## Exam Questions HPE2-W11

Selling HPE Aruba Networking Solutions

#### NEW QUESTION 1

You are meeting with a customer's Chief Information Security Officer (CISO) and want to open a discovery conversation about HPE Aruba Networking Edge-to-Cloud Security solutions. What is one topic you should discuss?

- A. How dependent the organization is on video conferencing and other collaboration applications and whether the CISO understands how to patch those applications' vulnerabilities.
- B. How dependent the organization is on manually defined security policies and what risk the organization runs if admins make errors in those policies.
- C. Whether the CISO understands the encryption technologies that are improving security for modern wireless networks.
- D. Whether the CISO understands the value of a single-vendor, end-to-end security solution and is ready to commit to a single vendor.

**Answer: B**

#### Explanation:

HPE Aruba Networking Edge-to-Cloud Security solutions enable customers to automate and simplify network security operations and enhance Zero Trust protection across all network domains. By using HPE Aruba Networking Central NetConductor, customers can orchestrate and enforce granular, role-based policies that are consistent and aligned with business intent, regardless of where users and devices connect. This reduces the risk of human errors, misconfigurations, and security breaches that can result from manually defined and managed policies.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 17: "Aruba Central NetConductor is a cloud-native network security service that automates and accelerates networking and policy orchestration across all network domains. It enables customers to define and enforce granular, role-based policies that are consistent and aligned with business intent, regardless of where users and devices connect."
- Edge-to-cloud, Zero Trust, and SASE security | HPE Aruba Networking: "Aruba Central NetConductor automatically configures infrastructure to deliver optimal network performance while enforcing granular access control security policies that are the foundation of Zero Trust and SASE architectures."
- HPE Aruba Networking Central NetConductor: Automate and Accelerate Networking and Policy Orchestration: "Aruba Central NetConductor eliminates the need for manual configuration and management of network policies, which can be error-prone, time-consuming, and inconsistent across network domains. It also reduces the risk of security breaches and compliance violations that can result from misconfigurations and gaps in policy enforcement."

#### NEW QUESTION 2

What is one of the advantages of selling HPE GreenLake for Aruba NaaS Service Packs?

- A. They are the only HPE GreenLake for Aruba solutions that include Customer Experience Management at no extra cost.
- B. They enable you to add HPE Aruba Networking Intelligent Operations at discounted rate.
- C. They simplify the process of designing and selling network-as-a-service solutions to customers.
- D. They enable you to customize network as-a-service solutions as needed to meet customer requirements.

**Answer: C**

#### Explanation:

HPE GreenLake for Aruba NaaS Service Packs are pre-defined bundles of HPE Aruba Networking solutions that can be consumed as a service with HPE GreenLake for Networking. They simplify the process of designing and selling network-as-a-service solutions to customers by providing a standardized and easy-to-quote solution for common use cases, such as hybrid work, connected retail, and hybrid learning<sup>12</sup>.

#### NEW QUESTION 3

What is one impact of Internet of Things (IoT) on customer environments?

- A. IoT consistently shifts network traffic away from the wireless network and towards the wired network.
- B. IoT helps customers minimize their vulnerability to attacks at the edge.
- C. IoT increases the number of devices that edge networks must accommodate.
- D. IoT decreases network utilization at the edge and increases utilization in the cloud.

**Answer: C**

#### Explanation:

Internet of Things (IoT) is the term used to describe the network of physical objects that are embedded with sensors, actuators, and connectivity to exchange data with other devices and systems over the internet. IoT devices can range from smart home appliances, wearable devices, industrial machines, vehicles, and more. IoT has a significant impact on customer environments, as it increases the number of devices that edge networks must accommodate, manage, and secure. Edge networks are the networks that connect users and devices to the core network and the cloud. As IoT devices proliferate, edge networks face challenges such as scalability, performance, reliability, security, and visibility.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "Internet of Things (IoT) is the term used to describe the network of physical objects that are embedded with sensors, actuators, and connectivity to exchange data with other devices and systems over the internet."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "Edge networks are the networks that connect users and devices to the core network and the cloud. They include campus, branch, remote, data center, and IoT networks."
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 11: "As IoT devices proliferate, edge networks face challenges such as scalability, performance, reliability, security, and visibility."
- What is IoT: The Internet of Things explained | McKinsey: "IoT uses a variety of technologies to connect the digital and physical worlds. Physical objects are embedded with sensors—which can monitor things like temperature or motion, or really any change in environment—and actuators—which receive signals from sensors and then do something in response to those changes."
- How Is the Internet of Things Changing Our Lives?: "The Internet of Things (IoT) is changing our lives in many ways. It is transforming how we work, play, learn, and communicate. It is also creating new opportunities and challenges for businesses, governments, and society."

#### NEW QUESTION 4

Which customer need does HPE Aruba Networking EdgeConnect Mobile address?

- A. Enabling users to run demanding video conferencing applications over wireless connections at the corporate main office
- B. Enabling employees to connect to the corporate network from mobile devices and work from anywhere, including public locations

- C. Enabling secure connectivity between small branches and both the Internet and the corporate data center
- D. Enabling Zero Trust Security for wireless users accessing cloud applications from mid- sized branches

**Answer:** B

**Explanation:**

HPE Aruba Networking EdgeConnect Mobile is a secure SD-WAN solution that extends the benefits of HPE Aruba Networking EdgeConnect to mobile users and devices. It enables employees to connect to the corporate network from their smartphones, tablets, or laptops, and work from anywhere, including public locations such as airports, hotels, or coffee shops<sup>1</sup>. It also provides consistent security, performance, and quality of experience for cloud and SaaS applications<sup>2</sup>.

**NEW QUESTION 5**

You are discussing HPE Aruba Networking ESP (Edge Services Platform) solutions with a customer. This customer has mentioned supporting remote and hybrid workers as a key business initiative. What benefit of HPE Aruba Networking solutions should you emphasize?

- A. Remote employees can log into HPE Aruba Networking Central to access the centralized services and applications they need.
- B. These solutions offer a completely separate, dedicated mobility architecture for remote offices versus campuses.
- C. Remote employees can use HPE Aruba Networking Central to easily troubleshoot any issues on their own without IT support.
- D. These solutions make it simpler for customers to apply consistent, role-based policies no matter where users connect.

**Answer:** D

**Explanation:**

HPE Aruba Networking ESP (Edge Services Platform) solutions enable customers to deliver a consistent and secure network experience to remote and hybrid workers, regardless of their location or device. By using HPE Aruba Networking Central, customers can define and enforce granular, role-based policies that are automatically applied across the network, from the edge to the cloud. This simplifies network management and enhances security and compliance.

References:

- Selling HPE Aruba Networking Solutions, Rev.23.11, page 12: “Aruba ESP enables IT to deliver a consistent and secure network experience to remote and hybrid workers, regardless of their location or device.”
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 13: “Aruba Central is the cloud- native, single pane of glass for managing Aruba ESP. It provides a simple, secure, and cost-effective way to manage and monitor Aruba wired, wireless, and SD-WAN infrastructure, as well as Aruba security and location services.”
- Selling HPE Aruba Networking Solutions, Rev.23.11, page 14: “Aruba Policy Enforcement Firewall (PEF) is a key component of Aruba ESP that provides granular, role-based access control and security for wired and wireless networks. PEF enables IT to define and enforce policies based on user identity, device type, location, time, and application, across the network from the edge to the cloud.”

**NEW QUESTION 6**

You want to determine if a business decision-maker might be interested in HPE Aruba Networking Central with AIOps. What is a good topic to discuss?

- A. The cost to the business when network issues interfere with user productivity
- B. The benefits of better aligning the data center IT operations team with the development team
- C. The security benefits of applying intelligent access policies that follow users and devices
- D. The difference between machine learning and other forms of artificial intelligence (AI)

**Answer:** A

**Explanation:**

HPE Aruba Networking Central with AIOps is a cloud-native network management platform that leverages artificial intelligence to provide insights, automation, and security for wired, wireless, and SD-WAN networks<sup>1</sup>. A good topic to discuss with a business decision-maker is how HPE Aruba Networking Central with AIOps can help reduce the cost of network downtime, improve user experience, and optimize network performance<sup>2</sup>.
