## Exam Questions PMI-RMP

PMI Risk Management Professional

#### NEW QUESTION 1

Nancy is the project manager of a project with 78 stakeholders. This is a high-profile project and she needs to express to her project team and to the management the importance of communication in this project. She would like to show the number of stakeholder communication channels in the project. Based on this information how many communication channels exist within this project?

- A. 156
- B. 3,003
- C. 78
- D. 6,084

**Answer: B**

#### NEW QUESTION 2

Ben is the project manager of the YHT Project for his company. Alice, one of his team members, is confused about when project risks will happen in the project. Which one of the following statements is the most accurate about when project risk happens?

- A. Project risk can happen at any moment.
- B. Project risk happens throughout the project execution.
- C. Project risk is always in the future.
- D. Project risk is uncertain, so no one can predict when the event will happen.

**Answer: C**

#### NEW QUESTION 3

Where can a project manager find risk-rating rules?

- A. Risk management plan
- B. Organizational process assets
- C. Enterprise environmental factors
- D. Risk probability and impact matrix

**Answer: B**

#### NEW QUESTION 4

Tracy is the project manager of the NLT Project for her company. The NLT Project is scheduled to last 14 months and has a budget at completion of \$4,555,000. Tracy's organization will receive a bonus of \$80,000 per day that the project is completed early up to \$800,000. Tracy realizes that there are several opportunities within the project to save on time by crashing the project work. Crashing the project is what type of risk response?

- A. Transference
- B. Mitigation
- C. Exploit
- D. Enhance

**Answer: D**

#### NEW QUESTION 5

Jeff, a key stakeholder in your project, wants to know how the risk exposure for the risk events is calculated during quantitative risk analysis. He is worried about the risk exposure which is too low for the events surrounding his project requirements. How is the risk exposure calculated?

- A. The risk exposure of a risk event is determined by historical information.
- B. The probability of a risk event times the impact of a risk event determines the true risk exposure.
- C. The probability of a risk event plus the impact of a risk event determines the true risk exposure.
- D. The probability and impact of a risk event are gauged based on research and in-depth analysis.

**Answer: B**

#### NEW QUESTION 6

Joan is the project manager of the BTT project for her company. She has worked with her project to create risk responses for both positive and negative risk events within the project. As a result of this process Joan needs to update the project document updates. She has updated the assumptions log as a result of the findings and risk responses, but what other documentation will need to be updated as an output of risk response planning?

- A. Scope statement
- B. Lessons learned
- C. Risk Breakdown Structure
- D. Technical documentation

**Answer: D**

#### NEW QUESTION 7

You are the project manager for GHY Project and are working to create a risk response for a negative risk. You and the project team have identified the risk that the project may not complete on time, as required by the management, due to the creation of the user guide for the software you're creating. You have elected to hire an external writer in order to satisfy the requirements and to alleviate the risk event. What type of risk response have you elected to use in this instance?

- A. Avoidance

- B. Exploiting
- C. Transference
- D. Sharing

**Answer:** C

#### NEW QUESTION 8

Which positive risk response best describes a teaming agreement?

- A. Share
- B. Exploit
- C. Enhance
- D. Venture

**Answer:** A

#### NEW QUESTION 9

Virginia is the project manager for her organization. She has hired a subject matter expert to interview the project stakeholders on certain identified risks within the project. The subject matter expert will assess the risk event with what specific goal in mind?

- A. To determine the level of probability and impact for each risk event
- B. To determine the bias of the risk event based on each person interviewed
- C. To determine the probability and cost of the risk event
- D. To determine the validity of each risk event

**Answer:** A

#### NEW QUESTION 10

Stephen is the project manager of the GBB project. He has worked with two subject matter experts and his project team to complete the risk assessment technique. There are approximately 47 risks that have a low probability and a low impact on the project. Which of the following answers best describes what Stephen should do with these risk events?

- A. The low probability and low impact risks should be added to a watchlist for future monitoring.
- B. Because they are low probability and low impact, the risks can be dismissed.
- C. The low probability and low impact risks should be added to the risk register.
- D. Because they are low probability and low impact, Stephen should accept the risks.

**Answer:** A

#### NEW QUESTION 10

Diana is the project manager of the QPS project for her company. In this project Diana and the project team have identified a pure risk. Diana and the project team decided, along with the key stakeholders, to remove the pure risk from the project by changing the project plan altogether. What is a pure risk?

- A. It is a risk event that is generated due to errors or omission in the project work.
- B. It is a risk event that is created by a risk response.
- C. It is a risk event that only has a negative side, such as loss of life or limb.
- D. It is a risk event that cannot be avoided because of the order of the work.

**Answer:** C

#### NEW QUESTION 14

You are the project manager of the GHG project for your company. You have identified the project risks, completed qualitative and quantitative analysis, and created risk responses. You also need to document how and when risk audits will be performed in the project. Where will you define the frequency of risk audits?

- A. Risk response plan
- B. Quality management plan
- C. Risk management plan
- D. Schedule management plan

**Answer:** C

#### NEW QUESTION 19

You are the project manager of the BJA Project for your company. Management is worried about one of the identified risks in your project. The risk event has a probability of 90 percent and a cost impact of \$85,000. Management and you discuss possible solutions to address the risk. You share with them that for \$75,000 you can reduce the probability of the risk event to 15 percent and the impact to \$25,000. This solution will add three weeks to the project schedule. Management thinks this is a good idea and they would like you to add the time and cost additions to your project plan. What type of risk response is used?

- A. Avoidance
- B. Acceptance
- C. Exploit
- D. Mitigation

**Answer:** D

#### NEW QUESTION 22

During qualitative risk analysis you want to define the risk urgency assessment. All of the following are indicators of risk priority except for which one?

- A. Cost of the project
- B. Risk rating
- C. Warning signs
- D. Symptoms

**Answer:** A

#### NEW QUESTION 23

Gary is the project manager of his organization. He is managing a project that is similar to a project his organization completed recently. Gary has decided that he will use the information from the past project to help him and the project team to identify the risks that may be present in the project. Management agrees that this checklist approach is ideal and will save time in the project. Which of the following statement is most accurate about the limitations of the checklist analysis approach for Gary?

- A. The checklist analysis approach is fast but it is impossible to build an exhaustive checklist.
- B. The checklist analysis approach saves time, but can cost more.
- C. The checklist analysis approach only uses qualitative analysis.
- D. The checklist is also known as top down risk assessment.

**Answer:** A

#### NEW QUESTION 26

You work as a project manager for BlueWell Inc. You are working with Nancy, the COO of your company, on several risks within the project. Nancy understands that through qualitative analysis you have identified 80 risks that have a low probability and low impact as the project is currently planned. Nancy's concern, however, is that the impact and probability of these risk events may change as conditions within the project may change. She would like to know where will you document and record these 80 risks that have low probability and low impact for future reference. What should you tell Nancy?

- A. Risks with low probability and low impact are recorded in a watchlist for future monitoring.
- B. All risks, regardless of their assessed impact and probability, are recorded in the risk log.
- C. Risk identification is an iterative process so any changes to the low probability and low impact risks will be reassessed throughout the project life cycle.
- D. All risks are recorded in the risk management plan.

**Answer:** A

#### NEW QUESTION 29

Mike is the project manager of the NNP Project for his organization. He is working with his project team to plan the risk responses for the NNP Project. Mike would like the project team to work together on establishing risk thresholds in the project. What is the purpose of a risk threshold?

- A. It helps to identify those risks for which specific responses are needed.
- B. It is a limit of the funds that can be assigned to risk events.
- C. It is a warning sign that a risk event is going to happen.
- D. It is a study of the organization's risk tolerance.

**Answer:** A

#### NEW QUESTION 33

You work as a project manager for BlueWell Inc. You are performing the quantitative risk analysis for your project. One of the project risks has a 50 percent probability of happening, and it will cost the project \$55,000 if the risk happens. What will be the expected monetary value of this risk event?

- A. Negative \$27,500
- B. Zero - the risk event has not yet occurred
- C. Negative \$26,000
- D. Negative \$55,000

**Answer:** A

#### NEW QUESTION 35

Mark works as a project manager of the NNH project. In this project, he has created a contingency response that the cost performance index should be less than 0.91. The NNH project has a budget at completion of \$950,000 and is 43 percent complete - though the project should be 50 percent complete. The project has spent \$470,897 to reach the 43 percent complete milestone. What is the project's cost performance index?

- A. 0.95
- B. 0.80
- C. 0.87
- D. 0.91

**Answer:** C

#### NEW QUESTION 38

You are the project manager of the GHY project. In your organization you must follow certain enterprise environmental factors that establish the rules for risk management. One of the policies your project must adhere to requires periodic rapid analysis of risks within the project. These rapid, cost-effective sessions must be documented and performed monthly. What type of analysis are you required to perform according to your enterprise environmental factors?

- A. Brainstorming
- B. Qualitative analysis
- C. Delphi Technique

D. Quantitative analysis

**Answer:** B

#### NEW QUESTION 39

You are the project manager of the NHQ project for your company. Management has told you that you must implement an agreed upon contingency response if the Cost Performance Index in your project is less than 0.90. Consider that your project has a budget at completion of \$250,000 and is 60 percent complete. You are scheduled to be however, 75 percent complete, and you have spent \$165,000 to date. What is the Cost Performance Index for this project to determine if the contingency response should happen?

- A. -\$37,500
- B. 0.91
- C. 0.88
- D. 0.80

**Answer:** B

#### NEW QUESTION 43

David is the project manager of the NKL Project for his organization. He has been asked to create a proposal for a construction project for a client. David realizes that there are several requirements within the SOW and RFP provided by the client that would eliminate his company from bidding on the construction project. David proposed to management that his organization create a partnership with a competitor so that together they could bid on the construction project and qualify for the customer's requirements. What risk response is David proposing to management?

- A. Exploiting
- B. Teaming agreement
- C. Transference
- D. Sharing

**Answer:** D

#### NEW QUESTION 45

Holly is the project manager of the NHQ project for her company. Her project sponsor, Tracy, has requested that Thomas, the department manager, from the Risk Management Department, will work with Holly to determine the effectiveness of the risk responses. Tracy and Thomas are concerned that some of the risks within Holly's project may not be addressed to depth they would like. In this scenario, who is responsible for ensuring that risk audits are performed at an appropriate frequency throughout the project?

- A. Thomas
- B. Tracy
- C. The project team
- D. Holly

**Answer:** D

#### NEW QUESTION 49

Your project has several risks that may cause serious financial impact should they happen. You have studied the risk events and made some potential risk responses for the risk events but management wants you to do more. They'd like for you to create some type of a chart that identified the risk probability and impact with a financial amount for each risk event. What is the likely outcome of creating this type of chart?

- A. Risk response
- B. Quantitative analysis
- C. Contingency reserve
- D. Risk response plan

**Answer:** C

#### NEW QUESTION 51

Which of the following statements describe the purpose of an Issue Log? Each correct answer represents a complete solution. Choose all that apply.

- A. It analyzes the impact that the issue is having on the project.
- B. It tracks the actions taken to resolve the issue.
- C. It tracks the outcome of the actions taken.
- D. It addresses the risks that could affect the project.

**Answer:** ABC

#### NEW QUESTION 55

Shawn is the project manager of the WHT Project for his company. In this project Shawn's team reports that they have found a way to complete the project work for less cost than what was originally planned. The project team presents a new software that will help to automate the project work. While the software and the associated training costs \$25,000 it will save the project nearly \$65,000 in total costs. Shawn agrees to the software and changes to the project management plan accordingly. What type of risk response has been used in this instance?

- A. Avoidance
- B. Exploiting
- C. Accepting
- D. Enhancing

**Answer:** B

#### NEW QUESTION 57

You are the project manager of the GHY Project for your company. You have completed the risk response planning with your project team. You now need to update the WBS. Why would the project manager need to update the WBS after the risk response planning process? Choose the best answer.

- A. Because of work that was omitted during the WBS creation
- B. Because of new work generated by the risk responses
- C. Because of risk responses that are now activities
- D. Because of risks associated with work packages

**Answer: B**

#### NEW QUESTION 59

Joan is a project management consultant and she has been hired by a firm to help them identify risk events within the project. Joan would first like to examine the project documents including the plans, assumptions lists, project files, and contracts. What key thing will help Joan to discover risks within the review of the project documents?

- A. The project documents will help the project manager, or Joan, to identify what risk identification approach is best to pursue.
- B. Lack of consistency between the plans and the project requirements and assumptions can be the indicators of risk in the project.
- C. Poorly written requirements will reveal inconsistencies in the project plans and documents.
- D. Plans that have loose definitions of terms and disconnected approaches will reveal risks.

**Answer: B**

#### NEW QUESTION 60

The Project Risk Management knowledge area focuses on which of the following processes? Each correct answer represents a complete solution. Choose all that apply.

- A. Quantitative Risk Analysis
- B. Risk Monitoring and Control
- C. Potential Risk Monitoring
- D. Risk Management Planning

**Answer: ABD**

#### NEW QUESTION 63

You work as a project manager for SoftTech Inc. You have implemented the risk action plan and it was not effective. What type of plan should you as a project manager will create for implementation if a selected risk strategy fails to be fully effective?

- A. Mitigation management plan
- B. Mitigation plan
- C. Fallback plan
- D. Risk response plan

**Answer: C**

#### NEW QUESTION 65

Beth is the project manager of the BFG Project for her company. In this project Beth has decided to create a contingency response based on the performance of the project schedule. If the project schedule variance is greater than \$10,000 the contingency plan will be implemented. What is the formula for the schedule variance?

- A.  $SV=EV/PV$
- B.  $SV=PV-EV$
- C.  $SV=EV/AC$
- D.  $SV=EV-PV$

**Answer: D**

#### NEW QUESTION 67

You are working as a project manager in your organization. You are nearing the final stages of project execution and looking towards the final risk monitoring and controlling activities. For your project archives, which one of the following is an output of risk monitoring and control?

- A. Quantitative risk analysis
- B. Risk audits
- C. Requested changes
- D. Qualitative risk analysis

**Answer: C**

#### NEW QUESTION 72

Della works as a project manager for Tech Perfect Inc. She is studying the documentation of planning of a project. The documentation states that there are twenty-eight stakeholders with the project. What will be the number of communication channels for the project?

- A. 378
- B. 300
- C. 28
- D. 250

**Answer:** A

**NEW QUESTION 74**

Tom is the project manager of the GGG project for his company. He is working with the project team on the Perform Qualitative Risk Analysis process. Tom is having the project team to review the project scope statement as an input to the qualitative risk analysis process. Why?

- A. The project scope statement must be understood to see the project requirements and the inherent risks of the project.
- B. The project scope statement will reveal the type of project as either a recurrent or first- of-its-kind project.
- C. The project scope identifies the risks associated with project constraints.
- D. The project scope statement must be reviewed to understand the quality requirements and the risks associated with the demand for quality.

**Answer:** B

**NEW QUESTION 79**

You are the project manager of the GGG project. You have completed the risk identification process for the initial phases of your project. As you begin to document the risk events in the risk register what additional information can you associate with the identified risk events?

- A. Risk potential responses
- B. Risk schedule
- C. Risk owner
- D. Risk cost

**Answer:** A

**NEW QUESTION 83**

Thomas is a key stakeholder in your project. Thomas has requested several changes to the project scope for the project you are managing. Upon review of the proposed changes, you have discovered that these new requirements are laden with risks and you recommend to the change control board that the changes be excluded from the project scope. The change control board agrees with you. What component of the change control system communicates the approval or denial of a proposed change request?

- A. Configuration management system
- B. Scope change control system
- C. Integrated change control
- D. Change log

**Answer:** C

**NEW QUESTION 84**

Which of the following are parts of SWOT Analysis? Each correct answer represents a complete solution. Choose all that apply.

- A. Opportunities
- B. Tools
- C. Weaknesses
- D. Threats
- E. Strengths
- F. Optimism

**Answer:** ACDE

**NEW QUESTION 88**

Which of the following documents is described in the statement below? "It is developed along with all processes of the risk management. It contains the results of the qualitative risk analysis, quantitative risk analysis, and risk response planning."

- A. Risk management plan
- B. Project charter
- C. Risk register
- D. Quality management plan

**Answer:** C

**NEW QUESTION 90**

You work as a project manager for TechSoft Inc. You are preparing to plan risk responses for your project with your project team. How many risk responses are available for a positive risk event in the project?

- A. Three
- B. Four
- C. Seven
- D. One

**Answer:** B

**NEW QUESTION 93**

You work as a project manager for BlueWell Inc. You have to communicate the causes of risk events to the stakeholders. Which risk diagramming technique you will use to communicate the causes of risk events to project stakeholders?

- A. Project network diagrams
- B. Process flow charts
- C. Ishikawa diagrams
- D. Influence diagrams

**Answer:** C

**NEW QUESTION 94**

Which of the following risk responses delineates that the project plan will not be changed to deal with the risk?

- A. Exploitation
- B. Transference
- C. Acceptance
- D. Mitigation

**Answer:** C

**NEW QUESTION 96**

Examine the figure given below.

What will be the expected monetary value of Risk C?

- A. -\$113,750
- B. \$175,000 if the risk event actually happens
- C. -\$175,000
- D. -\$27,000

**Answer:** D

**NEW QUESTION 98**

Which of the following techniques examines the degree to which organizational strengths offset threats and opportunities that may serve to overcome weaknesses?

- A. SWOT Analysis
- B. Expert Judgment
- C. Delphi
- D. Brainstorming

**Answer:** A

**NEW QUESTION 101**

Jenny is the project manager of the NHJ Project for her company. She has identified

several positive risk events within the project and she thinks these events can save the project time and money. You, a new team member wants to know that how many risk responses are available for a positive risk event. What will Jenny reply to you?

- A. Four
- B. Three
- C. Seven
- D. Acceptance is the only risk response for positive risk events.

**Answer:** A

**NEW QUESTION 104**

You are the project manager of the HJU project for your company. This project will last for 18 months and has a project budget of \$567,000. Robert, one of your stakeholders, has introduced a scope change request that will likely have an impact on the project costs and schedule. Robert assures you that he will pay for the extra time and costs associated with the risk event. You tell Robert that the change request may affect more areas of the project than just time and cost and that you are worried about the additional risks the change request will bring. What project management component is responsible for evaluating a change request and its impact on all of the project management knowledge areas?

- A. Project change control system
- B. Integrated change control
- C. Risk analysis
- D. Configuration management

**Answer:** B

**NEW QUESTION 105**

You are the program manager for your organization. Management is considering a new program but they are worried about the program risks that may affect the program success. You know that there are three positive risks responses and three negative risk responses that each risk can have. Management asks you which risk response would be most appropriate for a large risk event if they wanted to hire a third-party to own the risk event for the program. What risk event is most appropriate?

- A. Avoidance
- B. Sharing
- C. Transference
- D. Mitigation

**Answer:** C

#### NEW QUESTION 110

Your organization has named you the project manager of the JKN Project. This project has a BAC of \$1,500,000 and it is expected to last 18 months. Management has agreed that if the schedule baseline has a variance of more than five percent then you will need to crash the project. What happens when the project manager crashes a project?

- A. Project risks will increase.
- B. The project will take longer to complete, but risks will diminish.
- C. Project costs will increase.
- D. The amount of hours a resource can be used will diminish.

**Answer: C**

#### NEW QUESTION 111

Which one of the following is the only output for the qualitative risk analysis process?

- A. Enterprise environmental factors
- B. Project management plan
- C. Risk register updates
- D. Organizational process assets

**Answer: C**

#### NEW QUESTION 115

Your project team has identified a project risk that must be responded to. The risk has been recorded in the risk register and the project team has been discussing potential risk responses for the risk event. The event is not likely to happen for several months but the probability of the event is high. Which one of the following is a valid response to the identified risk event?

- A. Corrective action
- B. Risk audit
- C. Technical performance measurement
- D. Earned value management

**Answer: A**

#### NEW QUESTION 120

There are four inputs to the Monitoring and Controlling Project Risks process. Which one of the following will NOT help you, the project manager, to prepare for risk monitoring and controlling?

- A. Work Performance Information
- B. Project management plan
- C. Risk register
- D. Change requests

**Answer: D**

#### NEW QUESTION 123

During which of the following processes, probability and impact matrix is prepared?

- A. Perform Qualitative Risk Analysis
- B. Monitoring and Control Risks
- C. Plan Risk Responses
- D. Perform Quantitative Risk Analysis

**Answer: A**

#### NEW QUESTION 124

You are the project manager of the HJK project for your organization. You and the project team have created risk responses for many of the risk events in the project. A teaming agreement is an example of what risk response?

- A. Transference
- B. Acceptance
- C. Mitigation
- D. Sharing

**Answer: D**

#### NEW QUESTION 127

You are the project manager of the NNQ Project for your company and are working with your project team to define contingency plans for the risks within your project. Mary, one of your project team members, asks what a contingency plan is. Which of the following statements best defines what a contingency response is?

- A. Some responses are designed for use only if certain events occur.
- B. Some responses have a cost and a time factor to consider for each risk event.
- C. Some responses must counteract pending risk events.
- D. Quantified risks should always have contingency responses.

**Answer:** A

**NEW QUESTION 129**

Elizabeth is a project manager for her organization and she finds risk management to be very difficult for her to manage. She asks you, a lead project manager, at what stage in the project will risk management become easier. What answer best resolves the difficulty of risk management practices and the effort required?

- A. Risk management only becomes easier the more often it is practiced.
- B. Risk management only becomes easier when the project is closed.
- C. Risk management only becomes easier when the project moves into project execution.
- D. Risk management is an iterative process and never becomes easier.

**Answer:** A

**NEW QUESTION 132**

You work as a project manager for BlueWell Inc. There has been a delay in your project work that is adversely affecting the project schedule. You decided, with your stakeholders' approval, to fast track the project work to get the project done faster. When you fast track the project which of the following are likely to increase?

- A. Costs
- B. Quality control concerns
- C. Human resource needs
- D. Risks

**Answer:** D

**NEW QUESTION 134**

You are the project manager of the YHG project for your company. Within the project, you and the project team have identified a risk event that could have a financial impact on the project of \$450,000. This risk event has a 70 percent chance of occurring in the project. The project identifies a solution that will reduce the probability of the risk event to ten percent, but it will cost \$260,000 to implement. Management agrees with the solution and asks that you include the risk response in the project plan. What risk response is this?

- A. This is mitigation because the response reduces the probability.
- B. This is not a risk response, but a change request.
- C. This is transference because of the \$260,000 cost of the solution.
- D. This is avoidance because the risk response caused the project plan to be changed.

**Answer:** A

**NEW QUESTION 138**

You are working with your project stakeholders to identify risks within the JKP Project. You want to use an approach to engage the stakeholders to increase the breadth of the identified risks by including internally generated risk. Which risk identification approach is most suited for this goal?

- A. Delphi Technique
- B. SWOT analysis
- C. Assumptions analysis
- D. Brainstorming

**Answer:** B

**NEW QUESTION 142**

You are the project manager of the NHH project for your company. You have completed the first round of risk management planning and have created four outputs of the risk response planning process. Which one of the following is NOT an output of the risk response planning?

- A. Risk register updates
- B. Organizational process assets updates
- C. Project document updates
- D. Risk-related contract decisions

**Answer:** B

**NEW QUESTION 146**

Jenny is the project manager for the NBT projects. She is working with the project team and several subject matter experts to perform the quantitative risk analysis process. During this process she and the project team uncover several risks events that were not previously identified. What should Jenny do with these risk events?

- A. The events should be entered into qualitative risk analysis.
- B. The events should be determined if they need to be accepted or responded to.
- C. The events should be entered into the risk register.
- D. The events should continue on with quantitative risk analysis.

**Answer:** C

**NEW QUESTION 150**

You are the project manager of a large, high-profile project in your organization. You have realized that politics within your company may affect the true identification of risk events within the project. You decide that you'd like to use a method to identify

risk events through an anonymous process. Which one of the following risk events will allow you to collect and distribute risk information without the stakeholders knowing what other stakeholders are communicating about the project risk events?

- A. Surveys
- B. Monte Carlo Technique
- C. Checklist analysis
- D. Delphi Technique

**Answer: D**

#### NEW QUESTION 153

You are the project manager of the NGQQ Project for your company. To help you communicate project status to your stakeholders, you are going to create a stakeholder register. All of the following information should be included in the stakeholder register except for which one?

- A. Assessment information of the stakeholders' major requirements, expectations, and potential influence
- B. Stakeholder classification of their role in the project
- C. Identification information for each stakeholder
- D. Stakeholder management strategy

**Answer: D**

#### NEW QUESTION 154

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Increased understanding or quantification of the system
- B. Estimating the average outcome
- C. Model development
- D. Decision making or the development of recommendations for decision makers

**Answer: ACD**

#### NEW QUESTION 158

Nancy is the project manager of the NHH project. She and the project team have identified a significant risk in the project during the qualitative risk analysis process. Bob is familiar with the technology that the risk is affecting and proposes to Nancy a solution to the risk event. Nancy tells Bob that she has noted his response, but the risk really needs to pass through the quantitative risk analysis process before creating responses. Bob disagrees and ensures Nancy that his response is most appropriate for the identified risk. Who is correct in this scenario?

- A. Bob is correc
- B. Bob is familiar with the technology and the risk event so his responseshould be implemented.
- C. Bob is correc
- D. Not all risk events have to pass the quantitative risk analysis process to develop effective risk responses.
- E. Nancy is correc
- F. All risks of significant probability and impact should pass the quantitative risk analysis process before risk responses are created.
- G. Nancy is correc
- H. Because Nancy is the project manager she can determine the correct procedures for risk analysis and risk response
- I. In addition, she has noted the risk response that Bob recommends.

**Answer: B**

#### NEW QUESTION 159

Mary is the project manager of the HGH Project for her company. She and her project team have agreed that if the vendor is late by more than ten days they will cancel the order and hire the NBG Company to fulfill the order. The NBG Company can guarantee orders within three days, but the costs of their products are significantly more expensive than the current vendor. What type of a response strategy is this?

- A. Internal risk management strategy
- B. Contingent response strategy
- C. External risk response
- D. Expert judgment

**Answer: B**

#### NEW QUESTION 163

You are the project manager of the NHQ Project for your company. You have completed qualitative and quantitative analysis of your identified project risks and you would now like to find an approach to increase project opportunities and to reduce threats within the project. What project management process would best help you?

- A. Monitor and control project risks
- B. Create a risk governance approach
- C. Create the project risk register
- D. Plan risk responses

**Answer: D**

#### NEW QUESTION 165

You are the project manager of a large construction project. This project will last for 18 months and will cost \$750,000 to complete. You are working with your

project team, experts, and stakeholders to identify risks within the project before the project work begins. Management wants to know why you have scheduled so many risk identification meetings throughout the project rather than just initially during the project planning. What is the best reason for the duplicate risk identification sessions?

- A. The iterative meetings allow the project manager and the risk identification participants to identify newly discovered risk events throughout the project.
- B. The iterative meetings allow all stakeholders to participate in the risk identification processes throughout the project phases.
- C. The iterative meetings allow the project manager to discuss the risk events which have passed the project and which did not happen.
- D. The iterative meetings allow the project manager to communicate pending risks events during project execution.

**Answer:** A

#### NEW QUESTION 169

Gary is the project manager for his project. He and the project team have completed the qualitative risk analysis process and are about to enter the quantitative risk analysis process when Mary, the project sponsor, wants to know what quantitative risk analysis will review. Which of the following statements best defines what quantitative risk analysis will review?

- A. The quantitative risk analysis process will review risk events for their probability and impact on the project objectives.
- B. The quantitative risk analysis seeks to determine the true cost of each identified risk event and the probability of each risk event to determine the risk exposure.
- C. The quantitative risk analysis process will analyze the effect of risk events that may substantially impact the project's competing demands.
- D. The quantitative risk analysis reviews the results of risk identification and prepares the project for risk response management.

**Answer:** C

#### NEW QUESTION 174

Mark works as a project manager for TechSoft Inc. Mark, the project team, and the key project stakeholders have completed a round of qualitative risk analysis. He needs to update the risk register with his findings so that he can communicate the risk results to the project stakeholders – including management. Mark will need to update all of the following information except for which one?

- A. Prioritized list of quantified risks
- B. Watchlist of low-priority risks
- C. Trends in qualitative risk analysis
- D. Risks grouped by categories

**Answer:** A

#### NEW QUESTION 177

Sensitivity analysis is a technique for systematically changing parameters in a model to determine the effects of such changes and is useful for computer modelers for a range of purposes. Which of the following purposes does the sensitivity analysis include? Each correct answer represents a complete solution. Choose all that apply.

- A. Estimating the average outcome
- B. Model development
- C. Decision making or the development of recommendations for decision makers
- D. Increased understanding or quantification of the system

**Answer:** BCD

#### NEW QUESTION 182

You are the project manager for your organization. You are working with your key stakeholders in the qualitative risk analysis process. You understand that there is certain bias towards the risk events in the project that you need to address, manage, and ideally reduce. What solution does the PMBOK recommend to reduce the influence of bias during qualitative risk analysis?

- A. Establish the definitions of the levels of probability and impact
- B. Provide iterations of risk analysis for true reflection of a risk probability and impact
- C. Isolate the stakeholders by project phases to determine their risk bias
- D. Involve all stakeholders to vote on the probability and impact of the risk events

**Answer:** A

#### NEW QUESTION 185

Bill is the project manager for a project that will last six months and has a budget of \$580,000. In this project a high-risk has been identified with the new materials the project will be using. Bill would like to assign one person, Beth, to be responsible to monitor this risk. Bill assigns Beth the authority to respond to the risk event if it appears in the risk events that is likely to happen. In addition, Bill hires a consultant to work with Beth on this area of the project. In this instance, who is the risk response owner?

- A. Bill, because he is the project manager
- B. Beth, because she has the authority to respond to the risk event
- C. Beth and the consultant are the risk owners
- D. The consultant working with Beth, because this is transference

**Answer:** B

#### NEW QUESTION 186

You are the project manager of the NHJ project for your company. This project has a budget at completion of \$1,650,000 and you are 60 percent complete. According to the project plan, however, the project should be 65 percent complete. In this project you have spent \$995,000 to reach this point of completion. There is a risk that this project may be late so you have taken some measures to recover the project schedule. Management would like to know, based on current performance, what the estimate at completion for this project will be. What is the estimate at completion?

- A. \$1,650,000
- B. \$1,666,667
- C. \$663,333
- D. -\$8,333

**Answer: B**

**NEW QUESTION 189**

Ben is the project manager of the CMH Project for his organization. He has identified a risk that has a low probability of happening, but the impact of the risk event could save the project and the organization with a significant amount of capital. Ben assigns Laura to the risk event and instructs her to research the time, cost, and method to improve the probability of the positive risk event. Ben then communicates the risk event and response to management. What risk response has been used here?

- A. Sharing
- B. Transference
- C. Enhance
- D. Exploit

**Answer: C**

**NEW QUESTION 193**

Tom works as a project manager for BlueWell Inc. He is determining which risks can affect the project. Which of the following inputs of the identify risks process is useful in identifying risks, and provides a quantitative assessment of the likely cost to complete the scheduled activities?

- A. Activity cost estimates
- B. Cost management plan
- C. Activity duration estimates
- D. Risk management plan

**Answer: A**

**NEW QUESTION 198**

Mary is the project manager of PKT project. In Mary's project there are certain enterprise environmental factors that require Mary to use modeling and simulation techniques to predict the likelihood of achieving cost and schedule objectives in the project. Mary is using a technique for which the cost estimates are chosen at random for each iteration of the analysis, such as pessimistic, most likely, and worst-case scenarios. What type of analysis is Mary using in this project?

- A. Quantitative analysis
- B. Qualitative analysis
- C. Risk distribution
- D. Monte Carlo Analysis

**Answer: D**

**NEW QUESTION 201**

You are the project manager of the NJJ project. Your enterprise environmental factors require that you establish certain risk management rules regarding low risks within your project. What is the best policy for risks with low probability and low impact in the project management?

- A. These risks should be accepted.
- B. These risks should be placed on a watchlist for future monitoring.
- C. These risks should be identified, but dismissed.
- D. These risks should be placed in the risk register.

**Answer: B**

**NEW QUESTION 203**

There are seven risk responses for any project. Which one of the following is a valid risk response for a negative risk event?

- A. Enhance
- B. Exploit
- C. Acceptance
- D. Share

**Answer: C**

**NEW QUESTION 205**

You are the project manager of the CUL project in your organization. You and the project team are assessing the risk events and creating a probability and impact matrix for the identified risks. Which one of the following statements best describes the requirements for the data type used in qualitative risk analysis?

- A. A qualitative risk analysis requires fast and simple data to complete the analysis.
- B. A qualitative risk analysis requires accurate and unbiased data if it is to be credible.
- C. A qualitative risk analysis encourages biased data to reveal risk tolerances.
- D. A qualitative risk analysis required unbiased stakeholders with biased risk tolerances.

**Answer: B**

**NEW QUESTION 209**

You work as a project manager for TechSoft Inc. You are working with the project stakeholders on the qualitative risk analysis process in your project. You have used all the tools to the qualitative risk analysis process in your project. Which of the following techniques is NOT used as a tool in qualitative risk analysis process?

- A. Risk Urgency Assessment
- B. Risk Categorization
- C. Risk Reassessment
- D. Risk Data Quality Assessment

**Answer: C**

#### NEW QUESTION 211

You are the project manager for a construction project. The project involves casting of a column in a very narrow space. Because of lack of space, casting it is highly dangerous. High technical skill will be required for casting that column. You decide to hire a local expert team for casting that column. Which of the following types of risk response are you following?

- A. Acceptance
- B. Avoidance
- C. Mitigation
- D. Transference

**Answer: D**

#### NEW QUESTION 216

Della works as a project manager for SoftTech Inc. She is working with the project stakeholders to begin the quantitative risk analysis process. Which of the following inputs will be needed for the quantitative risk analysis process in her project? Each correct answer represents a complete solution. Choose all that apply.

- A. Risk management plan
- B. Project scope statement
- C. Risk register
- D. Cost management plan

**Answer: ACD**

#### NEW QUESTION 221

Donna is the project manager of the QSD Project and she believes Risk Event D in the following figure is likely to happen. If this event does happen, how much will Donna have left in the risk contingency reserve if none of the other risk events have happened?

- A. \$35,000
- B. \$41,700
- C. \$14,000
- D. \$6,700

**Answer: D**

#### NEW QUESTION 224

You are the project manager of RTF project for your organization. You are working with your project team and several key stakeholders to create a diagram that shows causal factors for an effect to be solved. What diagramming technique are you using as a part of the risk identification process?

- A. Cause and effect diagrams
- B. System or process flow charts
- C. Predecessor and successor diagramming
- D. Influence diagrams

**Answer: A**

#### NEW QUESTION 225

Fred is the project manager of the PKL project. He is working with his project team to complete the quantitative risk analysis process as a part of risk management planning. Fred understands that once the quantitative risk analysis process is complete, the process will need to be completed again in at least two other times in the project. When will the quantitative risk analysis process need to be repeated?

- A. Quantitative risk analysis process will be completed again after the cost management planning and as a part of monitoring and controlling.
- B. Quantitative risk analysis process will be completed again after new risks are identified and as part of monitoring and controlling.
- C. Quantitative risk analysis process will be completed again after the risk response planning and as a part of monitoring and controlling.
- D. Quantitative risk analysis process will be completed again after the plan risk response planning and as part of procurement.

**Answer: C**

#### NEW QUESTION 230

Todd is the project manager of the EST project for his company. His organization has established certain rules in the enterprise environmental factors which affect the approach that Todd takes in managing his project. One of the rules requires Todd to consider the risk attitude of the stakeholders participating in risk analysis. Why must risk attitude be considered as a part of risk analysis?

- A. Risk attitude can affect the measurement of probability and impact.
- B. Risk attitude can establish a stakeholder's influence over project decisions.
- C. Risk attitude identifies stakeholders that are hygiene seekers or motivation seekers.
- D. Risk attitude establishes stakeholders as positive or negative stakeholders.

**Answer:** A

**NEW QUESTION 233**

Wendy is the project manager of the FBL project for your company. She has identified several risks within her project and has created a risk contingency reserve of \$45,000 total. Her project is nearly complete and many of the risks have not happened in the project. What should Wendy do with the funds in the contingency reserve?

- A. The funds remain in the contingency reserve until all of the risks have passed.
- B. The funds for the risks that have passed and have not happened are transferred to the project budget.
- C. The funds for the risks that have passed and have not happened are released.
- D. The funds remain in the contingency reserve until the project is closed.

**Answer:** C

**NEW QUESTION 237**

You are the project manager for a construction project. The project includes a work that involves very high financial risks. You decide to insure processes so that any ill happening can be compensated. Which type of strategies have you used to deal with the risks involved with that particular work?

- A. Mitigate
- B. Avoid
- C. Accept
- D. Transfer

**Answer:** D

**NEW QUESTION 238**

Gary is the project manager for his organization. He is working with the project stakeholders on the project requirements and how risks may affect their project. One of the stakeholders is confused about what constitutes risks in the project. Which of the following is the most accurate definition of a project risk?

- A. It is an uncertain event that can affect the project costs.
- B. It is an uncertain event or condition within the project execution.
- C. It is an uncertain event that can affect at least one project objective.
- D. It is an unknown event that can affect the project scope.

**Answer:** C

**NEW QUESTION 242**

You are the project manager for BlueWell Inc. You are reviewing the risk register for your project. The risk register provides much information to you, the project manager and to the project team during the risk response planning. All of the following are included in the risk register except for which item?

- A. Network diagram analysis of critical path activities
- B. Symptoms and warning signs of risks
- C. List of potential risk responses
- D. Trends in qualitative risk analysis results

**Answer:** A

**NEW QUESTION 245**

You are the project manager of the NGH project for your organization. You want to create a causeand- effect diagram to help discover the root causes of the risks within the project. Harold, the CIO, recommends that you create an Ishikawa diagram instead. What is an Ishikawa diagram?

- A. It is a graphical representation of situations showing causal influences.
- B. It is the same thing as a root cause diagram.
- C. It shows how various elements of a system interrelate.
- D. It diagrams the risks according to the work breakdown structure including resources.

**Answer:** B

**NEW QUESTION 247**

Who is responsible for the stakeholder expectations management in a high-profile, high- risk project?

- A. Project risk assessment officer
- B. Project management office
- C. Project sponsor
- D. Project manager

**Answer:** D

**NEW QUESTION 250**

A project team member has just identified a new project risk. The risk event is determined to have significant impact but a low probability in the project. Should the risk event happen it'll cause the project to be delayed by three weeks, which will cause new risk in the project. What should the project manager do with the risk event?

- A. Add the identified risk to a quality control management control chart.
- B. Add the identified risk to the issues log.

- C. Add the identified risk to the risk register.
- D. Add the identified risk to the low-level risk watchlist.

**Answer: C**

#### NEW QUESTION 253

Tom is the project manager for his organization. In his project he has recently finished the risk response planning. He tells his manager that he will now need to update the cost and schedule baselines. Why would the risk response planning cause Tom the need to update the cost and schedule baselines?

- A. New or omitted work as part of a risk response can cause changes to the cost and/or schedule baseline.
- B. Risk responses protect the time and investment of the project.
- C. Risk responses may take time and money to implement.
- D. Baselines should not be updated, but refined through versions.

**Answer: A**

#### NEW QUESTION 254

Neil works as a project manager for SoftTech Inc. He is working with Tom, the COO of his company, on several risks within the project. Tom understands that through qualitative analysis Neil has identified many risks in the project. Tom's concern, however, is that the priority list of these risk events are sorted in "high-risk," "moderate-risk," and "low-risk" as conditions apply within the project. Tom wants to know that is there any other objective on which Neil can make the priority list for project risks. What will be Neil's reply to Tom?

- A. Risks may be listed by the additional analysis and response
- B. Risk may be listed by the responses in the near-term
- C. Risks may be listed by priority separately for schedule, cost, and performance
- D. Risks may be listed by categories

**Answer: C**

#### NEW QUESTION 259

Harold is the project manager of a large project in his organization. He has been actively communicating and working with the project stakeholders. One of the outputs of the manage stakeholder expectations process can actually create new risk events for Harold's project. Which output of the manage stakeholder expectations process can create risks?

- A. Project document updates
- B. Change requests
- C. Organizational process assets updates
- D. Project management plan updates

**Answer: B**

#### NEW QUESTION 263

Fill in the blank with an appropriate phrase.

\_\_\_\_\_ is the study of how the variation (uncertainty) in the output of a mathematical model can be apportioned, qualitatively or quantitatively, to different sources of variation in the input of a model.

- A. Sensitivity analysis

**Answer: A**

#### NEW QUESTION 264

A part of a project deals with the hardware work. As a project manager, you have decided to hire a company to deal with all hardware work on the project. Which type of risk response is this?

- A. Exploit
- B. Mitigation
- C. Transference
- D. Avoidance

**Answer: C**

#### NEW QUESTION 268

You are the project manager of the NHQ Project for your company. You are discussing some of the project issues that need to be resolved in the project. You and the project stakeholders come to an agreement about the risk issues and how they will be resolved. Where should you document this information for issue resolution?

- A. Project management plan for execution
- B. Lessons learned documentation
- C. Issue log
- D. Risk response plan

**Answer: C**

#### NEW QUESTION 269

Wendy is about to perform qualitative risk analysis on the identified risks within her project. Which one of the following will NOT help Wendy to perform this project management activity?

- A. Project scope statement
- B. Risk management plan
- C. Risk register
- D. Stakeholder register

**Answer:** D

**NEW QUESTION 274**

Which risk response is acceptable for both positive and negative risk events?

- A. Transferring
- B. Acceptance
- C. Sharing
- D. Enhancing

**Answer:** B

**NEW QUESTION 275**

You are the project manager of the GGK project for your company. The GGK project has a budget of \$1,265,100 and is currently 40 percent complete. In this project, you elected to add labor to the project to increase the likelihood of completing the project early as the project was only scheduled to be 35 percent complete at this time. This positive risk response, while keeping the project ahead of schedule, has added significant costs to the project. You have already spent \$575,000 to reach this point in the project. Management would like to know what your cost performance index and the schedule performance index is for this project. What are these values?

- A. The CPI is -\$68,960 and the SPI is \$63,255.
- B. The CPI is .88 and the SPI is zero.
- C. The CPI is .88 and the SPI is 1.14.
- D. The CPI is 1.14 and the SPI is .88.

**Answer:** C

**NEW QUESTION 277**

You work as a project manager for BlueWell Inc. You are about to complete the quantitative risk analysis process for your project. You can use three available tools and techniques to complete this process. Which one of the following is NOT a tool or technique that is appropriate for the quantitative risk analysis process?

- A. Expert judgment
- B. Data gathering and representation techniques
- C. Organizational process assets
- D. Quantitative risk analysis and modeling techniques

**Answer:** C

**NEW QUESTION 279**
