. Privacy concerns for co-tenants regarding the collection and analysis of telemetry and artifacts associated with an incident.
- C. The possibility of data crossing geographic or jurisdictional boundaries.
- D. Object-based storage in a private cloud.
- E. The resource pooling practiced by cloud services, in addition to the rapid elasticity offered by cloud infrastructures.

**Answer:** B

**NEW QUESTION 74**

Which cloud storage technology is basically a virtual hard drive for instanced or VMs?

- A. Volume storage
- B. Platform
- C. Database
- D. Application
- E. Object storage

**Answer:** A

**NEW QUESTION 75**

CCM: The Architectural Relevance column in the CCM indicates the applicability of the cloud security control to which of the following elements?

- A. Service Provider or Tenant/Consumer
- B. Physical, Network, Compute, Storage, Application or Data
- C. SaaS, PaaS or IaaS

**Answer:** C

**NEW QUESTION 80**

Which of the following encryption methods would be utilized when object storage is used as the back-end for an application?

- A. Database encryption
- B. Media encryption
- C. Asymmetric encryption
- D. Object encryption
- E. Client/application encryption

**Answer:** E

**NEW QUESTION 84**

.....

## Thank You for Trying Our Product

\* 100% Pass or Money Back

All our products come with a 90-day Money Back Guarantee.

\* One year free update

You can enjoy free update one year. 24x7 online support.

\* Trusted by Millions

We currently serve more than 30,000,000 customers.

\* Shop Securely

All transactions are protected by VeriSign!
